## **Foreword**

The Economic Survey is an annual publication of the Kenya National Bureau of Statistics (KNBS). It presents socio-economic highlights of the economy for the last five years. The report forms an important source of input into the budgeting process, planning, monitoring and policy formulation processes.

### **Vision**

The Vision of the Bureau is “to become a centre of excellence in statistical production and management for national development”.

### **Mission**

The mission of the Bureau is “to coordinate and supervise the National Statistical System; produce and disseminate comprehensive, integrated, accurate and timely statistics required mainly to inform national development initiatives and processes; and develop and maintain a socio-economic national database”.

### **Mandate**

The KNBS is a Semi Autonomous Government Agency (SAGA) mandated by law (Statistics Act 2006) to collect, analyze and disseminate socio-economic statistics needed for planning and policy formulation in the country.

### **The Organization**

The Kenya National Bureau of Statistics comprises of six Directorates namely;

Production Statistics  
Macroeconomic Statistics  
Strategy and Development  
Finance and Administration  
Population and Other Social Statistics  
Information and Communication Technology

### **Teamwork**

Together with users and producers of data we are committed to face challenges and opportunities of the 21<sup>st</sup> Century.

**Director General**  
**Kenya National Bureau of Statistics**

## Table of Contents

<b>Foreword.....</b>	<b>iii</b>
<b>List of Tables.....</b>	<b>viii</b>
<b>List of Figures .....</b>	<b>xiv</b>
<b>List of Acronyms.....</b>	<b>xv</b>
<b>Summary and Outlook.....</b>	<b>1</b>
International Scene .....	1
Domestic Economy .....	1
Social Scene.....	2
Employment, Earnings and Consumer Prices .....	2
Money, Banking and Finance .....	3
Public Finance .....	3
International Trade and Balance of Payments.....	4
Agriculture.....	4
Environment and Natural resources .....	5
Energy .....	5
Manufacturing .....	5
Building and Construction .....	6
Tourism.....	6
Transport, Storage and Communications.....	7
Governance .....	7
Highlight on Child Labour in Kenya .....	8
Outlook.....	8
<b>Chapter 1: International Scene .....</b>	<b>11</b>
Introduction.....	11
Country/Regional Economic Analysis .....	11
Sub-Saharan Africa (SSA).....	14
Maghreb Region.....	15
Outlook.....	15
<b>Chapter 2: Domestic Economy .....</b>	<b>18</b>
Overview .....	18
Agriculture and Forestry .....	19
Manufacturing .....	18
Electricity and Water.....	20
Construction.....	20
Transport and Communication .....	20
Hotels and Restaurants.....	21
Financial Intermediation .....	21
Expenditure on GDP .....	30
Private Consumption .....	31
Gross Fixed Capital Formation .....	32
Disposable Income and Savings.....	33
Quarterly Gross Domestic Product .....	34
Benchmarking.....	34
Seasonal adjustment.....	36
<b>Chapter 3: Social Scene .....</b>	<b>42</b>
Overview .....	42
Social Sector Expenditure .....	42
Education.....	45

Health .....	57
Other Social Services .....	63
<b>Chapter 4: Employment, Earnings and Consumer Prices.....</b>	<b>67</b>
Overview .....	67
Employment .....	67
Modern Sector.....	67
Wage Earnings in the Modern Sector .....	72
Employment in the Informal Sector .....	78
Launch of Labour Institutions .....	79
Review of the Mandatory Retirement Age for Public Servants .....	79
Wage Awards and Registered Collective Bargaining Agreements .....	79
Consumer Price Index .....	83
<b>Chapter 5: Money, Banking and Finance.....</b>	<b>87</b>
Overview .....	87
Monetary Indicators and Aggregates.....	87
Consolidated Accounts of the Banking System.....	88
Sources of Changes in M3 and Real Values of Selected Financial Aggregates .....	89
Nominal and Real Interest Rates .....	91
Central Bank's Balance Sheet.....	93
Commercial Banks' credit and liquidity.....	94
Consolidated Balance Sheet for Non-Bank Financial Institutions .....	96
Capital Market Indicators.....	97
Developments in the Financial Sector .....	98
Developments in the Capital markets.....	98
Pensions Sub-sector.....	98
Insurance Sub sector.....	99
<b>Chapter 6: Public Finance .....</b>	<b>100</b>
Overview .....	100
Overall Results.....	100
<b>Chapter 7: International Trade and Balance of Payments .....</b>	<b>118</b>
Overview .....	118
Balance of Trade .....	118
Price Changes .....	119
Terms of Trade.....	120
Volume Changes .....	121
Quantities of Principal Exports and Imports .....	122
Values of principal exports and imports.....	122
Prices of principal Imports and Domestic Exports.....	128
Composition of Exports .....	130
Composition of Imports.....	132
Direction of Trade.....	133
Balance of Payments.....	138
International Liquidity.....	141
Export Market Development .....	144
Promotion of Export of Services .....	144
Commonwealth Secretariat (COMSEC) Technical Assistance .....	145
The Business Sector Programme Support (BSPS).....	145

<b>Chapter 8: Agriculture .....</b>	<b>146</b>
Overview .....	146
Marketed Production .....	147
<b>Chapter 9: Environment and Natural Resources.....</b>	<b>164</b>
Overview .....	164
Water Supply .....	164
Forestry .....	167
Mining .....	168
Refuse Management.....	169
Wildlife.....	170
Weather Out-turn .....	171
Resource Monitoring.....	171
<b>Chapter 10: Energy .....</b>	<b>173</b>
Overview .....	173
Petroleum .....	174
Electricity.....	182
Rural Electrification.....	186
<b>Chapter 11: Manufacturing .....</b>	<b>187</b>
Overview .....	187
Employment .....	187
Manufacturing Output.....	187
Quantum Indices .....	188
Investment.....	194
Credit to the Manufacturing Sector .....	194
Export Processing Zones (EPZ).....	195

WPP	Water Purification Points
WTO	World Tourism Organization

## Summary and Outlook

**International Scene** **T**he global economy experienced slower growth against projected outcomes during 2008 due to a financial crisis arising from the housing sector in the United States. The global economy is estimated to have expanded by 2.7 per cent in 2008 compared to 3.7 per cent in 2007. High rates of inflation were reported in emerging and developing economies due to the rise in food and oil prices. The rate of inflation reached an average of 3.6 per cent in the advanced economies, 7.3 per cent in emerging Asia and 10.2 per cent in Africa.

In OECD countries real GDP growth is estimated to have dropped to 1.4 per cent in 2008 compared to 2.6 per cent in 2007. The countries growth in real total domestic demand declined from 2.3 per cent in 2007 to 0.8 per cent in 2008. Similarly, in the Euro Area, a deepening global recession, declined domestic demand and tightening of financial conditions resulted in an estimated reduction in real GDP growth in 2008 to 1.0 per cent compared to 2.6 per cent in 2007. The United States economy also experienced a slackened real GDP growth estimated at 1.4 per cent in 2008 compared to 2.0 per cent in 2007. The decline in performance is attributed to spiral effect arising from the collapse of various financial institutions engaged heavily in mortgage financing.

In sub-Saharan Africa (SSA) growth in real GDP declined from 6.9 per cent in 2007 to an estimated 6.1 per cent in 2008 while consumer prices increased significantly from 7.1 per cent to 11.9 per cent over the same period. The rise in consumer prices was due to increases in the cost of food that was experienced in 2008, largely fueled by high energy costs and crop failure. The current account balance of SSA improved in 2008 at negative 0.7 per cent of GDP compared to negative 3.0 in 2007.

**Domestic Economy** The economic growth momentum that started in 2003 was restrained by a number of both internal and external factors in the year under review. These factors included the 2008 post election disruptions, the global financial crisis, the high fuel and food prices among others. Combined, these factors slowed the economic growth from 7.1 per cent in 2007 to 1.7 per cent in 2008.

Though the post-election violence was experienced only in the first quarter of 2008, its spill-over effects were manifest throughout 2008 resulting to substantial declines in growths of most of the sectors of the economy. Among the key sectors that were heavily impacted on include Agriculture and forestry, and Hotels and restaurants whose value added contracted substantially by 5.1 per cent and 36.1 per cent respectively in 2008 compared to growths of 2.0 per cent and 16.3 per cent correspondingly in 2007. Agricultural activities were also affected by high costs of fertilizers, unseasoned weather pattern and drought in some regions of the country during the year. Despite the unfavourable environment, Construction and Education sectors recorded improved growths of 8.3 per cent and 5.8 per cent in 2008 compared to 6.9 per cent and 3.7 per cent in 2007 respectively.

The global financial crisis precipitated the downturn of the Kenyan economy in 2008 through deteriorating current account balance, declining economic growth and depreciation of domestic currency. The effects were attributed to the dwindling exports, remittances and capital inflows.

**Social Scene** The Government expenditure in social services sector is expected to increase by 7.8 per cent, from KSh 187,769.3 million in the 2007/08 to KSh 202, 428.3 million in the 2008/09. Recurrent expenditure constitutes the largest proportion of the total expenditure (87.5 per cent), largely for salaries. The expenditure for Ministry of State for Youth and Sports is expected to almost triple between 2007/08 and 2008/09. Expenditure for the Ministry of National Heritage and Culture and the Ministry of Home Affairs is expected to increase by 65.7 and 40.9 per cent respectively over the same period. The Ministry of Higher Education, Science and Technology is expected to record a recurrent budget of KSh 19,334.6 million in 2008/09 compared to KSh 15,859.8 million in 2007/08, an increase of 21.9 per cent. The Ministries of Education and Health are expected to record recurrent budgets of KSh 106,193.0 million and KSh 27,689.4 million respectively during the 2008/09.

The number of both primary and secondary schools increased marginally by 0.4 per cent and 1.3 per cent from 26,104 and 6,485 in 2007 to 26,206 and 6,566 in 2008 respectively. Total enrolment in primary schools increased by 2.8 per cent from 8,330.1 thousand in 2007 to 8,563.8 thousand in 2008. The total enrolment in secondary school students increased by 17.1 per cent from 1,180.3 thousand students in 2007 to 1,382.2 thousand students in 2008. The Gross Enrolment Rate (GER) for boys and girls in 2008 was 118.1 per cent and 113.1 per cent respectively, indicating a higher proportion of boys enrolled in primary schools.

The number of health institutions rose by 2.2 per cent from 5,589 in 2007 to 5,712 in 2008 partly attributed to continual construction of new health facilities funded through Constituency Development Fund (CDF). National Hospital Insurance Fund (NHIF) receipts increased by 14.1 per cent from KSh 3,954.9 million in 2006/07 to KSh 4,511.4 million in 2007/08 mainly as a result of an increase in new membership from both formal and informal sectors. The number of registered medical personnel increased from 73,236 to 77,736, an increase of 6.1 per cent. The number of undergraduate and post graduate medical students registered rose by 25.3 per cent from 4,640 in 2007/08 to 5,814 in 2008/09. The number of middle level medical trainees enrolled increased by 26.6 per cent from 5,932 in 2007 to 6,090 in 2008. Full Immunization Coverage (FIC) rate declined from 73.0 per cent to 71.0 per cent in 2007 and 2008 respectively. The number of malaria cases reported declined significantly from 31.2 million in 2007 to 28.4 million in 2008.

The number of employers registered with NSSF increased by 4.4 per cent from 58.8 thousand in 2007 to 61.8 thousand in 2008. However, the number of employees' registered declined marginally from 3,171.8 thousand to 3,169 thousand in the review period. The number of adult learners' enrolment rose from 118,264 in 2007 to 179,598 in 2008, an increase of 51.9 per cent. Government grants to women groups doubled from KSh 40.1 million in 2007 to KSh 80.0 million in 2008. In addition the Government has set aside KSh 315 million in the 2008/09 compared to KSh 1.0 billion

in the 2007/08 for Women Enterprise Fund. The proportion of female public officers in selected public offices increased from 13.1 per cent in 2006 to 15.4 per cent in 2008.

**Employment,  
Earnings and  
Consumer  
Prices**

In 2008, employment creation was adversely affected by the slow economic growth, resulting into the number of new jobs created by the domestic economy declining from 485.5 thousand jobs in 2007 to 467.3 thousand. In particular, the new jobs created in the modern private sector declined from 74.0 thousand to 23.8 thousand within this period. The public sector which has been registering negative growth since 2004 recovered to post a marginal growth of 1.6 per cent.

The nominal wage bill in 2008 rose by 10.3 per cent from KSh 656,777.4 million in 2007 to KSh 724,220.4 in 2008 with the public sector wage bill increasing by 11.0 per cent to KSh 225,426.3 million. Overall, annual average earnings recorded an 8.4 per cent increase rising from KSh 343,934.7 in 2007 to KSh 372,699.9 in 2008 translating to KSh 31,058.3 per month. Annual average earnings per employee in the private sector remained higher than those in the public sector over the five year period. In the same period, the annual average inflation rate almost tripled from 9.8 per cent in 2007 to 26.2 per cent in 2008, a record high since that of 28.8 per cent in 1994. Underlying inflation, which excludes food items from the Consumer Price Index (CPI) basket, increased from 5.7 per cent in 2007 to 11.1 per cent in 2008. This was mainly due to high prices of petroleum products and electricity. The high annual average inflation rate reduced real average earnings by 16.2 per cent in 2008.

**Money,  
Banking and  
Finance**

The monetary policy aimed at guarding against rising inflation and thereby providing a stable macroeconomic environment. Consequently reserve money was projected to grow by 15.4 per cent with broad money M3 being targeted to expand by 16.0 per cent. M3 expanded by 10.5 per cent.

The Central Bank rate was revised to 8.50 in December 2008 from 9.00 per cent maintained in the previous months while domestic credit expanded by 18 per cent to KSh 791 billion in December 2008. Average 91-day Treasury bills rate rose by 1.72 per cent points while the average deposit rate rose marginally to 4.89 per cent in December 2008. The loans and advance rose by 1.55 points to 14.87 per cent over the same period. Generally the banking sector remained resilient in 2008 despite the global financial crisis as there is less pronounced interface with the world financial markets.

However, the stock market experienced a downturn with 20 share index shedding 1924 points at the end of 2008, while market capitalization remained almost constant at KSh 854 billion in 2008. This stagnation maybe explained by the effects of the global financial turmoil that resulted in reduced investor confidence who offloaded their investments in the Nairobi Stock Exchange in anticipation of a global credit crunch and falling stock prices.

Growth in the insurance sub-sector was slowed down due to post election violence and subsequent loss of property that resulted in huge claims of which the insurers didn't anticipate and hence reserves were not enough for compensation and propelling

of business growth. As a result of these events the overall real growth for the financial sector declined to 3.1 per cent in 2008 compared to 6.7 per cent in 2007.

### **Public Finance**

The Central Government expenditure for 2008/09 is expected to be KSh 773.0 billion comprising of KSh 565.5 billion and KSh 207.5 billion in recurrent and development expenditures respectively. Total Central Government receipts (including grants) are expected to increase from KSh 468.6 billion in 2007/08 to KSh 549.6 billion in 2008/09.

The stock of outstanding debt as at end June 2008 was KSh 748.5 billion comprising of KSh 413.5 billion and KSh 335.0 billion in domestic and foreign debts respectively. This represents an overall growth of 4.6 per cent with external and domestic debt recording increases of 4.1 and 5.2 per cent respectively.

The total budgeted expenditure for local authorities is expected to grow by 21.1 per cent from KSh 22.8 billion in 2007/08 to KSh 27.6 billion in 2008/09. Local authorities' revenue including Local Authorities Transfer Fund (LATF) is expected to increase marginally to KSh 22.0 billion from KSh 21.7 billion in the same period. Locally generated revenue for Local authorities is expected to decline by 5.2 per cent as receipts from Central Government through (LATF) are expected to increase by 12.1 per cent.

### **International Trade and Balance of Payments**

Key international trade indicators show that trade balance continued to widen in 2008. The trade balance widened to a deficit of KSh 425,705 million from a deficit of KSh 330,454 million in 2007, a deterioration of 28.8 per cent. The value of domestic exports rose by 23.3 per cent while imports grew relatively faster at the rate of 27.4 per cent. The leading export earners were horticulture, tea, articles of apparel and clothing accessories, and soda ash, collectively accounting for 51.3 per cent of the total domestic export earnings. Re-exports recorded an increase of 71.8 per cent in 2008 compared to a 43.1 per cent decline recorded in 2007. The export-import ratio further deteriorated from 45.4 per cent in 2007 to 44.8 per cent in 2008.

The overall balance of payments position recorded a deficit of KSh 33,161 million in 2008 compared to a surplus of KSh 63,250 million in 2007. The unfavourable balance of payments out-turn was on account of decreased net capital inflows and the widening merchandise trade deficit. The current account balance deteriorated to a deficit of KSh 136,851 million in 2008 from a deficit of KSh 69,638 million the previous year. As a percentage of GDP, the current account deficit excluding current transfers was 14.2 per cent in 2008 against the 7.0 per cent projected in the first medium term plan of the Vision 2030. The capital and financial account recorded a surplus of KSh 81,055 million compared to a surplus of KSh 150,090 million recorded in 2007 as result of decreased inflows of foreign direct investment and short term capital inflows.

The Kenya Shilling weakened against the US dollar to record an average exchange rate of KSh 69.18 in 2008 compared to KSh 67.32 per US dollar in 2007. The weakening of the Kenyan Shilling against the major world currencies during the period under review

can be partly attributed to the global economic meltdown coupled with the financial crisis, albeit positive growths in remittances. In addition, the earnings from tourism sector which deteriorated in 2008, impacted negatively on the foreign exchange rate.

**Agriculture** Inadequate rainfall in various parts of the country, post election violence and high agricultural input prices contributed to decelerated agricultural sector growth from 2.2 per cent registered in 2007 to negative 5.4 per cent in 2008. Maize production declined to 26.0 million bags recorded in 2008. Production of tea declined by 6.4 per cent from 369.6 thousand tonnes in 2007 to 345.8 thousand tonnes in 2008. Coffee production dropped by 21.3 per cent from 53.4 thousand tonnes in 2006/07 crop year to 42.0 thousand tonnes in 2007/08 crop year. Sugarcane production declined by per cent from 5,204,214 tonnes in 2007 to 5,112,040 tonnes in 2008. The volume of marketed milk decreased by 6.4 per cent from 423 million litres in 2007 to 399 million litres in 2008. Exports of fresh horticultural produce declined by 13.8 per cent from a revised 67,253.7 million in 2007 to KSh 57,965.8 million in 2008 mainly due to lower prices in the export market.

**Environment and Natural resources** Environment and Natural Resources utilisation and development remained high in the Government's agenda for sustainable development. Total development expenditure on water increased substantially by 25.7 per cent from KSh 8,414.3 million in 2007/08 to KSh 10,574.1 million in 2009/09 with about half being allocated for Water Development activities in the country. The sale of forest products increased from 423.4 thousand cubic metres in 2007 to 503.7 cubic metres in 2008. Quantity of fish landed from fresh water sources went up from 128.2 thousand tonnes in 2007 to 134.6 thousand tonnes in 2008 with the overall value also rising from KSh 8.6 billion to KSh 9.0 billion over the same period. The value of mineral production rose from KSh 6991.2 million in 2007 to KSh 12,304.9 million in 2008 with Soda ash and fluorspar recording the highest export price levels in the last five years.

**Energy** Energy prices were on an upward trend for most of the year under review except in the last quarter when the prices showed a declining trend. The high oil prices were mainly attributed to increased speculation in the commodity market inspired by depreciation of the US dollar against major currencies. Other aspects responsible for pushing oil prices up included the balance between supply and demand of crude oil which has remained tight over the years; the high demand of oil by non-OECD countries especially from Asia and Latin America; unstable geo-political situations which included the instability in Iraq, the conflict between Turkey and Iraq and the uncertain future of the Iran nuclear programme. These factors partly explained the high oil prices experienced up to July 2008. However, the global economic slowdown occasioned by the financial crisis and the warm weather jointly contributed in pulling down oil prices starting from the end of the third quarter of 2008.

International prices for Murban crude oil declined drastically by 53.3 per cent from US dollars 90.60 per barrel in December 2007 to US dollars 42.10 per barrel in December 2008. In the domestic market, pump prices remained erratic throughout

## Summary and Outlook

---

the year in tandem with international oil prices. Inadequate rainfall experienced in most parts of the country slowed down hydro generation leading the country to increasingly depend on thermal generation. The high energy costs impacted negatively on economic activities in agriculture, manufacturing and transport sectors of the economy.

The value of imports and exports of petroleum products rose by high margins in 2008 mainly due to high international petroleum prices. The total import bill of petroleum products increased tremendously by 62.3 per cent from KSh 121,776.0 million in 2007 to KSh 197,676.2 million in 2008. The total quantity of petroleum products exported declined by 55.8 per cent from 216.1 thousand tonnes in 2007 to 95.6 thousand tonnes in 2008.

Total electricity generation recorded a decelerated growth of 2.1 per cent in 2008 compared to a growth of 7.3 per cent in 2007. The decelerated growth was largely due to a decline in electricity production from hydro electric power sources which declined by 8.9 per cent during the same period. This decrease was attributed to inadequate rainfall experienced around hydro electricity generating parts of the country. The number of customers connected under the Rural Electrification Programme rose by 21.3 per cent to stand at 161,373 customers as at July 2008.

**Manufacturing** Kenya's manufacturing sector growth rose by 3.8 per cent in 2008, the lowest in the last five years, compared to a revised growth of 6.5 per cent registered in 2007. The sector is important in terms of its contribution to total output, export earnings and in its employment creation capability. Some of the key challenges facing the sector included low levels of productivity and the high cost of production. These challenges were aggravated by the spillover effects from the post-election crisis, high inflationary pressures, the depreciation of the Kenya shilling, counterfeits and stiff competition from cheap imports.

Major industries that registered growth were: beverages, clothing, wood and cork products, paper and paper products, non-metallic mineral products among others. Number of direct formal wage employment in the manufacturing sector dropped by 0.3 from 264,812 persons in 2007 to 264,095 persons in 2008. Direct employment of Kenyans in the EPZ contracted by 12.4 per cent to stand at 30,183 persons in 2008. The sector's output rose by 14.5 per cent from KSh 626.2 billion recorded in 2007 to KSh 717.2 billion in 2008. Value added rose from KSh 190.2 billion to KSh 223.4 billion over the same period. The rate of growth in the compensation of employees decelerated to 1.6 per cent in 2008 compared to 3.6 per cent in 2007.

**Building and Construction** Most of the building and construction sector's key economic indicators showed improvements in the year under review. Disbursements by the Kenya Roads Board to the various roads agencies increased by 23.4 per cent to KSh 19.0 billion in 2008/09 from KSh 15.4 billion in 2007/08. The index of Government expenditure on roads increased from 219.4 in 2007 to 256.4 in 2008. Loans and advances from commercial banks to the sector declined from KSh 31,576 million in 2007 to KSh 29,247 million in 2008 representing a 7.4 per cent decrease.

Cement consumption increased by 7.0 per cent from 2,061.4 thousand tonnes

recorded in 2007 to 2,205.8 thousand tonnes in 2008. The total value of reported private building works completed in selected main towns rose by 12.3 per cent to KSh 12,323.2 million in 2008 from KSh 10,969.2 million in 2007. The total estimated cost of reported new private buildings completed increased by 6.8 per cent to KSh 6,298.1 million in 2008 from KSh 5,898.1 million in 2007. Total wage employment in the sector increased by 4.3 per cent from 81,297 persons registered in 2007 to 84,795 persons in 2008. The total value of building plans approved went up by 3.3 per cent from KSh 67,087.8 million in 2007 to KSh 69,321.7 million in 2008.

### **Tourism**

In 2008, the tourism sector witnessed one of its worst performances in recent history. This was mainly as a result of the political violence that erupted in the country during the first quarter of the year after the December 2007 General Elections and the subsequent negative travel advisory against the country by major tourism source countries. As a consequence, tourism earnings decreased from KSh. 65.2 billion in 2007 to KSh. 52.7 billion in 2008, representing a 19.2 per cent drop. The volume of international arrivals decreased sharply by 33.8 per cent from 1,817.0 thousand in 2007 to 1,203.2 thousand in 2008. This was attributed to cancellations of reservations and termination of ongoing holidays as a result of ensuing political uncertainty.

The number of bed-nights occupied decreased significantly by 46.7 per cent from 6,939.4 thousand in 2007 to 3,699.0 thousand in 2008. Over the review period, the number of beds available contracted by 3.2 per cent from 14,711.6 thousand in 2007 to 14,233.6 thousand in 2008. On average, bed-nights occupancy rate went down from 47.2 per cent in 2007 to 26.0 per cent in 2008. The level of rooms occupied compared to rooms available contracted from 36.6 per cent in 2007 to 32.2 per cent in 2008. The number of visitors to the country's game parks and reserves dropped from 2,495.1 thousand in 2007 to 1,633.9 thousand in 2008. All the parks and reserves recorded reduced number of visitors except Nairobi Mini Orphanage, Meru National Park, Impala Sanctuary (Kisumu), and Mt. Longonot that went up.

### **Transport, Storage and Communications**

The transport, storage and communication sector has been recording improved performance over time but the sector's growth slowed down to 11.6 per cent in 2008 from a 14.9 per cent growth recorded in 2007. This trend was attributable to the aftermath of the post election violence, weakening of the Kenya shilling against the hard currencies among other factors. The sector also witnessed increased fuel pump prices occasioned by high international oil prices.

Newly registered road motor vehicles increased substantially by 42.8 per cent during the year under review. The increase was mainly driven by a high registration of motor and auto cycles. Reported traffic accidents decreased by 11.1 per cent from 10,225 in 2007 to 9,093 in 2008. Railway transport sub-sector performance continued with a downward trend, partly due to poor rail infrastructure and network disruptions in the first quarter of 2008 resulting from post election violence.

Traffic handled at the Port of Mombasa increased slightly during 2008 to reach 16.4 million metric tonnes from 16.0 million metric tonnes in 2007. Much of the traffic handled was for imports which accounted for slightly over 80 per cent. Passenger traffic at the main airports declined by 9.4 per cent from 7,039.1 million in 2007 to

6,376.0 million in 2008.

The telecommunications industry witnessed an increase in foreign direct investment as a result of the privatization of the fixed line operator – Telkom Kenya. New developments in the industry also included the launch of mobile communication services by Econet Kenya Limited and the increased rollout of services by Orange Mobile that notably increased Competition in the market.

**Governance** Good governance is key in facilitating economic development of a country. The government facilitated this through ensuring that issues of public safety, law and order, democracy and human rights are observed. In 2008, the number of crimes reported to the Police increased marginally from 63,028 crimes reported in 2007 to 63,476 in 2008. Overall, the number of persons reported to have committed crimes reduced by 11.6 per cent from 69,484 in 2007 to 61,438 in 2008. There was a reduction in the number of cases reported to KACC by 45.9 per cent from 6,728 in 2007 to 3,637 in 2008, while the number of cases forwarded to the office of the Attorney General (AG) increased marginally from 122 in 2007 to 126 in 2008.

The total the number of cases filed, disposed of and pending, as reported by the judiciary reduced by 15.9, 29.5 and 1.5 per cent, respectively, in 2008. During the review period, the number of pending land cases increased by 62.5 per cent while those disposed of rose by 85.4 per cent. The period also saw the number of magistrates increase from 252 recorded in 2007 to 287 in 2008, with the number of resident magistrates increasing by 42.

The prison population declined by 1.5 per cent from 89,770 in 2007 to 88,414 in 2008. Major declines of 27.1 per cent and 15.9 per cent were witnessed among the youth ages 16-17 and 21-25 years, respectively. On the hand, an increase of 60.3 per cent of prison population of persons aged above 50 years and 14.1 per cent of those less than 16 years of age were observed in 2008. The number of prisoners committed to safe custody (remand) increased by 94.1 per cent from 36,794 in 2007 to 71,411 in 2008.

The number of new applicants for identity cards reduced by 61.9 per cent from 1,925,737 in 2007 to 733,103 in 2008. The number of entry permits issued increased by 6.6 per cent from 10,812 in 2007 to 11,530 in 2008. Similarly, the number of passports issued increased marginally from 126,213 in 2007 to 128,345 in 2008.

**Highlight on Child Labour in Kenya** In an effort to establish the size and structure of child labour in Kenya and provide a database for designing appropriate intervention programmes and child labour policies, Child Labour statistics were collected in both the 1998/99 Integrated Labour Force Survey (LFS) and the 2005/06 Kenya Integrated Household Budget Survey (KIHBS).

Findings from the 2005/06 survey indicates that about 1.0 million children aged 5-17 years worked compared to 1.9 million children reported in the 1998/99 survey. Out of the 1.0 million children who reported to have worked in 2005/06, 951.3 thousand reported to have worked either for pay, profit or family gain. Majority, 64.4 per cent of

all working children worked as unpaid family workers while 10.7 per cent operated their own businesses. The proportion of working children in the 5-17 years age group declined from 17.4 per cent in to 7.8 per cent between the two surveys.

**Outlook** Although the global financial crisis is expected to ease within the course of 2009, its effects are likely to impact negatively on many of the OECD countries, with financial market stabilization now projected to take longer than previously envisaged. The outlook for the global economy in 2009 is therefore bleak.

In line with this expectation, most of the major economies of the world are projected to contract. While the rate of contraction is expected to moderate from the second quarter onward, world output is projected to decline by 1.3 percent in 2009 as a whole and to recover only gradually in 2010, growing by 1.9 percent (World Economic Outlook, April 2009).

Despite relatively weak financial linkages with advanced economies, the current global financial crisis is likely to continue impacting negatively to the domestic economy. These effects will include reduction in demand and price of commodities in the world market, reduction in capital flows such as investment, official development assistance, and remittances, and reduced earnings from tourism.

In the agricultural sector, output might remain subdued due to insufficiency of rains. The lowering of the cost of inputs like fertilizers and seeds is however expected to encourage farmers to cultivate more land.

Tourism is likely to perform below potential against a low level of visitor arrivals due to the prevailing global financial crisis. Nonetheless, aggressive marketing of the country as a preferred tourism destination is expected to reverse the decline recorded in 2008.

The manufacturing sector is also expected to experience a more positive year with the reduction in fuel costs which will in turn lower the cost of production. The sector will further gain from the expected, albeit marginal, upturn in agricultural production as it is agro based.

The construction sector is expected to continue booming in 2009 although government participation in the sector might be affected because of the budget deficit that will lead to a deduction in development expenditures.

With good weather, reduction in cost of energy and other sound macroeconomic variables, inflation is expected to ease in 2009. This will also be supported by the higher base that was witnessed in 2008.

With these determined steps to turn around the economy, the domestic economy is projected to grow by between 2.0 per cent and 3.0 per cent in 2009. However if drought persists in 2009, then economy is expected to record a lower growth as it will impact negatively on key sectors like Agriculture and Manufacturing.

**Table 0: Key Economic and Social Indicators 2004 - 2008<sup>1</sup>**

	DESCRIPTION	Unit	2004	2005	2006	2007	2008*
1	Population	(Million)	34.2	35.1	36.1	37.2	38.3
2	Growth of GDP at Constant Prices	(Per cent )	5.1	5.9	6.3	7.1	1.7
3	GDP at Market Prices :	(KSh Mn)	1,274,328	1,415,724	1,622,434	1,825,960	2,099,798

## Chapter 1

### International Scene

**Introduction** **T**he global economy faced unprecedented challenges in 2008 following the crisis in the United States housing sector in 2007 and consequently the financial markets. Subsequently, the global economy experienced slower growth against projected outcomes for 2008. The global economy is estimated to have expanded by 2.7 per cent in 2008 from 3.7 per cent and 3.9 per cent in 2007 and 2006, respectively. The slower growth rates experienced in 2008 are further attributed in part to high commodity and crude oil prices. Most advanced economies experienced a recession during the review period, a situation that is projected to continue until 2010.

1.1. The constrained global economic performance in 2008 worsened inflationary pressures with most economies recording high inflation rates in comparison to those experienced in the last ten years. The resurgence in high inflation has been observed in emerging and developing economies due to the rise in food and oil prices. Headline inflation reached an average of 3.6 per cent in the advanced economies, 7.3 per cent in emerging Asia and 10.2 per cent in Africa.

1.2. World trade experienced a slump in 2008 growing by 4.8 per cent compared to 7.0 per cent in 2007. The reduced growth in trade was due to shrinking markets in Europe and America as well as countries seeking to meet domestic demand for basic food stuffs. However, commodity-exporting countries still benefited from the generally high export prices in the global market.

1.3. Oil prices experienced sporadic spikes in 2008, reaching an all time high of US\$143 a barrel in July 2008, and closed the year at US\$ 37.6 a barrel in December 2008. Though the prices of all oil products moved up, the consumption of transportation fuels rose due to high growths in vehicle ownership in the emerging and developing economies. Due to strong demand for diesel that outstretched the refining capacity, its prices rose much faster than gasoline. Similarly, coal prices rose by 70.0 per cent mainly due to supply disruptions and bottlenecks in the major shipping ports.

**Country/** 1.4. Table 1.1 highlights key economic indicators for the main Organisation for  
**Regional** Economic Co-operation and Development (OECD) countries for the last three years  
**Economic** and projections for 2009 and 2010. Real GDP growth in OECD countries dropped to  
**Analysis** 1.4 per cent in 2008 compared to 2.6 per cent in 2007. The countries' growth in real  
total domestic demand declined significantly from 2.3 per cent in 2007 to 0.8 per cent  
in 2008. World trade is estimated to have slowed from an increase of 7.0 per cent in  
2007 to 4.8 per cent in 2008.

**1.5. United States;** The economy experienced a slackened real GDP growth estimated at 1.4 per cent in 2008 compared to 2.0 per cent in 2007. The decline in performance is attributed to collapse of various financial institutions especially those that had heavily invested in mortgage financing. The associated challenge was increasing unaffordability of mortgage payments, declining house prices which consequently reduced household wealth and thus causing a downward pressure on consumption. The labour market encountered increasing unemployment rate and falling wages consequently lowering domestic demand.

**1.6. Japan:** The expansion of the economy experienced a slowdown following the recession in the global economy. The country's real GDP grew at an estimated 0.5 per cent compared to 2.1 per cent in 2007. This was occasioned by external shocks leading to contraction in the country's export markets, reduction in domestic demand, and an appreciation of the Japanese Yen against other major currencies. The unemployment rate in the country increased from 3.9 per cent in 2007 to 4.1 per cent in 2008.

\*Provisional

<sup>1</sup> Projections

**Notes**

Assumptions underlying the projections include:

- no change in actual and announced fiscal policies;
- unchanged exchange rates as from 28th October 2008; in particular 1USD=95.69 Yen & 0.80 Euros and 0.69 Euros;

The cut off date for other information used in the compilation of the projections was 14<sup>th</sup> November 2008.

\*\*\*World Trade growth rate is the arithmetic average of world merchandise import and export volumes

**1.7. Euro Area:** A deepening global recession and tightening of financial conditions led to a reduction in the real GDP growth in the region from 2.6 per cent in 2007 to 1.0 per cent 2008. Declining domestic demand which decreased to 0.8 per cent in 2008 from 2.3 per cent in 2007 also contributed to the reduction in the real GDP growth. The labour market experienced a reduction in employment growth from 1.8 per cent in 2007 to 1.0 per cent in 2008. However, the rate of unemployment remained at 7.4 per cent over the review period.

**1.8. United Kingdom:** Real GDP is estimated to have grown at 0.8 per cent in 2008 with the economy facing adjustments in the construction sector, falling house prices and decelerated domestic demand. Unemployment is estimated to have increased by 0.1 percentage points to 5.5 per cent in 2008.

**1.9. Germany:** The country's real GDP growth is estimated to have reduced from 2.6 per cent recorded in 2007 to 1.4 per cent in 2008. There were notable increases in the unit labour cost from 0.3 per cent in 2007 to 2.4 per cent in 2008 while the rate of unemployment declined from 8.3 per cent in 2007 to 7.4 per cent in 2008.

**1.10. China:** Real GDP growth is estimated to have contracted in 2008 to 9.5 per cent compared to 11.9 per cent in 2007. This is mainly attributed to decline in domestic demand from 11.4 per cent in 2007 to 9.4 per cent in 2008. Other contributing factors to the reduced rate of growth include a slump in the real estate sector and a fall in exports with the country experiencing deteriorating terms of trade from negative 1.2 per cent in 2007 to negative 5.1 per cent in 2008.

**1.11. Middle East:** The global financial crisis had little effect in the area and consequently the region experienced steady growth in 2008 at 6.4 per cent compared to 5.9 per cent reported in 2007. This was largely attributed to high oil prices in the market and an expansion in the construction industry in some countries. However, inflation edged upward to double digit partly due to high consumer prices in previously stable economies in the region.

**1.12. Emerging Asian Economies:** Countries in this region experienced slowed real GDP growth in 2008 at a rate of 7.7 per cent compared to 9.3 per cent in 2007. The region also recorded worsening consumer prices in 2008 which led to the use of food subsidies, export bans, quota system and selective taxation measures to raise domestic food supplies. India's real GDP grew at 7.6 per cent in 2008 down from 9.3 per cent recorded in 2007. Association of South East Asian Nations (ASEAN) economies are estimated to have experienced a real GDP growth of 5.5 per cent in 2008 compared to 6.3 per cent in 2007.

**1.13. Africa:** The continent's real GDP growth slackened in 2008, growing at an estimated 5.9 per cent compared to 6.3 per cent in 2007 as indicated in Table 1.2. This is attributable to the reduced global market for Africa's products due to the effects of

the financial turmoil in developed economies, high energy costs and rise in food prices. The growth in 2008 was driven by improvements in terms of trade for many countries due to a surge in the prices of fuel and non-fuel commodities, and steady net capital inflows.

<sup>2</sup>Percent of GDP

<sup>3</sup> See current GDP analysis in chapter 2

**Sub-Saharan Africa (SSA)** 1.14. Growth in SSA declined from 6.9 per cent in 2007 to an estimated 6.1 per cent in 2008. Despite its poor performance in 2008, there was reported growth in most countries including Congo, Tanzania, Uganda, Ghana, Nigeria, Cameroon and Cote d'Ivoire. Poorly performing countries including Kenya, Ethiopia, Sudan and South Africa lost 3.7, 3.0, 1.7 and 1.3 percentage points in real GDP growth in 2008 compared to 2007, respectively. Zimbabwe's increasing economic and political crisis in 2008 worsened the hyperinflation recorded since 2000 dimming the country's prospects for economic recovery and tracking of performance.

1.15. Consumer prices increased significantly from 7.1 per cent in 2007 to 11.9 per cent in 2008. This was due to the increases in the prices of food that was experienced in 2008, largely fueled by high energy costs and crop failure. Notably, all countries experienced increased consumer prices in 2008 compared to 2007 with most economies recording double-digit inflation. Significant increases in consumer prices was reported in Sudan,

Kenya, Nigeria, Cameroon and Cote d'Ivoire over the same period. While the rise in commodity prices in the region is projected to ease in 2009, Ethiopia, Uganda, Nigeria and Cote d'Ivoire are projected to experience an upward trend in the costs of these goods.

1.16. The current account balance improved in 2008 at negative 0.7 per cent compared to negative 3.0 per cent in 2007. Cameroon and Cote d'Ivoire reported surpluses in their current account balances as was the case with oil-exporting countries of Angola and Nigeria. Net oil-importing countries will rely largely on adjustment of their monetary and fiscal policies, and income policies to address trade imbalances that are projected to continue in 2009 for most economies.

**Maghreb Region** 1.17. Countries in the region reported real GDP growth averaging 5.5 per cent in 2008 compared to 4.3 per cent in 2007. Morocco experienced a significant growth from 2.7 per cent in 2007 to 6.5 per cent in 2008. The region's economic prospects are however projected to slacken with growth projected at 4.9 per cent in 2009. While commodity prices increased by 1.3 percentage points in 2008 from 3.0 per cent recorded in 2007, they are projected to decline to 4.0 per cent in 2009.

1.18. The current account balance for the Maghreb region improved in 2008 to 15.5 per cent of GDP compared to 12.1 per cent in 2007. Algeria recorded the greatest improvement in its current account balance gaining 5.3 percentage points in 2008 from 22.8 per cent in 2007. Projections indicate that most countries in the region will record shrinking current account balances estimated at an average of 10.3 per cent of GDP in 2009. Algeria's current account balance is likely to reduce but will remain positive compared to Morocco and Tunisia which are projected to record negative trends.

**Outlook** 1.19. The global financial crisis is expected to impact the economic performance of many regions including OECD countries in 2010 negatively. The global rate of real GDP growth is projected at 3.0 per cent in 2009 compared to 2.7 per cent in 2008. All regions are expected to experience a decline including oil exporting region of the Middle East whose economy is projected to decline to 5.9 per cent in 2009 from 6.4 per cent in 2008.

1.20. The commodity price increase experienced globally in 2008 and its long-term effects on inflation were on account of food and oil prices. Notably, food prices will continue to contribute to high but stabilized inflationary tendencies in emerging economies, while oil prices will continue to spur inflation in advanced economies in 2009 and 2010.

1.21. The **OECD countries** are projected to record a negative real GDP growth rate of 0.4 per cent in 2009 but are expected to recover in 2010 at a projected 1.5 per cent. The projected negative growth in 2009 attributed to the anticipated continuation of the recessionary tendencies experienced in most OECD countries in 2008 as a result of

the global financial crisis. This will be reflected in a continued housing sector downturn and increasing unemployment. The rate of unemployment is projected to increase in 2009 and 2010 at 6.9 per cent and 7.2 per cent, respectively. Japan is expected to record higher unemployment levels in 2009 and 2010 with unemployment rate projections at 4.4 per cent in both years from 4.1 per cent in 2008.

1.22. In the **Euro area**, economic activity is projected to decline in 2009 and will be reflected by negative real GDP growth of 0.6 per cent before making a recovery in 2010 at a projected increase of 1.2 per cent. Unemployment levels might however continue to rise over the two years amidst falling income levels. The region is also likely to record a worsening current account balance in 2009 and 2010 at negative 7.6 per cent and negative 4.3 per cent, respectively. This is due to anticipation sluggish export growth in the region due to weak global demand.

1.23. In the **United Kingdom**, domestic demand is expected to shrink in 2009 with increased unemployment rate until late 2009 due to lack of confidence in the financial sector, tighter credit conditions and falling house prices. Growth in GDP at market prices is projected at negative 1.1 per cent in 2009 with economic recovery anticipated in 2010 at 0.9 per cent. The unemployment rate is projected to increase to 6.8 per cent and 8.2 per cent in 2009 and 2010, respectively.

1.24. In 2009, **Germany's** economy is expected to be severely affected by the global economic slowdown since the economy is largely dependent on international trade. The saving rate is however expected to rise due to increasing uncertainties in the labour market and a continued bear run in the stock market. The country's growth in real GDP is projected at negative 0.8 per cent in 2009 but is expected to make a recovery in 2010 to expand at 1.2 per cent.

1.25. **China's** economic performance will slaken further in 2009 due to global uncertainties which are likely to subdue its market and ignite a correction in its housing market before experiencing a recovery in 2010. The country's export will also be affected by rising labour costs leading to a decline in its current account surplus as a share of GDP.

1.26. In the **Middle East**, 2009 will present mixed prospects with a decline in real GDP growth by 0.5 percentage points to 5.9 per cent. However, commodity prices will reduce by 14.4 per cent. External risks to the region's future growth include weaker demand in advanced economies and potentially lower prices for exported products and services. The devaluation of currencies of most oil exporting countries poses a challenge for the region's future economic prospects.

1.27. In **Sub-Saharan Africa**, the financial obligations of most governments are not likely to be met due to the 2008 challenges projected to spiral into 2009. With a financial economic downturn in developed and emerging economies, the region's worsening

current account balances projected in 2009 implies that there will be reduction in private capital inflows to close the deficit, hence the slowed growth anticipated in SSA in 2009.

1.28. Despite the global economic turmoil, Africa's real GDP growth prospects are optimistic at a projected 6.0 per cent while commodity prices are likely to reduce to 8.3 per cent in 2009. The continent will however face various challenges including high inflation in some countries undermining poverty reduction efforts and stabilization mechanisms. Sub Saharan Africa is expected to recover from the slackened growth recorded in 2008 to grow at 6.3 per cent in 2009.

## Chapter 2

### Domestic Economy

**Overview** **T**he economic growth momentum that started in 2003 was restrained by a number of both internal and external factors in the year under review. These factors included the 2008 post election disruptions, the global financial crisis, the high fuel and food prices among others. Combined, these factors slowed the economic growth from 7.1 per cent in 2007 to 1.7 per cent in 2008.

2.2. Though the post-election violence was experienced only in the first quarter of 2008, its spill-over effects were manifest throughout 2008 resulting to substantial declines in growths of most of the sectors of the economy. Among the key sectors that were heavily impacted on include *Agriculture and forestry*, and *Hotels and restaurants* whose value added contracted substantially by 5.1 per cent and 36.1 per cent respectively in 2008 compared to growths of 2.0 per cent and 16.3 per cent correspondingly in 2007. In addition to the disruption associated with the post-election violence, agricultural activities were adversely affected by high costs of fertilizers, weather pattern changes and drought in some regions of the country during the year. Despite the unfavourable environment, *Construction* and *Education* sectors managed improved growths of 8.3 per cent and 5.8 per cent in 2008 compared to 6.9 per cent and 3.7 per cent in 2007 respectively.

2.3. The global financial crisis started in the US in early 2007 but spread out to other economies through a combination of markets failures<sup>1</sup>. These effects of the financial crisis were however not felt in Kenya until in 2008 through a deteriorating current account balance, declining economic growth and depreciation of domestic currency. The effects were attributed to the dwindling exports, remittances and capital inflows.

2.4. The food price shock of 2008 put an upward pressure on inflation way above the 2007 levels. Headline inflation rose from 9.8 per cent in 2007 to 26.2 per cent in 2008. Similarly, the underlying inflation increased from 5.7 per cent in 2007 to 11.1 per cent in 2008. The rise in inflation was also attributed to the escalation in fuel prices and the depreciation of the Kenyan shilling experienced during this period. Like in many countries around the world, Kenya witnessed an unprecedented rise in food prices during the period under review. Moreover, food and fuel shortages resulting from supply disruption due to the post-election violence exacerbated the domestic situation. The rise in international food prices was mainly on account of unseasoned droughts in grain producing countries, increase in costs of fertilizers, and increased use of biofuels particularly in developed countries.

---

<sup>1</sup> This was mainly due to poor corporate governance and incompatible executive remuneration structure while lack of transparency in trading procedures, financial instruments, and balance sheet positions of major financial institutions also exacerbated the market failures

**Sectoral Analysis**

**Agri-  
culture and  
Forestry** 2.5. Agriculture and forestry sector declined by 5.1 per cent in 2008 compared to a revised growth of 2.0 per cent in 2007. The decline was mainly due to unfavourable weather conditions, displacement of some farmers and disruption of agricultural activities arising from the post election skirmishes leading to late planting and reduction of area under crop which resulted in poor harvests. The high costs of agricultural inputs like fertilizers and seeds worsened the situation thereby leading to the low production of both food and industrial crops except horticulture which recorded marginal increase. During the review period prices of most commodities increased due mainly due to the soaring demand coupled with a reduction in production.

2.6. During the year under review, maize production went down to 26.0 million bags compared to 32.5 million bags in 2007. Although this is a second consecutive decline, it was the lowest production in the last six years equaling 2002 production. Other key food crops like beans, and potatoes recorded declines of 15.9 per cent and 20.0 per cent, respectively, in 2008.

2.7. Coffee production declined by 26.0 per cent in 2008 to 38.7 thousand tonnes compared to 52.3 thousand tonnes in 2007 with the value of marketed production declining to KSh 6,859.3 million in 2008 compared to KSh 9,089.9 million in 2007. Better prices of tea in the international market in 2008 enabled the value of marketed production to increase by 26.2 per cent to record KSh 55,383.1 million in 2008 despite the drop in production to 345 thousand tonnes from 369.6 thousand tonnes in 2007.

2.8. The volume of fresh horticultural exports increased by 0.5 per cent in 2008 to 193.1 thousand tonnes compared to 192.2 thousand tonnes in 2007. However, the value decreased by 13.8 per cent from KSh 67.3 billion in 2007 to KSh 58.0 billion in 2008. The decline is attributed to the lower prices paid in the international market due to the lower demand. The volume of fruits and flowers exported recorded increases of 9.3 per cent and 2.6 per cent respectively in 2008 while that of vegetables recorded a decline of 3.5 per cent in the year under review.

2.9. The value of marketed livestock and products increased marginally in 2008 to stand at KSh 30,629.1 million compared to KSh 29,691.4 million in 2007. Nearly all products except dairy produce recorded marginal increases. The dairy produce decreased by 1.1 per cent to KSh 8,368.7 million in 2008 as a result of reduced milk production.

**Manuf-  
acturing** 2.10. In 2008, the sector faced various challenges among them increased costs of doing business caused by rise in inflation, supply disruption and temporary closures associated with the post-election violence during the first quarter of the year. In addition, subdued demand and stiff competition from cheap imports and counterfeits also worked against the sector's growth. In spite of these challenges, the sector posted a growth of 3.8 per cent in 2008, albeit the lowest since 2003, compared to 6.5 per cent in 2007. This growth was largely, supported by a resilient domestic demand of some selected commodities among them beverages and cement.

2.11. Manufacture of food, beverages and tobacco sub-sector, which includes the processing of the products of agriculture and fishing into food for humans and animals, contracted by 1.7 per cent in 2008 from a growth of 9.3 per cent of 2007. This drop was principally on account of the decline in the agricultural output during the period under review. However, manufacture of beverages grew by 6.4 per cent in 2008 compared to 14.9 per cent recorded in 2007. All the other sub-sectors of manufacture of foods registered negative growths during the period under review. Combined, manufacture of non-food items (all other manufacturing) grew by 6.3 per cent in 2008 compared to a growth of 5.2 per cent in 2007.

**Electricity and Water** 2.12. The sector recorded a decelerated increase in real value added of 5.2 per cent in 2008 compared to 9.1 per cent in 2007. The decelerated growth was due to a reduction in electricity production from hydro sources which declined by 8.9 per cent from 3,591.5 GWh in 2007 to 3,271.8 GWh in 2008. The decline in hydro electricity generation was attributable to inadequate rainfall experienced in the catchment regions for the water used in electricity generation. Total installed capacity rose by 6.0 per cent in 2008 compared to an increase of 1.7 per cent in 2007 as a result of an increase in thermal oil and hydro installation.

**Construction** 2.13. The sector recorded a growth of 8.3 per cent in 2008 compared to 6.9 per cent in 2007. This was not only the highest growth for the sector since 1998 but also the highest growth recorded across the sectors in 2008. The robust growth was largely supported by increased capital investments in roads, housing and expansion of the Jomo Kenyatta International Airport (JKIA). Increase in construction activities was reflected in the cement consumption which grew by 7.0 per cent from 2,061.4 thousand tonnes in 2007 to 2,205.8 thousand tonnes in 2008. Loans and advances to the sector declined by 7.4 per cent in 2008 compared to the previous period, but the fall was more than offset by the government expenditure allocation to the sector which rose from KSh 29.3 billion in 2007 to KSh 31.6 billion in 2008.

**Transport and Communication** 2.14. Transport and Communication sector recorded the lowest growth in the last five years of 3.1 per cent in 2008 with the main driver in the sector remaining the post and telecommunication sub sector. Transport and storage sub sector which includes the road, rail, air and water transport among others recorded insignificant growth of 0.1 per cent in 2008 compared to 7.2 per cent growth in 2007. This decelerated growth was influenced by several factors which include the post election skirmishes, high international crude oil prices for the better part of the year and the generally low demand of its output. However, the high importation of motor and auto cycles resulted to an increase in the number of new registered motor vehicles by 42.8 per cent in 2008. The post and telecommunication sub sector recorded a decelerated growth of 7.9 per cent in 2008 from 30.3 per cent in 2007. The telecommunication sub sector recorded increase in subscriber base which reached 12.9 million in 2008 from 9.3 million in 2007.

**Hotels and Restaurants** 2.15. The Hotel and Restaurant sector was worst hit by the internal and external shocks to record a massive contraction of 36.1 per cent in 2008 compared to an impressive growth of 16.3 per cent in 2007. The post election skirmishes in the beginning of the year coupled with the global financial crises later in the year were some of the key factors that affected the sector. This resulted in a sharp decline in the number of international arrivals due to cancellations of reservations and termination of ongoing holidays. Consequently, international arrivals declined sharply by 33.8 per cent from 1,817.0 thousand in 2007 to 1,203.2 thousand in 2008. The resulting decline in the tourist arrivals led to a reduction in tourism earnings from KSh 65.2 billion in 2007 to KSh 52.2 billion in 2008.

**Financial Intermediation** 2.16. The financial sector, which has been on a growth path since 2003 recorded a value added growth of 3.1 per cent in 2008. Total domestic credit increased from KSh 670.8 billion in December 2007 to KSh 827.4 billion in 2008. Credit advanced to private enterprises and government increased by 24.5 per cent and 18.8 per cent respectively, during the review period. Consequently broad money supply (M3) expanded from KSh 777.6 billion in 2007 to KSh 901.1 billion in 2008. The average interest rates for the 91 day treasury bills, loans and advances for commercial banks and overdraft, rose by 1.72, 1.40 and 1.55 percentage points, respectively compared to 2007. However, there was a drop in the Central bank repo rate, interbank rate and interest on savings deposits for commercial banks during the review period. In the capital markets, the Nairobi Stock Exchange (NSE) experienced a downturn in 2008 with the NSE 20 share index losing 1,924 points by the end of 2008 to close at 3521.

2.17. Table 2.1 presents the breakdown of the Gross Domestic Product (GDP) at market prices for the period 2004 to 2008. In 2008, the absolute value of GDP at current prices stood at KSh 2,099.8 billion up from KSh 1,826.0 billion in 2007. Further, the table gives details of the value added by two broad institutional sectors; Corporations, Non-profit institutions and households and General government.

## Chapter 2: Domestic Economy

**Table 2.1: Gross Domestic Product by Activity+**

Industry	Current prices - KSh Million				
	2004	2005	2006	2007	2008*
Agriculture and forestry	311,275	336,806	379,183	394,777	491,975

2.18. Table 2.2 shows the percentage share contributions of the various industries based on Table 2.1. During 2008, most of the sectors maintained their contribution to GDP at around the level of 2007. However, Agriculture and forestry was a notable exception which despite contraction in output in 2008, its contribution to GDP increased by 1.8 percentage points to 23.4 per cent in 2008. Other sectors whose contribution to GDP rose include Manufacturing and, Wholesale and Retail trade by 0.2 and 0.3 percentage points, respectively, during the same period. The increase in contribution of agriculture and forestry was compensated by falls in a number of sectors among them Hotels and restaurants, Transport and communication and Public administration.

**Table 2.2: Gross Domestic Product by Activity+**

Industry	Per cent contributions to GDP				
	2004	2005	2006	2007	2008*

2.19. Table 2.3 is similar to table 2.1 but the components of the GDP are valued at constant prices of 2001 (base year). Using base year prices for the valuation has the advantage of allowing comparison of GDP and its components between years. Table 2.4 depicts the growth rates of the GDP and value added for all the sectors. The table shows that value added for Agriculture and forestry and Hotels and restaurants contracted significantly while most of the other sectors posted slower growths in 2008 as compared to 2007. Only a few sectors registered improved growths in 2008 in comparison to 2007.

**Table 2.3: Gross Domestic Product by Activity+**

Industry	Constant 2001 prices - KSh Million				
	2004	2005	2006	2007	2008*

2.20. Table 2.5 shows how various sectors of the economy contributed to GDP growth for the period 2004 to 2008. Taxes less subsidies and Wholesale and retail trade and repairs were the main drivers of the growth in 2008. Other sectors influential in driving the growth in 2008 were Manufacturing, Education, Construction and Real Estate, Renting and Business Services. As expected the contraction in Agriculture and forestry and Hotels and restaurants were the main forces behind the economic slowdown.

**Expenditure on GDP** 2.21. Expenditure on GDP and percentage shares are shown in tables 2.7 and 2.8 respectively. The Gross domestic expenditure at current prices increased by 12.9 per cent to KSh 2,335.6 billion in 2008 compared to KSh 2,068.9 billion in 2007. The combined share of Government and Private consumption expenditure declined to 92.1 per cent in 2008 compared to 94.3 per cent in 2007 with Government consumption expenditure share declining to 17.2 per cent and that of Private consumption declining to 74.9 per cent. Share of exports of goods and services declined by 0.2 percentage points to 26.3 per cent in 2008 while share of imports rose by 3.8 percentage points to 41.7 percent during the same period. The current account balance widened due to the rise in merchandise trade deficit occasioned by expansion of value of total imports as compared to the value of exports. This has resulted into declining share of net exports of goods and services to 15.4 per cent in 2008 compared to 11.5 per cent in 2007. Share of gross fixed capital formation remained at 11.4 per cent in 2008.

2.22. The details of expenditure on GDP in real terms and the growth rates are presented in Tables 2.9 and 2.10, respectively. There were moderate growths in the main components of expenditure on GDP except in private consumption expenditure and change in inventories. The highest growth of 9.7 per cent was recorded in Gross Fixed Capital Formation in 2008, although this is the lowest growth realized since

2005. Private consumption expenditure declined by 0.4 per cent in 2008 compared to an average growth of 7.3 per cent since 2005. The net exports of goods and services recorded a decelerated growth of 1.7 per cent in 2008 compared to a growth of 5.4 per cent in 2007.

**Private Consumption** 2.23. Tables 2.11a and 2.11b present figures on final private consumption by type of consumption and the percentage shares of each of the categories respectively. Total private consumption increased from KSh 1,383.4 billion in 2007 to KSh 1,572.8 billion in 2008 representing a growth of 13.7 per cent. Food and beverages category continued to register the largest share of consumption with its share increasing marginally from 43.8 per cent in 2007 to 44.8 per cent in 2008 due to the high prices of the commodities in the category witnessed in the year under review. The share of housing category reduced slightly to 7.7 per cent in 2008 compared to an average of 8.0 per cent since 2004.

**Gross Fixed Capital Formation** 2.24. Gross Fixed Capital Formation (GFCF) by type of asset and their shares at current prices are presented in Tables 2.12a and 2.12b. The total expenditure on GFCF recorded a growth of 15.3 per cent to stand at KSh 408,327 million in 2008. The booming construction activities in 2008 saw the share of building and structures increase to 46.3 per cent in 2008. The share of transport equipment declined to 18.1 per cent in 2007 compared to 23.4 per cent in 2008 while that of other machinery and equipment increased to 35.4 per cent in the year under review from 30.3 per cent in 2007.

2.25. Tables 2.13a and 2.13b give details of the real GFCF and the growth rates respectively. The total assets grew by 9.7 per cent in 2008 to stand at KSh 323,688 million in real terms. Other machinery and equipment, and building and structures recorded growths of 28.1 per cent and 8.9 per cent in 2008 while all other type of assets declined with the highest decline being witnessed in cultivated assets and transport and equipments of 53.3 per cent and 16.1 per cent, respectively.

### Disposable Income and Savings

2.26. Tables 2.14 and 2.15 show the distribution of income. The Gross National Income (GNI) increased by 15.4 per cent to stand at KSh 1816.3 billion in 2008. The net primary income improved to a deficit of KSh 3,127 million in 2008 compared to deficit of KSh 9,706 million in 2007. The net current transfers recorded a decelerated growth of 3.1 per cent in 2008 compared to 10.2 per cent in 2007 partly due to the slower growth of remittances as a result of the global economic crisis.

**Quarterly Gross Domestic Product** 2.27. Tables 2.16 and 2.17 give the summary of the Quarterly Gross Domestic Product (QGDP) by activity from 2001 to 2008. The growth of the fourth quarter stagnated in 2008 compared to a growth of 6.0 per cent in 2007. The second and third quarters of 2008 recorded growths of 3.5 per cent and 3.3 per cent while the first quarter recorded a marginal decline.

**Benchmarking** 2.28. The approach and data sources used in the compilation of quarterly and annual GDP are not the same hence the sum of four quarters does not add up to the annual estimates. QGDP estimates, therefore, are re-aligned to annual estimates through benchmarking. Annual GDP estimates are considered to be more reliable as they are based on a more comprehensive data. The proportional Denton method is used to execute the benchmarking process. This is done through quadratic minimization of the differences between the re-aligned and original series, subject to the constraint that the yearly totals of the re-aligned estimates are equal to the annual estimates.

**Seasonal adjustment** 2.29. Quarterly estimates quite often show short-term variations due to factors such as weather, habits and legislation, usually defined as seasonal fluctuations. Although seasonality is an integral part of quarterly data, it is often an impediment to correct identification and analysis of the business cycle and trend. Therefore, quarterly estimates are seasonally adjusted as an addition to the raw estimates and they are needed to gauge the growth from quarter to quarter. Without seasonal adjustment, changes in trend can only be judged by comparing the level of change in the latest quarter with the same of the previous year. The benchmarked series are seasonally adjusted using the Census X-11/X-12 method.

2.30. Figure 2.1 shows the movement of seasonally adjusted and unadjusted QGDP. Seasonal diagnosis of value added by activity indicated that fluctuations in Agriculture, Hotels and Restaurants and, Wholesale and Retail Trade are the main sources of seasonal variations noted in QGDP. From table 2.17 it can be seen that the Seasonal adjusted GDP decreased by 2.5 per cent in the fourth quarter of 2008 compared to the third quarter of the same year. This shows a decline in the growth of the economy compared to the seasonally adjusted growth rates from the previous three quarters although it was much slower in the third quarter.

**Figure 2.1: Movement of seasonally adjusted and unadjusted QGDP**

2.31. Figure 2.2 below shows the total values added excluding agriculture. Agriculture has a very strong impact on the seasonal pattern of GDP. This is clear when comparing the seasonally adjusted and unadjusted GDP in figure 2.1 with the seasonally adjusted and non-adjusted “non-agricultural GDP” as shown in figure 2.2

Figure 2.2: Movement of seasonally adjusted and unadjusted QGDP excluding agriculture

## Chapter 3

### Social Scene

**Overview** In 2008, the Government continued to support the Free Primary Education (FPE) and initiated the Free Secondary Tuition Education (FSTE). However, the post election violence adversely affected the education and health sectors with the most affected being the Internally Displaced Persons (IDPs). In an effort to support women and youth development, the Government continued to support the youth and the women enterprise funds. To cater for the rising number of students qualifying for higher education, the Government elevated Kenya and Mombasa polytechnics to constituent university colleges.

3.2. The Government expenditure in the social services sector increased by 7.8 per cent, from an estimate of KSh 187,769.3 million in the 2007/08 to KSh 202, 428.3 million in the 2008/09. Recurrent expenditure constitutes the largest proportion of the total expenditure (87.5 per cent), largely for salaries. The number of both primary and secondary schools increased marginally by 0.4 per cent and 1.3 per cent from 26,104 and 6,485 in 2007 to 26,206 and 6,566 in 2008 respectively. Total enrolment in primary schools increased by 2.8 per cent from 8,330.1 thousand in 2007 to 8,563.8 thousand in 2008. The total enrolment in secondary school students increased by 17.1 per cent from 1,180.3 thousand students in 2007 to 1,382.2 thousand students in 2008. The Gross Enrolment Rate (GER) for boys and girls in 2008 was 118.1 per cent and 113.1 per cent respectively, indicating a higher proportion of boys enrolled in primary schools.

3.3. The number of health institutions rose by 2.2 per cent from 5,589 in 2007 to 5,712 in 2008. National Hospital Insurance Fund (NHIF) receipts increased by 14.1 per cent from KSh 3,954.9 million in 2006/07 to KSh 4,511.4 million in 2007/08 mainly as a result of an increase in new membership from both formal and informal sectors. Similarly, benefits and Contribution Net of Benefits to members rose by 31.2 per cent and 4.5 per cent in 2007/08 respectively. In 2008, the number of registered medical personnel increased by 6.1 per cent. The number of undergraduate and postgraduate medical students registered rose by 19.8 per cent from 4,855 to 5,814 in 2008/09. The total number of Full Immunization Coverage (FIC) reported declined by 2.7 per cent, from 978,417 to 951,700 cases in 2007 and 2008 respectively. The national FIC rate worsened from 73.0 per cent in 2007 to 71.0 per cent in 2008.

**Social Sector Expenditure** 3.4. The data presented in Table 3.1 illustrates the total social sector expenditure patterns over the last five years. The social sector expenditure levels is expected to increase to KSh 202,428.3 million in 2008/09 from KSh 113, 591.6 million in the year 2004/05. The expenditure for Ministry of State for Youth and Sports is expected to almost triple between 2007/08 and 2008/09. Expenditure for the Ministry of National Heritage and Culture and the Ministry of Home Affairs is expected to increase by 65.7 and 40.9

per cent respectively over the same period. The Ministry of Higher Education, Science and Technology is expected to record a recurrent budget of KSh 19,334.6 million in 2008/09 compared to KSh 15,859.8 million in 2007/08, an increase of 21.9 per cent. The Ministries of Education, and Health are expected to record recurrent budgets of KSh 106,193.0 million and KSh 27,689.4 million respectively during the 2008/09.

3.5. Development expenditure of the social sector is expected to increase by 17.6 per cent to KSh 31,321.8 million in 2008/09 from KSh 26,577.2 million in 2007/08. During the same period, development expenditure in the Ministry of Higher Education, Science and Technology is expected to improve tremendously by more than ten-fold followed by Ministry of Ministry of Youth and Sports which more than quadrupled and National Heritage and Culture at 94.2 per cent. The expenditure increase in the three Ministries reflects the Government's commitment to the enhancement of the Youth revolving fund and cultural centers and improvement of facilities in Technical and Vocational Institutions and Youth Polytechnics. Both the Ministry of Medical Services and Ministry of Public Health and Sanitation are expected to record a total expenditure of KSh 6,947.1 million in 2008/09 as compared to KSh 11,230.0 million in 2007/08, a decline of 38.1 per cent. The same scenario is replicated in the Ministry of Gender, Sports, Culture and Social Services, which is expected to record an expenditure decline of 25.6 per cent, while that of the Ministry of Home Affairs is expected to increase by 6.0 per cent. The increase in expenditure for Home Affairs is towards the continued implementation of prison reforms. The Ministry of Education development expenditure is expected to increase marginally from KSh 9,683.7 million in 2007/08 to KSh 9,866.8 million in 2008/09, an increase of 1.9 per cent. The education development funds include commitments from Development partners for implementation of the Kenya Education Sector Support Programme (KESSP), a sector wide approach to planning.

+ Estimates including supplementaries.

Expenditure on the Ministry of Medical Services, Ministry of Public and Sanitation and expenditure on KETRI currently in the Ministry of Agriculture.

3.6. The implementation of social sector services by the Local Authorities seeks to improve the livelihood of the population and hence the need to track the budgetary patterns as illustrated in Table 3.2. Local Government expenditure estimate on social services has increased over the years from KSh 2.65 billion in the 2004/05 to KSh 4.73 billion in the 2008/09. Expenditure on education increased tremendously by 43.5 per cent from KSh 1,010.5 million in the 2007/08 to KSh 1,450.45 million in the 2008/09. This is attributed to communities demand for improved education sector access through school infrastructure support by the various local authorities. Expenditure on health and other social services is expected to increase by 5.8 per cent and 3.4 per cent respectively in the year under review.

+ Estimates

**Education** 3.7. Table 3.3 illustrates the recurrent and development expenditure of the Ministry of Education between 2004/05 and 2008/09, including budget estimates for the Technical Industrial and Vocational Educational Training (TIVET), University and Youth Polytechnics. The expenditure trend reflects Government commitment to implementing the Free Primary Education (FPE) and Free Tuition Secondary Education (FTSE). The gross total expenditure increased from KSh 122.0 billion in the 2007/08 to KSh 136.8 billion in 2008/09. Of the total allocation, recurrent expenditure received the largest share of 89.2 per cent. Overall, the secondary education registered the highest recurrent expenditure of KSh 12.5 billion in the 2008/09 compared to KSh 3.9 billion in 2007/08 to cater for the Free Secondary Tuition. Recurrent expenditure for pre-primary increased more than four fold while that of Youth polytechnics and training increased by 64.1 per cent. Recurrent expenditure for special education increased by 44.2 per cent in 2008/09. However, during the period teacher education and university education recorded a decline in recurrent expenditures of 13.5 per cent and 0.8 per cent respectively.

3.8. Total development expenditure estimate for the Ministry of Education including TIVET, University and Youth Polytechnics increased from KSh 11.0 billion in the 2007/08 to KSh 15.5 billion in the 2008/09. The increased expenditure is attributed to the contribution of the FPE and FSE from the development partners and the Government's commitment in TIVET and Youth development. The highest development expenditure during the period was recorded in secondary education which increased by 342 per cent, followed by University education, 141 per cent and Technical Education, 132 per cent. Primary Education development expenditure increased by 23.7 per cent from KSh 7.3 billion in the 2007/08 to KSh 9.0 billion in the 2008/09 .

**3.9. Number of Educational Institutions:** Table 3.4 provides details on number of educational institutions between 2004 and 2008. The total number of educational institutions increased by 1.3 per cent from 69,916 units in 2007 to 70,790 units in 2008. The total number of primary schools registered as at 2008 were 26,206 as compared to 26,104 in 2007. The number of secondary schools rose from 6,485 in 2007 to 6,566 in 2008. The number of training colleges and universities remained unchanged over the period.

+ Includes Kenya Technical Training College

**3.10. Pre-Primary Education:** Enrolment and number of teachers in Early Childhood Development (ECD) centres for the period 2004 to 2008 are presented in Table 3.5. Enrolment increased by 1.7 per cent to 1.7 million in 2008. The number of trained ECD teachers increased by 7.0 per cent from 54,177 in 2007 to 57,976 in 2008. In 2008, there were 68,141 female teachers constituting 87.1 per cent of the total ECD teachers. The number of untrained ECD teachers declined by 8.5 per cent from 22,147 in 2007 to 20,254 in 2008. This is attributed to the increased access to ECD Teacher training colleges that have provided opportunity to untrained teachers. The pupil teacher ratio remained stable at 22:1 over the period. GER for Pre-primary school increased slightly from 59.3 per cent in 2007 to 59.8 per cent in 2008, while Net Enrolment Rate (NER) increased from 39.7 per cent to 43.0 per cent in the same period.

**3.11. Primary Education:** Table 3.6 shows primary school enrolment by class and gender between 2004 and 2008. The Government continued to implement Free Primary Education (FPE) under the Kenya Education Sector Programme. The Ministry continued to support construction of new classrooms under the School Infrastructure Investment Programme and the Constituency Development Fund (CDF) with more funds directed to the areas that were affected during the post election violence. Overall, primary school enrolment rose by 2.8 per cent to 8.6 million in 2008. The Non-Formal Education Programme registered an increase in enrolment from 154,000 in 2007 to 161,231 in 2008. Majority of these enrollments were in Nairobi slum areas and the Arid and Semi-Arid Lands (ASALs) districts. The number of Kenya Certificate of Primary Education (KCPE) candidates declined by 1.3 per cent from 704,918 in 2007 to 695,728 in 2008. The transition rate increased marginally from 59.6 per cent in 2007 to 59.9 per cent in 2008. There was improvement in the average textbook pupil ratio from 1:3 to 1:2, as a result of sustained FPE grants towards procurement of teaching and learning materials at school level. The GER in primary schools increased from 108.9 per cent in 2007 to 109.8 per cent in 2008. The GER for boys and girls in 2008 were 112.2 per cent and 107.3 per cent respectively. The NER increased from 91.6 per cent in 2007 to 92.5 per cent in 2008 as illustrated in Figure 3.1.

**Figure 3.1: Primary Schools NER, 2004-2008**

**3.12. Primary Teachers:** The number of public primary school teachers by qualification and sex between 2004 and 2008 is shown in Table 3.7. The total number of teachers declined by 1.8 per cent from 173,157 in 2007 to 170,059 in 2008, with Male teachers constituting 54.0 per cent. There were no untrained teachers recorded in 2008 since they were upgraded to P1 grade. Teachers with P1 qualification were the majority accounting for 58.5 per cent followed by Approved Teachers at 25.3 per cent within the scheme of service for primary school teachers. Under the policy of replacing teachers exiting service through natural attrition, a total of 7,250 primary school teachers were recruited by the Teachers Service Commission in 2008 compared to 6,500 teachers in 2007. The Pupil Teacher Ratio (PTR) rose from 44:1 in 2007 to 45:1 in 2008. However, there is a

high PTR disparity among the districts ranging from 24:1 to 94:1. On average 87 out of the 158 districts have a higher PTR than the national average, reflecting a disparity in the teachers' distribution across districts.

<sup>1</sup> Data exclusively for public schools and does not include teachers on study leave, disciplinary cases and those performing non-teaching duties.

**3.13. Secondary Education:** Total secondary school enrolment between 2004 and 2008 is shown in Table 3.8. In 2008, the Government implemented the Free Secondary Tuition Education aimed at enhancing access to secondary education. As a result, there was substantial increase in enrolment by 17.1 per cent to 1,382.2 thousand students in 2008. The increase was mainly recorded in day schools that required minimal fee levies to cater for development and lunch only. The GER increased from 38.0 per cent in 2007 to 42.5 per cent in 2008 as shown in Figure 3.2. As shown in Figure 3.3, NER improved from 24.2 per cent in 2007 to 28.9 per cent in 2008. Despite the implementation, the cost of secondary education still remains prohibitively high due to boarding expenses which are not catered for by the grants provided. This leads to more than half of the school age population not accessing secondary education. The number of Kenya Certificate of Secondary Education (KCSE) candidates increased by 10.4 per cent from 276.2 thousand in 2007 to 305.0 thousand in 2008 of which 165.7 thousand were boys and 139.3 thousand were girls. In 2008, a total of 7,716 students were registered as private KCSE candidates.

**3.14. Secondary School Teachers:** Table 3.9 shows the number of public secondary school teachers by qualification and sex between 2004 and 2008. The number of teachers declined by 2.9 per cent from 44,305 in 2007 to 43,016 in 2008. The number of male teachers declined by 2.5 per cent from 28,544 in 2007 to 27,838 in 2008, while the number of female teachers decreased by 3.7 per cent from 15,761 in 2007 to 15,178 in 2008. The student teacher ratio in public secondary schools rose from 23:1 in 2007 to 28:1 in 2008. A total of 4,700 secondary school teachers were recruited in 2008 as compared to 3,500 in 2007.

**3.15. Teacher Training Institutions:** Table 3.10 shows teacher trainee enrolment by year and gender for the period between 2004 and 2008. There was a 3.0 per cent decline in primary teacher trainee enrolment in teacher training colleges from 22,908 in 2007 to 22,228 in 2008. Enrolment in diploma teacher training colleges declined by 6.7 per cent from 1,939 trainees in 2007 to 1,809 trainees in 2008. This is mainly attributed to the reduced college intake capacity as a result of some colleges being converted into constituent university colleges. In 2008, female enrolment in P1 and Diploma colleges constituted 49.0 per cent and 43.9 per cent of the total number of trainees, respectively.

**3.16. Technical, Industrial and Vocational Educational Training (TIVET) Institutions:** According to Vision 2030, the Government's commitment in this sector is to use science, technology and innovation in general and TIVET as the vehicle for socio-economic and technological transformation. The student enrolment in TIVET institutions by gender for the years 2004 to 2008 is presented in Table 3.11. Total enrolment increased by 11.3 per cent from 76,516 in 2007 to 85,200 in 2008. Kenya Polytechnic University College had the highest student enrolment of 10,148 students in 2008 followed by Mombasa Polytechnic University College with 6,999 students while the least enrollment was in Kisumu Polytechnic at 2,799 students. Enrolment of males is higher than that of females in TIVET institutions except for Youth Polytechnics. The Kenya Polytechnic University College and Mombasa Polytechnic university college have already registered 200 and 150 students on degree courses.

**3.17. University Education:** Table 3.12 summarizes student enrolment by gender in Public and Private Universities between 2004/05 and 2008/09 academic years. Total enrolment in all the universities grew by 3.9 per cent from 118,239 students in the 2007/08 academic year to 122,847 students in the 2008/09 academic year. Student enrolment in public universities rose by 3.6 per cent from 97,107 students in the 2007/08 academic year to 100,649 students in 2008/09 academic year. Male student enrolment in public universities increased by 3.7 per cent from 60,504 to 62,753 while female enrolment rose by 3.5 per cent from 36,603 to 37,896 during 2007/08 and 2008/09 academic years respectively. Public universities intake through the Joint Admissions Board (JAB) increased from 16,000 in the 2007/08 academic year to 17,100 in the 2008/09 academic year, an increase of 6.9 per cent. Part-time students constituted 34.2 per cent of the total student enrolment in 2008/09 academic year. Students in private accredited universities accounted for 17.2 per cent of the total university students enrolled in 2008/09 academic year. The proportion of female students enrolled in the universities stood at 40.1 per cent in 2008 as compared to 36.7 per cent in 2004.

**Health** 3.18. Table 3.13 shows the distribution of health institutions by province from 2004 to 2008. Over the five year period, the number of health institutions has increased by 19.8 per cent. The increase could be partly attributed to the implementation of the Constituency Development Funds (CDF) Act which enabled new health facilities to be constructed. The number of health institutions rose marginally by 2.2 per cent from 5,589 in 2007 to 5,712 in 2008. Rift Valley Province continues to have the largest number of health institutions (27.0 per cent) followed by Eastern Province (16.5 per cent). North Eastern Province had the least number of health institutions accounting for 3.5 per cent.

**Table 3.13: Number of Health Institutions<sup>1</sup> by Province, 2004 - 2008**

3.19. Table 3.14 (a) presents the National Hospital Insurance Fund (NHIF) resources over a five year period ending 2007/08. Overall, the receipts increased by 14.1 per cent from KSh 3,954.9 million in 2006/07 to KSh 4,511.4 million in 2007/08, mainly as a result of an increase in new membership from both formal and informal sectors. Benefits to members maintained an upward trend rising by 31.2 per cent in 2007/08 compared to 27.9 per cent in 2006/07. Contributions net of benefits continued to rise for the second consecutive year from KSh 2,540.1 million in 2006/07 to KSh 2,654.9 million 2007/08, an increase of 4.5 per cent.

3.20. Registered membership of the National Hospital Insurance Fund for the period between 2005/06 to 2007/08 is shown in Table 3.14 (b). The total membership increased by 14.1 per cent to 2,077.5 thousand in the 2007/08. In the same year, the formal sector accounted for 85.5 per cent of the total registered members. Since the introduction of informal registered membership, its share to total registered membership has increased from 6.7 per cent in 2005/06 to 14.5 per cent in 2007/08. Between 2005/06 and 2007/08, the number of informal sector registered members nearly tripled compared to 15.3 per cent in the formal sector in the same period.

3.21. Details of registered medical personnel for the years 2007 and 2008 are shown in Table 3.15. There was an increase in the number of registered medical personnel in most categories. Compared to 2007, the number of registered medical personnel increased by 6.1 per cent in 2008. The number of doctors, dentists and registered nurses rose by 5.6 per cent, 4.6 per cent and 15.4 per cent respectively from 2007 to 2008. The 'In-training' medical personnel slightly decreased by 3.2 per cent from 9,224 in 2007/08 to 8,925 in 2008/09.

3.22. Table 3.16 presents the number of registered undergraduate and post graduate medical students by course and gender in Kenyan universities, between 2004/05 and 2008/09 academic years. The number of medical students registered increased by 55.0 per cent from 3,761 to 5,814 in 2004/05 and 2008/09 academic years. This increase could be attributed to introduction of medical courses at Kenya Methodist University, University of Eastern Africa, Baraton, AghaKhan University and Kenyatta University. Furthermore, the parallel degree programme offered at the University of Nairobi and expansion of facilities at Moi University has contributed to the increase in number of students enrolled. In the last two years, the number of medical students registered rose by 25.3 per cent to 5,814 in 2008/09. Bachelor of Science in Medicine and Surgery accounted for 54.6 per cent of the total registered medical students enrolled. More males were registered in all the courses, with exception of Bachelor of Science in Nursing. Only 8.8 per cent of the medical students were registered for postgraduate courses.

3.23. Table 3.17 presents the number of middle level medical trainees in public medical training colleges. Over the last five years, the number of medical trainees rose by 59.5 per cent to 6,090 in 2008. The number of enrolled trainees increased by 2.6 per cent from 5,932 in 2007 to 6,090 in 2008. A combined enrolment for Diploma courses in Community Health Nursing, Clinical Medicine and Surgery and Pharmacy accounted for 59.4 per cent of the total middle level medical trainees in 2008. A new certificate course in Nutrition was introduced in 2008.

+ New courses

1. Includes food science and inspection, epidemiology, solid waste and occupational health

2. Includes clinical chemistry, haematology, histology, parasitology, virology, microbiology, bacteriology and blood tr.

3. Includes Psychiatry Nursing, Community Health Nursing, intensive care, ophthalmic and PeriOperative nursing (reintroduced in September 2008)

4. Includes paediatrics, orthopaedics, anaesthesia, lungs & skin, ent & audiology, reproductive health and ophthalmolog

3.24. Table 3.18 shows Full Immunization Coverage (FIC) rate of children under one year old by province between 2004 and 2008. The total number of FIC cases reported declined by 2.7 per cent, from 978,417 to 951,700 cases in 2007 and 2008 respectively. The reduced coverage was registered in Central, Coast, Eastern, Rift Valley and Western

provinces. The National FIC rate worsened from 73 per cent in 2007 to 71 per cent in 2008. North Eastern Province registered the highest coverage rate while Coast Province registered the lowest.

3.25. Table 3.19 shows the incidence of the top ten diseases causing morbidity in the country between 2004 and 2008. Malaria accounted for about 32.8 per cent of all the disease cases reported in 2008, while diseases of the respiratory system ranked second accounting for 24.1 per cent. The number of malaria cases reported declined significantly from 31.2 million in 2007 to 28.4 million in 2008. This could be attributed to the drought experienced in the country. Similarly, the prevalence of waterborne diseases such as intestinal worms and diarrhoea as well as pneumonia and disease of the respiratory system also declined over the same period.

**Table 3.19: Incidence of Diseases Causing Morbidity in Kenya, 2004 - 2008**

**Other Social Services** 3.26. **National Youth Service (NYS):** Table 3.20 gives details of recruitment and income earned between 2004 and 2008 by the National Youth Service. In 2008, the recruitment of service men increased by 87.8 per cent while that of service women more than doubled. Income earned by both service men and women declined by 21.4 per cent from KSh 54.0 million in 2007 to KSh 42.4 million in 2008. The decrease on the income earned was due to lost man hours during the post election violence period.

**Table 3.20: National Youth Services Recruitment and Allowances, 2004-2008**

Year	Recruitment (Numbers)			Income Earned ( KSh Million)
	Service Men	Service Women	Total

**3.28. Adult Education:** Details of enrolment for adult learners by province and gender are shown in Table 3.22. Overall, the number of adult learners enrolment rose from 118,264 in 2007 to 179,598 in 2008, an increase of 51.9 per cent. Enrolment was higher for female adult learners in all the provinces except in Nairobi and North Eastern. Over the three year period, male enrolment had an upward trend due to enhanced publicity and advocacy.

**3.29.** Table 3.23 gives annual evaluation of adult learners in literacy proficiency test passed from 2006 to 2008. The number of learners who passed proficiency test declined from 18,031 in 2007 to 15,825 in 2008. Similarly, the number of private candidates registered for the KCPE declined by 16 per cent to 12,534 candidates in 2008 as reflected in Table 3.24. More males than females registering for private KCPE examinations in most provinces.

**3.30. Gender:** The formation of women groups in Kenya as a strategy to empower women has benefited communities at the grassroots level through income generating activities. Women groups represent the primary decision-making forums for women in Kenya. Table 3.25 shows the number of registered women groups, membership, contributions, Government of Kenya grants to women groups and women enterprise funds. The number of registered women groups increased by 1,729 to 140,482 in 2008. Women group membership increased by 1.2 per cent from 5,417.9 thousand in 2007 to 5,484.3 thousand in 2008, while women groups' contributions rose from KSh 544.6 million in the year 2007 to KSh 547.3 million in 2008. Government grants doubled from KSh 40.1 million in 2007 to KSh 80.0 million in 2008. This increase could be attributed to the large number of women groups requesting the grants from the Department of Gender and Social Development and the establishment of Social Protection Fund within the Department for individual poor women.

**Table 3.25: Registered Women Groups by Membership, Contributions and GOK Grants, 2004 to 2008**

**3.34.** The Women Enterprise Fund was initiated by the Government in December 2006 as a strategy to address poverty reduction through socio-economic empowerment of women. The Government has set aside KSh 315 million in the 2008/09 compared to KSh 1.0 billion in the 2007/08 for Women Enterprise Fund.

**3.35. Decision Making:** Table 3.26 gives details of decision making in selected public offices. In all the categories, women representation is less than the 30 per cent stipulated in the affirmative action. Overall, the proportion of female public officers in selected public offices increased from 13.1 per cent in 2006 to 15.4 per cent in 2008. The cadre of deputy secretary and diplomatic corps has women forming 26.4 and 27.5 per cent shares respectively. Generally, there was an increase of 10.2 per cent of women representation at all levels in 2008 compared to 2006 as shown in Figure 3.4.

## Chapter 4

### Employment, Earnings and Consumer Prices

**Overview** The slow economic growth in 2008 adversely affected employment creation. The number of new jobs created by the domestic economy declined from 485.5 thousand jobs in 2007 to 467.3 thousand jobs in 2008. In particular, the new jobs created in the modern private sector declined from 74.0 thousand to 23.8 thousand within this period. The annual average inflation rate almost tripled from 9.8 per cent in 2007 to 26.2 per cent in 2008, a record high since that of 28.8 per cent in 1994. Underlying inflation, which excludes food items from the Consumer Price Index (CPI) basket, increased from 5.7 per cent in 2007 to 11.1 per cent in 2008. This was mainly due to high prices of petroleum products and electricity. The high annual average inflation rate reduced real average earnings by 16.2 per cent in 2008.

**Employment** 4.2. Table 4.1 gives a summary of total number of persons employed in various sectors of the domestic economy during the period 2004 to 2008 excluding small scale farming and pastoralist activities. In 2008, total employment registered a decelerated growth of 4.9 per cent from 5.4 per cent to stand at 9,946.2 thousand. In the same period, 33.7 thousand new jobs were created in the modern sector wage employment, down from 52.2 thousand in 2007. The modern sector employment contributed 20.2 per cent of total jobs in 2008. The informal sector which constituted 79.8 per cent of total employment, continued to form the bulk of total jobs created providing an additional 433.5 thousand new jobs, same levels as those created in 2007. In the same period, the total number of self employed and unpaid family workers within the modern sector remained at the same level of 2007.

**Table 4.1: Total Recorded Employment<sup>1</sup>, 2004 - 2008**

<sup>1</sup> Figures refer to employment stock as at 30<sup>th</sup> June and excludes small scale farming and Pastrolist activities.

<sup>2</sup> Estimated

**Modern Sector** 4.3. Table 4.2 gives an analysis of modern wage employment by industry and sector for the period 2004 to 2008. During the period under review, the private sector employment growth decelerated from 6.1 per cent in 2007 to 1.9 per cent in 2008. The public sector, on the other hand, reversed its steady decline to record a modest growth of 1.6 per cent in 2008 from a negative growth of 3.4 per cent in 2007.

**4.4. Private Sector:** In 2008, the leading industries providing wage employment were; community social and personal services; agriculture and forestry, and manufacturing with contribution of 23.5, 22.2 and 18.2 per cent, respectively. Wage employment in the manufacturing sector, however, declined by 0.4 percent while a marginal increase of 0.2 per cent was recorded in agriculture and forestry. The decline in the manufacturing industry can partly be attributed to the scaling down and closure of firms in the garment sub-sector of the Export Processing Zones (EPZs) where employment contracted by 8.0 per cent. Community, social and personal services industry, provided 7.9 thousand new jobs in 2008. The transport and communication industry registered a significant drop in growth from 29.6 per cent in 2007 to a paltry 2.1 per cent in 2008. Building and construction posted improved performance from 5.7 per cent in 2007 to 6.0 per cent in 2008. This was occasioned by continued public spending in the industry especially in the construction of roads and private sector real estate construction. Overall, most industries registered reduced growth which can partly be attributed the effects of the 2008 post election violence and the global economic down turn.

**4.5. Public Sector:** This sector which has been registering negative growth since 2004 recovered to post a marginal growth of 1.6 per cent in modern wage employment as reflected in Table 4.2. Most industries in the public sector recorded marginal growths in 2008. Building and construction; and finance, insurance, real estate and business services industries, however, registered declines of 1.0 per cent and 0.7 per cent, respectively.

4.6. Figure 4.1 shows the number of new jobs created in the modern sector wage employment for the period 2004 to 2008. As illustrated in the figure, the jobs created by the private sector declined sharply from 74.0 thousand in 2007 to 23.8 thousand in 2008, same level as those created in 2002. On the contrary the public sector wage employment recovered from a loss of 21.8 thousand jobs in 2007 to create 9.9 thousand new jobs in 2008, the first positive growth since 2003.

Figure 4.1: New Wage Employment in the Modern Sector, 2004 - 2008

4.7. The employment scenario in various public sector domains is presented in Table 4.3. The Teachers Service Commission (TSC) which is the largest employer in the sector registered a 0.9 per cent growth in employment in 2008 compared to that of 0.6 per cent in 2007. Employment in the Central Government continued on an upward trend registering a growth of 2.4 per cent same level as that of 2007. This was on account of continued recruitment in the civil service. Both parastatal bodies and institutions with majority control by the public sector reversed their declining trend to register modest growth of 2.3 per cent each. Employment in Local Authorities which had been on a declining trend since 2006 also registered a marginal growth of 0.5 per cent in 2008 compared to a 3.6 per cent decline in 2007.

4.9. Table 4.5 presents wage employment in major urban centres by selected industries. Over the five year period, 136,400 jobs were created in urban areas, reflecting a 14.3 per cent increase from 2003. The largest share of wage employment was contributed by the city of Nairobi followed by Mombasa both having a combined share of 60.2 per cent. The transport and communications industry registered the highest growth in percentage terms while Manufacturing had the least growth over the period for the selected industries. Community, social and personal services and manufacturing continued to be the most dominant industries with wage employment of 394,700 persons and 243,000 persons respectively, in 2008.

<sup>1</sup> Urban centres refer to towns which had a population of 2000 or more persons in 1989.

4.10. As shown in Table 4.6, males in modern sector wage employment accounted for 69.8 per cent of the total wage employment in 2008. There was a slight decline in the wage employment for males in the manufacturing industry while other industries showed marginal growth in both sexes. Inter-sectoral comparison shows that agriculture and forestry, and manufacturing engaged the largest number of males accounting for 18.7 per cent and 16.0 per cent of total males engaged, respectively. On the other hand, educational services had the largest number of females engaged accounting for 27.2 per cent of total females engaged in the modern sector wage employment. Overall, casual employment registered a growth of 13.3 per cent and accounted for 32.2 per cent of total wage employment. Levels of regular employment dipped by 2.9 per cent, reflecting employers' preference of hiring casual employees during the period under review.

**Wage** 4.11. Total wage payments by industry and sector are presented in Table 4.7. The  
**Earnings in** nominal wage bill rose by 10.3 per cent from KSh 656,777.4 million in 2007 to KSh  
**the Modern** 724,220.4 in 2008. The public sector wage bill increased by 11.0 per cent from KSh  
**Sector** 203,130.1 million in 2007 to KSh 225,426.3 million in 2008. The private sector registered a growth of 10.0 per cent, lower than the 14.6 per cent rise registered in 2007. This may be attributed to increased use of casual labourers whose pay is usually lower than that of regular employees.

4.12. Total wage payment in the public sector by various domains is summarised in Table 4.8. The wage bill for the Teachers Service Commission (TSC) which has the highest contribution to the total public sector wage bill, rose by 9,011.4 million in 2008. The Central Government, parastatal bodies and institutions of majority control by the public sector all had their wage bills increase by about 9 per cent each. Local Government had the smallest increase in absolute terms of 2,446.3 million in 2008.

<sup>1</sup> Refers to position as at 30<sup>th</sup> June, but the June figures are annualised by multiplying by 12 for earnings.

<sup>2</sup> Refers to Government wholly-owned corporations.

<sup>3</sup> Refers to institutions where the Government has over 50 per cent shareholding but does not fully own them.

4.14. Table 4.10 presents percentage changes in wage employment and average earnings for the period 2003/2008 and 2007/2008. During the five year period, total wage employment rose by 12.1 per cent with wage employment in the private sector rising by 22.1 per cent and that of the public sector declining by 3.2 per cent. The increase of 1.9 per cent in the private sector wage employment in the period 2008/2007 was however lower than the average growth of 4.1 per cent over the five year period. In the public sector, only the Central Government and Teachers Service Commission

showed a slight increase in employment of 0.9 per cent each over the five year period. Local Government, parastatal bodies and institutions where Government has majority control all recorded a decline in employment. Over the same period, the private sector, Transport and Communication industry indicated the largest increase of 144.5 per cent.

4.15. Annual average earnings in the economy have risen by 49.2 per cent over the five year period with public sector earnings rising by 57.0 per cent compared to 44.2 per cent of the private sector. In the public sector, employees in the Local and Central Government had the highest increases of 85.4 and 75.0 per cent, respectively whereas the lowest increase of 47.5 per cent was recorded in the parastatal bodies. Increase in the earnings of the various industries in the private sector ranged from 21.3 per cent to 57.4 per cent.

4.16. Tables 4.11 and 4.12 present estimated real average earnings per employee and changes in wage, prices and real earnings, respectively, for the period 2004 to 2008. Real earnings which show the extent to which inflation affects workers' earnings are deflated from nominal average earnings using the consumer price index. In the private sector real average earnings declined from KSh 157,357.8 in 2007 to KSh 131,415.2 while the public sector decline from KSh 143,781.9 and KSh 121,520.8 in 2008. Overall, real average earnings fell by 16.2 per cent in 2008.

**Employment in the Informal Sector** 4.17. The informal sector represents an important part of the economy and labour market, and also plays a vital role in employment creation, production and income generation. As introduced by the International Labour Organization (ILO) Mission to Kenya in 1972, the sector is characterised by ease of entry, reliance on indigenous resources, family ownership, small scale operations; labour intensive and adaptive technology, skills acquired outside the formal sector unregulated and competitive markets. The working environment in the sector lacks the desired ‘decent job’ conditions and is now one of the major challenges to policy makers.

4.18. Table 4.13 presents the number of persons engaged in the informal sector. Most of the informal sector activities are based in the rural areas which are estimated to absorb 61.0 per cent of the informal sector employment. In 2008, Nairobi province accounted for 24.5 per cent and had the highest informal sector employment of 1,943,300 persons. Rift Valley Province followed with 1,496,800 persons and a share of 18.9 per cent of the total informal sector employment. North Eastern Province had the least number of informal sector employees. Notably, the sector has witnessed a declining trend in employment growth rate over the five year period.

**Table 4.13: Number of Persons Engaged in the Informal Sector by Province, 2004- 2008**

4.19. The distribution of employment in the informal sector by activity is presented in Table 4.14. Wholesale and Retail Trade, Hotels and Restaurants sector continued to absorb the highest number of employees accounting for 59.4 per cent of total employment while manufacturing accounted for 20.7 per cent. Thus, the two sectors jointly accounted for over 80.0 per cent, of the total employment in the informal sector.

### Developments in the Labour Market

**Launch of Labour Institutions** 4.20. As a result of the enactment of new labour laws in 2007, the Government launched the following new institutions in the labour market: The National Labour Board, the General Wages Council, the Agricultural Wages Council, the Rules Board of the Industrial Court and the Occupational Health and Safety Council. These institutions are expected to spearhead dialogue and enhance sound labour relations in the country, in addition to addressing emerging challenges related to productivity, job creation and safe working environment.

**Review of the Mandatory Retirement Age for Public Servants** 4.21. Over the years the public sector has continued to lose productive employees particularly those in the professional and technical areas as a consequence of retirement age being set at 55 years. In order to address this challenge and in the spirit of harmonizing the retirement age applicable to the EAC countries, the Government raised the mandatory age for all Public Servants from 55 years to 60 years with effect from 1<sup>st</sup> April, 2009. The provisions in the Pensions Act Cap 189, various Pension Schemes and other Policy Guidelines governing the Civil Service, Disciplined Services, Teachers, State Corporations, Public Universities and the Armed Forces regarding compulsory and voluntary retirement are yet to be revised.

**Wage Awards and Registered Collective Bargaining Agreements** 4.22. The national incomes policy has been useful in guiding industrial relations and cultivating harmony within the labour market. Its objectives among others are to: assure wage earners a reasonable share of the national income, promote a harmonious and just relationship between employers and workers, and be responsive to the demands of the economy. In 2008, the Basic Statutory Minimum wages were not increased reflecting the Government's change of policy on annual increase on minimum wages. The last revision of these wages was in 2006. It is proposed that future wage guidelines be pegged on productivity gains, the ability of the economy to sustain increased labour costs and cost of living compensation factor. Tables 4.15 and 4.16 present the prevailing minimum wages in the agricultural sector and the non-agricultural sector, respectively.

4.23. In line with the policy of harmonisation of terms and conditions of service in the public service, the Government introduced full banding of civil service salaries in July, 2005. The final phase of the implementation of full banding was effected in July, 2008 for officers in Job Groups 'A' to 'L', giving an average salary increase of 11.0 per cent.

## Chapter 4: Employment, Earnings and Consumer Prices

The minimum monthly salary for officers in Job Group 'A' rose from KSh 7,466 to KSh 7,619 while those in Job Group 'L' increased from KSh 25,491 to KSh 30,472.

4.24. The Industrial Court has jurisdiction to register collective bargaining agreements negotiated between representatives of employers and workers in order to improve terms and conditions of employment. As presented in Table 4.17, the number of collective bargaining agreements registered by the Court declined to 297 in 2008 from 317 in 2007. However, the number of unionisable employees covered by the agreements

increased from 61,251 in 2007 to 82,612 in 2008. The majority were in agriculture, hunting and fishing sector which represented 48.4 per cent of the total unionisable employees. The average monthly basic salary offered in 2008 was KSh 14,621.60 while the monthly basic house allowance on average was KSh 3,138.

**Consumer Price Index** 4.25. The overall annual rate of inflation, computed as a percentage change in the Consumer Price Index (CPI) over two consecutive 12 month periods, increased from 9.8 per cent in 2007 to 26.2 per cent in 2008. Table 4.18 shows annual inflation rates for the different income groups in Nairobi and for the rest of urban areas over the last five years. In 2008, inflationary pressures were almost twice as much for both the Nairobi lower income group and the rest of urban areas compared to the Nairobi middle/upper income category of the population.

4.26. The increase in overall inflation was mainly attributed to high food prices arising from the high cost of agricultural inputs, the post election violence that disrupted production and distribution of goods and services in the early part of 2008, the global economic turmoil and global food shortages.

4.27 Underlying inflation which excludes food items from the CPI basket increased from 5.7 per cent in 2007 to 11.1 per cent in 2008. This was mainly due to high prices of petroleum products and electricity among other non-food items.

**Table 4.18: Annual Inflation Rates, 2004-2008**

Income Group	2004	2005	2006	2007	2008
Nairobi Lower Income Inflation.....	14.4	11.7	19.6	9.4	27.9
Nairobi Middle/Upper Income Inflation ...	8.0	10.1	6.5	7.1	14.0
Nairobi Inflation ... ..	13.2	11.4	17.3	9.1	25.7
Rest of Urban Towns Inflation ...	10.6	9.6	12.6	10.2	26.6
<b>Kenya Inflation Rate... ..</b>	<b>11.6</b>	<b>10.3</b>	<b>14.5</b>	<b>9.8</b>	<b>26.2</b>

I: The Nairobi composite index is weighted as 0.8 for lower income group and 0.2 for middle/upper income group while Kenya composite index is weighted as 0.399 for Nairobi and 0.601 for rest of Urban Towns.

II: The lower income group comprises households with monthly expenditure below KSh 10,000 in October 1997

III The middle/upper income group comprises households with monthly expenditure above KSh 10,000 in October 1997

4.28. Tables 4.19 to 4.23 show a five year series of the CPI for the Nairobi lower, middle/upper, Nairobi combined, rest of urban areas and the whole Kenya combined. In general, relatively higher CPI which translated to higher inflation rates were recorded for all categories and for all the months in 2008 compared to 2007.

4.29. The annual average CPI for Nairobi lower income group rose from 240.85 in 2007 to 308.12 in 2008 giving rise to an annual inflation of 27.9 per cent as shown in Table 4.19. In 2008, the highest CPI of 332.13 was recorded in December for this income group while the lowest of 285.03 was observed in January. Table 4.20 shows an average annual CPI of 179.13 in 2007 and 204.12 in 2008 for the Nairobi middle/upper income groups. This translates to an annual inflation of 14.0 per cent. The monthly CPI for this income group ranged from 191.28 in January to 212.35 in December. Similarly, Tables 4.21, 4.22 and 4.23 give the average annual CPI for Nairobi combined, rest of urban and for the whole Kenya combined respectively.

## Chapter 4: Employment, Earnings and Consumer Prices

4.30. As indicated in Table 4.24, the annual average CPI for food and non-alcoholic drinks rose from 281.84 in 2007 to 381.19 in 2008. This represents an annual food inflation of 35.3 per cent. Food accounts for more than half of the weight of the overall CPI basket and hence movements in the food prices contributed greatly to the upsurge in the overall inflation.

4.31. Overall, the price of food items increased tremendously in 2008. The average cost of a 2 Kg packet of maize flour rose by 42.4 per cent from KSh 49.49 in 2007 to KSh 70.47 in 2008. The price of beans went up by 49.3 per cent from an annual average of KSh 45.64 per Kg in 2007 to KSh 68.16 in 2008. The price of rice rose by 45.8 per cent from an average of KSh 45.83 per Kg to KSh 66.82 over the two periods. Kales (Sukuma wiki) price increased by 31.1 per cent, Irish potatoes by 29.5 per cent and beef with bones by 19.1 per cent.

4.32. Figure 4.2 shows the inflation rates by broad commodity groups in 2008. All the nine non-food broad commodity groupings recorded significant rises in their respective indices. These high non-food prices similarly resulted in more than doubling of the underlying inflation rates for the year 2008 compared to 2007.

**Figure 4.2: Inflation Rates by Broad Commodity Groups**

## Chapter 5

### Money, Banking and Finance

**Overview** The monetary policy in 2008 was aimed at guarding against incipient inflationary pressures and thereby providing for a stable macroeconomic environment for implementation of projects under the Vision 2030 framework. The Government through the Central Bank of Kenya (CBK) sought to consolidate and sustain monetary policy reforms that would ensure that monetary expansion remained consistent with the principle objective of low and stable inflation. In order to deliver on this objective the CBK implemented monetary policy through the use of reserve money as an operational target and money supply as an intermediate target. Consequently, reserve money was projected to grow by 15.4 per cent while broad money supply, M3, was targeted to expand by 16.0 per cent by December 2008. The statutory minimum requirements for commercial banks' liquidity ratio remained at 20.0 per cent of their deposit liabilities. The Central Bank Rate (CBR) was revised upwards from 8.75 per cent to 9.00 per cent in June 2008 before being lowered to 8.5 per cent in December 2008. Similarly the cash ratio requirement was lowered from 6.0 per cent to 5.0 per cent to ease liquidity problems in the market.

#### Monetary Indicators and Aggregates

5.2. Table 5.1 presents monetary indicators for the period 2004 - 2008. Net Foreign Assets increased from KSh 256.7 billion in December 2007 to a peak of KSh 292.7 billion in June 2008 before closing the year at KSh 260.5 billion. Total domestic credit increased from KSh 670.8 billion in December 2007 to KSh 827.4 billion in December 2008. Credit advanced to private enterprises and Government increased by 24.5 per cent and 18.8 per cent respectively in December 2008. Broad money supply, M3, expanded from KSh 777.6 billion to KSh 901.1 billion over the same period. Liquidity in the commercial banks and advances to deposits ratio both fluctuated in 2008 standing at 39 per cent and 73 per cent in December 2008, respectively.

<sup>+</sup> Some figures have been revised

5.3. Money supply aggregates for the period 2004-2008 are presented in Table 5.2. Overall liquidity, comprising money supply M3 and non-bank holdings of government securities, increased to KSh 1,091.9 billion in December 2008 from KSh 971.6 billion in December 2007, while narrow money supply M1 and broad money supply M2 increased to KSh 392.8 billion and KSh 766.4 billion respectively over the same period. However, quasi-money supply in Non-Bank Financial Institutions (NBFIs) declined to KSh 13.5 billion in December 2008 from 14.3 billion in December 2007.

### **Consolidated Accounts of the Banking System**

5.4. Table 5.3 presents consolidated accounts of the banking system for the period 2004-2008. Total assets/liabilities grew by 17.3 per cent to KSh 1,088.0 billion in December 2008 from KSh 927.5 billion in December 2007. Quasi money deposits in commercial banks increased significantly rising by KSh 78.8 billion from KSh 281.6 billion in December 2007 while demand deposits grew by KSh 21.9 billion over the same period. Currency outside banks declined in 2008 to close at KSh 93.9 billion from KSh 96.1 billion in 2007. The holdings of Government securities by the non-bank public increased marginally during the first quarter of 2008 but declined to close the year at KSh 190.9 billion down from KSh 193.6 billion in December 2007. The growth in commercial banks assets is associated with increases in net foreign assets, credit to Central Government and credit to private sector.

**Notes:**

(a) Broad Money, M2, is money supplied by the Central Bank, Commercial Banks and NBFIs.

The items include currency outside banking institutions, deposits held by non-banking institutions with Central Bank, all deposits as well as certificates of deposits held by the private and other public sectors with banking institutions. Excluded are

(b) Broad Money, M3, comprises M2 and foreign currency holdings by residents.

(c) Broad Money, L, comprises M3 and Government Security holdings by the non-bank public.

(d) Other Items Net Includes SDR allocated by IMF.

(e) Net Foreign Assets includes Government reserve position in the IMF and deposits with crown agents.

**Sources of Changes in M3 and Real Values of Selected Financial Aggregates** 5.5. Changes in money supply and their sources are presented in Table 5.4. Quasi-money deposits with NBFIs expanded by KSh 1,385.0 million in 2008 compared to a change of KSh 764.0 million in 2007. The main source of change in the money supply was driven by domestic credit to private sector and Government. In 2008, credit to private sector increased by KSh 133.4 billion compared to KSh 72.6 billion in 2007 while those to Government increased by KSh 25.8 billion compared to an increase of KSh 2.4 billion in 2007. Overall domestic credit grew by KSh 156.6 billion in 2008 compared to a growth of KSh 70.8 billion in 2007. Net foreign assets increased marginally by KSh 3.8 billion in 2008 compared to an increase of KSh 47.2 billion in 2007.

5.6. Table 5.5 highlights the trends in the real value of selected financial aggregates between 2004 and 2008. The real value of highlighted aggregates declined by various proportions in 2008 compared to 2007. The real value of broad money supply M3, declined by 14.1 per cent to KSh 294.2 billion in 2008 from KSh 342.6 billion in 2007. Overall liquidity (L) declined by 16.7 per cent to KSh 356.5 billion in 2008 from KSh 427.9 billion in 2007. Similarly, total liabilities of the banking systems and non-bank financial institutions (NBFIs) declined by 13.1 per cent and 16.5 per cent, respectively during the period under review.

<sup>1</sup>Deflated by Consumer Price Index for the month of December

**Nominal and Real Interest Rates** 5.7. Table 5.6 presents principal interest rates for the period 2004 - 2008. In June 2008, all selected interest rates increased as compared to end of December 2007. In December 2008, the average interest rates for the 91-day treasury bills, loans and advances for commercial banks and overdraft, rose by 1.72, 1.40 and 1.55 percentage points, respectively from the 2007 levels. Central Bank Rate (CBR) was revised downwards to 8.5 per cent in December 2008 from 9.0 per cent maintained earlier. Declines in repo rate, interbank rate and interest on savings deposits for commercial banks were observed over the review period. Commercial banks interest rates on savings deposits declined from 1.67 per cent in December 2007 to 1.65 per cent in December 2008. Commercial bank lending rates for loans and advances increased from 13.32 per cent to 14.87 per cent over the same period. The spread between interest on loans and advances and average deposits increased from 9.00 percentage points in 2007 to 9.98 percentage points in December 2008.

<sup>1</sup>Bank Rate introduced in 2006

<sup>2</sup>Weighted average commercial bank interest rates

5.8. Due to high inflation experienced in 2008, negative real interest rates were recorded as shown in Table 5.7. The average real interest rate for 91-day treasury bills dropped from negative 5.1 per cent in 2007 to negative 19.1 per cent in 2008 while commercial banks savings deposit moved from negative 10.3 per cent to negative 26.1 per cent over the same period. Similarly, real interest for the interbank rate and commercial banks loans and advances worsened to negative 21.0 per cent and negative 12.9 per cent in 2008 from negative 5.0 per cent and 1.3 per cent, respectively in 2007.

**Table 5.7: Trends in Real Interest Rates 2004 - 2008**

				Per cent
	Year	Nominal Interest	Inflation Rate	Real Interest <sup>1</sup>

	2008	6.7	27.7	-21.0

<sup>1</sup>Nominal interest rate minus inflation rate, gives the appropriate measure

5.9. In 2008 assets/liabilities of CBK declined marginally from KSh 291.3 billion in 2007 to KSh 287.6 billion as indicated in Table 5.8. On the assets side, there were increases in special drawing rights, other investments, and direct advances and overdraft facility to the Kenya Government. Liabilities in terms of the capital and general reserve fund increased from KSh 9.3 billion in 2007 to KSh 14.3 billion in 2008. Open Market Operations (OMO) repo sales declined to KSh 4.0 billion from KSh 10.1 billion in 2007 while deposits of Kenya Government at the CBK declined from KSh 76.2 billion in 2007 to KSh 50.1 billion in 2008.

**Central Bank's Balance Sheet** 5.10. Table 5.9a presents commercial banks' bills, loans and advances for the period 2004-2008. Total bills, loans and advances by commercial banks grew by 25.6 per cent to KSh 641.8 billion in 2008 from KSh 510.8 billion in 2007. Notably, bills, loans and advances to the Central Government declined to KSh 332 million in 2008 from KSh 1,083 million in 2007 while those to Local Government increased from KSh 973 million in 2007 to KSh 1,478 million in 2008.

<sup>1</sup> Excludes portfolio investment by private enterprises and bank deposits placed with non-bank financial institutions

**Commercial Banks' credit and liquidity** 5.11. Bills, loans and advances by commercial banks to private enterprises increased by 30.0 per cent from KSh 383.4 billion in 2007 to KSh 498.6 billion in 2008. Credit to enterprises in mining and quarrying, trade, other businesses and manufacturing increased significantly by 72.0 per cent, 53.9 per cent, 39.6 per cent and 38.6 per cent, respectively in 2008 compared to 2007. However, credit to financial institutions and; building and construction enterprises declined by 25.4 per cent and 7.4 per cent, respectively over the review period.

5.12. The trend of sectoral shares of bills, loans and advances by commercial banks for the period 2004-2008 is presented in Table 5.9b. Share of credit to public sector by commercial banks declined by 0.6 percentage points to 2.2 per cent in 2008 while that to private sector increased to 77.7 per cent from 75.1 per cent in 2007. Private enterprises which recorded increased share of credit in 2008 compared to 2007 included; mining and quarrying, manufacturing, trade and other business enterprises.

5.13. Deposit liabilities and liquid assets for commercial banks for the period 2004-2008 are presented in Table 5.10. Deposit liabilities held by commercial banks increased by 20.4 per cent from KSh 687.3 billion in December 2007 to KSh 827.5 billion in December 2008. The liquidity ratio fluctuated during the review period attaining a maximum of 45 per cent in June 2008 before declining to 39 per cent by December 2008.

**Source:** Central Bank of Kenya.

<sup>1</sup>Deposits and Liquid Assets are calculated as an average of three days balances.

<sup>2</sup> Includes notes and coins, balances at Central Bank, net inter-bank balances in Kenya and Overseas (included only if positive) and Treasury Bills.

<sup>3</sup>The ratios given in this column are not quite consistent with figures in the other two columns because of the inclusion of certain other minor items in the denominator.

**Consolidated Balance Sheet for Non-Bank Financial Institutions** 5.14. Table 5.11 presents assets and liabilities of Non-Bank Financial Institutions (NBFIs) for the period 2004-2008. Total assets and liabilities of NBFIs grew by 22.3 per cent from KSh 27.4 billion in 2007 to KSh 33.5 billion in 2008. Deposits by Central and Local Governments increased significantly from KSh 1.0 million in 2007 to KSh 542.0 million in 2008 mainly due to deposits accruing from the civil service housing scheme. NBFIs assets held by the private sector also increased to KSh 21.0 billion in 2008 from KSh 16.5 billion in 2007. The increase in assets and liabilities of NBFIs could be attributed to an increase in demand for housing and a consequent rise in demand for mortgage financing.

## Capital Market Indicators

5.15. Table 5.12 highlights the performance of the capital market for the period 2004-2008. The Nairobi Stock Exchange (NSE) experienced a downturn in 2008 with the NSE 20 share index losing 1,924 points by the end of 2008. It is however notable that capitalization in the equities market rose to over one trillion Kenya Shillings following the Initial Public Offer (IPO) of safaricom shares in the second quarter of 2008 but declined to KSh 854 billion at the end of the fourth quarter. The total bond turnover rose by 12.4 per cent to KSh 95.4 billion in 2008 compared to KSh 84.9 billion in 2007.

<sup>1</sup>-as at end of period

**Banking Subsector**

**Develop-  
ments  
in the  
Financial  
Sector** 5.16. The Kenyan banking system comprises of 43 commercial banks, two mortgage finance companies and 121 foreign exchange bureaus. Despite an increasingly challenging operating environment following the post election violence and the global credit crisis, the banking sector displayed unexpected resilience, reporting high levels of profit and asset growth during 2008. The banks continued to record growth in earnings spurred by robust loan book expansion and increased foreign exchange (FX) income albeit higher impairment charges.

5.17. As a cushion against the global recession, the CBK in December 2008 reduced both the CBR and the cash ratio from 9.0 per cent to 8.5 per cent and from 6.0 per cent to 5.0 per cent, respectively. This was intended to enhance liquidity in the banking system as well as foster growth during the recovery period. In addition, the CBK reduced the Treasury bill bid threshold to KSh 100 thousand from KSh 1 Million effective 1<sup>st</sup> January 2009. This was intended to enable the small savers/investors diversify their financial asset portfolio.

5.18. During the year under review, the total capital to total risk weighted asset ratio for the sector stood at 18.1 per cent above the statutory minimum requirement of 12.0 per cent. The proportion of gross non-performing loans to gross loans stood at 8.4 per cent in December 2008.

5.19. In the microfinance sub-sector, the regulatory framework was finalized and became operational in May 2008. Following the enactment of the Microfinance Act, the CBK approved thirteen business names in the microfinance subsector. Two other applications for deposit taking microfinance business were also being processed. These actions are considered a commendable step in improving access to financial services.

**Develop-  
ments in  
the Capital  
markets** 5.20. The total number of licensed players in the capital markets increased from 87 in 2007 to 97 in 2008. During the year, some policy measures were instituted through the budget aimed at deepening the capital markets. Other measures were also introduced to strengthen Capital Markets Authority (CMA) supervisory capacity, enhance corporate governance among the financial market players and reduce costs for listed companies.

5.21. The bearish performance in the Nairobi Stock Exchange (NSE) market may be attributed to the effects of global financial turmoil in an integrated global economy. The financial turmoil that gripped major world economies created a slump in the NSE with most counters recording low stock prices. Some stocks were sold below their offering price causing panic selling among retail investors. This together with the exit of foreign investors had a negative effect on the bourse. Further to this, foreign participation which historically has been of net inflows, changed to net outflows. During the year, one listed company split its share at a ratio of two shares for every one held, while four other companies announced bonus issues.

**Insurance** 5.22. Though there were proposed amendments to the Insurance Act as contained in the Finance Bill 2008, the legislation was not done during the review period. The sub sector was affected by both the post election violence and the global economic meltdown which impacted negatively on the cash flow of insurance companies. The insurance industry faced an estimated KSh 1.2 billion compensation claims arising from the post-election violence according to Association of Kenya Insurers (AKI). Some insurers compensated post election violence claims on ex-gratia basis impacting negatively on their cash flow as the claims were not backed by reserves. Over the same period, there was a rise in interest on micro insurance products. The main challenge for the insurance industry remained a stagnated growth in penetration.

**Pensions** 5.23. During the year under review, the Retirement Benefits Authority (RBA) Sub-sector licensed 16 fund managers, 6 custodians and 23 administrators to provide services to retirement schemes under the new 2007 regulations. The authority hosted the International Organization of Pensions Supervisors (IOPS) and, held both its annual meeting and a joint Global Forum on Private Pensions with the OECD in Mombasa. The conference focused on the challenges and opportunities for pension development in Africa; addressed key issues such as how to raise pension coverage for informal sector workers and encouraged the use of pension funds in infrastructure development. The IOPS Annual General Meeting witnessed the approval of a new set of guidelines for the supervisory assessment of pension funds.

5.24. In the 2008/2009 budget, requirements for the preparation of investment policy were tightened, while the maximum investment allowed under “other assets” was increased from 5 per cent to 10 per cent. Every pension scheme will now be required to have at least one member, particularly a director, who has been vetted by RBA to undertake trust services. Trustees will now be required to maintain up-to-date records of the bank accounts for their members for the purpose of payment of benefits among other requirements.

## Chapter 6

### Public Finance

**Overview** During 2008/09 financial year, the Government continued to pursue fiscal policies that emphasize on efficient coordination of financial operations thereby ensuring that public resources are utilized for the intended purposes and in the most efficient and effective way. Development of infrastructure has been identified in the 2008-2012 Medium Term Plan as a critical component of reducing the cost of production and doing business among others, thereby improving the country's competitiveness. To finance rehabilitation and expansion of the road network, enhance energy and water supply capacities, and further roll out the Information, Communication and Technology (ICT) infrastructure, the Government issued the first 12-year maturity infrastructure bond with a face value of KSh 18.5 billion in 2008/09.

**Overall Results** 6.2. The Central Government expenditure for 2008/09 is expected to be KSh 773.0 billion comprising of KSh 565.5 billion and KSh 207.5 billion in recurrent and development expenditures respectively. Total receipts (including grants) are expected to increase from KSh 468.6 billion in 2007/08 to KSh 549.6 billion in 2008/09. The stock of outstanding debt as at end June 2008 was KSh 748.5 billion comprising of KSh 335.0 billion and KSh 413.5 billion in domestic and foreign debts respectively. The total budgeted expenditure for local authorities is expected to be KSh 27.6 billion in 2008/09, compared to KSh 22.8 billion in 2007/08. Their total revenue, including Local Authorities Transfer Fund (LATF) is expected to increase marginally to KSh 22.0 billion from KSh 21.7 billion in the same period. While their locally generated revenue is expected to decline by 5.2 per cent, receipts from Central Government through LATF is expected to increase by 12.1 per cent.

6.3. A statement of Central Government operations for the last five financial years is presented in Table 6.1. In 2008/09, current expenditure and capital transfers components of expense are expected to increase by 18.3 and 17.1 per cent respectively. The net borrowing is expected to worsen from KSh 48.5 billion to KSh 118.9 billion partly due to an anticipated slower increase in revenues compared to expenditure in the review period. Total financing in the review period is expected to be KSh 108.3 billion of which net incurrence of liabilities accounts for 91.4 per cent. Expenditure on public debt repayment is expected to drop marginally from KSh 91.8 billion in 2007/08 to KSh 91.7 billion in 2008/09; the external debt redemption component is however expected to record a 30.7 per cent increase while the domestic component is expected to decrease by 7.3 per cent.

Acquisition of Non-financial assets(net)=Acquisition of Non financial assets- Gross Disposal of Non-financial assets

6.4. Analysis of key fiscal ratios from 2004/05 to 2008/09 is presented in Table 6.2. The gross operating balance as a proportion of both revenue and acquisition of non-financial assets are expected to decline further to stand at 4.7 and 17.7 per cent in 2008/09 from 5.4 and 34.3 per cent in 2007/08 respectively. The proportion of external inflows to acquisition of non-financial assets is expected to increase from 22.0 to 31.3 per cent in the review period. Revenue as a per cent of GDP at current market prices is expected to decline from 25.7 in 2007/08 to 22.3 in 2008/09 largely due to relatively higher decline in expected revenues. Government expenditure as a proportion of the GDP at current market prices is expected to decline from 35.9 per cent in 2007/08 to 31.2 per cent in 2008/09.

+ Revised Estimates

<sup>1</sup> Data series revised

6.5. Table 6.3 provides comparison between the budgeted estimates and actual out-turns of revenue and expenditure for the period between 2005/06 and 2008/09. In the year under review, the revised estimates of recurrent revenue are expected to decrease from the original printed estimates by KSh 815.6 million. Actual recurrent expenditure is expected to marginally surpass the budgeted estimates by KSh 1.9 billion while development expenditure is expected to exceed the actual out-turns by KSh 11.3 billion in 2008/09. This can be explained by a general increase in allocation of funds towards infrastructure development especially expenditure on roads construction and geothermal exploration.

6.6. Details of Government receipts for the fiscal period between 2004/05 and 2008/09 are presented in Table 6.4. Reforms in tax administration instituted by the Government continue to yield benefits, with the total receipts expected to rise by 16.4 per cent from KSh 443.1 billion in 2007/08 to KSh 515.8 billion in 2008/09. All categories of tax revenue are expected to increase except taxes on “use of goods and on permission to use the goods or to perform services and activities”, which is expected to decline by 6.8 per cent to KSh 3.0 billion during the review period. Income tax (PAYE), corporate tax, Value Added Tax (VAT) and excise duty are expected to rise by 18.1, 16.7, 16.4 and 13.4 per cent in 2008/09 respectively. Taxes on income, profits and capital gains, VAT, excise duty and taxes on international trade transactions accounted for 37.6, 26.0, 14.1 and 10.1 per cent of the total receipts in 2008/09.

6.7. Table 6.5 presents import duty collection for selected commodities categorized by end use between 2004 and 2008. Receipts from import duty registered a 6.3 per cent increase in 2008 from KSh 27.6 billion in 2007. The highest increase in receipts was recorded in fuels at 32.6 per cent followed by chemicals at 20.8 per cent. On the other hand, metals, textiles, and food, drinks and tobacco recorded declines in receipts of 6.3, 2.7 and 2.4 per cent respectively.

<sup>2</sup> Data presented in this table refer to calendar years

6.8. Revenue collection from excise duty for some selected domestically manufactured commodities for the period between 2004 and 2008 are presented in Table 6.6. Excise revenue collection in 2008 improved by 12.2 per cent to stand at KSh 22.1 billion, compared to KSh 19.7 billion in 2007. Beer and cigarettes remained the major source of excise revenue contributing 50.2 and 29.8 per cent of the total excise revenue respectively in 2008. Revenue from wines and spirits registered the highest growth of 84.1 per cent in excise receipts, followed that from mineral water at 39.6 per cent. The slow growth rate of receipts from cigarettes may be attributed to reduced consumption following a ban on smoking in public places instituted by some local authorities.

<sup>2</sup> Includes revenue from jewellery, cosmetics and locally assembled vehicles.

6.9. Details of Central Government financing on acquisition of non-financial assets during the period between 2004/05 and 2008/09 are presented in Table 6.7. Expenditure on acquisition of non financial assets is expected to increase from KSh 73.8 billion in 2007/08 to KSh 144.5 billion in 2008/09. After recording a decline in 2007/08, financing of non-financial assets is expected to increase more than three fold in 2008/09. External loans and grants which form part of long term financing are expected to increase significantly from KSh 6.3 billion and KSh 25.5 billion in 2007/08 to KSh 25.2 billion and KSh 33.8 billion in 2008/09 respectively.

+ Estimates

<sup>1</sup> Balancing Item

6.10. Table 6.8 provides the Classification of Expenditure by Functions of Government (COFOG) for the fiscal period between 2005/06 and 2008/09. The total expenditure is expected to increase from KSh 658.1 billion in 2007/08 to KSh 773.0 billion in 2008/09. Recurrent expenditure is expected to increase from KSh 497.6 billion in 2007/08 to KSh 565.5 billion in 2008/09. Similarly, development expenditure is expected to increase from KSh 160.4 billion to KSh 207.5 billion over the same period. Allocation for economic affairs is expected to increase by 55.7 per cent predominantly due to increased allocation in agriculture and infrastructure development. Specifically, funding of the transport sector is expected to rise from KSh 45.7 billion to KSh 68.6 billion in the review period due to increased allocation for roads construction. In the energy sector, expenditure is expected to increase from KSh 13.6 billion in 2007/08 to KSh 36.0 billion in 2008/09 on account of expenditure on geothermal resource exploration, rural electrification program and expansion of the national grid. Development expenditure on agriculture more than doubled partly due to allocation for procurement of fertilizer to enhance agricultural productivity.

Figure 6.1: Proportion of Expenditure by Functions of Government (COFOG) 2008/09

6.11. Despite recording notable growth in absolute terms, the ratio of expenditure on the social services (which comprises education and health) to the total expenditure remained at 24.3 per cent as shown in Figure 6.1. In the education sector, expenditure is expected to increase by 21.4 per cent to KSh 151.7 billion in 2008/09. In this sector, tertiary institutions are expected to benefit greatly in the year under review with their funding expected to grow by 80.0 per cent to KSh 34.4 billion in 2008/09. Analogously, expenditure in the health sector is expected to rise by 19.3 per cent to KSh 36.1 billion in 2008/09 due to increased provision for hospital and public health services.

6.12. Expenditure on social protection is expected to increase by 50.3 per cent to KSh 45.0 billion in 2008/09. The increase is partly attributable to increased allocation for emergency food supplies in response to the prevailing drought, and expenditures towards relief, rehabilitation and resettlement of the Internally Displaced Persons (IDPs). The proportion of economic affairs, public debt, general public services and public order and safety sectors are 19.9, 19.0, 11.4 and 8.5 per cent in 2008/09, respectively.

\* Provisional.

+ Revised Estimates

Total Expenditure =Expense+Acquisition of Non Financial Assets(net)+ Public debt redemption

6.13. As shown in Table 6.9, total expense is expected to increase from KSh 443.3 billion in 2007/08 to 524.0 billion in 2008/09. The share of expenditure on consumption of goods and services to total expenditure is expected to decline from 39.5 per cent in 2007/08 to 37.9 per cent in 2008/09. Government spending on compensation of employees and use of goods and services is expected to increase by 10.6 and 16.9 per cent respectively. At the same time, the cost of acquisition of non-financial assets is expected to record significant growth from KSh 73.8 billion to KSh 144.5 billion. The anticipated increase in expenditure on acquisition of non-financial assets is largely as a result of higher allocation on infrastructure development such as buildings, structures and equipments. Outlays on interest payments are expected to increase from KSh 43.8 billion to KSh 56.1 billion in the period under review.

6.14. As shown in Table 6.10, the stock of outstanding public debt as at end June 2008 was KSh 748.5 billion, composed of KSh 335.0 billion owed domestically and KSh 413.5 billion owed to the rest of the world. Overall, public debt grew by 4.6 per cent in 2008 with external and domestic debt recording increases of 4.1 and 5.2 per cent respectively.

6.15. The external debt increased from KSh 397.1 billion as at end-June 2007 to KSh 413.5 billion one year later as shown in Table 6.11. The outstanding external debt owed to multilateral and bilateral sources as at end June 2008 were KSh 286.8 billion and KSh 126.7 billion respectively. Japan, France and Germany remained the main creditors, jointly accounting for 67.8 per cent of the bilateral outstanding debt. Outstanding debt owed to Japan decreased significantly from KSh 67.0 billion as at June 2007 to KSh 47.3 billion as at June 2008. The leading source of credit among the international organizations continued to be IDA/IFAD accounting for 72.1 per cent of the multilateral outstanding debt. Credit owed to ADF/ADB and IMF respectively registered absolute increases of KSh 8.3 billion and KSh 10.1 billion in 2008. Domestic debt increased for the third year running, to stand at KSh 335.0 billion in 2008. Outstanding domestic debt acquired through Treasury bills recorded a decline of 18.6 per cent from KSh 94.4 billion in 2007 to KSh 76.8 billion in 2008. Credit through treasury bonds recorded 15.8 per cent increase from KSh 272.2 billion in 2007 to KSh 315.2 billion in 2008. Marginal decline was also recorded in non-interest bearing debt from KSh 35.5 billion in 2007 to KSh 34.4 billion in 2008. Figure 6.2 shows the proportion of outstanding public debt by source.

6.16. Table 6.12 presents the Government stocks at book value by holders as at 30<sup>th</sup> June for the period between 2004 and 2008. The total outstanding stocks stagnated at KSh 0.8 billion after dropping from KSh 1.1 billion in 2006. The stagnation is associated with non-maturity of the stocks during the period. The outstanding stocks owed to NSSF accounted for over 54.2 per cent of the total stocks as at end June 2008.

6.17. Debt servicing charges for the fiscal periods between 2003/04 and 2007/08 is presented in Table 6.13. The net debt servicing charges increased from KSh 128.3 billion in 2006/07 to KSh 134.4 billion in 2007/08. The net external debt servicing charges increased by 27.5 per cent to KSh 22.8 billion in 2007/08. Net domestic debt servicing charges increased by a paltry 1.0 per cent in the same period. Receipts from loan repayments dropped by 21.3 per cent to KSh 1.3 billion in 2007/08.

<sup>1</sup> Annual debt servicing Charges = Public debt redemption (Table 6.1)+Interest (Table 6.9)

6.18. The relationship between Government debt service charges on external debt and exports of goods and services between 2004 and 2008 are presented in Table 6.14. The debt servicing charges on external debt rose from KSh 17.9 billion in 2007 to KSh 22.8 billion in 2008. Exports of goods and services increased by 20.6 per cent from KSh 475.5 billion to KSh 573.5 billion in the same period. Consequently, the debt servicing charges as a per cent of the exports of goods and services increased from 3.8 per cent in 2007 to 4.0 per cent in 2008.

<sup>1</sup> Including debt redemption, however, interest payments on drawing on IMF are excluded.

**6.19. Local Authorities:** The Central Government continued to transfer resources through the LATF mechanism to the local authorities. The fund aims at among others improving service delivery, financial management, and debt resolutions within the local authorities. As presented in Table 6.15, the Central Government is expected to transfer KSh 9.3 billion to local authorities in 2008/09 through LATF reflecting a 12.1 per cent rise. In 2008/09 the County Councils is expected to receive 46.5 per cent of the LATF funds while Municipal Councils, Nairobi City Council and Town Councils received 24.9, 18.7 and 9.9 per cent respectively. The share of funds to different categories of local authorities during the year under review was not significantly different from the levels of the previous years. Figure 6.3 presents trends of funds transferred to local authorities through LATF.

6.20. Expenditure by category of local authorities for the period between 2004/05 and 2008/09 is presented in Table 6.16. The total budgeted expenditure for all local authorities was KSh 27.6 billion in 2008/09, recording a 20.9 per cent increase from previous financial year. During the period, expenditure by the Nairobi City Council, other Cities and Municipal Councils, Towns and County Councils are expected to rise by 18.2, 21.6 and 23.0 per cent respectively. Towns and County Councils accounted for the highest proportion (35.4 per cent) closely followed by Nairobi City Council at 34.6 per cent as shown in Figure 6.4.

Figure 6.4: Proportion of Expenditure by Category of Local Authorities 2008/09

6.21. Expenditure for Municipal Councils on main services for the period between 2004/05 and 2008/09 is shown in Table 6.17. The total expenditure increased by 19.8 per cent to KSh 17.8 billion in 2008/09. Expenditure on administration accounted for 23.7 and 23.3 per cent, in 2007/08 and 2008/09 respectively. Expenditure on economic services in 2008/09 accounted for 35.0 per cent as social services and community services accounted for 21.2 and 20.5 per cent respectively. The highest growth in expenditure was recorded on community services which recorded 30.4 per cent. Similarly, expenditure on social services, administration and economic services recorded growths of 20.5, 18.0 and 15.0 per cent respectively.

<sup>1</sup> Includes Nairobi City Council

6.22. Table 6.18 depicts the economic analysis of expenditure for Municipal Councils, including Nairobi City Council from 2004/05 to 2008/09. The share of current to total expenditure is expected to decline marginally from 69.5 per cent in 2007/08 to 68.5 per cent in 2008/09. Current expenditure increased by 17.9 per cent to KSh 12.2 billion in 2008/09. Expenditure on compensation of employees remained the main expenditure item accounting for 62.1 per cent of the total current expenditure in the review period. In the same period, expenditure on use of goods and services is expected to increase by 25.8 per cent to KSh 4.4 billion. Expenditure on acquisition of non-financial assets are expected to increase by 24.0 per cent to stand at KSh 5.4 billion in 2008/09.

+ Estimates

<sup>1</sup> Includes Nairobi City Council

<sup>2</sup> Includes interest.

6.23. As shown on Table 6.19, the total revenue raised by Municipal Councils, including Nairobi City Council is expected to record a 5.2 per cent drop in 2007/08 to KSh 9.4 billion in 2008/09. The decline was reflected in both current and capital revenue. However, revenue collected from direct taxes and income from property is expected to record 4.0 and 3.3 per cent increases respectively in the review period. The increase in direct taxes is attributable to increased rates collection and contribution in lieu of rates in some local authorities. Receipts from sale of goods and services accounted for a large proportion (34.6 per cent) of current revenue for local authorities declined by 10.7 per cent.

6.24. Table 6.20 provides the economic analysis of expenditure and revenue for Towns and County Councils for the fiscal period between 2004/05 and 2008/09. The total expenditure by Town and County Councils is expected to record a 23.0 per cent increase to KSh 9.8 billion in 2008/09 compared to the previous financial year. Expenditure on compensation of employees and use of goods and services accounted for 48.0 and 43.8 per cent of the current expenditure over the same period. Expenditure on acquisition of non-financial assets is expected to register 18.3 per cent increase to KSh 2.8 billion in 2008/09. The share of expenditure on acquisition of non-financial assets to total expenditure however is expected to record a marginal drop from 30.2 per cent in 2007/08 to 29.0 per cent in 2008/09. The total revenue collection declined by 5.2 per cent to KSh 3.4 billion in the same period. Overall, decline in revenue is expected to be recorded in all major categories of receipts except for rates and income from property.

## Chapter 7

## International Trade and Balance of Payments

**Overview**

Key international trade indicators include merchandise trade balance, terms of trade, volume of trade, current account balance and overall balance of payments position. In 2008, the trade balance widened to a deficit of KSh 425,705 million from a deficit of KSh 330,454 million in 2007, a deterioration of 28.8 per cent. The export-import ratio further deteriorated from 45.4 per cent in 2007 to 44.8 per cent in 2008. As a percentage of GDP, the current account deficit excluding current transfers was 14.2 per cent in 2008 against the 7.0 per cent projected in the first medium term plan of the Vision 2030. The Kenya Shilling weakened against the US dollar to record an average exchange rate of KSh 69.18 in 2008 compared to KSh 67.32 per US dollar in 2007. These developments in the international trade are a reflection of Kenya's slowed economic performance in 2008.

7.2. In 2008, the value of domestic exports rose by 23.3 per cent while imports grew relatively faster at the rate of 27.4 per cent. The leading export earners were horticulture, tea, articles of apparel and clothing accessories, and soda ash, collectively accounting for 51.3 per cent of the total domestic export earnings. Re-exports recorded an increase of 71.8 per cent in 2008 compared to a 43.1 per cent decline recorded in 2007. The volume of trade increased by 26.8 per cent in 2008 compared to a 13.9 per cent growth in 2007.

7.3. Balance of payments position recorded a deficit of KSh 33,161 million in 2008 compared to a surplus of KSh 63,250 million in 2007. The unfavourable balance of payments out-turn was on account of decreased net capital inflows and the widening merchandise trade deficit. The current account balance deteriorated to a deficit of KSh 136,851 million in 2008 from a deficit of KSh 69,638 million the previous year. The capital and financial account recorded a surplus of KSh 81,055 million compared to a surplus of KSh 150,090 million recorded in 2007 as result of decreased inflows of foreign direct investment and short term capital inflows.

**Balance of Trade**

7.4. Table 7.1 and Figure 7.1 present details on the balance of trade from 2004 to 2008. Total domestic exports increased by 23.3 per cent as compared to a 14.7 per cent increase in 2007. The re-exports increased by 71.8 per cent in 2008 compared to a decrease of 43.1 per cent the previous year. The re-export performance can be attributed to the petroleum products and fertilizers. Total imports increased by 27.4 per cent in the year under review compared to a 16.0 per cent increase in 2007. These developments caused the trade balance to widen further from a deficit of KSh 330,454 million in 2007 to KSh 425,705 million in 2008, an increase of 28.8 per cent. Total imports grew relatively faster than exports leading to deterioration in the export/import cover ratio from 45.4 per cent in 2007 to 44.8 per cent in 2008.

## Price Changes

7.5. Presented in Table 7.2 are merchandise trade indices computed using unit prices. The overall export and import unit prices increased by 18.9 per cent and 7.6 per cent, respectively, in 2008. Export and import price indices for non-oil items rose by 15.8 per cent and 8.9 per cent, respectively, over the same period. Increases in the export unit prices were recorded in all the items except miscellaneous manufactured articles which declined by 21.1 per cent. The export price index for beverages and tobacco registered an increase of 1.2 per cent after a significant decline of 51.0 per cent in

2007.

\* Provisional

7.6. The import price indices for all the categories increased except for beverages and tobacco which deteriorated by 6.6 per cent against an increase of 31.7 per cent in 2007. The import price indices for chemicals, animals and vegetable oils and fats, and food and live animals rose by 25.3, 22.9 and 18.8 per cent, respectively. The import price indices for machinery and transport equipment, and manufactured goods increased slightly by 4.6 per cent and 4.3 per cent, respectively, in 2008.

**Terms of Trade** 7.7. Terms of trade refers to the ratio of export price index to import price index. Table 7.3 presents terms of trade for the period 2004 to 2008. Terms of trade for all items increased by 7 percentage points to stand at 77 per cent in 2008 compared to 70 per cent in 2007. Terms of trade for non-oil items increased by 6 percentage points up from 88 per cent in 2007. The improved favourable terms of trade in 2008 compared to the previous period suggest rise in the relative price of exportable to importable goods.

**Volume Changes**

7.8. Changes in the volume of trade are summarized in Table 7.4 as quantum indices. Overall, the export quantum indices for non-oil items and all items increased by 8.9 per cent and 5.4 per cent, respectively, in 2008. This is as a result of an increase in the quantum indices recorded in all the categories except mineral fuels which declined by 21.3 per cent. This decline is partly explained by a drop in the domestic export volume of mineral fuels.

**Table 7.4: Quantum Indices, 2004-2008**

7.9. The overall import quantum indices for all items and non-oil items increased by 18.5 per cent and 8.0 per cent, respectively. This was mainly due to substantial increases in import quantum indices for mineral fuels, beverages and tobacco and animal and vegetable oils and fats. The import quantum index for mineral fuels rose by 60.2 while that of beverages and tobacco increased by 40.2 per cent. The rise in mineral fuels index was as a result of volume increases in the heavy diesel oil and jet fuel.

**Quantities of Principal Exports and Imports** 7.10. Volumes of principal exports and imports from 2004 to 2008 are shown in Table 7.5. Notable decreases were recorded in export quantities of hides and skins; stone, sand and gravel, and wood manufactures which decreased by 65.2, 33.9 and 32.9 per cent, respectively. Export quantities of raw maize and unroasted coffee declined by 31.5 per cent and 24.8 per cent, respectively, partly due to the drought experienced in many parts of the country coupled with the post election violence which affected local production. Export of petroleum products which had recorded a significant increase in 2007, reduced by 67.1 per cent during the review period. This may be partly attributed to the increase of transit petroleum products to Uganda, Democratic Republic of Congo, Rwanda and Burundi. On the other hand, export quantities of horticulture and tea increased from 397,271 tonnes and 370,245 tonnes in 2007 to 414,703 tonnes and 390,003 tonnes, respectively, in 2008. Export quantities of wheat flour more than tripled, rising from 688 tonnes in 2007 to 2,286 tonnes in 2008. In the review period, export quantities of soda ash and fluorspar increased by 62.7 per cent and 47.5 per cent, respectively. This increased production was as a result of plant expansions and growing international demand.

7.11. Import quantities of unmilled maize more than doubled during the review period to supplement the local production. However, import quantities of wheat flour and unmilled wheat declined by 39.6 per cent and 4.6 per cent, respectively. Imports of crude petroleum increased by 10.9 per cent thus reversing the downward trend witnessed since 2005. Import quantities of paper and paper board, and medicinal and pharmaceutical products increased by 15.0 per cent and 11.8 per cent, respectively. The number of bicycles imported reduced significantly by 46.5 per cent in 2008. This could have been as a result of a shift in domestic demand from bicycles to motor cycles. Imports of motor cycles more than doubled during the review period.

**Values of principal exports and imports** 7.12. Table 7.6 indicates the values of principal exports and imports. During the period under review, horticulture, tea, articles of apparel and clothing accessories and soda ash were the leading export earners, collectively accounting for 51.3 per cent of the total domestic export. Export earnings from horticulture increased by 25.3 per cent from KSh 56,808 million in 2007 to KSh 71,182 million in 2008, the highest single commodity foreign exchange earner. Foreign exchange earnings from cement increased by 57.3 per cent while those from fluorspar more than doubled. On the other hand, export earnings from footwear and textile yarn reduced by 13.6 per cent and 7.2 per cent respectively. The value of petroleum products exports declined due to a drop in the export quantity of diesel and lubricating grease.

7.13. There was a general increase in the value of imported food items such as wheat, maize and rice. This may be attributed to high international food prices and prolonged drought experienced during the period under review. The value of maize imported increased by more than six times in 2008 compared to a drop of 29.4 per cent in 2007. Expenditure on refined and unrefined petroleum products accounted for 25.7 per cent of the total import bill in 2008. The expenditure on crude petroleum grew

by 65.4 per cent showing the increasing dependency on oil energy. Import value of chemical fertilizers increased by 92.5 per cent despite the decline of 6.9 per cent in the quantities imported. This is attributed to high import prices. Import value of non-ferrous metal and hand and machine tools decreased by 16.7 per cent and 19.7 per cent, respectively in 2008.

7.14. Tables 7.7 and 7.8 provide a summary of values, quantities and prices of selected exports and imports together with their percentage changes in 2007 and 2008. Despite improved export unit price of raw maize, there was a drop in the export quantities of maize leading to a decline of 16.0 per cent in its export earnings. The decline of 41.6 per cent in the export unit price of insecticides and fungicides was compensated by the significant increase in export volumes resulting into an increase of 92.3 per cent in export earnings in 2008. The 35.9 per cent increase in the export price of cement coupled with 15.8 per cent increase in export volume translated into a 57.3 per cent increase in its export earnings. The increase in the import unit price of unmilled wheat dampened the slight decline in its import quantities to register a 43.6 per cent increase in the total import expenditure. The slight increase in quantities of petroleum products imports together with a 53.6 per cent increase in its unit price caused a 59.8 per cent increase in its import value.

**Prices of principal Imports and Domestic Exports** 7.15. Unit prices of principal exports and imports are summarized in Table 7.9. Most of the commodities recorded increases in export unit prices. Export prices of coffee and tea which had posted declines in the previous year, registered growths of 29.1 per cent and 30.2 per cent, respectively, in 2008. Similarly, export unit prices of fluorspar and soda ash increased by 54.2 and 49.6 per cent respectively, during the year under review. However, export prices of insecticides and fungicides which had recorded significant growth in 2007 declined by 41.7 per cent in 2008.

7.16. Import price of petroleum products was on an upward trend, increasing by 52.8 per cent in 2008. The unit price of crude petroleum which had declined by 8.0 per cent the previous year increased by 49.1 per cent in 2008. Import unit price of chemical fertilizers more than doubled during the review period. The only commodities which registered decreases in import unit prices were wheat flour and non-ferrous metals during the review period.

<sup>1</sup> Some of the items under this heading have either varying unit of quantity or none at all, hence the blank.

**Composition of Exports** 7.17 A summary of composition of Kenya's domestic exports by Broad Economic Category (BEC) is presented in Table 7.10. Export earnings from food and beverages accounted for 40.4 per cent of the total domestic export earnings in 2008, almost the share recorded in 2007. During the period under review, the earnings from non-food industrial supplies, and fuel and lubricants accounted for 28.7 per cent and 1.4 per cent, respectively, of the total earnings from domestic exports. Export earnings from machinery and other capital equipment accounted for a paltry 1.7 per cent, while the share of transport equipment in total export revenue declined marginally to stand at 1.1 per cent in 2008.

7.18. Earnings from commodities in the non-food industrial supplies increased substantially by 38.7 per cent from KSh 66,678 million in 2007 to KSh 92,500 million in 2008. This could be attributed to the increase in the earnings from processed non-food industrial supplies which rose from KSh 53,133 million in 2007 to KSh 74,037 million in 2008. Export earnings from food and beverages increased by 23.4 per cent from KSh 105,549 million in 2007 to KSh 130,273 million in 2008. This was on account of a 24.7 per cent increase in earnings from primary food and beverages for household consumption. The export earnings from machinery and other capital equipment sub-sector increased notably by 25.8 per cent from KSh 4,426 million in 2007 to KSh 5,566 million in 2008. The value of export earnings from fuel and lubricants category declined by 48.6 per cent. This could be partly explained by a reduction of a 49.0 per cent in the earnings from other processed fuel and lubricants. Earnings from the exports of transport equipment rose marginally by 5.7 per cent in 2008 as compared to a 25.8 per cent increase recorded in 2007. This was mainly due to a slow growth in the export earnings from other industrial transport equipment which rose by 17.0 per cent in 2008 compared to 32.7 per cent in 2007.

**Composition of Imports** 7.19. Imports by Broad Economic Category (BEC) are presented in Table 7.11. Total expenditure on non-food industrial supplies rose by 23.0 per cent from KSh 194,190 million in 2007 to KSh 238,926 million in 2008 mainly due to a notable increase of 23.9 per cent in the expenditure on processed non-food industrial supplies. Expenditure on fuel and lubricants increased substantially by 63.0 per cent from KSh 126,760 million in 2007 to KSh 206,642 million in 2008 on account of a 62.5 per cent increase in the imports of other processed fuel and lubricants. The expenditure on transport equipment declined by 8.5 per cent from KSh 97,385 million in 2007 to KSh 89,103 million in 2008.

7.20. During the review period, expenditure on non-food industrial supplies and, fuel and lubricants contributed the biggest share of the total import bill accounting for

31.0 and 26.8 per cent, respectively. On the other hand, 16.6 per cent of the total import expenditure was on machinery and other capital equipment. This can be attributed to a 38.7 per cent increase in the value of imports of complete machinery and other capital equipment. The share of expenditure on transport equipment declined from 16.1 per cent in 2007 to 11.6 per cent in 2008 mainly due to a 30.1 per cent reduction in the value of imports of industrial transport equipment.

**Direction of Trade** 7.21. Kenya's exports and imports markets are presented in Tables 7.12, 7.13 and 7.14. In 2008, the share of exports to the African continent was 47.1 per cent, an increase of 2.0 percentage points from the previous year. The total value of exports to the region grew by 31.1 per cent in 2008 compared to a growth of 14.5 per cent in 2007. This could be partly due to a large increase in exports of tea to Egypt which rose from KSh 8,577 million in 2007 to KSh 14,695 million in 2008. Exports to South Africa increased by 55.2 per cent occasioned by increases in exports of soda ash. Total exports to the European Union expanded by 22.8 per cent in 2008 compared to 10.9 per cent increase in 2007. Export earnings from Finland increased by 37.6 per cent in 2008 compared to 1.7 per cent increase in 2007. Similarly exports to Netherlands increased by 19.4 per cent mainly due to exports of cut flowers valued at KSh 14,402 million.

7.22. The value of exports to Saudi Arabia grew by 93.5 per cent in 2008 compared to a growth of 11.9 per cent in 2007. Export earnings from Iran which had plummeted in 2007 more than doubled during the review period mainly due to improved diplomatic relations which boosted tea exports. On the other hand, the value of exports to Jordan and United Arab Emirates declined by 25.7 per cent and 12.4 per cent, respectively. In terms of bilateral trade in goods, the main destinations of Kenya's exports continued to be Uganda, United Kingdom, Tanzania, Netherlands, United States of America, Sudan, Somalia, Egypt and Pakistan.

7.23. Asia continued to be the dominant source of Kenya's imports in 2008 with Far East Asia contributing a significant change in trade pattern as depicted in Table 7.13. The value of imports from Singapore increased almost three times recovering from a decline of 63.4 per cent in 2007. The increase in imports was partially caused by increased importation of palm oil which grew from KSh 3,840 million in 2007 to KSh 8,774 million in 2008. Imports from Israel increased by 86.6 per cent whereas imports from India increased from KSh 56.8 billion in 2007 to KSh 90.5 billion in 2008. The value of imports from South Korea declined by 4.2 per cent in 2008.

7.24. The value of imports from Sweden increased by 65.8 per cent recovering from the marginal decline registered in 2007 partly as a result of importation of base stations valued at 1,140 million. Imports from Belgium increased from KSh 6.2 billion in 2007 to KSh 8.2 billion in 2008, reversing the downward trend since 2005. Imports from Romania increased from KSh 665 million to 2,006 million in 2008 partly as a result of importation of chemical fertilizers where none was imported the previous year. Conversely, imports from Spain and United Kingdom declined by 20.7 per cent and 4.9

per cent, respectively, in 2008. Imports from Spain declined partly due to a reduction in imports of measuring instruments and apparatus.

7.25. Imports from the African continent increased by 19.4 per cent compared to 13.2 per cent increase in 2007. The value of imports from South Africa in 2008 increased by 32.1 per cent, occasioned by the rise in the unmilled maize imports. Imports from American continent declined by 21.4 per cent on account of a 38.1 per cent decrease in imports from United States of America. Imports from Canada which had declined the previous year increased almost two fold to stand at KSh 4.5 billion in 2008.

<sup>1</sup> Rwanda and Burundi joined EAC in July 2007<sup>2</sup> COMESA includes Uganda, Burundi and Rwanda<sup>3</sup> TOTAL AFRICA = COMESA + Tanzania + Other African Countries

7.26. Exports to the Common Market for Eastern and Southern Africa (COMESA) increased relatively faster by 29.2 per cent remaining the dominant destination of Kenya's exports. The share of exports to COMESA was 68.5 per cent of the total exports to the African region. Exports to Namibia more than tripled to stand at KSh 106 million during the review period on account of increased exports of carbonates and peroxocarbonates. The value of exports to Malawi increased by 89.0 per cent whereas exports to Comoros increased by 74.7 per cent in 2008. On the other hand, exports to Swaziland continued on the downward trend since 2006. Exports to the East African Community (EAC) continued to grow accounting for 51.6 per cent of the total exports to Africa in 2008. Exports to Rwanda, Burundi and Uganda increased by 54.3, 43.5 and 26.0 per cent, respectively, in 2008. The sharp rise in exports to Burundi was as a result of exports of flat-rolled products of iron and non-alloy steel.

7.27. Exports to Somalia increased by 54.2 per cent from KSh 8,330 million in 2007 to KSh 12,848 million in 2008 mainly due to exports of foliage, branches and other parts of plants suitable for bouquets or ornamental purposes worth KSh 3,392 million. Exports to Lesotho which had recorded a significant increase in 2007, decreased by 97.5 per cent in 2008. Exports to Reunion also declined by 58.5 per cent to stand at KSh 122.6 million in 2008 partly as a result of reduced exports of cement.

7.28. Total imports from COMESA declined marginally by 1.2 per cent. Imports from Zimbabwe, Djibouti, and Uganda which had registered significant increases in 2007 declined by 64.1, 15.2 and 12.7 per cent respectively, in 2008. The decline in imports from Zimbabwe was mainly due to non-importation of cane or beet sugar and chemically pure sucrose. Imports from Eritrea and Sudan which had decreased by 97.7 per cent and 86.9 per cent, respectively, in 2007 increased tremendously during the review period. Imports from South Africa continued to increase after the slump in 2006, recording 32.1 per cent increase in 2008. The value of imports from Algeria and Libya increased from KSh 4.9 million in 2007 to KSh 393.5 million in 2008. The increase in imports from Algeria was caused by imports of cement clinkers valued at KSh 370 million during the review period.

**Balance of Payments** 7.29. Kenya's balance of payments (BoP) is generally characterized by a persistent current account deficit. Compounded with the recent world economic slowdown, the significance of such perpetual current account deficit may pose a threat to long term economic growth. In 2008, the balance of payments position declined on account of decreased foreign direct investment inflows and the ever widening merchandise trade deficit. Net official reserves decreased by KSh 33,161 million in 2008 compared to an increase of KSh 63,250 million in 2007. The depletion of reserves was occasioned by the growth in import bill and unmatched growth in exports of goods and services and net capital inflows. The current account balance deteriorated to a deficit of KSh 136,851 million in 2008 from a deficit of KSh 69,638 million, the previous year. The capital and financial account recorded a surplus of KSh 81,055 million in

2008 compared to a surplus of KSh 150,090 million recorded in 2007. This can be explained by decreased foreign direct investment and short term capital inflows. The invisible trade registered a surplus of KSh 253,933 million in 2008 up from a surplus of KSh 216,868 million registered in 2007. This is attributable to the increase in current transfers which recorded a surplus of KSh 161,561 million and an increase in earnings from government services, during the period under review. Generally, the Kenya Shilling weakened against the US dollar at an average of KSh 69.18 in 2008 compared to KSh 67.32 per US dollar in 2007.

7.30. The deficit on current account to be financed by capital and financial account is estimated at KSh 136,851 million in 2008, against a deficit of KSh 69,638 million of the previous year. This was mainly due to the visible trade balance deficit widening to KSh 390,784 million in 2008 from a deficit of KSh 286,506 million in 2007, reflecting a deterioration of 36.4 per cent. This deterioration reflected a growth in merchandise imports bill that surpassed earnings from export of goods and services. However, the invisible trade registered a surplus of KSh 253,933 million in 2008 up from a surplus of KSh 216,868 million registered in 2007. This is attributable to the increase in private current transfers which recorded a surplus of KSh 147,656 million.

7.31. The capital and financial account recorded a surplus of KSh 81,055 million in 2008 down from a surplus of KSh 150,090 million recorded in 2007. This drop was occasioned by the decreased inflows from short term and foreign direct investments. Foreign direct investments inflows decreased to KSh 3,585 million in 2008 from KSh 46,652 million in 2007. The net deficit in the portfolio investment account widened marginally from a deficit of KSh 1,665 million in 2007 to a deficit of KSh 1,805 million in 2008. Other changes in capital and financial account included increased net foreign loan repayments and capital repatriation mainly at the stock market after huge foreign investor participation at Nairobi Stock Exchange. This came with the listing of Safaricom, the region's biggest listed company in terms of market capitalization and profitability.

<sup>\*</sup> Provisional<sup>1</sup> Revised<sup>1</sup> Official reserves are now defined to exclude Commercial Banks' foreign assets

7.32. Table 7.16 presents level of change in balance of payments accounts. In 2008, exports of goods earnings expanded by KSh 70,454 million while imports of goods bill increased by KSh 174,732 million. Services and income net increased by KSh 17,273 million in 2008. The increase was on account of the rise in the net earnings from government services and other services. However, tourism net earnings dropped by KSh 10,244 million in 2008. These developments in the current account resulted in a deficit of KSh 67,214 million in 2008 from a deficit of KSh 32,835 million in 2007. The deficit in the basic balance indicates a deterioration of Kenya's overall balance of payments position and the depletion of international reserves.

\* Provisional.

<sup>+</sup>Revised

Notes:

(i) A positive entry indicates a change that improves the balance of payments outcome; a negative entry indicates a change worsening the BOP outcome. Thus, an increase in imports or reduction in exports are marked as negative entries.

(ii) Exports and imports of goods are derived from Goods Account

**International Liquidity** 7.33. Table 7.17 presents foreign assets of the Monetary Authorities which includes international reserves. The international reserve assets consist of external assets available to and controlled by the monetary authorities for financing external obligations and regulating the BoP imbalances. Net foreign assets of Central Bank deteriorated from KSh 204,995 million as at December 2007 to KSh 200,145 million as at December 2008. The reserve position in the Fund increased notably by 19.3 per cent to stand

at KSh 1,512 million as at December 2008 from KSh 1,267 million as at December 2007. On the other hand, the Special Drawing Rights (SDRs) increased substantially to stand at KSh 238 million as at December 2008 up from KSh 47 million as at December 2007.

7.34. The foreign liabilities of the Central Bank consisting of External banks' deposits and Use of Fund Credit declined by 6.4 per cent to stand at KSh 21,890 million as at December 2008 compared to a total of KSh 23,398 million as at December 2007. The foreign exchange holdings of the Central Bank declined marginally by 2.1 per cent to stand at KSh 219,757 million in December 2008 from KSh 224,467 million as at the end of 2007. These developments resulted in the marginal decline of the international reserves from KSh 225,845 million as at December 2007 to KSh 221,548 million as at December 2008, reflecting a decrease of 1.9 per cent. The decline in the official foreign reserves holdings in 2008 can be attributed to inadequate purchase of foreign exchange reserves from the domestic interbank foreign exchange reserves market by Central Bank of Kenya in a bid to support reserve build up, as the bank continued to meet Government external obligations. The stock of official reserves was also subjected to exchange rate revaluation losses due to the appreciation of the US dollar (the reporting currency) against the Sterling Pound and the Euro given that a significant portion of reserves are held in the two currencies.

<sup>1</sup> Reserves constitute foreign assets which are readily available for meeting external financial needs

7.35. Table 7.18 shows the nominal value of the Kenyan Shilling at the close of the review period against the selected world currencies. Overall, the Kenyan Shilling depreciated against most of the selected currencies as reflected in the trade weighted exchange rate index, which increased notably by 18.0 per cent from 604.0 in 2007 to 712.9 in 2008. It appreciated against Sterling Pound, South African Rand, Norwegian Kroner and Australian Dollar by 9.6, 7.6, 1.6 and 1.3 per cent, respectively as at December 2008. Within the East African Community, the Kenyan Shilling lost against the Uganda Shilling and Tanzania Shilling by 7.7 and 7.2 per cent, respectively. The weakening of the Kenyan Shilling against the major world currencies during the period under review can be partly attributed to the global economic meltdown coupled with the financial crisis, albeit positive growth in remittances. In addition, the earnings from tourism sector deteriorated in 2008.

### Developments in Trade

**Export Market Development** 7.36. Under the export market development component, the EPC's goal is to identify market opportunities and formulate appropriate export entry strategies for market consolidation and expansion in traditional markets, and diversification into emerging export markets. These opportunities are passed on to the Kenyan business community to take advantage. During the year under review, the Council carried out various activities such as market research and investigations, trade fairs and exhibitions, and conduct promotion. Some of the promotional activities for Kenyan exporters were done in Tanzania, Spain, Uganda, DRC, Rwanda, Zambia, Sudan, and Germany, among others.

**Promotion of Export of Services** 7.37. Trade in services has emerged to be an important component in export trade. In this regard, the Council facilitated the participation of nine Kenyan companies in the Business Process Outsourcing (BPO) and Information Technology Outsourcing (ITO) workshop held in Abuja, Nigeria. The event was intended to promote networking for service industry associations and companies exporting services in order to boost partnership and exchange of market information in the Information Technology (IT) services.

---

**Product Development and Adaptation**

- Commonwealth Secretariat (COMSEC) Technical Assistance** 7.38. During 2008, the Commonwealth Secretariat/Export Promotion Council project on Product Design and Development for the Commercial Crafts sector was fully implemented with the participation of the Kenyan producers in the Tendence 2008 Frankfurt Fair to test-market the new products. Seven companies participated at the Fair while products of six other companies who could not travel for the fair were show-cased. The objective of participating at the international trade fair was to gauge the acceptability of the newly developed products, make business contacts and to get sale orders.
- The Business Sector Programme Support (BSPS)** 7.39. The technical assistance on Product Design and Development for the commercial crafts sector in the North Rift and Eastern regions of Kenya (Turkana, Marsabit, Wajir, Garissa, Lamu, Malindi and Mombasa) was provided. The main objective of this project was to assist Micro Small and Medium Scale Enterprises (MSMEs) producer groups (clusters) of commercial craft products in the North Rift and Eastern regions of the country to improve their export product offerings and competitiveness. The project assisted in improving the designs and quality of commercial crafts produced by these communities in order to meet current international market preferences, resulting in market-led products. It further assisted in the introduction of new products to the export market. The project is in line with the Council's strategies to enlarge Kenya's export supply base by assisting new export enterprises, including MSMEs, and promoting new products for export.

## Chapter 8

### Agriculture

**Overview** The inadequate rainfall in various parts of the country, high agricultural input prices coupled with disruptions due to the post election skirmishes resulted in the contraction of agricultural sector growth from a revised rate of 2.2 per cent registered in 2007 to negative 5.4 per cent in 2008 as shown in Figure 8.1. In the year under review, the country witnessed a substantial reduction in the production of food crops which led to widespread food shortages and the resultant increases in food prices. The total value of marketed production at current prices increased by 0.1 per cent from KSh 178,643.9 million in 2007 to KSh 178,856.6 million in 2008. The aggregate value of marketed crops decreased by 0.5 per cent from KSh 148,952.5 million in 2007 to KSh 148,227.5 million in 2008. The value of livestock and products increased by 3.2 per cent from KSh 29,691.4 million in 2007 to KSh 30,629.1 million in 2008. The value of marketed cereals declined by 8.3 per cent from KSh 14,617.6 million in 2007 to KSh 13,398.4 million in 2008 on account of a reduction in marketed cereals. The value of marketed horticultural produce declined by 13.8 per cent from a revised KSh 67,253.7 million in 2007 to KSh 57,965.8 million in 2008 mainly due lower prices in the export market resulting from the global financial crisis. However, the quantity of horticulture exports increased marginally from 192.2 thousand tonnes in 2007 to 193.1 thousand tonnes in 2008.

Figure 8.1: Agriculture Gross Value Added (GVA) Growth Rate, 2004-2008

8.2. In general, agricultural produce declined during the year under review compared to 2007. Maize production declined by 20.0 per cent from 32.5 million bags in 2007 to an estimated 26.0 million bags recorded in 2008. Consequently, the quantity of maize imports increased from 100 thousand tonnes valued at KSh 1,094.9 million in 2007 to 243 thousand tonnes valued at KSh 6,664.7 million in 2008. Wheat production declined by 23.6 per cent from 112.9 thousand tonnes in 2007 to 86.2 thousand tonnes

in 2008. Coffee production dropped by 21.3 per cent from 53.4 thousand tonnes in 2006/07 to 42.0 thousand tonnes in 2007/08 crop year. Production of tea declined by 6.4 per cent from 369.6 thousand tonnes in 2007 to 345.8 thousand tonnes in 2008. The reduced production of tea was caused by adverse weather conditions that affected tea growing areas in the first half of the year. The volume of marketed milk decreased by 6.4 per cent from 423 million litres in 2007 to 396 million litres in 2008. The value of dairy produce also decreased from KSh 8,462.2 million in 2007 to KSh 8,368.7 million in 2008. This decrease was attributed to death of some stocks coupled with lower milk delivery.

8.3. Table 8.1 provides agriculture value added at both current and constant prices. Agriculture output at current prices increased by 20.3 per cent to KSh 598.5 billion in 2008. Agriculture input at current prices increased by 3.7 per cent to KSh 123.3 billion. However, agriculture output and input at constant prices decreased by 5.1 and 4.1 per cent to KSh 378.4 billion and KSh 86.7 billion respectively in 2008. As a result, agriculture value added at constant prices declined by 5.4 per cent from KSh 308.2 billion in 2007 to KSh 291.7 billion in 2008.

## Marketed Production

8.4. Table 8.2 shows the value of marketed production in the agricultural sector for the period 2004 to 2008. The total value of marketed production at current prices increased marginally from KSh 178,643.9 million in 2007 to KSh 178,856.6 million in 2008. Tea, maize, fruits and sugarcane contributed to the marginal increase in the value of marketed output. The aggregate value of marketed crops decreased by 0.5 per cent to KSh 148,227.5 million in 2008. The value of livestock and products marketed increased by 3.2 per cent from KSh 29,691.4 million in 2007 to KSh 30,629.1 million in 2008. The value of marketed cereals declined by 8.3 per cent from KSh 14,617.6 million in 2007 to KSh 13,398.4 million in 2008.

\* Provisional.

\*\* Data refers to fresh Horticultural exports only

8.5. The value of marketed maize increased by 4.5 per cent from KSh 7,969.2 million in 2007 to KSh 8,326.6 million in 2008, as a result of high prices offered in the market. The value of marketed horticultural produce declined by 13.8 per cent from KSh 67,253.7 million in 2007 to KSh 57,965.8 million in 2008 mainly due to lower unit prices for horticulture in the export market. The decline in horticultural export earnings in the year under review is attributed to a 27.8 per cent slump in the value of vegetables. The high tea prices resulted in the value of marketed tea increasing by 26.2 per cent to KSh 55,383.1 million in 2008. The value of marketed dairy produce decreased by 1.1 per cent to KSh 8,368.7 million in 2008 as a result of reduced milk production.

8.6. The overall price index as shown in Table 8.3 rose from 124.2 in 2007 to 130.2 in 2008 in response to higher prices paid for the agricultural commodities. The price indices for cereals, temporary and permanent crops registered significant increases while the price indices for horticulture, livestock and products declined during the year under review. The reduction in local production for most of the commodities resulted in a decline in the overall quantum index from 149.1 in 2007 to 144.9 in 2008. However, the marginal increase in horticultural exports resulted in an increase in the quantum index for horticulture in 2008. The quantum index for livestock and its products

increased from 169.7 in 2007 to 171.0 in 2008. The reduction in the magnitude of growth in the quantum index has been on the decline since 2004 but was made worse by adverse weather conditions during the year under review.

8.7. Table 8.4 shows the average gross commodity prices paid to farmers for various commodities. The prices of all commodities except pyrethrum registered an upward trend on account of soaring demand coupled with a reduction in production during the year under review. The prices of pyrethrum remained virtually stagnant for the last three years.

**Table 8.4: Average Gross Commodity Prices\* to Farmers, 2004 -2008**

+ The prices are for calendar year and may differ from those based on crop years. In the case of tea and coffee, the prices are for black tea and processed coffee respectively.

8.8. As shown in Table 8.5, the share of sales to marketing boards by small farms declined from 75.9 per cent in 2007 to 73.1 per cent in 2008 in line with lower production from the smallholder farmers. The share of large farms sale to marketing boards increased

by 11.8 per cent from KSh 43,053 million in 2007 to KSh 48,148 million in 2008. In spite of the decline in the share of small farms sale to marketing boards by 3.6 per cent from KSh 135,591 million in 2007 to KSh 130,709 million in 2008, the aggregate value of sales by the small farmers remained more than double, the value sold by the large farms.

**Table 8.5: Sale to Marketing Boards from Large and Small Farms, 2004 -2008**

YEAR	LARGE FARMS		SMALL FARMS		TOTAL		PERCENTAGE SHARE OF SMALL FARMS

8.9. The agricultural input indices are shown in Table 8.6. The overall quantum and price indices increased from 147.1 and 128.3 in 2007 to 269.5 and 165.7 in 2008, respectively. The increase in the inputs quantum index is mainly attributed to increased sales in purchased seeds, manufactured feeds and, fuel and power. The increase in prices of most inputs such as fertilizer, fuel and power, manufactured feeds, service inputs and bags contributed to the observed increase in the inputs price index.

**Table 8.6: Agricultural Input Indices, 2004 - 2008**

8.10. Table 8.7 presents the value of purchased agricultural inputs for the last five years. The value of total inputs purchased in the agricultural sector rose by 48.1 per cent from KSh 17,649 million in 2007 to KSh 26,135 million in 2008. This is largely attributed to significant increases in the price of fertilizer, fuel and power and manufactured feeds in the year under review. The global surge in fuel oil prices in the first half of the year under review resulted in higher local fuel pump prices as well as an increase in the unit price of electricity. This culminated into a 34.5 per cent increase in the value of fuel and power consumed in the agricultural sector. The value of purchased seeds increased by 43.7 per cent from KSh 2,548 million in 2007 to KSh 3,661 million in 2008.

+ Except labour.

8.11. As shown in Table 8.8, agriculture terms of trade continued to deteriorate for the second consecutive year, with the index moving down by 13.2 percentage points from 74.4 points in 2007 to 61.2 points in 2008, the lowest level realized in the last five years. This was driven by a modest rise in agriculture output price index and a comparatively large increase in the price index of agricultural inputs and consumer goods. While the price index of output prices rose by 5.5 percentage points between 2007 and 2008, the price index of inputs and consumer goods rose by 40.3 percentage points during the same period, leading to the observed worsening of terms of trade in the agriculture sector.

8.12. Estimates on production of major food security crops are given in Table 8.9. In 2008, there was a widespread shortage of food due to the substantial reduction in the production of food crops. As reflected in the table, this resulted into an acceleration of prices for most food commodities. For the second year running, the country recorded a decline in the production of maize from 32.5 million bags in 2007 to 26.0 million bags in 2008. Similarly, the production of beans declined by 15.9 per cent, falling from 3.5 million bags in 2007 to 2.9 million bags in 2008. Production of Irish potatoes, sorghum and millet dropped by 20.0 per cent, 66.6 per cent and 53.6 per cent, respectively. This decline in production of food crops was mainly occasioned by delayed planting after the post election violence and unfavourable weather conditions as witnessed in the inadequate long and short rains received in most parts of the country. The inadequate rainfall led to crop failure in several regions, notably the eastern and coastal parts of the country.

**Table 8.9: Estimated Production of Selected Agricultural Commodities, 2004 - 2008**

\* Provisional.

8.13. Average retail prices for selected food crops are presented in Table 8.10. At national level, the country witnessed uncharacteristically high price increase for all the reported crops between 2007 and 2008. At the regional level, all provinces recorded price increases for all the crops except sorghum whose average price in Eastern Province declined from KSh 21.00 per kilogramme in March 2007 to KSh 20.50 per kilogramme in March 2008. The food supply constraints experienced in the country in 2008 are clearly depicted by the high prices, relative to the previous year, of the major food staples of maize, beans and potatoes.

8.14. Nationally, the highest absolute price jump was observed for beans, rising from KSh 38.40 per kilogramme in September 2007 to KSh 66.5 per kilogramme same month in 2008. The price of the same commodity rose from KSh 36.9 per kilogramme in March 2007 to KSh 56.1 per kilogramme in March 2008, representing a price change of KSh 19.2 per kilogramme. Between March 2007 and March 2008, the national average price of maize registered a difference of KSh 4.2 per kilogramme, rising from KSh 15.6 per kilogramme to KSh 19.8 per kilogramme in the respective months. However, the national average price of maize in the month of September reflects a large shift from KSh 15.4 per kilogramme in 2007 to KSh 28.0 per kilogramme in 2008, a difference of KSh 12.6 per kilogramme. The high prices of maize were driven by lower domestic production coupled with a reduced global supply of the grain. At provincial level, the highest prices for maize in the month of September 2008 were observed in Central Province while the highest prices for potatoes, sorghum and millet were all recorded in Western Province in the same period.

**Table 8.10: Retail Market Prices for Selected Food Crops, 2004-2008**

8.15. Data on sales of agricultural produce to various marketing boards is given in Table 8.11. In 2008, the agricultural sector registered a substantial decline as indicated by the reduced volume of sales of all commodities reported. Deliveries of maize grain to the National Cereals and Produce Board (NCPB) and millers registered the highest decline, from 508.8 thousand tonnes in 2007 to 340.5 thousand tonnes in 2008, a drop of 33.1 per cent. This huge decline is attributed to low maize production in the year under review. The decline is also partly attributed to disagreements between farmers and NCPB on the price of the grain, leading to farmers withholding significant amounts from the long rains harvested crop. The quantity of sales of tea and coffee dropped by 6.4 per cent and 26.0 per cent respectively, a direct result of the reduced production of the two crops during the year. Both cotton and sugar-cane registered a reversal in the trends of their sales, each recording declines in 2008. Sales of sisal continued on the downward trend while the sale of wheat grain recorded a 23.6 per cent decline compared to an increase of 9.1 per cent in 2007. For the second consecutive year, the quantity of marketed rice paddy declined significantly, from 32.3 thousand tonnes in 2007 to 24.3 thousand tonnes in 2008. The pyrethrum sub-sector continued to post the mixed performance over the recent past, registering a reduction in sales in 2008 compared to an increase in 2008.

**Table 8.11: Sale of Selected Crops to Marketing Boards, 2004 – 2008**

CROP	UNIT	2004	2005	2006	2007	2008*

\* Provisional.

<sup>1</sup>No purchases by boards.

<sup>2</sup>Includes purchases by NCPB and millers.

**8.16. Wheat:** Domestic production of wheat went down substantially during the year under review, declining to 86.2 thousand tonnes from 112.9 thousand tonnes in 2007 as shown in Table 8.12. This reduced production was mainly attributed to inadequate rainfall in Rift Valley and Central Province wheat growing areas during the long rains. At the same time, imports of wheat declined for the second year running, by 13.2 per cent from 564.3 thousand tonnes in 2007 to 538.5 thousand tonnes in 2008. Despite this decline in wheat imports, the country continues to rely heavily on foreign supply of this food commodity. Out of a total of 624.7 thousand tonnes wheat supply during the year, only 13.8 per cent was sourced locally.

**Table 8.12: Production and Imports of Wheat, 2004 - 2008**

2007 .. ..	112.9	564.3	677.2
2008* .. ..	86.2	538.5	624.7

\*\* Includes retention for seed.

\* Provisional.

**8.17. Coffee:** The coffee sub-sector registered a 21.3 per cent decline in production from 53.4 thousand tonnes in 2006/07 to 42.0 thousand tonnes in 2007/08 crop year as shown in Table 8.13. The reduced coffee production is attributable to unfavourable weather comprising of a prolonged dry spell within coffee growing areas. The prevailing dry weather conditions also led to a high incidence of coffee berry disease, further impacting negatively on the year's crop.

**Table 8.13: Production, Area, and Average Yield of Coffee by Type of Grower, 2003/04 - 2008/09**

\* Provisional.

8.18. During the 2007/08 crop year, the area planted with coffee trees reduced further to 155.0 thousand hectares from 163.0 thousand hectares recorded in the previous crop year, with the Estates sub-sector recording a greater percentage change than the cooperatives. Owing to the higher decline in production compared to area under crop, the average yield for cooperatives fell by 19.6 per cent while that of the estates fell by 10.6 per cent during the year under review. This was a reversal of trend following notable increases in average yield of coffee over the past three crop years.

8.19. **Tea:** Table 8.14 presents production, area and average yield of tea by type of grower for the period 2004 to 2008. Production of tea declined by 6.4 per cent from 369.6 thousand tonnes in 2007 to 345.8 thousand tonnes in 2008, with the smallholder sub-sector recording a greater percentage drop than the estates sub-sector. During the year, production from the small scale farmers constituted 61.0 per cent of total tea production. The area planted with tea bushes increased by 5.7 per cent between 2007 and 2008, rising from 149.2 thousand hectares to 157.7 thousand hectares. Both small scale and large scale tea farms recorded significant declines in the average yield of tea per hectare. The reduced production of tea was caused by adverse weather conditions and the tea pluckers strike that affected tea growing areas in the first half of the year.

**Table 8.14: Production, Area and Average Yield of Tea by Type of Grower, 2004- 2008**

**Source:** Tea Board of Kenya

\* Provisional

\*\* Obtained by dividing current production by the area four years ago

**8.20. Tea Exports:** The volume of tea exports rose substantially from 370.2 thousand tonnes in 2007 to 390.0 thousand tonnes in 2008. At the same time, the value of tea exports rose from KSh 46.8 billion to KSh 63.8 billion, an increase of 36.3 per cent. This proportionately high value of tea exports was a result of good international tea prices that were driven by reduced global production of tea. The weakening Kenya shilling in most part of the year further supported higher returns for the tea. Due to the reduced production, the average auction price of tea rose from KSh 118.74 per kilogramme to KSh 160.15 per kilogramme.

**8.21. Sugarcane:** Table 8.15 presents sugarcane statistics for the last five years. The area under sugarcane increased by 6.9 per cent from 158.6 thousand hectares in 2007 to 169.4 thousand hectares in 2008. The area harvested decreased from 59,201 hectares in 2007 to 54,465 hectares in 2008 while production decreased by 1.8 per cent over the same period. However, average yield increased by 2.9 per cent over the review period.

**Table 8.15: Area Under Sugar Cane, Area Harvested, Production, and Average Yield, 2004 – 2008**

\*\* Does not include area harvested by non-contracted farmers

**8.22.** Table 8.16 provides details on production, imports, consumption and exports of sugar. The production of sugar decreased slightly from 520.4 thousand tonnes in 2007 to 517.7 thousand tonnes in 2008 while consumption went up by 1.4 per cent from 741.2 thousand tonnes in 2007 to 751.5 thousand tonnes in 2008. Sugar imports decreased by 5.0 per cent to 218.6 thousand tonnes over the same period, while sugar exports increased by 23.5 thousand tonnes in 2008.

**Table 8.16: Production, Imports and Consumption of Sugar, 2004 – 2008**

YEAR	'000 Tonnes			
	PRODUCTION	IMPORTS	CONSUMPTION	EXPORTS

**8.23. Horticulture:** Exports of fresh horticultural produce for the period 2004 to 2008 are shown in Table 8.17. The horticulture sub-sector continued to play an important role in the domestic economy, earning the country a substantial amount of foreign exchange from the exports of flowers, vegetables and fruits. In 2008, the volume of exports increased marginally to 193.1 thousand tonnes from 192.2 thousand tonnes exported in 2007. During the same period, the value of fresh horticultural exports decreased by 13.8 per cent to KSh 58.0 billion in 2007. The decrease in export values could be attributed to lower prices paid in the international market.

**Table 8.17: Exports of Fresh Horticultural Produce<sup>1</sup>, 2004 – 2008**

YEAR	VOLUME ('000 Tonnes)	VALUE (KSh billion)
2004 .. ..	145.6	32.6
2005 .. ..	163.2	38.8
2006 .. ..	163.2	43.1
2007 .. ..	192.2	67.3
2008* .. ..	193.1	58.0

\* Provisional.

<sup>1</sup>Excludes exports of processed horticultural produce.

**8.24.** The volume of fruits exported increased by 9.3 per cent to 17,123 metric tonnes in 2008. Over the same period, the volume of flowers exported increased by 2.6 per cent from 91,193 metric tonnes to 93,639 metric tonnes while the volume of vegetables exported decreased by 3.5 per cent from 85,323 metric tonnes to 82,358 metric tonnes.

**8.25.** Figure 8.2 below provides a comparison of the quarterly exports of fresh horticultural produce between 2007 and 2008. Earnings from the exports of flowers increased in the first quarter of 2008 compared to 2007. However, the flower export values declined in the subsequent quarters of 2008. Exports of fresh vegetables declined from an average quarterly value of KSh 5.6 billion in 2007 to average quarterly value of KSh 4.1 billion in 2008. Export earnings from fresh fruits declined in the first half of 2008 but increased in the third quarter, remaining at the 2007 level in the fourth quarter of 2008.

Figure 8.2: Quarterly Exports of Fresh Horticultural Produce, 2007-2008

**8.26. Irrigation:** The area cropped in Mwea Irrigation scheme in 2007/08 reduced to 7,806 hectares from 8,325 hectares in 2006/07, as shown in Table 8.18. However, the gross value of output increased from KSh 1,544 million in 2006/07 to KSh 2,121 million in 2007/08 due to the favourable prices for the commodity. The number of plot-holders in the scheme slightly decreased from the 7,267 in 2006/07 to 7,257 in 2007/08 while their payments increased by 57.8 per cent from KSh 919 million in 2006/07 to KSh 1,450 million in 2007/08. Overall, total area irrigated for all the schemes dropped from 9,626 hectares in 2006/07 to 8,307 hectares during 2007/08 crop year. The reduction in crop area was partly attributed to low level of irrigation water. Gross value of output from the seven irrigation schemes increased to KSh 2,160 million from KSh 1,604 million and plot holders payments increased to KSh 1,457 million from KSh 941 million during the 2007/08. Total rice paddy production decreased to 40,065 tonnes in 2007/08 from 53,113 tonnes in 2006/07. The drop in paddy rice production was mainly attributed to reduced production in Mwea, Ahero and Bunyala Irrigation schemes during the year. There was no production in Ahero irrigation scheme in 2006/07.

**Table 8.18: Progress and Production at Seven Irrigation Scheme Areas, 2003/04 - 2007/08**

**8.27. Dairy Produce:** Table 8.19 shows production and sales of livestock and dairy produce. In 2008, the volume of marketed milk decreased by 6.1 per cent from 423 million litres in 2007 to 399 million litres in 2008. This decrease was attributed to lower milk delivery as a result of reduction in milk production during the year under review. The volume of whole milk and cream processed dropped by 7.1 per cent from 282 million litres in 2007 to 262 million litres in 2008. Similarly, production of butter and ghee decreased to 1,218 tonnes in 2008 from 1,752 tonnes in 2007. The production of cheese continued to decrease partly due to high costs of production and low demand.

**8.28. Livestock products:** The number of cattle and calves slaughtered increased by 10.0 per cent from 1,720 thousand head in 2007 to 1,892 thousand head in 2008 while the number of sheep and goats slaughtered increased by 8.2 per cent during the same period. The number of pigs slaughtered increased by 18.6 per cent from 167 thousand in 2007 to 198 thousand in 2008. The increased number of animals slaughtered may be attributed to higher livestock disposals occasioned by the adverse weather resulting in lack of pasture and water coupled with high cost of manufactured feeds.

**8.29. Agriculture Training:** Table 8.20 shows the enrolment for various agricultural and livestock related courses at various levels. Enrolment for degree courses slightly increased by 1.8 per cent from 6,001 students in 2007 to 6,110 students in 2008. In 2008, enrolment for diploma courses at Egerton University and Bukura Institute of Agriculture decreased by 7.2 per cent and 25.5 per cent to 1,844 and 301 students respectively. Certificate level courses enrolment at Naivasha Dairy Training Institute dropped by 68.6 per cent and this was attributed to post election violence that was experienced in the beginning of 2008. The number of trainees at the three Animal Health Training Institutes remained almost constant in 2008 compared to 2007 while enrolment in Short-Term Vocational courses decreased by 18.6 per cent over the same period.

8.30. Table 8.21 shows that the total number of co-operative societies and unions increased by 2.9 per cent from 11,635 in 2007 to 11,968 at the end of 2008. The total number of agricultural societies increased by 1.4 per cent from 4,414 to 4,477 during the same period. Total non-agricultural societies increased by 3.8 per cent from 7,122 in 2007 to 7,391 in 2008. The increase in the number of co-operative societies was due to continued member education by the Ministry of Co-operative Development and Marketing. The Savings and Credit Co-operative Organisations (SACCOs) increased by 4.5 per cent from 5,122 in 2007 to 5,350 in 2008 which may be attributed to high interest rates charged by other lending institutions.

8.31. As shown in Table 8.22, total sale of agricultural produce by co-operatives decreased by 13.4 per cent from KSh 7,572 million in 2007 to KSh 6,555 million during 2008. This decrease was mainly attributed to the coffee and pyrethrum sub-sectors that registered declines of 21.9 per cent and 44.0 per cent respectively, during the period under review. Sugar cane and dairy products sales increased by 0.5 per cent and 3.6 per cent from KSh 213 million and KSh 2,395 million in 2007, respectively. In terms of percentage shares, the contribution by coffee and milk rose by 1.9 and 1.4 percentage points respectively. However, share contribution by sugarcane and pyrethrum declined from 2.0 per cent and 76.1 per cent in 2007 to 1.7 per cent and 45.7 per cent in 2008.

**Table 8.22: Sale of Selected Agricultural Produce by Co-operatives and their Contribution to Gross Farm Revenue, 2004 - 2008**

## Chapter 9

### Environment and Natural Resources

**Overview** In 2008, the Government continued to institute and enforce policy measures that govern the natural resources exploitation, management and conservation with the overall objective of ensuring sustainable development.

9.2. Total development expenditure on Water Supplies and Related Services increased by 25.7 per cent from KSh 8,414.3 million in 2007/08 to KSh 10,574.1 million in 2008/09. Total value of fish landed increased by 5.0 per cent from KSh 8,594.5 million in 2007 to KSh 9,024.2 million in 2008. The value of mineral production also increased during the review period from KSh 6,991.2 million in 2007 to KSh 12,304.9 million. The sale of forest products increased from 423.4 thousand cubic metres in 2007 to 503.7 thousand cubic metres in 2008.

**Water Supply** 9.3. The Government through the Ministry of Water and Irrigation continued to run programmes aimed at providing safe drinking water to citizens within reasonable distance while at the same time ensuring its sustainability. In urban areas, development of water schemes was undertaken by the Water Services Boards while in rural areas, it was done by the Ministry in partnership with beneficiary communities.

9.4. The Ministry of Water and Irrigation continued to maintain modest Water Purification Points (W.P.P) across the country as presented in Table 9.1. There were no new W.P.P.s constructed in the last five years. However, major expansion and rehabilitation works were done on existing water projects.

9.5. The Ministry was also engaged in providing clean water in the rural areas through drilling of boreholes. A total of 141 boreholes were sunk during 2008/09 compared to 170 boreholes in 2007/08 representing a decline of 17.1 per cent. Generally, there was an increase in the number of boreholes drilled in all provinces except in Eastern, N/Eastern and Rift Valley provinces.

B.H - Borehole (drilled by Government and private sector)

W.P.P - Water Purification Point (Water Treatment Point)

9.6. The development expenditure on water supply and related services continued to increase rapidly over the period 2008/09. Overall expenditure rose by 25.7 per cent to KSh 10,574.1 million in 2008/09 from KSh 8,414.3 million in 2007/08. This was mainly attributed to increase in funding on Water Development, Rural Water Supplies, National Water Conservation and Pipeline Corporation (NWCPC), Irrigation Development and National Irrigation Board. There has been an increase in funding of the NWCPC for the last five years especially in the area of water conservation, dam and boreholes construction. The allocation to NWCPC increased by 73.6 per cent from KSh 1,733.5 million in 2007/08 to KSh 3,010.2 million in 2008/09. The allocation for Water development item increased from KSh 4,448.5 million in 2007/08 to KSh 5,130.5 million in 2008/09.

**Table 9.2: Development Expenditure on Water Supplies and Related Services , 2004/05- 2008/09**

**Fisheries** 9.7. The fisheries sector is an important income generating activity in the economy. Over the last five years, fish from fresh water sources remained the major contributor to fish landed, accounting for 94.5 per cent of the total output in 2008. The relatively low share from marine sources may have been caused by inadequate fishing facilities and technologies necessary for fishing in deep waters.

9.8. Table 9.3 shows the details of quantity and value of fresh water and marine fish landed from 2004 to 2008. Total fish landed increased from 135.1 thousand tonnes in 2007 to 142.5 thousand tonnes in 2008. The quantity of freshwater fish increased by 5.0 per cent from 128.2 thousand tonnes in 2007 to 134.6 thousand tonnes in 2008. Lake Victoria continues to be the major source of freshwater fish in the country with a share contribution of 91.4 per cent in 2008. Despite the incidence of post election violence witnessed early in 2008 which disrupted fishing activities in the lake region, fish landed from the lake increased from 117.2 thousand tonnes in 2007 to 123.1 thousand tonnes in 2008.

9.9. The total value of fish landed increased to KSh 9,024.2 million in the year under review from KSh 8,594.5 million in 2007. The value of fish landed from freshwater sources increased from KSh 7,983.6 million in 2007 to KSh 8,382.8 million in 2008 accounting for 92.9 per cent of the total value of fish landed.

**Forestry** 9.10. The continued interference with forest resources through encroachment and illegal logging has remained the major challenge facing the forest sub-sector. In 2008, the Government through the Kenya Forest Service (KFS) continued to place more emphasis in conservation and expansion of forest cover in the country by enhancing participatory forest management. The strategy aims to build capacity in communities living near forests on forest management and conservation.

9.11. Table 9.4 gives details of forest plantation area. The overall plantation area has remained unchanged at 132.3 thousand hectares since there have been no excisions or opening of new areas for forest plantation development. The areas under indigenous and exotic forests remained unchanged for the last five years at 12.3 thousand hectares and 98.7 thousand hectares respectively.

**Table 9.4: Forest Plantation Area, 2004-2008**

9.12. Table 9.5 presents changes in forest plantation stocking. The forest plantation stocking increased marginally from 112.3 thousand hectares in 2007 to 114.0 thousand hectares in 2008. The area planted increased marginally from 5.5 thousand hectares in 2007 to 5.7 thousand hectares in 2008. The area clear felled also increased from 2.0 thousand hectares in 2007 to 3.0 thousand hectares in 2008. The reported incidence of planting failures and areas of forest plantation damaged by fires declined from 1.7 thousand hectares in 2007 to 1.0 thousand hectares in 2008.

9.13. Table 9.6 presents recorded sales of forest products. The sales of forest products increased from 423.4 thousand true cubic metres in 2007 to 503.7 thousand true cubic metres in 2008. There have been no sales of hardwood timber over the last five years as the timber harvesting moratorium is still in force. The recorded sales of fuel wood /

charcoal increased from 27.7 thousand stacked cubic metres to 28.8 thousand stacked cubic metres due to the growing demand for these products. The sale of power/telegraph poles remained at 52.0 thousand stacked cubic metres in 2008.

**Mining** 9.14. As Table 9.7 shows, mineral production increased from 1,349.5 thousand tonnes in 2007 to 1,545.2 thousand tonnes, an increase of 14.5 per cent. Mineral production continued to be dominated by soda ash and fluorspar which increased by 30.1 and 52.9 per cent respectively in the year under review. Salt production more than doubled in 2008 from 11.6 thousand tonnes in 2007 to 24.3 thousand tonnes in 2008. The increase in mineral production was attributed to plant expansion and improvement both at Magadi Soda Company and Kenya Fluorspar Company which improved on mine extraction and processing.

9.15. The value of mineral produced increased by 76.0 per cent to KSh 12.3 billion in 2008. This was as a result of increase in the value of soda ash by 86.2 per cent to KSh 8.9 billion in 2008 and fluorspar by 95.7 per cent to KSh 1.9 billion in 2008.

9.16. The average export prices for soda ash and fluorspar maintained an increasing trend for the fifth year running as shown in Table 9.8. The export price per tonne of soda ash recorded a 44.7 per cent increase from KSh 12,812 per tonne in 2007 to KSh 18,541 per tonne in 2008. Similarly, the price of fluorspar increased by 28.1 per cent from KSh 11,700 per tonne in 2007 to KSh 14,982 per tonne in 2008. The increase in price was attributed to the growing demand for these minerals in the export market.

**Table 9.8: Average Export Prices of Soda Ash and Fluorspar, 2004-2008**

## Refuse Management

9.17. Table 9.9 presents the trend in expenditure on public health by the Nairobi City Council (NCC) from 2004/05 to 2008/09. Total expenditure on public health increased from KSh 445.9 million in 2007/08 to KSh 490.5 million in 2008/09. The increase was attributed to rising salaries, wages and allowances and hiring of refuse removal services and street cleaning. Refuse removal expenditure increased from KSh 144.0 million in 2007/08 to KSh 158.4 million in 2008/2009. Cleaning and Administration continued to consume the largest part with an allocation of 67.3 per cent of the total expenditure on public health in 2008/09.

**Table 9.9: Expenditure on Public Health by the Nairobi City Council, 2004/05-2008/09**

**Wildlife** 9.18. Wildlife population estimates derived from aerial sample survey data are given in Table 9.10. The dominant land-use in the Kenyan rangelands continues to be wildlife and livestock grazing. These rangelands are home to most wildlife species, which are major tourist attraction thus supporting the tourism industry. Over the period under review, various wildlife herbivores indicated a decline. These species include Elephant, Burchell's and Grevy's Zebra, Wildebeests, Waterbuck, Buffalo, Kongoni, Gerenuk, Topi, Grant's gazelle, Kudus, Waterbuck, Eland, Giraffe, Impala and Oryx. The declines may be attributed to predation, poaching, migration, loss of habitat due to land fragmentation and unfavorable weather conditions among other causes. Species that showed stability or increase in population numbers during the review period include Warthog, Ostrich, H. Hartebeest and Thomson's gazelle.

**Table 9.10: Wildlife Population Estimates in the Kenya Rangelands, 2004 – 2008**

	'000 Number

\* Provisional

**Weather** 9.19. During the March-April-May (MAM) 2008 long rain season, most locations in  
**Out-turn** Kenya experienced depressed rainfall. The most affected areas were the North Western and North Eastern parts of the country, Nairobi area and much of Central Province. The area along the coastline and parts of the western highlands of Kakamega, Kericho and Kisii received rainfall that was within the normal range. The observed rainfall patterns were mainly due to abnormally cool sea surface temperatures conditions that prevailed over the equatorial Eastern Pacific Ocean. In addition, cooler than normal sea surface temperatures was also prevalent over the Indian Ocean during this period. Consequently, most parts of the country experienced depressed and poorly distributed rainfall.

9.20. The depressed rainfall received in most locations of the country resulted in poor agricultural production especially in North Western, Central and North Eastern parts of the country. However, in most parts of Rift Valley and Western provinces the heavy rains experienced during the period resulted in improved agricultural production.

9.21. The October-November-December (OND) 2008 short rains season was characterized by very poor temporal distribution of rainfall. Most parts of the country experienced heavy and continuous rainfall during the month of October and the first half of November. The rainfall was especially heavy over the Western, North Eastern and some parts of Central Kenya including Nairobi. This rainfall resulted into flash floods and landslides and mudslides leading to loss of life and property as well as destruction of infrastructure in several areas.

**Resource** 9.22. Environmental issues in the country continued to be addressed by the National  
**Monitoring** Environment Management Authority (NEMA). The Authority continued to institute policy measures and strategies geared towards ensuring the right balance between the desired development outcomes and the associated environmental impacts.

9.23. In 2008, the Authority initiated and completed a review of the Environment Impact Assessment (EIA) and Environmental Audit (EAs) licensing process of all major development projects in the country. The number of EIA reports reviewed increased by 28.4 per cent from 1,178 reports in 2007 to 1,513 reports in 2008. The improvement in the number of EIA reports was due to major investments on road construction and housing development in the country. The number of EA reports reviewed increased by 59.9 per cent from 1,101 reports in 2007 to 1,760 reports in 2008. The increase was due to enhanced inspections and awareness on the legal requirements as stipulated in the Environmental Management and Coordination Act.

9.24. In order to enforce the environmental laws and regulations, the authority established an environmental police unit within the organization and gazetted 120 of its officers as Environmental Inspectors. This effort will enhance compliance and ensure that Kenyans continue to enjoy their right to a clean and healthy environment.

9.25. Other major environmental activities undertaken in 2008 relate to Education for Sustainable Development (ESD). This Strategy provides mechanism for adopting a holistic approach to sustainable development by engaging all sectors and stakeholders throughout the country. During the period under review, the programme conducted sensitization workshops in key public institutions in environment, mineral resources, education, labour and health sectors. Separately, the programme also trained the national ESD steering committee on the ESD monitoring and evaluation tools to facilitate the process of mapping the strategy's outcome.

9.26. In 2008, NEMA in conjunction with other stakeholders implemented the Nairobi River Basin Programme. The programme aims to rehabilitate, restore and manage the Nairobi River System in order to provide improved livelihood especially for the poor and enhance environmental quality and values through well regulated economic and recreational ventures. Under the programme, the Authority created awareness and assessed social impacts as well as conducting surveys and delineating the riparian reserve. The Authority managed to stop 21 of the illegal discharges out of 25 sites targeted during the period.

9.27. The Government also initiated a five-year Environment Programme Support (EPS) project on environment and poverty alleviation during the year. The project completed the preparation of a strategy for decentralizing environmental management, and implementation in selected administrative jurisdictions and developed a framework for the integrated coastal zone management. The project achieved an improvement in compliance and enforcement of environmental regulations and enhancement of institutional and financial management of NEMA.

9.28. Kenya's post election crisis witnessed in early 2008 resulted in substantial damage to the country's natural resources. Reduced security and absence of enforcement personnel during the post election crisis precipitated clearing and scrounging of forest for agriculture and firewood, opportunistic felling of trees for timber/wood and encroachment of forest in conflict areas. In urban areas, environmental services and management such as solid waste collection, provision of drinking water and sanitation fell apart as waste and pollution problems increased due to the unrest.

## Chapter 10

### Energy

**Overview** Energy prices were on an upward trend for most of the year under review except in the last quarter when the prices showed a declining trend. The high oil prices were mainly attributed to increased speculation in the commodity market inspired by depreciation of the US dollar against major currencies. This in turn led to increased investment in the commodity market, particularly for crude oil thereby pushing prices to high levels. Other aspects responsible for pushing oil prices up included the balance between supply and demand of crude oil which has remained tight over the years; the high demand of oil by non-OECD countries especially from Asia and Latin America; unstable geo-political situations which included the instability in Iraq, the conflict between Turkey and Iraq and the uncertain future of the Iran nuclear programme. These factors partly explained the high oil prices experienced up to July 2008 when the international prices for Murban crude oil peaked at US dollars 137.35 per barrel. However, the global economic slowdown occasioned by the financial crisis and the warmer global weather jointly contributed in pulling down oil prices starting from the end of the third quarter of 2008. International prices for Murban crude oil declined drastically by 53.3 per cent from US dollars 90.60 per barrel in December 2007 to US dollars 42.10 per barrel in December 2008.

10.2. In the domestic market, pump prices remained erratic throughout the year in tandem with international oil prices. However, the last quarter of 2008 recorded high domestic prices despite the lowering of international oil prices as local oil marketers remained hesitant to adjust prices accordingly. On the other hand, inadequate rainfall experienced in the catchment areas for the water used in electricity generation leading to increased dependence on thermal generation. The high energy costs impacted negatively on economic activities in agriculture, manufacturing and transport sectors of the economy.

10.3. The value of imports and exports of petroleum products rose by unprecedented margins in 2008 mainly due to high international petroleum prices. The total import bill of petroleum products increased tremendously by 62.3 per cent from KSh 121,776.0 million in 2007 to KSh 197,676.2 million in 2008. The total quantity of petroleum products imported into the country dropped by 3.0 per cent from 3,691.8 thousand tonnes in 2007 to 3,579.7 thousand tonnes in 2008. Imports of crude oil went up by 10.9 per cent from 1,598.7 thousand tonnes in 2007 to stand at 1,773.3 thousand tonnes in 2008. The decline in imports of petroleum products may be attributed to a 16.2 per cent drop in the imports of petroleum fuels in 2008 compared to a significant increase in 2007. On the other hand, the total quantity of petroleum products exported declined by 55.8 per cent from 216.1 thousand tonnes in 2007 to 95.6 thousand tonnes in 2008. This may be partly attributed to the increase in transit petroleum products to Uganda, Democratic Republic of Congo, Rwanda and Burundi in the period under review.

10.4. Total demand for petroleum products rose marginally by 2.0 per cent in 2008 compared to an increase of 3.4 per cent in 2007. The decelerated growth in demand of petroleum products may be explained partly due to the prevailing high domestic fuel prices, a depressed economy, the Safaricom Initial Public Offer (IPO) which necessitated consumers to realign their investment portfolio and the fuel shortages that hit the country in January/February and December 2008. In this regard, total domestic demand for petroleum products rose from 3,218.3 thousand tonnes in 2007 to 3,283.0 thousand tonnes in 2008.

10.5. Total electricity generation recorded a decelerated growth of 2.1 per cent in 2008 compared to a growth of 7.3 per cent in 2007. Electricity production from hydro electric power sources declined by 8.9 per cent from 3,591.5 GWh in 2007 to 3,271.8 GWh in 2008. This decrease was attributed to inadequate rainfall experienced in the catchment areas for the water used in electricity generation. The number of customers connected under the Rural Electrification Programme rose by 21.3 per cent to stand at 161,373 customers as at July 2008.

**Petroleum** 10.6. The quantity and value of imports, exports and re-exports of petroleum products for the period 2004 to 2008 are presented in Table 10.1. In 2008, the value of imports of petroleum products rose by unprecedented margins due to high international petroleum product prices prevailing for most of the year. The total quantity of petroleum products imported into the country dropped by 3.0 per cent from 3,691.8 thousand tonnes in 2007 to 3,579.7 thousand tonnes in 2008. The decline in imports of petroleum products may be attributed to a drop in the imports of petroleum fuels by 16.2 per cent in 2008 compared to an increase of 42.6 per cent in 2007. Imports of crude oil went up by 10.9 per cent in 2008 from 1,598.7 thousand tonnes in 2007 to stand at 1,773.3 thousand tonnes. Over the same period, the quantity of lubricating greases grew by 27.3 per cent while that of lubricating oils rose from a minimal quantity to 12.4 thousand tonnes. Total import bill of petroleum products increased remarkably by 62.3 per cent from KSh 121,776.0 million in 2007 to KSh 197,676.2 million in 2008. During this period, value of imports for crude oil and petroleum fuels rose by 65.4 per cent and 57.6 per cent, respectively, in 2008. This trend was different from that observed in 2007 where the value of crude oil declined by 10.5 per cent while that of petroleum fuels increased by 25.8 per cent.

\*Provisional

<sup>1</sup> Excludes other light and medium petroleum oils, preparations and residual petroleum products not elsewhere stated, which are included in Chapter 7.

10.7. Total quantities of petroleum products exported declined by 55.8 per cent from 216.1 thousand tonnes in 2007 to 95.6 thousand tonnes in 2008. This may be partly attributed to the increase in transit petroleum products to Uganda, Democratic Republic of Congo, Rwanda and Burundi in the period under review. The decline in export of petroleum products in 2008 was recorded in all the export categories with petroleum fuels contracting by 77.7 per cent while exports of lubricating oils and lubricating greases contracted by 21.1 per cent and 54.1 per cent, respectively. Total value of petroleum products exported declined by 38.2 per cent in 2008 compared to an increase of 21.6 per cent in 2007.

10.8. During the period under review, the volume of total re-exports of petroleum products rose considerably from 18.3 thousand tonnes to 75.2 thousand tonnes while total value of re-exports rose from KSh 723.6 million to KSh 17,194.7 million. The net balance of petroleum products rose by 54.3 per cent in 2008 compared to an increase of 16.5 per cent in 2007. This higher increase in the net balance reflects the low level of petroleum products exports compared to imports in 2008 and the high international prices witnessed during the year.

10.9. As shown in Table 10.2, total volume of crude oil intake at the Kenya Petroleum Refineries Limited (KPRL) declined by 4.8 per cent in 2008 compared to a marginal increase in 2007. The refinery throughput dipped from 1,662.8 thousand tonnes in 2007 to 1,582.7 thousand tonnes in 2008. The decline in crude oil intake at the refinery could be attributed to the high international crude oil prices that prevailed during the period under review coupled with ageing machinery at the facility. Murban was the main type of crude oil processed at the refinery accounting for 84.3 per cent of the total crude intake in 2008 while Arabian medium rose marginally to account for 16.0 per cent.

<sup>1</sup> A mixture of crude oil and pure products realised during processing and is recycled

10.10. Table 10.3 presents details of finished petroleum products processed by KPRL for the period 2004 to 2008. Due to the decline in crude oil intake at the refinery, total output of finished petroleum products also declined by 4.8 per cent in 2008 compared to a marginal increase of 0.7 per cent in 2007. All the products processed at the refinery declined by various margins with heavy and marine diesel oil recording the highest decline of 26.2 per cent. Unleaded motor gasoline premium and light diesel oil declined by 13.5 per cent and 3.8 per cent, respectively, in 2008 compared to increases of 22.7 per cent and 8.9 per cent, respectively, recorded in 2007. Other notable declines in production in 2008 included unleaded motor gasoline regular, illuminating kerosene and jet /turbo fuel, and fuel oil which decreased by 7.9, 6.4 and 3.5 per cent, respectively.

<sup>1</sup> Excludes lubricants.<sup>2</sup> Includes Mogas blending component and fuel use and loss

10.11. Table 10.4 presents the supply and demand balance for petroleum products for the period 2004 to 2008. Total demand for petroleum products rose marginally in 2008 compared to an increase of 2.8 per cent in 2007. The decelerated growth in demand of petroleum products may be explained by the prevailing high domestic fuel prices, a depressed economy and the fuel shortages that hit the country in the months of January, February and December 2008. Total domestic demand for petroleum products rose by 2.0 per cent from 3,218.3 thousand tonnes in 2007 to 3,283.0 thousand tonnes in 2008. All petroleum products recorded increases in sales except jet/turbo oil, illuminating kerosene and heavy diesel oil which recorded declines in sales in the period under review. The decline in jet/turbo oil and illuminating kerosene may be explained by the poor performance in the tourism sector and the aviation sub-sector. Light diesel oil, which is the main type of fuel sold in the country, continued with its upward trend for the five year period signifying increased activities in the motor transport sub-sector. Sales of this oil rose marginally by 2.2 per cent from 1,116.5 thousand tonnes in 2007 to 1,141.1 thousand tonnes in 2008.

<sup>2</sup> Adjustment for inventory changes and losses in production.

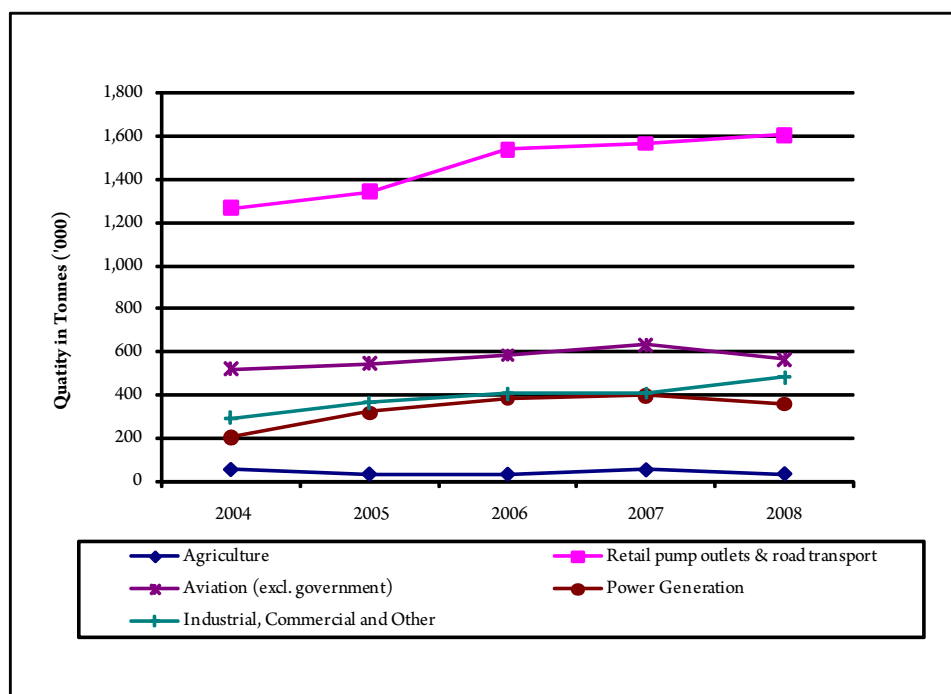

10.12. Table 10.5 and Figure 10.1 show net domestic sales of petroleum fuels by consumer category for the period 2004 to 2008. The upward trend over the five year period in domestic consumption of petroleum products continued during the period under review. Net domestic sales rose marginally from 3,121.7 thousand tonnes in 2007 to 3,133.1 thousand tonnes in 2008. The sector realised only a marginal increase in net domestic sales of petroleum fuels due to the high cost of fuel in the domestic market, a depressed economy and the Safaricom IPO which necessitated consumers to restructure their investment portfolio. In 2008, all the major sectors of the economy recorded declines in oil consumption except for retail pump outlets and road transport, and industrial, commercial and other which, increased by 2.5 per cent and 17.9 per cent, respectively. Consumption in the industrial, commercial and other sectors of the economy has been on an upward trend for the five year period signalling some economic activity in the industrial sector despite the slowdown in the economy. Agriculture sector recorded a mixed consumption trend for the last five years. Consumption by this sector declined by 34.3 per cent from 56.5 thousand tonnes in 2007 to 37.1 thousand tonnes in 2008. Other declines in consumption were recorded in rail transport, tourism sector, aviation and power generation which dropped by 17.7, 30.2, 10.8 and 9.9 per cent, respectively. The downward trend observed in government consumption of fuel was reversed to register a large increase of 50.6 per cent to stand at 12.5 thousand tonnes in 2008.

<sup>1</sup> Comprises sales to tour operators**Figure 10.1: Sale of Petroleum Fuels by Major Consumer Categories, 2004-2008**

10.13. Wholesale prices of petroleum products in Mombasa as at December went up by various margins in 2008 compared to 2007 as shown in Table 10.6. Illuminating kerosene registered the highest percentage increase of 10.8 while fuel oil registered the lowest increase of 1.2 per cent. Wholesale prices of all products increased during the five year period except for illuminating kerosene which registered a marginal decline in 2005 and notable increases in the subsequent years. The increase in fuel prices in 2008 could be attributed to the increase in crude oil prices coupled with the depreciation of the Kenya Shilling against the US dollar and existing cartels in the oil business.

**Table 10.6: Wholesale Prices<sup>1</sup> of Petroleum Products in Mombasa, 2004- 2008**

PRODUCT	KSh per Tonne

<sup>1</sup> Including duties and VAT.

10.14. Table 10.7 presents Murban crude oil prices in the international market for the period 2004 to 2008. International prices for Murban crude oil increased gradually over the period under review to record the highest price of US dollars 137.35 per barrel in July 2008. The price of Murban crude oil declined drastically by 53.5 per cent from US dollars 90.60 per barrel in December 2007 to US dollars 42.10 per barrel in December 2008. The highest international crude oil prices were recorded in the second and third quarters of 2008. The high international crude prices may be partly explained by the high demand of fuel by fast growing economies in Asia and South America, speculation in the commodity market and the depreciation of the dollar against major international currencies. However, the high crude oil prices were slowed down in the last quarter of 2008 by reduced demand due to the international financial crisis and the warmer weather in temperate countries.

**Figure 10.2: International Crude Oil Prices against Domestic Fuel Prices, 2008**

10.15. Table 10.8 and Figure 10.2 give details of average retail prices of selected petroleum products in Kenya. Unprecedented increases in pump prices were observed during the year under review. The domestic fuel price of motor spirit premium retailed at more than KSh 100 per litre for the first time in Kenya in the month of June 2008. The trends in domestic prices were only in tandem with international prices up to August 2008. However, the last quarter of 2008 recorded high domestic prices despite the lowering of international oil prices as local oil marketers failed to lower their prices accordingly. The domestic price for motor spirit premium rose by 2.0 per cent from KSh 84.50 per litre in December 2007 to KSh 86.16 per litre in December 2008 while that of diesel (gas oil) rose by 4.9 per cent from KSh 73.95 per litre to KSh 77.54 per litre in the same period. The prices of gas oil and illuminating kerosene peaked at KSh 100.99 per litre and KSh 84.95 per litre, respectively, in August 2008. The domestic price of Liquified Petroleum Gas (LPG) rose by 8.2 per cent to stand at KSh 1,845.46 per 13 Kg cylinder in December 2008 up from KSh 1,705.76 per 13 Kg cylinder in December 2007.

**Electricity** 10.16. Table 10.9 and Figure 10.3 present details of installed capacity and generation of electricity by different producers in the period 2004 to 2008. Total installed capacity rose by 6.0 per cent in 2008 compared to an increase of 1.7 per cent in 2007. The rise in installed capacity was the result of increases in thermal oil and hydro installation from 389.3 MW and 677.3 MW in 2007 to 418.9 MW and 719.0 MW, respectively, in 2008. The increase in hydro installation resulted from the commissioning Sondu-Miriu hydro project with installed capacity of 60 MW. Geothermal and cogeneration installed capacity remained unchanged over the last three years.

**Table 10.9: Installed Capacity and Generation of Electricity<sup>1</sup>, 2004 – 2008**

	INSTALLED CAPACITY MW <sup>2</sup>					GENERATION GWh <sup>3</sup>								
	Hydro	Thermal Oil	Geo thermal	Co-generation	Total	Hydro <sup>4</sup>	Thermal oil				Geo thermal	Co-generation	Wind	Total

\* Provisional

IPP: Independent Power Producers

EPP: Emergency Power Producers

<sup>1</sup> Includes generation for industrial establishment with generation capacity of over 100KVA plus emergency supply of 99 MW by contracted generators<sup>2</sup> 1 megawatt = million watts = 1,000 kilowatts.<sup>3</sup> Gigawatt hour = 1,000,000 kilowatt hours<sup>4</sup> Includes Imports from Uganda and Tanzania

10.17. Total electricity generation recorded a decelerated growth of 2.1 per cent in 2008 compared to a growth of 7.3 per cent in 2007. This was largely due to an 8.9 per cent decline in electricity production from hydro generation power sources. The decline in hydro power generation was attributable to low water levels at the hydro electricity power generation dams. Generation from thermal oil and geothermal plants rose by 23.6 and 5.1 per cent in 2008 compared to declines of 4.5 per cent and 5.4 per cent, respectively, in 2007. The increase in thermal generation was necessary in order to compensate for the significant drop in hydro electric power generation. Hydro electric power accounted for more than half of total electricity generation while geothermal and thermal sources accounted for 16.1 and 33.2 per cent, respectively, during the period under review.

**Figure 10.3: Generation of Electricity by Source, 2004-2008**

10.18. Details of electricity energy supply and demand balance for the period 2004 to 2008 are given in Table 10.10 and Figure 10.4. Total domestic consumption of electricity increased from 5,156.6 GWh in 2007 to 5,352.2 GWh in 2008. Demand by domestic and small commercial users grew by 14.9 per cent in 2008 compared to a growth of 10.8 per cent in 2007. Demand in electricity by large and medium (commercial and industrial) consumers declined by 11.5 per cent in 2008 compared to an increase of 7.6 per cent in 2007. The demand of electricity by rural electrification increased by 12.4 per cent in 2008 as a result of increased connections of rural households compared to an increase of 3.5 per cent in 2007. Due to the on-going rehabilitation and expansion of street lighting programmes in all major urban centres in the country, demand in electricity for street lighting more than doubled in 2008 compared to an increase of 22.4 KWh in 2007. Importation of electricity from Uganda and Tanzania increased by 10.5 per cent from 22.6 GWh in 2007 to 25.0 GWh in 2008 while exports of electricity to Uganda declined by 29.6 per cent during the same period.

**Table 10.10: Electricity Supply and Demand Balance<sup>1</sup>, 2004 - 2008**

<sup>1</sup> Figures are in calendar year

10.19. Transmission losses and unallocated demand which had been on an upward trend reversed in 2008 to decrease by 3.8 per cent. Transmission losses and unallocated demand as a proportion of total demand improved to 16.5 per cent in 2008 compared to 17.5 per cent in 2007.

Figure 10.4: Electricity Supply and Demand, 2004-2008

10.20. Total domestic demand and supply of commercial energy expressed in terms of primary source for the period 2004 to 2008 are presented in Table 10.11. During the period under review, consumption of coal and coke recorded a paltry growth of 1.6 per cent compared to a decline of 8.5 per cent recorded in 2007. Total consumption of hydro and geothermal energy declined by 5.8 per cent in 2008 compared to an increase of 12.8 per cent in 2007 due to a decline in local production of hydro power by 8.9 per cent in 2008. Total energy consumption declined marginally from 3,627.1 thousand tonnes of oil equivalent in 2007 to stand at 3,617.1 thousand tonnes of oil equivalent in 2008.

**Table 10.11: Production, Trade and Consumption of Energy<sup>1</sup> Expressed in Terms of Primary Source, 2004 - 2008.**

\* Provisional.

<sup>1</sup> Modern sector only; fuelwood and charcoal are excluded.

10.21. During the period under review, local energy production as a percentage of total energy consumption declined to 10.2 per cent compared to 10.9 per cent in 2007. Per capita energy consumption in terms of kilograms of oil equivalent declined slightly from 97.5 kilograms of oil equivalent per person in 2007 to 97.2 kilograms of oil equivalent per person in 2008.

### **Developments in the Energy Sector**

**Rural Electrification** 10.22. During the year under review, Kenya Power and Lighting Company continued to implement the rural electrification programme on behalf of Rural Electrification Authority (REA). A total of 832 projects covering trading centres, secondary schools, health facilities, community water projects, coffee factories, tea buying centres and government/administrative centres were completed throughout the country at a cost of KSh 5.9 billion. The projects benefited 639 trading centres across the 210 constituencies in the country. Other beneficiaries included 641 schools, 203 health centres, 133 government/administrative centres, 79 coffee factories, 70 tea buying centres and 24,960 residential customers.

10.23. The cumulative capital expenditure since inception of the Rural Electrification Programme in 1973 rose to KSh 20 billion during the financial year 2007/08, up from KSh 13 billion the previous financial year. A total of KSh 1,282 million was collected from the Rural Electrification Levy in 2007/08 compared to KSh 1,163 million the previous year.

10.24. The number of customers connected under the programme rose by 21.3 per cent to stand at 161,373 customers as at July 2008 up from 133,047 customers the previous year. Units of electricity sold increased by 15.8 per cent from 203 million units to 235 million units while revenue realised grew by 19.9 per cent from KSh 1,721 million in 2006/07 to KSh 2,064 million in 2007/08, respectively.

## Chapter 11

### Manufacturing

#### Overview

Kenya's manufacturing sector growth rose by 3.8 per cent in 2008, the lowest in the last five years, compared to a revised growth of 6.5 per cent registered in 2007. Major industries that registered growths included beverages, clothing, wood and cork products and non-metallic mineral products. Some of the key challenges facing the sector included low levels of productivity and the high cost of production. These challenges were aggravated by the spillover effects from the post-election crisis, high inflationary pressures, the depreciation of the Kenya shilling, counterfeits and stiff competition from cheap imports. The period however, witnessed the revival of Anti-Counterfeit Bill to give the regulating bodies more strength in discharging their duties. Towards the start of second quarter, there was a steep increase in electricity tariff by more than 65 per cent pushing the cost of production upwards. This led to manufacturing entities realigning their operations in order to remain relevant in the market. The slow down in the sector resulted in closure of some entities, under-utilization of capacity and lay offs. The sector's contribution to formal wage employment stood at 13.6 per cent in 2008. Major industries that registered growth were; beverages, clothing, wood and cork products, paper and paper products, non-metallic mineral products among others.

**Employment** 11.2 Number of direct formal wage employment in the manufacturing sector dropped by 0.3 per cent from 264,812 persons in 2007 to 264,095 persons in 2008. Direct employment of Kenyans in the EPZ contracted further for the third year running by 12.4 per cent to stand at 30,183 persons in 2008. The total employment attributable to EPZ including an estimated 10,061 indirect jobs rose to over 40,244 in 2008.

**Manufacturing Output** 11.3. Manufacturing sector output, value added and compensation of employees shown in Table 11.1. Value of manufacturing output rose by 14.5 per cent from KSh 626.2 billion recorded in 2007 to KSh 717.2 billion in 2008. Value added rose from KSh 190.2 billion to KSh 223.4 billion over the same period. The rate of growth in the compensation of employees decelerated to 1.6 per cent in 2008 compared to 3.6 per cent in 2007.

**Table 11.1: Manufacturing Sector-Output, Compensation of Employees**

and Value Added, 2004-2008			Current Prices KSh Million	
YEAR	Value of Output	Intermediate Consumption	Value Added	Compensation of Employees
2004	444,648	317,205	127,443	46,791
2005	500,215	351,053	149,162	50,734
2006	560,089	393,312	166,777	57,827
2007	626,173	436,008	190,165	59,898
2008*	717,217	493,864	223,353	60,829

\* Provisional.

**Figure 11.1: Growth of Value Added of Manufacturing Sector**

## Quantum Indices

11.4. Table 11.2 shows the quantum index of the manufacturing production for the period 2004-2008. Based on the quantum index, manufacturing production declined by 1.0 per cent in the year 2008 compared to a growth of 7.0 per cent in 2007. Most of the sub-sectors experienced declines in production during the review period. Sub-sectors that registered growths included beverages, clothing, leather and footwear, wood and cork products, paper and paper products, non-metallic minerals and miscellaneous manufacturing. Notable declines were recorded in printing and publishing, basic industrial chemicals, rubber products, electrical machinery and transport equipments among others. Food manufacturing sub-sector recorded a decline in growth of 3.7 per cent whereas beverages and tobacco sub-sector grew by 5.6 per cent over the same period. There was a general decline in demand of most of the manufactured food products in 2008 compared to 2007. This was contributed by a general rise in input prices and other intermediaries like fuel prices which led to increased cost of production. The period also recorded increased consumer prices, dampening the consumer demand further.

**Table 11.2: Quantum Index of Manufacturing Production, 2004-2008**

Industry	1976=100					Percentage Change 2008/2007
	2004	2005	2006	2007	2008*	
Meat & Dairy Products	104.8	118.7	125.3	154.8	145.1	-6.3

\* Provisional

11.5. Growth in meat and dairy products industry declined by 6.3 per cent in 2008 compared to a growth of 23.5 per cent experienced in 2007. Production of beef, sheep, lamb and goats, pig (pork) processed chicken, baby foods with milk base and ice-cream registered growths of 10.0, 8.2, 17.2, 3.5, 45.9 and 9.9 per cent respectively, in 2008 while sausage production declined by 4.8 per cent during the year under review. Production of liquid processed milk dropped by 7.6 per cent from 282,125 thousand litres in 2007 to 260,725 thousand litres in 2008.

11.6 Canned vegetables, fruits, fish, oils and fats industries which have been recording positive growths in the past contracted by 2.5 per cent in 2008. Production of canned fruits decreased by 0.5 per cent from 234,047 tonnes to 232,857 tonnes in 2008. Fish processed dropped by 21.6 per cent from 14,905.5 tonnes recorded in 2007 to 11,686.0 tonnes in 2008. Edible fats and margarines decreased marginally by 0.7 per cent while edible oils dropped from 121,091.5 to 112,123.1 thousand litres in 2008. Production of fruits and vegetable juices and canned vegetables went up by 14.6 and 22.7 per cent, respectively.

11.7. During the year under review, production of grain mill products index increased by 0.1 per cent. As illustrated in Table 11.3, this growth was mainly driven by the milling of sifted maize meal which rose to 344.2 thousand metric tonnes in 2008 from 287.5 thousand metric tonnes in 2007. Milling of wheat flour and rice however, recorded declines of 16.9 per cent and 24.7 per cent respectively.

**Table 11.3: Production of Grain Milling Products, 2004-2008**

YEAR	COMMODITY		
	Sifted Maize meal	Wheat Flour	Rice
2004	207.5	338.4	30
2005	283.1	363.3	39.5
2006	322.8	392.8	39.7
2007	287.5	374.5	35.6
2008*	344.2	311.2	26.8

\* Provisional

11.8. Production of bakery products declined further by 4.9 per cent during the period under review. Production of cakes and biscuits rose by 8.3 and 9.7 per cent, respectively, while production of bread dropped by 7.8 per cent during the period under review.

11.9. The sugar sub-sector experienced significant challenges during the review period resulting to a marginal decline of 1.0 per cent. There was low factories' performance emanating from the heavy rains experienced in the third and fourth quarters of 2008, disruptions of cane harvesting and transport operations. The period recorded increases in sugarcane prices raising further the cost of production. High crude oil prices increased further the transport costs for sugarcane and distribution of the finished sugar. Inputs such as fertilizers and packaging materials which are petroleum based were at an all time high, increasing the operational costs. Sugar production dropped by 0.5 per cent from 520.4 thousand tonnes in 2007 to 517.7 thousand tonnes in 2008. The industry was plagued by high costs of production and a lack of credit for inputs leading to low yields.

11.10. The miscellaneous foods industry registered a decline of 7.1 per cent during the period under review. Production of instant coffee more than doubled from 121.5 metric tonnes in 2007 to 256.4 metric tonnes in 2008. Production of prepared animal feeds rose by 25.5 per cent in 2008. Pig feeds, poultry feeds and horse and other feeds went up by 62.8, 34.0 and 21.3 per cent, respectively. Production of milled coffee and roasted coffee dropped by 29.1 and 7.8 per cent, respectively in 2008.

11.11. Beverages and tobacco sub-sector grew by 5.6 per cent in 2008, a slower growth compared to 20.0 per cent growth recorded in 2007. This was mainly driven by production of beer and soft drinks which rose by 8.0 per cent and 2.1 per cent, respectively during the review period. In addition, production of spirits rose by 13.1

per cent from 25,317.2 thousand litres in 2007 to 28,645.5 thousand litres in 2008. Production of cigarettes dropped marginally by 0.3 per cent, though exports of tobacco and tobacco products rose by 6.0 per cent in value terms during the period under review.

11.12. Production in the textiles sub-sector dropped by 23.7 per cent in 2008. This was mainly due to the decline in production of blankets, canvas material, cardigans, knitted fabrics, rope and twine which registered different drops in production margins during the review period. Production of cotton woven fabrics, knitted fabrics and cardigans declined by 21.8, 2.4 and 5.9 per cent whereas production of bed sheets and gunny bags went up by 16.7 per cent and 21.2 per cent, respectively, in 2008.

11.13. Clothing industry grew significantly by 15.5 per cent in 2008. The key drivers of growth were production of; shirts, sport shirts and t-shirts, uniforms and overalls, vests, singlet and underwear which grew by various margins. However, production of trousers and suits dropped by 33.0 and 18.8 per cent respectively, in 2008.

11.14. The leather and footwear industry recorded a modest growth of 1.8 per cent buoyed by a growth in production of unfinished leather. Processing of sheep and goat skin rose by 0.7 per cent in 2008. There was minimal growth in the manufacture of polyvinyl chloride (PVC), leather cloth and sole leather. Production of wood and cork products rose by 11.9 per cent. Sawn timber increased by 11.9 per cent while furniture and fixtures rose by 9.0 per cent as proxied by employment growth within the sub-sector.

11.15. Paper and paper products industry recorded a substantial growth of 29.5 per cent in 2008. This was mainly motivated by production of exercise books, kraft paper boards and wrapping papers which rose by 12.0, 14.8 and 51.1 per cent, respectively. Other products that increased in their level of production include paper bags and sacks, toilet paper rolls and corrugated paper containers which went up by various margins during the period under review.

11.16. The printing and publishing industry recorded an unimpressive decline of 33.2 per cent in 2008. Production of newsprint went down by 33.2 per cent from 6,446 metric tonnes in 2007 to 4,305 metric tonnes in 2008. However, production of news paper copies rose by 4.0 per cent during the period under review.

11.17. Basic industrial chemicals sub-sector declined by 26.1 per cent in 2008. Production of oxygen, nitrogen and hydrogen rose marginally while production of herbicides more than doubled during the period under review. Production of acetylene and electrodes dropped by 3.7 and 29.2 per cent during the same period. Production of pyrethrum extract declined by 63.0 per cent from 46.0 tonnes in 2007 to 17.0 tonnes in 2008. Liquid insecticides dropped from 131,605 litres recorded in 2007 to 119,292 litres in 2008. Production of fertilizers dropped by 42.8 per cent during the review

period.

11.18. There was a growth of 7.1 per cent in petroleum and other chemicals sub-sector in 2008. This was mainly driven by increases in the production of paints, distempers, vanishes and lacquers and drugs (tablets) during the period under review. Paints manufacture rose from 19.4 million litres to 19.8 million litres. However, production of thinners dropped significantly by 29.4 per cent during the review period. The perfumes and toiletries sub-sector registered mixed performances during the review period. Production of laundry soap, detergent powder, detergent liquid, deodorants and anti-respirants rose by 25.1, 14.8, 30.2 and 39.1 per cent, respectively in 2008. In addition, production of cosmetics, liquid paraffin and castor oil rose by 6.0 per cent and 18.3 per cent, respectively. However, production of tooth paste and cream lotions dropped by 18.9 and 22.3 per cent, respectively. Washing soap production declined from 15,421 metric tonnes in 2007 to 14,152 metric tonnes in 2008 while laundry soap rose from 124,739 tonnes to 156,049 tonnes in 2008.

11.19. In the miscellaneous chemical industry, production of shoe polish and matches went down by 0.2 and 25.4 per cent, respectively. In addition, production of Liquefied Petroleum Gas (LPG), motor spirits, kerosene, gas oil and bitumen went down by 1.1, 12.7, 6.7, 6.0 and 17.2 per cent respectively, during the review period. Nevertheless, production of diesel and fuel oil rose by 4.7 and 0.5 per cent, respectively.

11.20. Rubber products sub sector recorded a significant drop of 23.1 per cent mainly as a result of decline in the production of motor vehicle tyres and tubes. Production of motor vehicle tyres and tubes dropped by 40.7 and 70.8 per cent respectively, in 2008. Exports of the same products went down by 41.3 and 57.1 per cent, respectively. On the other hand, imports of motor vehicle tyres rose by 12.5 per cent, while that of tubes dropped by 38.7 per cent in 2008. Rubber shoes rose by for and soles production went up by 24.8 and 18.7 per cent respectively.

11.21. Production of plastic products registered a 9.6 per cent decline. This could be attributed to the production of polythene film bags which dropped by 23.3 per cent from 12,856 tonnes recorded in 2007 to 9,855 tonnes in 2008. However, production of plastic shoes and plastic bottles rose by 7.0 and 0.5 per cent respectively during the review period.

11.22. The clay and glass products industry recorded a 2.3 per cent decline in production in 2008. Production of floor and wall tiles declined by 6.9 per cent whereas glass bottles production dropped by 2.9 per cent over the same period.

11.23. The non-metallic industry recorded a splendid growth of 46.6 per cent in 2008 mainly aided by production of clinker, limestone, roofing tiles, cement and, concrete pipes and blocks, with the latter increasing threefold. Further details on cement production and utilization are presented indicated in Table 11.4. Local cement

production rose from 2,615.1 thousand metric tonnes in 2007 to 2,829.6 thousand metric tonnes in 2008, an 8.2 per cent increase. Importation of cement on the other hand dropped by 56.0 per cent from 42.5 thousand metric tonnes in 2007 to 18.7 thousand metric tonnes in 2008. Exports of cement to Uganda and Tanzania rose by 21.8 per cent to 626.5 thousand metric tonnes in 2008. However, there was a 21.5 per cent decline in the export of cement to other countries from 84.1 thousand metric tonnes in 2007 to 66.0 thousand metric tonnes in 2008. Production of steel wool also declined by 5.1 per cent in 2008.

**Table 11.4: Cement Production and Utilisation, 2004-2008**

YEAR	PRODUCTION	IMPORTS	CONSUMPTION AND STOCKS	EXPORT TO	
				Uganda and Tanzania	All Other Countries
2004	1,873.30	3.7	1,478.70	249.8	148.5
2005	2,123.30	9.9	1,675.90	337.5	127.3
2006	2,405.90	3.8	1,765.80	428.1	123.4
2007	2,615.10	42.5	2,059.50	514.0	84.1
2008*	2829.58	18.7	2155.8	626.5	66.0

\* Provisional.

11.24. The metal products industry declined by 1.9 per cent in 2008. During this period, production of galvanized iron sheets rose by 0.4 per cent to 189.3 thousand metric tonnes in 2008. Iron bars and rods, barbed wire and cork, welded mesh rose by 9.8, 31.3, and 3.4 per cent in the same period. Production of nails, silencers, gas cylinders and metal cans and tins dropped by 12.3, 15.3, 43.8 and 15.3 per cent respectively. Production of gas cylinders dropped from 8,715 in 2007 to 4,895 in 2008. Nevertheless, production of aluminium sufurias rose by 20.8 per cent. Non electrical machinery industry recorded a decline of 10.7 per cent in production. Production of wheel barrows dropped by 10.7 per cent, in 2008.

11.25. Electrical machinery production dropped further for the third consecutive year by 22.5 per cent in 2008. There was however increased production of motor vehicle batteries and battery plates by 11.2 per cent in 2008. The production dry cells dropped from 109.3 million cells in 2007 to 88.1 million cells in 2008 mostly due to competition from counterfeit and cheap imports.

11.26. Production of transport equipment dropped by 15.5 per cent in 2008 with assembling of motor vehicles declining by 12.2 per cent from 6,542 in 2007. Further, production of coaches and bus bodies and lorry bodies and trailers dropped by 15.8 and 23.9 per cent, respectively.

11.27. Production of miscellaneous manufacture increased by 28.2 per cent in 2008. Ball point production dropped by 22.8 per cent in 2008 while industrial and paint brushes fell by 31.2 per cent. However, production of household brushes went up substantially, while illuminated signs and mattresses increased by 84.0 and 63.1 per cent respectively.

**Investment** 11.28. The global financial crisis has had far reaching impacts in the world over, and Kenya as a country has not been spared either. The crisis has contributed to declining profitability, tighter credit conditions, shrinking stock values, slowed market growth and an aura of uncertainty over the future which is not good for investment. In the manufacturing sector, Kenya Investment Authority (KIA) approved projects in; manufacture of motor vehicle bodies, garments, cement, furniture, sugar, food products, pharmaceuticals, cooking oil, detergents and non-alcoholic drinks. In the same period, the total capital costs in the sector more than tripled to KSh 23.3 billion from 7.6 billion in 2007 out of which KSh 23.1 billion was from local sources. Employment to locals however dropped further by 38.1 per cent to 1,508.

**Credit to the Manufacturing Sector** 11.29. Table 11.5 presents the number and expenditure for industrial projects approved by selected government institutions. During the year under review, Development Bank of Kenya (DBK) experienced a decreased demand for loans and advances. DBK approved long term loans and short term advances of KSh 1.3 billion and KSh 42 million in letters of credit, in 26 projects. The approvals were made to projects operating in the manufacturing sector among others. The new projects were expected to create an estimated 300 new direct jobs.

**Table 11.5: Industrial Projects Approved By Selected Government or Quasi-Government, 2004-2008**

INSTITUTION	Number of Projects					Approved Expenditure (KSh Million)				
	2004	2005	2006	2007	2008*	2004	2005	2006	2007	2008*
Industrial Development Bank Limited (I.D.B Capital.)	4	0	1	1	2	98	0	37.4	20.0	47.8
Development Bank of Kenya (DBK) <sup>1</sup>	13	20	32	39	26	525	892	959.6	1800	1342
Kenya Industrial Estates Limited (K.I.E.)	80	117	83	69	39	18	29.8	33.5	20.7	11.7

<b>TOTAL</b>	<b>101</b>	<b>137</b>	<b>117</b>	<b>111</b>	<b>68</b>	<b>643</b>	<b>921.8</b>	<b>1031.7</b>	<b>2120.7</b>	<b>1622.5</b>

\* Provisional

<sup>1</sup>Expenditure includes ICT, real estate, cut flowers, education, health services & manufacturing

11.30. Industrial Development Bank Capital (IDB Capital) disbursed loans using its own internally generated resources for short term to medium term lending. This was mainly for machinery finance and working capital. Total approvals amounted to KSh 162.5 million as compared to KSh 108.4 million in 2007. Of this, about 29 per cent of the funds disbursed went to manufacturing enterprises mainly for expansion purposes.

11.31. Industrial and Commercial Development Corporation (ICDC) invested KSh 171.0 million in form of rights issue into a manufacturing company engaging in soft

drinks production in addition to a loan of KSh 50 million in 2008. These funds were meant for increasing the production capacity of the firm.

11.32. Kenya Industrial Estates Limited disbursed loans worth KSh 11.7 million in 2008 to 39 projects. Major manufacturing activities benefiting from the funds were in metal and allied, textiles and wood products manufacture.

**Export Processing Zones (EPZ)** 11.33. EPZ programme experienced mixed performance growth in 2008 as depicted in Table 11.7. The programme experienced various challenges including stiff competition and high cost of production. In addition, the US market which absorbs more than 50 per cent of total exports from the zones was adversely affected by the economic recession. In spite of this, the programme recorded a positive growth in a number of indicators which included the number of operational enterprises, total sales, exports and local purchases, among others. The indicators which exhibited a downward trend were number of employment, expenditure on local salaries and imports. The number of operating enterprises rose to 74 in 2008 from 72 recorded in 2007.

**Table 11.6: Selected EPZ Performance Indicators, 2004-2008**

Indicator	2004	2005	2006	2007	2008*
Gazetted Zones (Numbers)	41	43	39	41	38
Enterprises Operating (Numbers)	74	68	71	72	74
Employment – Locals	37,723	38,051	36,767	34,446	30,183
(Numbers) - Expatriates	837	800	649	511	469
<b>Total Workers</b>	<b>38,560</b>	<b>38,851</b>	<b>37,416</b>	<b>34,957</b>	<b>30,652</b>
Export Sales (KSh Million)	23,047	20,036	22,893	27,400	28,052
Domestic Sales (KSh Million)	651	3,160	1,403	1,421	2,536
<b>Total Sales (KSh) Million</b>	<b>24,211</b>	<b>23,774</b>	<b>25,352</b>	<b>29,400</b>	<b>31,202</b>

Investment (KSh Million)	17,012	18,682	20,320	19,027	20,122

**Source:** Export Processing Zones (EPZ)

\* Provisional

11.34. The number of gazetted zones as at the end of December 2008 stood at 38 down from 41 in 2007, out of which 36 were privately owned and operated, while 2 were public. Nine of the zones are located in Nairobi, 20 in Mombasa, 3 in Athi River (Mavoko), 2 in Kilifi, one each in Voi, Kerio Valley, Thika and Isinya in Kajiado district. Three new zones were gazetted in the course of 2008 while six were degazetted in the same period.

11.35. Total sales from the EPZ enterprises rose by 6.1 per cent in 2008 to KSh 31,202 from KSh 29,400 million in 2007, out of which export sales accounted for 89.9 per cent. Domestic sales in the same period increased by 78.5 per cent to stand at KSh 2,536 million.

11.36. Imports declined by 6.6 per cent to stand at KSh 16,151 million in the year

under review. On the other hand, expenditure on local purchases rose by 29.6 per cent reflecting an increase in activity/interaction level between the customs territory and the EPZ.

11.37. The cumulative capital investment in form of equipment, machinery and other funds invested by the 74 operational enterprises rose by 5.8 per cent to KSh 20,122 million in 2008 from KSh 19,027 million recorded during the previous year. Capital investment, here involves stocks save for the new enterprises which started operations during the (2008) and also those firms which reported increased capital investment compared to previous year. During the year 2007, capital investment went down due to depreciation in one on the major apparel firm.

11.38. Local resource utilisation constitutes the amount of resources spent by EPZ enterprises in purchase of local goods and services. It is the expenditure incurred in payment of local employees, settlement of bills for utilities consumed among other domestic expenditure. This constitutes a foreign trickle equivalent net benefit into the economy and stood at KSh 11,313 million in 2008 up from KSh 9,110 million recorded in 2007.

11.39. In 2008, 13.5 per cent of total EPZ enterprises were wholly Kenyan, 29.7 per cent were joint ventures while the rest were foreign investments. This was compared to 16.7 per cent (Kenyan owned), 29.2 per cent (joint ventures) and 54.2 per cent (wholly foreign) in 2007.

**Africa Growth and Opportunity Act (AGOA)** 11.40. Table 11.8 gives a breakdown of the indicators of the apparel/garment sector under the EPZ. Africa Growth Opportunity Act (AGOA) is a US initiative meant to increase exports from accredited Sub Saharan Africa (SSA) countries, especially apparels by accessing the US market duty and quota free as long as certain eligibility conditions are met. This is a critical sector, characterised by its labour intensiveness and hence suitable industry for a country like Kenya.

**Table 11.7: Impact of AGOA on EPZ Garment/Apparel Sector, 2004-2008**

	2004	2005	2006	2007	2008*	% Growth
Number of Enterprises	30	25	25	22	19	-13.6
Employment	34,614	34,234	31,813	28,006	25,776	-8.0
Capital Investment (KSh Million)	8,595	9,983	10,317	8,314	7,578	-8.9
Exports (KSh Million)	17,575	14,688	14,774	13,768	15,691	14.0

**Source:** EPZ

\*Provisional

11.41. Exports to the US increased by 14 per cent to stand at KSh 15,691 million in 2008 from KSh 13,768 million recorded in the 2007. However, some garment enterprises have diversified to other markets other than the US such as Europe, Canada, Russia, UAE, Hong Kong, Panama and Zimbabwe among others. During the year under review, these new markets were destinations of KSh 177 million worth of goods compared with

---

KSh 33 million in 2007. The new markets for apparel absorbed a quantity of 641,010 pieces valued at KSh 120 million.

11.42. Direct employment in the garment/apparel sector contracted by 8.0 per cent to stand at 25,776 in 2008 from 28,006 recorded the previous year. This was as a result of scaling down of operations and closure of some firms. Investment on the other hand registered a decline of 8.9 per cent as a result of the enterprises contracting operations and depreciation of the Kenya Shilling.

**Outlook** 11.43. Manufacturing sector is important in the Kenyan economic development in terms of its contribution to total output, export earnings and employment creation as identified in the Vision 2030. To attain the anticipated growth levels, there is need to bring in new investments and capital accumulation. There is also need for the government to formulate viable strategies to enhance productivity growth. Productivity development strategies should stress on technological upgrading (innovations), quality of labour force, stepping up of research and development activities and the full utilization of government incentives.

11.44. The manufacturing sector is expected to have a lackluster performance in 2009 if the global financial crisis continues. Demand for most manufactured products is expected to slow down on the backdrop of high cost of production and reduced agricultural output. Further depreciation of the shilling is expected to impact negatively on the manufacturing output as the cost of imported raw materials increases.

11.45. Growth in the EPZ sector is critical and depends on how issues of competition, incentives, high cost of operation/production and the global recession challenge in the USA market are addressed. If these constraints are addressed, EPZ programme is expected to register higher growth and also play a bigger role towards achievement of the Vision 2030 currently under implementation. Transition of EPZ programme to Special Economic Zones (SEZ) has already been approved by the Government. This means that the scope of activities would be expanded and corresponding benefits associated are likely to increase.

## Chapter 12

### Building and Construction

**Overview** In 2008, the Government continued with its infrastructure development programme in the building and construction sector. The sectoral targets included increased investments in the road networks and provision of affordable housing. The general road network conditions in the country has been improving due to the gradual and sustained investment in the sector by the government. The housing sector has continued to be characterized by inadequacy of affordable and decent housing, low level of urban home-ownership, extensive and inappropriate dwelling units, including slums and squatter settlements. Most of the sector's key economic indicators showed improvements in the year under review.

12.2. The overall expenditure by the Ministry of Roads is expected to rise by 25.9 per cent to KSh 53,223.1 million in 2008/09 financial year. Disbursement of funds by the Kenya Roads Board for road construction, rehabilitation and maintenance are expected to increase by 23.4 per cent from KSh 15.4 billion in 2007/08 to KSh 19.0 billion in 2008/09. The index of Government expenditure on roads increased from 219.4 in 2007 to 256.4 in 2008. Loans and advances from commercial banks to the sector declined from KSh 31,576 million in 2007 to KSh 29,247 million in 2008 representing a 7.4 per cent decrease. Cement consumption increased by 7.0 per cent from 2,061.4 thousand tonnes recorded in 2007 to 2,205.8 thousand tonnes in 2008. The total value of reported private building works completed in selected main towns rose by 12.3 per cent to KSh 12,323.2 million in 2008 from KSh 10,969.2 million in 2007. The total estimated cost of reported new private buildings completed increased by 6.8 per cent to KSh 6,298.1 million in 2008 from KSh 5,898.1 million in 2007. The total value of building plans approved rose by 3.3 per cent from KSh 67,087.8 million in 2007 to KSh 69,321.7 million in 2008. Total wage employment in the sector rose by 4.3 per cent to 84.8 thousand persons in 2008 from 81.3 thousand persons registered the previous year.

**Key Economic Indicators** 12.3. The trends of key economic indicators in building and construction sector for the years 2004 to 2008 are shown in Table 12.1. Cement consumption increased by 7.0 per cent to register 2,205.8 thousand tonnes in 2008. The increase was as a result of several on-going projects in the roads and housing sub-sectors. The index of reported private building works completed in main towns increased from 61.0 in 2006 to 108.2 in 2007 largely on account of houses constructed and completed by the private sector. The index of government expenditure on roads increased from 219.4 in 2007 to 256.4 in 2008. The index of reported public building works completed in main towns increased from 3.4 in 2006 to 4.4 in 2007 mainly because of housing projects completed by National Housing Corporation (NHC) and Ministry of Housing.

**Table 12.1: Selected Key Economic Indicators in Building and Construction<sup>1</sup>, 2004- 2008**

	2004	2005	2006	2007	2008*
1982=100					
"Index" of reported private building work completed in main towns <sup>2</sup> .....	33.0	36.0	61.0	108.2	-

"Index" of government expenditure on roads .....	100.6	62.6	201.1	219.4	256.4
Cement consumption ('000 tonnes) .....	1,418.3	1,572.5	1,765.8	2,061.4	2,205.8
"Index" of Cement consumption .....	244.8	271.4	304.8	355.8	380.7
Employment ('000) ..	77.3	78.2	79.9	81.3	84.8
"Index" of Employment ..	128.0	129.5	132.3	134.6	140.4

\* Provisional.

<sup>1</sup> Actual deflated by various building or construction cost indices.

<sup>2</sup> The average of the actual of two consecutive years is taken in each case for reported completion of buildings

12.4. Public and private wage employment in the Building and Construction industry rose by 4.3 per cent from 81.3 thousand persons registered in 2007 to 84.8 thousand persons in 2008. Public sector employment decreased by 1.0 per cent from 20.1 thousand persons in 2007 to 19.9 thousand persons in 2008. Private sector employment increased by 6.0 per cent to 64.9 thousand persons in 2008 from 61.2 thousand persons indicated in 2007.

12.5. Table 12.2 presents annual percentage change in building and construction cost indices for the period 2006 to 2008. The cost indices of materials for all buildings, and other construction recorded growths of 7.0 and 9.2 per cent respectively in 2008 compared to growths of 7.5 and 4.4 per cent respectively in 2007. The overall cost index of materials increased by 7.6 per cent in 2008 compared to a rise of 6.6 per cent the previous year. The increases may be partly attributable to a sharp rise in the prices of timber as the ban on logging is still in force. The total cost indices for residential and non-residential buildings registered slower growths of 7.0 and 6.6 per cent respectively in 2008 compared to growths of 7.8 and 6.9 per cent in 2007. The total cost indices for all buildings and other construction registered growth rates of 8.9 and 7.8 per cent respectively in 2008 compared to 5.3 and 5.5 per cent in 2007. The overall cost index rose from 6.7 per cent growth registered in 2007 to 7.1 per cent in 2008.

**Table 12.2: Annual Percentage change in Building and Construction Cost Indices<sup>1</sup>, 2006 - 2008**

	Materials			Labour			Total Cost		
	2006	2007	2008*	2006	2007	2008*	2006	2007	2008*
Residential Buildings .....	8.9	8.0	7.3	9.1	6.8	6.1	8.9	7.8	7.0
Non-Residential Buildings .....	8.0	6.9	6.7	9.1	6.8	6.1	8.3	6.9	6.6
All Buildings .....	8.5	7.5	7.0	9.1	6.8	6.1	8.6	5.3	8.9
"Other" Construction .....	9.0	4.4	9.2	9.1	6.8	6.1	9.0	5.5	7.8
Overall Cost Index	8.6	6.6	7.6	9.1	6.8	6.1	8.8	6.7	7.1

\* Provisional.

<sup>1</sup> From December to December.

12.6. Labour costs registered a slower growth of 6.1 per cent in 2008 as compared to a growth of 6.8 per cent in 2007. Wage for unskilled labour rose by 5.8 per cent in 2008 compared to 2.1 per cent in 2007. The wages for semi-skilled and skilled labour registered slower growths of 6.1 and 6.4 per cent respectively in 2008 as compared to growths of 8.9 and 8.6 per cent respectively in 2007. Figure 12.1 presents the trend in overall labour construction cost indices for the years 2004 to 2008.

Figure 12.1: Trend in Overall Labour Construction Cost Indices, 2004 – 2008 (Base 1982 = 100)

12.7. The analysis of the values of building plans approved by Nairobi City Council (NCC) and other towns for the years 2004 to 2008 is shown in Table 12.3. In 2008, the value of building plans approved by NCC declined by 12.9 per cent from KSh 59,765.1 million recorded in 2007 to KSh 52,073.0 million registered in 2008. Value of building plans approved by other towns rose significantly from KSh 7,322.7 million in 2007 to KSh 17,248.7 million recorded in 2008. The overall value of building plans approved registered a marginal increase of 3.3 per cent from KSh 67,087.8 million in 2007 to KSh 69,321.7 million in 2008.

Table 12.3: Value of Building Plans Approved in Nairobi and Other Towns, 2004 - 2008

Year	KSh Million		
	Nairobi	Other Towns	Total
2004 .. . . . .	11,851.59	23,110.81	34,962.40
2005 .. . . . .	23,842.19	13,804.88	37,647.07
2006 .. . . . .	21,142.98	5,816.66	26,962.66

12.8. The value of reported private building works completed in selected main towns for the years 2004 to 2008 is depicted in Table 12.4. The total value of reported private building works completed in the selected main towns expanded by 12.3 per cent to stand at KSh 12,323.2 million in 2008 from KSh 10,969.2 million in 2007. Nairobi City Council registered a 12.6 per cent increase in the value of reported

private building works completed in the year under review from KSh 9,786.7 million in 2007 to KSh 11,018.2 million in 2008. Malindi town recorded a value of KSh 143.8 million in 2008 from KSh 132.6 million indicated in 2007, an increase of 8.4 per cent. Mombasa town recorded a 5.3 per cent decrease from KSh 831.0 million in 2007 to KSh 787.0 million in 2008. Kisumu town recorded a 19.8 per cent decline from KSh 52.5 million in 2007 to KSh 42.1 million in 2008. Mombasa and Kisumu towns recorded decreases in the values of reported private building works completed partly due to post election violence.

12.9. Reported completion of new private buildings in selected main towns for the years 2004 to 2008 is shown in Table 12.5. The number of non-residential units increased from 52 in 2007 to 55 in 2008. The number of residential units increased to 2,401 in 2008 from 2,350 in 2007. The estimated cost of residential units rose by 3.2 per cent to KSh 4,923.7 million in 2008 from KSh 4,773.3 million in 2007. The estimated cost of non-residential units increased by 22.2 per cent to KSh 1,374.5 million in 2008 from KSh 1,124.8 million in 2007. The total estimated cost increased to KSh 6,298.1 million in 2008, an increase of 6.8 per cent from the previous year on account of several housing projects completed by the private sector.

**Table 12.5: Reported Completions of New Private Buildings<sup>1</sup> in Selected Main Towns<sup>2</sup>, 2004 - 2008**

Year	Number		Estimated Cost KSh Million

12.10. A comparative analysis of the value of private plans approved and estimated cost of reported new private building works completed in main urban areas is shown in Figure 12.2. The ratio of reported new private buildings completed to approved plans remains very low. This could be attributed to a combination of factors among them, increased approvals due to enhanced enforcement and rising cost of building on one hand and non-reporting of completions on the other hand. In 2008, the ratio increased marginally to 9.1 per cent up from 8.8 per cent in 2007.

**Figure 12.2: Comparison of Value of Private Plans Approved and Reported New Private Building Works Completed in Main Urban Areas, 2004-2008**

12.11. Table 12.6 shows the reported completions of new public buildings in selected main towns for the years 2004 to 2008. The number of new residential buildings completed reduced drastically from 309 units in 2007 to 88 in 2008. The number of non-residential buildings increased significantly from 7 in 2007 to 73 in 2008. The estimated cost of residential buildings completed decreased by more than a half to KSh 210.2 million in 2008 from KSh 507.7 million in 2007. The estimated cost of non-residential buildings rose significantly from KSh 16.1 million in 2007 to KSh 232.8 million in 2008. The total estimated cost of reported completions of new public buildings reduced by 15.4 per cent to KSh 443.0 million in 2008 compared to KSh 523.8 million recorded in 2007.

**Table 12.6: Reported Completions of New Public Buildings<sup>1</sup> in Selected Main Towns<sup>2</sup>, 2004 – 2008**

**Housing** 12.12. The housing sector has been characterized by inadequacy of affordable and decent housing, low level of urban home-ownership, extensive and inappropriate dwelling units, including slums and squatter settlements. The National Housing Corporation (NHC) continued to play a leading role in the implementation of housing policies and programmes through site and service schemes, rental and mortgage housing developments. In 2008, three housing projects were completed at a total cost of KSh 194.8 million. These consisted of 16 rental flats in Woodley infill (Nairobi), 24 rental flats in Sadi infill (Nairobi) and 38 mortgage maisonettes in Kiambu (Phase III). Other six housing projects which were under construction as at 31<sup>st</sup> December 2008 will cost a total of KSh 1,340.3 million upon completion. These consisted of 420 tenant purchase flats in Nairobi (Langata II & III), 6 mortgage maisonettes in Nairobi (Dam infill), perimeter wall and shops in Kisumu (Mamboleo), re-roofing and perimeter wall in Nairobi (Karanja road) and repairs on rental houses in Changamwe (Mombasa). There were also housing schemes at an advanced planning stage as at 31<sup>st</sup> December 2008 to be constructed in Nairobi, Kakamega, Nyeri and Kisumu consisting of 2,900 units and 1.8 km of perimeter wall at an estimated cost KSh 7.9 billion. The corporation advanced rural housing loans to 60 loanees amounting to KSh 62.7 million in the year 2008.

12.13. Table 12.7 shows the approved and actual Central Government expenditure on housing for the financial years 2004/05 to 2008/09. Actual expenditure on housing increased by 44.9 per cent from KSh 1,969.9 million registered in 2006/07 to KSh 2,853.5 million in 2007/08. Approved expenditure on housing is expected to increase by 31.1 per cent to KSh 4,104.5 million in 2008/09 from KSh 3,130.1 million in 2007/08. Actual expenditure as a percentage of approved expenditure decreased to 91.2 per cent from 98.9 per cent in 2006/07.

<sup>1</sup> Actual has a lag of one year

12.14. Housing projects at Ngara Phase I, Jogoo Road, Upper Hill, Kileleshwa and Kilimani are being developed by the Ministry of Housing for sale to civil servants through the Civil Servants Housing Scheme Fund. The houses being developed started in 2005/06 financial year and are estimated to cost KSh 696.79 million upon completion.

**Roads** 12.15. Recurrent and development expenditure for Ministry of Roads for the financial years 2004/05 to 2008/09 is shown in Table 12.9. Development expenditure on secondary roads increased significantly from KSh 2,898.4 million in 2007/08 to KSh 9,160.7 million in 2008/09. Due to the on-going rehabilitation of the major highways, expenditure on trunk roads increased by 42.9 per cent to KSh 23,726.8 million in 2008/09. Recurrent expenditure (maintenance and repair) on roads decreased by 11.4 per cent to KSh 10,454.0 million in 2008/09 from KSh 11,795.4 million in 2007/08. The overall expenditure for Ministry of Roads rose by 25.9 per cent to KSh 53,223.1 million in 2008/09.

12.16. Under the Roads 2000 Programme, the Government has continued to rehabilitate and maintain public roads in 37 districts spread across Rift-Valley, Nyanza, Eastern, Central and Coast provinces. The programme is being reviewed to cover an additional 72 districts by 2012. In 2008/09 financial year, a total of KSh 3.5 billion will be utilized in the programme to improve and maintain about 2,000 kms of rural roads.

12.17. In the 2008/09, the Kenya Roads Board (KRB) disbursed funds from Roads Maintenance Levy Fund (RMLF) to the various roads agencies. The Board disbursed a total of KSh 19.0 billion in 2008/09 compared to KSh 15.4 billion in 2007/08. Over the same period, the Roads Department received KSh 7,746.0 million while the District Roads Committees and roads within constituencies received KSh 3,738.0 million. District Roads Department which caters for classes D, E and Special Purpose (SP) roads received KSh 3,032.8 million. Ministry of Local Government and Roads in game reserves were allocated KSh 2,186.4 million.

12.18. Coverage of road network by type and classification as at 1<sup>st</sup> July 2004 and 1<sup>st</sup> July 2008 is shown in Table 12.8. International trunk roads under bitumen increased by 6.0 per cent from 2.7 thousand kilometres in 2004 to 2.8 thousand kilometres in 2008. Kilometres of roads under earth/gravel reduced by 15.6 per cent to 0.8 thousand kilometres in 2008 from 1.0 thousand kilometres in 2004. The primary roads under bitumen rose by 8.2 per cent from 2.56 to 2.8 thousand kilometres in 2004 and 2008 respectively. The primary roads under earth/gravel declined by 4.4 per cent to 5.23 thousand kilometres in 2008. Secondary roads under bitumen rose by 6.8 per cent from 1.2 thousand kilometres in 2004 to 1.3 thousand kilometres in 2008. The secondary roads under earth/gravel decreased by 3.6 per cent to 9.8 thousand kilometres in 2008. Minor roads under earth/gravel decreased marginally by 0.2 per cent to 26.3 thousand kilometres in 2008. Those under bitumen also declined by 14.7 per cent to 0.6 thousand kilometres in 2008. The total kilometres of road under bitumen increased by 5.4 per cent from 8.7 thousand kilometres in 2004 to 9.1 thousand kilometres in 2008, while those under earth/gravel declined by 14.8 per cent to 54.4 thousand kilometres in 2008.

**Table 12.9: Kilometres of Road as at 1<sup>st</sup> July, 2004 and 1<sup>st</sup> July, 2008 by Type and Classification**

<sup>1</sup> Special purpose roads include Government access, settlement, rural access, sugar, tea and wheat roads

12.19. Information on road works maintained, rehabilitated and constructed in 2008 is presented in Table 12.10. Overall, a total of KSh 70,676.6 million was used for maintenance, rehabilitation and construction. During 2008, a total of 502.0 kilometres of roads was maintained at a cost of Ksh.3,482.9 million. Over the same period, a total of 1,220.8 kilometres of roads was rehabilitated at a cost of Ksh.43,846.4 million and 710.8 kilometres of roads constructed at a cost of Ksh 23,547.3 million. However, it is important to note that some of the road works have been ongoing for a number of years and others are yet to be completed.

## Chapter 13

### Tourism

**Overview** In 2008, the tourism sector witnessed one of its worst performances in recent history. This was mainly as a result of the political violence that erupted in the country during the first quarter of the year after the December 2007 General Elections and the subsequent travel bans by major tourism source countries. As a consequence, tourism earnings decreased from KSh 65.2 billion in 2007 to KSh 52.7 billion in 2008, representing a 19.2 per cent drop. The volume of international arrivals decreased sharply by 33.8 per cent from 1,817.0 thousand in 2007 to 1,203.2 thousand in 2008. Other factors that impacted negatively on the sector included the high cost of jet fuel, the global financial meltdown, and rise in commodity prices and exchange rate fluctuations that occurred in the year.

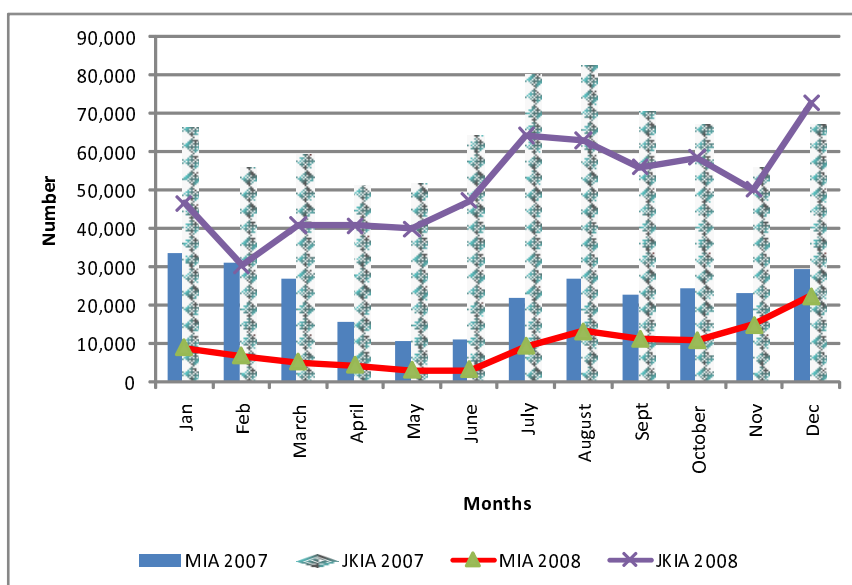

13.2. The number of bed-nights occupied decreased significantly by 46.7 per cent from 6,939.4 thousand in 2007 to 3,699.0 thousand in 2008. Similarly, the number of visitors to game parks and reserves dropped from 2,495.1 thousand in 2007 to 1,633.9 thousand in 2008, representing a 34.5 per cent drop.

13.3. The number of visitors to Museums, Snake Park and other historical sites contracted by 17.6 per cent from 598.6 thousand in 2007 to 493.2 thousand in 2008 despite Nairobi Museum re-opening for business at the beginning of 2008. In the conferences sub-sector, the number of international and domestic conferences held decreased by 16.6 per cent and 19.3 per cent, respectively, during the year under review.

**Arrivals and Departures** 13.4. As shown in Table 13.1, the number of inbound tourists decreased sharply by 33.8 per cent from 1,817.0 thousand in 2007 to 1,203.2 thousand in 2008. This was partly as a result of negative publicity by both local and international media of the political situation in the country. Another factor that led to the dismal performance was negative travel advisories from major tourism markets in Europe and the United States of America. As a result, the upward trend in international arrivals and earnings recorded during the last four years took a sudden downturn as shown in Figure 13.1

**Figure 13.1: Trends in Visitor Arrivals and Tourism Earnings, 2004-2008**

13.5. Figure 13.2 shows visitor arrivals through the country's leading international airports. Visitor arrivals through Jomo Kenyatta International Airport (JKIA) and Moi International Airport (MIA) in Mombasa were in tandem with the tourism cycles for the two years. Visitor arrivals through JKIA nosedived during the month of February 2008, an indication of the effects of the political violence in the country. During the subsequent months, visitor arrivals through JKIA continued on an upward trend but remained below the 2007 levels except the month of December 2008. Performance of visitor arrivals at MIA remained persistently low throughout 2008. The number of visitor arrivals was on a downward trend for the first half of the year. However, this trend was reversed after June in line with the return of charter flights.

**Figure 13.2: International Arrivals through JKIA and MIA, 2007-2008**

13.6. Table 13.1 shows an analysis of international visitor arrivals by purpose of visit and on quarterly basis. Overall, visitors on holiday declined by 26.8 per cent to account for 77.8 per cent of total inbound tourists. Visitors on business contracted by 54.8 per cent from 242.3 thousand in 2007 to 109.4 thousand in 2008. The inbound tourists in the first quarter of 2008 dropped by more than a half compared to the same period in 2007. During the quarter, number of visitors on holiday went down by 32.4 per cent but their share went up from 62.9 per cent in 2007 to 85.9 per cent in 2008. During the second quarter which normally coincides with the low season, the number of international arrivals decreased by 32.8 per cent. In the third quarter of 2008, visitor arrivals registered a drop of 33.2 per cent, although visitors classified as “Other” recorded an improvement of 16.4 per cent. The improvement was a result of inbound tourists who came for purposes of visiting friends and relatives. In the fourth quarter, visitor arrivals went down by 17.5 per cent. This drop was lower than the other quarters, an indication of recovery of the sector though at a slow pace.

**Table 13.1: Quarterly Visitor Arrivals by Purpose of Visit, 2004-2008**

13.7. The decline in the number of inbound visitors resulted in a downward performance of departing visitors throughout 2008. The number of departing tourists went down by 35.5 per cent from 1,772.1 thousand in 2007 to 1,143.1 thousand in 2008 as shown in Table 13.2. During the first quarter, visitor departures contracted significantly by 47.0 per cent. This was on account of massive declines recorded under Transit and Other categories. The second and third quarters registered declines of 33.2

per cent and 36.3 per cent, respectively, mainly as a result of declines recorded under holiday departures who accounted for more than 70 per cent of departures during the quarters. Visitor departures during the fourth quarter went down by 23.7 per cent from 427.9 thousand in 2007 to 326.3 thousand in 2008. However, the proportion of holiday departures went up from 69.5 per cent in 2007 to 78.0 per cent in 2008.

13.8. Table 13.3 shows the number of departing visitors by country of residence and purpose of visit. The number of departing visitors went down by 32.9 per cent from 1,588.9 thousand in 2007 to 1,065.8 thousand in 2008. This was mainly on account of departures destined for Europe that declined by 39.8 per cent. Departures to United Kingdom and Germany, which are key source markets declined by 30.9 per cent and 47.8 per cent, respectively, during the review period. The number of holiday visitors destined for Europe, North America and Asia went down while those to African destinations improved marginally. Similarly, business and transit departures to destinations other than to African countries recorded negative performance.

<sup>1</sup> Excludes visitor whose purpose of visit is "Other"

13.9. Table 13.4 shows the trend of the number of days stayed by purpose of visit. Consistent with the decline in the number of inbound visitors, the total length of stay contracted considerably by 41.4 per cent from 18,839.0 thousand in 2007 to 11,039.8 thousand in 2008. This was mainly explained by a 38.3 per cent decline in the length of stay by holiday makers. The length of stay by business tourists contracted drastically by 57.8 per cent owing to uncertainties associated with the post election violence. This is in line with the declining average length of stay that has been maintained for the last five years, a factor associated with tourists visiting more than one destination per trip. This resulted in the average length of stay being shorter by 12.6 per cent in 2008 when compared to 2007.

**Table 13.4: Number of Days Stayed<sup>1</sup> by Purpose of Visit, 2004-2008**

**Hotel  
Occupancy  
by Country  
of Residence**

13.10. The political crisis in the country which led to a drastic decline in the number of inbound tourist was equally felt in the hotels sub-sector. Bed-nights occupancy in leisure resorts went down by 46.7 per cent from 6,939.4 thousand in 2007 to 3,699.0 thousand in 2008, as shown in Table 13.5. This was a reflection of mass cancellation of reservations made prior to the election violence and termination of holidays during the first quarter of 2008. Over the review period, the number of beds available contracted by 3.2 per cent from 14,711.6 thousand in 2007 to 14,233.6 thousand in 2008. On average, bed-nights occupancy rate went down from 47.2 per cent in 2007 to 26.0 per cent in 2008. Similarly, the level of rooms occupied compared to rooms available contracted by 36.6 per cent in 2007 to 32.2 per cent in 2008. Although monthly bed and room-nights occupancy levels were below 25.0 per cent for the first half of 2008, the situation improved steadily during the second half of the year, as shown in Figure 13.3. This is an indication of recovery in the sector following massive campaigns mounted by the Government and the private sector.

<sup>1</sup> Persons staying one month or more in one hotel; includes some block bookings for air crew

Figure 13.3: Monthly Bed and Room Occupancy Rates, 2007 and 2008

13.11. The reduced volume of international arrivals resulted in low occupancy in hotels, lodges and other rooming houses during the year under review. Analysis of bed-nights occupancy by country of residence reveals a general decline by both domestic and foreign residents. Bed-nights occupied by residents from Europe went down from 3,837.8 thousand in 2007 to 1,323.7 thousand in 2008, representing a 65.5 per cent decline. Similarly, the share of bed-nights occupied by residents from European countries dropped from 55.3 per cent in 2007 to 35.8 per cent in 2008. This was mainly attributed to significant drops in occupancy by residents of United Kingdom and Germany which jointly accounted for 62.4 per cent of occupancy by European nationals. Occupancy by nationals from the African continent contracted by 18.5 per cent from 2,268.8 thousand in 2007 to 1,850.1 thousand in 2008. This result was mainly explained by a 16.2 per cent decline in occupancy by Kenyan residents.

13.12. Details of hotel bed-nights occupancy by zone are presented in Table 13.6. Hotel bed-nights occupancy at the Coast beach dropped by 56.4 per cent from 3,768.1 thousand in 2007 to 1,643.7 thousand in 2008. These may be explained by a decline in preference rate of the Coast beach from 54.3 per cent in 2007 to 44.4 per cent in 2008. However, although occupancy in Nairobi High-Class dropped by 30.4 per cent, the proportion of bed-nights to this zone went up by 4.5 percentage points to 19.4 per cent in 2008. Similarly, the share of bed-nights occupied in other zones registered improvements with the exception of Maasailand and Northern.

<sup>1</sup> Area neat to coastal strip less beaches and island

13.13. Figures 13.4a and 13.4b depict bed-nights occupancy along the coastal strip in 2007 and 2008. The coastal zones comprising coastal beach and coastal others continued to remain a preferred tourism destination accounting for 47.6 per cent of all bed-nights occupied in 2008. Analysis by area shows that North Coast was the most preferred leisure area along the coast both in 2007 and 2008. However, the share of occupancy in North Coast and Mombasa Island went up while that of South Coast went down. The share of occupancy at Kilifi, Malindi and Lamu area remained unchanged at 25.0 per cent over the same period.

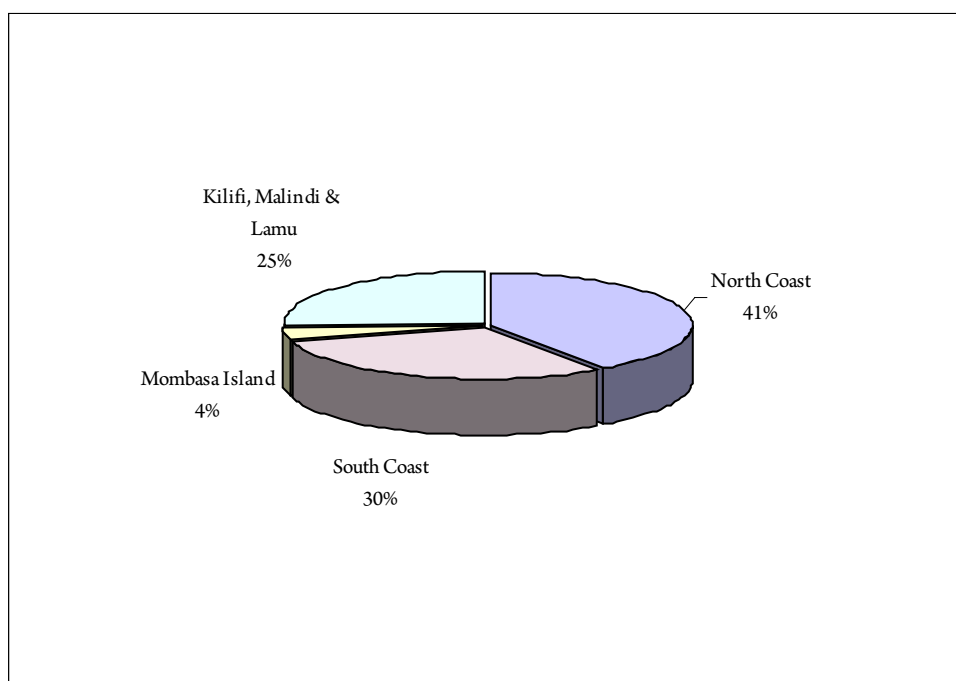

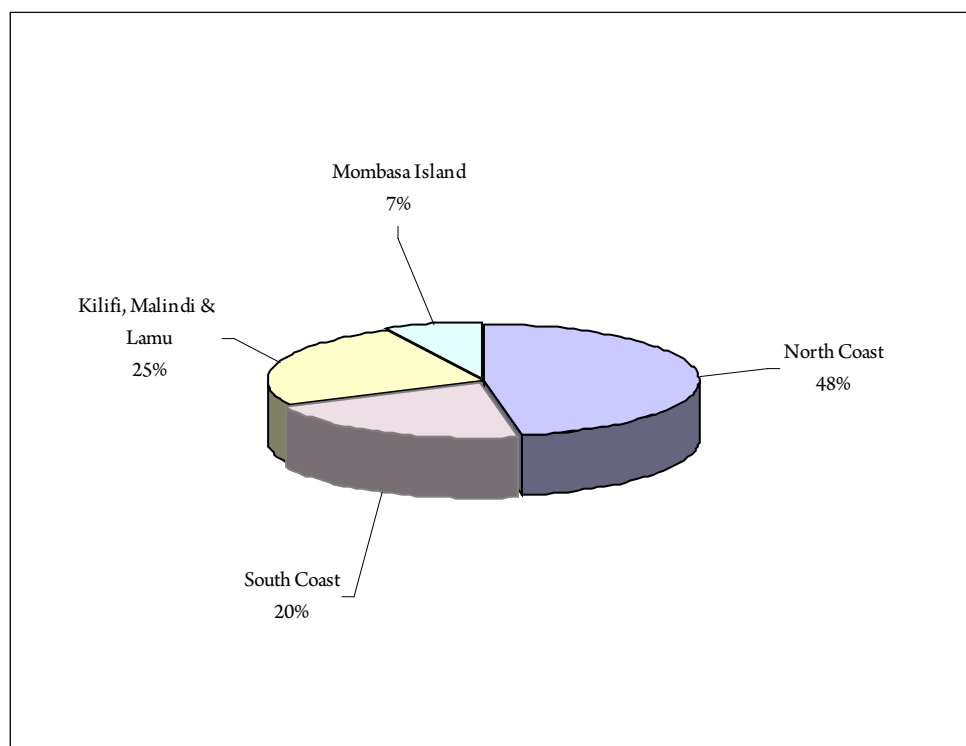

**Figure 13.4a: Bed-Night Occupancy at the Coast, 2007**

Figure 13.4b: Bed-Night Occupancy at the Coast, 2008

13.14. Table 13.7 presents details of bed-occupancy by area and country of residence in 2007 and 2008. The Kenyan coastal area remained the preferred destination in 2008, accounting for 47.6 per cent of all hotel occupancy. This was however lower compared to 56.5 per cent recorded in 2007 mainly on account of nationals from European countries dropping to almost a third. Occupancy within the Nairobi area dropped from 1,331.1 thousand in 2007 to 940.7 thousand in 2008, representing a 29.3 per cent decline. Occupancy in the lodges accounted for 8.9 per cent while in “Others” it went up from 11.7 per cent in 2007 to 18.0 per cent in 2008. There was a slight increase in bed nights occupancy at the coast by residents of India, Middle-East, China, Australia and New Zealand, and Tanzania.

<sup>1</sup> Excludes Coastal Hinterland<sup>2</sup> Persons staying one month or more in one hotel-includes some block bookings for air crew

13.15. Game lodges occupancy is as shown in Table 13.8. Occupancy by East African residents dropped by 6.8 per cent to stand at 82.7 thousand in 2008. This dismal performance was consistent with the decrease in number of visitors to Game parks and reserves in 2008. Bed-nights occupancy by foreign residents dropped by 68.3 per cent from 782.8 thousand in 2007 to 248.0 thousand in 2008. However, the share of foreign residents opting for full catering services improved from 83.8 per cent in 2007 to 85.2 per cent in 2008.

<sup>1</sup> Lodges in National Parks and Game Reserves

**Game Parks and Reserves** 13.16. In an effort to attract more visitors and encourage recovery in the tourism sector, the Kenya Wildlife Service (KWS) initiated a number of developments in 2008. These included airstrip upgrade programmes aimed at easing access to wildlife viewing areas amongst others. The 1.2 kilometer airstrip at Lake Nakuru National Park was upgraded from murrum to tarmac status as well as the Mulika and Kinna airstrips in Meru National Park. The airstrips will enhance direct flights between Maasai Mara, Amboseli, Samburu and the Coastal region. Plans are also underway for the construction of two more airstrips in Ruma and Mt. Elgon national parks to open up the Western Tourist Circuit covering Lake Victoria basin and gulf in Kenya. Other attractions in Western Kenya include the source of River Nile, Kakamega Forest, Kisumu Impala Sanctuary and Saiwa Swamp National Park among others. In November 2008, the Government pledged to brand Kogelo village in Western Kenya as a tourist destination.

13.17. The number of visitors to the country's game parks and reserves dropped from 2,495.1 thousand in 2007 to 1,633.9 thousand in 2008 as shown in Table 13.9. This decline is in tandem with the trend observed for international arrivals during 2008. However, increases in the number of visitors were recorded in Nairobi Mini Orphanage, Meru National Park, Impala Sanctuary (Kisumu), and Mt. Longonot that went up by 7.4, 24.2, 10.5 and 12.6 per cent, respectively. Adult citizens were the majority in these attractions accounting for 30.2 per cent of all visitors compared to 22.5 per cent in 2007 as seen from Figure 13.5.

Figure 13.5: Visitors to Game Parks and Reserves, 2007-2008

**Museums** 13.18. The rehabilitation of the National Museum of Kenya (NMK) has brought about diversification of services which helped attract visitors to the facility in 2008. The Nairobi Snake Park was closed for expansion and renovation in June 2008 and is expected to transform the facility to a modern reptile park. The Sacred Mijikenda Kayas were placed on the United Nations Education Social and Cultural Organisation (UNESCO) World Heritage List in July 2008 and is expected to attract visitors to the sites.

13.19. As shown in Figure 13.6, the first quarter 2008 registered the lowest number of visitors to the museums due to the post election crisis. This adversely affected revenue collection by the various museums, sites and monuments across the country. More people visited the museums from the months of June to October 2008, which may be attributed to institutional trips and the Agricultural Society of Kenya (ASK) shows. Table 13.10 shows that the number of visitors to museums, snake park and sites decreased by 17.6 per cent in 2008.

**Conference Tourism** 13.20. During the year under review, there was a considerable decline in the number of local and international conferences. This was largely due to cancellation and postponement of booked conferences as a result of post election violence that took place at the beginning of 2008. Despite the negative events in January 2008, the Government and the private sector assured the international market that Kenya was a safe destination. This was done through increased participation in international trade fairs and association meetings, promotional campaigns in international meetings and industry publications. The number of local and international conferences declined by 16.7 per cent and 19.2 per cent, respectively, in 2008. The number of international delegates and local delegates decreased by 77.0 per cent and 63.5 per cent, respectively, during the review period.

**Table 13.11: Reported Conferences, 2006-2008**

**Training** 13.21. The Kenya Utalii College (KUC) is in the process of upgrading its courses with a view to offering degree programmes in collaboration with the University of Nairobi. Progress is also being made with regard to establishment of KUC Coast Branch. The KUC's programmes are in high demand both locally and internationally. As a World Tourism Organisation (WTO) and East African Community (EAC) centre of Excellence, a proportion (up to 15.0 per cent) of the college's annual intake is reserved for students from other countries. The college introduced additional refresher courses to cater for challenges and opportunities that manifest in the hotel and tourism industry.

13.22. As shown in Table 13.12, the number of graduates from KUC declined by 36.1 per cent from 3,523 in 2007 to 2,250 in 2008. All the categories of training registered declines in 2008 except for the Service Advance Professional Courses which had an increase of 5 graduates. The decrease in number of graduates may be attributed to students' preference for the degree programmes instead of the other existing courses.

## Chapter 14

### Transport, Storage and Communication

**Over view** **T**he transport, storage and communication sector has been recording improved performance over time. However, in 2008, the sector recorded a slowed growth of 11.6 per cent down from 14.9 per cent in 2007. This could be attributed to the aftermath of the post election violence and weakening of the Kenya shilling against the hard currencies among other factors. The sector witnessed increased fuel pump prices occasioned by high international oil prices.

14.2. Newly registered road motor vehicles recorded an unprecedented increase of 42.8 per cent during the year under review. The increase was mainly driven by a high registration of motor and auto cycles during the period. Reported traffic accidents decreased by 11.1 per cent from 10,225 in 2007 to 9,093 in 2008. The Railway transport sub-sector performance continued with a downward trend, partly due to poor rail infrastructure and network disruptions in the first quarter of 2008 resulting from post election violence.

14.3. Traffic handled at the Port of Mombasa increased slightly during 2008 to reach 16.4 million metric tonnes from 16.0 million metric tonnes in 2007. Much of the traffic handled was for imports which accounted for slightly over 80 per cent. Passenger traffic at the main airports declined by 9.4 per cent from 7,039.1 million in 2007 to 6,376.0 million in 2008.

14.4. The telecommunications industry witnessed an increase in foreign direct investment as a result of the privatization of the fixed line operator – Telkom Kenya. A consortium led by France Telkom bought 55 per cent of the Government stake in Telkom Kenya at \$ 55 million. In the year under review, competition in the market also intensified due to increased rollout of services by *Orange Mobile* and the launching of mobile communication services by Econet Kenya Limited. The Communications Commission of Kenya (CCK) assigned frequencies and numbering resources to Telkom Kenya and Econet Wireless for deployment of Global System of Mobile (GSM) Communication. Safaricom limited was also assigned a spectrum for 3G commercial services which was initially rolled out in Nairobi and Mombasa. The expansion of existing networks also bolstered competition in the telecommunication industry. This led to intensified promotional offers that resulted in lower call charges and accessibility of mobile telephony services.

**Value of Output** 14.5. Table 14.1 presents details of the output values for the various transport and communication sub-sectors. During 2008, the transport and communication sector posted an output value of KSh 524.6 billion compared to KSh 470.1 billion in 2007. This represents a slowed growth of 11.6 per cent in 2008 compared to 14.9 per cent in

2007. Output from road transport sub-sector remained dominant, contributing 52.2 per cent of the total output value. Jointly, the road transport and communication sub-sectors contributed more than two-thirds of the value of total output from the sector in 2008.

**Table 14.1: Transport and Communications - Value of Output, 2004-2008**

## Road Transport

**Roads** 14.6. Data on funds disbursed for the roads maintenance in the country are presented in Table 14.2. During 2008/09 financial year, the Roads Maintenance Levy Fund collected KSh 21.3 billion compared to KSh 18.3 billion in 2007/08 financial year.

14.7. As shown in Table 14.3, growth of total earnings from road transport sub-sector expanded by 3.1 per cent in 2008 from 9.7 per cent in 2007. The growth in earnings from the road transport sub-sector was however constrained by high fuel prices and reduced economic activities witnessed during the year. Earnings from the road passenger transport industry contributed 55 per cent of the total earnings realized in the road transport industry during 2008.

## Chapter 14: Transport, Storage and Communication

**New Registration of Motor Vehicles** 14.8. As shown in Table 14.4, the total number of newly registered motor vehicles in the country has increased over the years. In 2008, the total number of units registered increased by 42.8 per cent to 121, 831 units from 85,324 units registered in 2007. This is largely as a result of increased registration of motor and auto cycles which more than tripled in 2008 and accounted for 42.2 per cent of the total registered units. In the recent past, the demand for services of this category especially in urban centres where they are used for passenger transport and office errands has increased. Registration of buses and coaches; trailers and three wheelers declined over the same period, while saloon cars, station wagons, lorries/trucks and wheeled tractors increased slightly.

**Table 14.4: New Registration of Road Motor Vehicles, 2004 - 2008**

**Road Licenses** 14.9. The number of various categories of Transport Licensing Board (TLB) and driving licenses issued are presented in Table 14.5. The number of driving licenses issued increased from 185,183 in 2007 to 200,869 in 2008 on account of increase in original driving licenses issued, which rose by 11.6 per cent in 2008 to stand at 165,705. Duplicate and foreign driving licenses issued in the same period decreased by 4.0 per cent and 8.5 per cent, respectively.

## Road Traffic Accidents

14.10 Table 14.6 presents a summary of road traffic statistics recorded in the country. The total number of reported traffic accidents dropped by 1,132 cases from 10,225 reported in 2007 to 9,093 in 2008. The total number of persons injured or killed through road traffic accidents declined by 8.9 per cent from 23,515 in 2007 to 21,420 in 2008. The decrease is partly attributed to improved conditions of major roads countrywide such as the ongoing re-carpeting of Mombasa-Nairobi and Nairobi-Kisumu highways.

**Table 14.6: Road Traffic Accidents, 2004 - 2008**

## Railway Transport

14.11 Traffic performance for the railway transport in the country is presented in Table 14.7. Freight tonnage transported decreased by 23.4 per cent from 2.3 million in 2007 to 1.8 million in 2008. Revenue earned from cargo transportation dropped by 4.1 per cent to KSh 4.3 billion in 2008 compared to KSh 4.4 billion earned in 2007. Similarly, earnings from passenger transportation service stream dropped substantially by 48.5 per cent. The poor performance of the railway transport sub-sector could be attributed to poor rail infrastructure, preference of major transporters to use roads for transportation of goods and, the effects of post elections violence which left some sections off the railway line vandalized.

## Water Transport

14.12. The volume of traffic throughput handled at the port of Mombasa in 2008 was 16,415 thousand tonnes compared to 15,962 thousand tonnes in 2007, a 2.8 per cent increase as detailed in Table 14.8. Total imports recorded an increase of 1.9 per cent from 13,062 thousand tonnes in 2007 to 13,311 thousand tonnes in 2008. The total number of motor vehicle units landed at the Port of Mombasa grew by 18.2 per cent to 87,284 in 2008 from 73,818 in 2007. Imported cargo accounted for 81.1 per cent of the total cargo traffic handled during the year under review. Most of the imported cargo volume comprised of dry general and bulk liquids. Total exports rose by 8.5 per cent to 2,685 thousand tonnes in 2008. This performance was attributed to increased exports of coffee, sorghum, soda ash, flouspar and bulk oils.

14.13. Container traffic posted an increase of 5.2 per cent from 585,367 twenty foot equivalent units (TEUs) handled in 2007 to 615,733 TEUs in 2008. Transit traffic expanded by 10.6 per cent, rising to 4,471 thousand tonnes in 2008 from 4,042 thousand tonnes in 2007. Transshipment traffic realized 419 thousand tonnes during the period under review compared to 426 thousand tonnes recorded in the corresponding period of 2007, registering a slight decline of 1.6 per cent. This was mainly due to the suspension of transshipment traffic at the port of Dar es Salaam.

DWT - Deadweight Tonnes

**Pipeline Transport** 14.14. Details of the pipeline throughput of white petroleum products by Kenya Pipeline Company (KPC) are presented in Table 14.9. Overall, throughput volume declined by 2.9 per cent to stand at 3,848.6 thousand cubic metres in 2008 compared to 3,962.5 thousand cubic metres in 2007. Fuel transported for domestic consumption fell by 7.0 per cent, from 2,830.9 thousand cubic metres in 2007 to 2,633.6 thousand cubic metres in 2008. Exports of white petroleum products increased to 1,215 thousand cubic metres over the review period from 1,131.6 thousand in 2007, representing a growth of 7.4 per cent.

14.15. The pumping capacity constraints remain a challenge for the Kenya Pipeline Company. In order to address this challenge, KPC continues to undertake various pipeline capacity enhancement projects such as western Kenya pipeline extension to increase flow rate and expansion of Kipevu oil storage facility (KOSF), among others.

\*\* Figures do not include volume carried by Kenya Railways and consumption in the coastal area

**Air Transport** **14.16. Passenger Traffic:** Table 14.10 presents commercial traffic handled at main airports. Commercial passenger traffic dropped by 9.4 per cent from 7,039.1 thousand passengers in 2007 to 6,376.0 thousand in 2008 notably due to the effects of post election crisis which adversely affected tourist demand and therefore air transport sector. The airlines business was further strained by high fuel prices and the global economic melt-down.

**14.17. Cargo and Mail Traffic:** Over the four years, total cargo traffic has continued to show considerable increase as indicated in Table 14.10. In 2008, total cargo traffic amounted to 320.2 million tonnes compared to 306.3 million tonnes in 2007, reflecting a growth of 4.5 per cent. Whereas mail traffic in Jomo Kenyatta International Airport (JKIA) increased by 29.9 per cent in 2008, dropped by 31.1 per cent in Moi International Airport (MIA) over the same period.

**Comm-unications** 14.18. **Postal Services:** The number of post offices declined from 719 in 2007, to 707 in 2008 as presented in Table 14.11. In spite of this decline, the Postal Corporation of Kenya (PCK) recorded an increase in revenue which could be attributed to the tariff increase for various categories of postal services, service diversification and improved management of postal services.

## Chapter 14: Transport, Storage and Communication

\*Provisional.

14.19. The number of installed private letter boxes increased from 412 thousand in 2007 to 414 thousand in 2008, while those of private rented bags increased by 49 during the same period. The total EMS items handled registered an enormous growth of 62.8 per cent in 2008, on account of Accepted and Delivered items which increased by 357 thousand and 162 thousand, respectively.

14.20. The total registered and insured domestic items posted grew by 4.0 per cent from 1,583 thousand in 2007 to 1,646 thousand in 2008. However, the total registered and insured international items posted declined by 6.3 per cent to 90 thousand in 2008. The domestic and international parcels handled by PCK declined for the second year running. The total parcels handled in 2008 were 136 thousand compared to 150 thousand handled in 2007, representing a 9.3 per cent decline. This could be partly attributed to the increase in private and licensed courier operators which encouraged competition in the market. The volume of unregistered international correspondence has been on the decline recording a further drop of 15.4 per cent from 13 million in 2007 to 11 million in 2008. This development could be due to the impact of electronic substitution in the services.

14.21. Money orders issued posted a negative growth of 23.4 per cent in 2008. The number of Ordinary and Express money orders issued declined by 22.0 per cent and 70.4 per cent, respectively. The newly introduced Posta Pay Service used for sending and receiving money was the most commonly used by PCK customers thereby registering an 11.8 per cent growth in 2008. The decline in the money orders issued could be partly attributed to competition arising from use of alternative money transfer services.

**Telecom-  
munications** 14.22. The telecommunications subsector continued to experience tremendous subscriber growth fuelled by heavy investment in the mobile telephone sub-sector and the introduction of new Global System Mobile Communication mobile networks as presented in Table 14.12. The capacity for the fixed lines, Code Division Multiple Access (CDMA) and other wireless increased significantly in 2008 due to expansion of the network coverage by the service providers in the country. Mobile telephone capacity also increased to 26.0 million in 2008, up from 18.2 million in 2007. The number of subscriber connections increased from 9.3 million in 2007 to 12.9 million in 2008; an increase of 38.7 per cent. The increase in the mobile capacity resulted in an increase in the tele-accessibility from 35.0 per cent in 2007 to 36.4 per cent in 2008.

**Fixed  
Line and  
Wireless  
Telephones** 14.23. The Fixed Wireless Service continued to boost the fixed telephone network with a total capacity of 612 thousand in 2008 up from 505 thousand in 2007; with fixed wireless services contributing about 60 per cent of the total fixed telephone capacity. Fixed and wireless line connections increased by 55.5 per cent from 339 thousand in 2007 to 527 thousand in 2008. The available mobile telephone capacity increased from 18.2 million in 2007 to 26.0 million in 2008; a remarkable increase of 42.9 per cent.

14.24. The Government embarked on the implementation of the national broadband backbone network. Construction of The East African Marine System (TEAMS) commenced during the year, which will link the port of Mombasa to Fujairah in United Arab Emirates (UAE). This UAE-Kenya Submarine Cable System is expected to bring closer the prospect of cheaper and high speed internet communication in the country and within the region. It will ensure affordability and improved international connectivity between Kenya and the rest of the world. The national transmission infrastructure in the country is also being bolstered through the construction of a fiber optic link connecting all the district headquarters in the country.

**Mobile  
Telephony** 14.25. In the mobile telephony sub-sector, two mobile operators namely Telkom Orange and Econet made entry into the market in September and November 2008 respectively. As a result, the market experienced unprecedented competition with consumers enjoying an array of innovative and attractive services from the different operators. Some of the promotional offers provided tariffs as low as KSh 1.00 for on net calls, KSh 6.00 for off net calls and KSh 1.00 on Short Messaging Service (SMS). This fueled increase in the mobile subscription and penetration in the country.

## Chapter 14: Transport, Storage and Communication

14.26. Influx of more affordable handsets in the market coupled with low denomination calling cards, as well as lower calling charges by the operators, continued to impact negatively on the number of public and community payphone booths available in the country. As at December 2008, the total number of conventional and community payphones stood at 6 thousand up from 5 thousand in 2007. During the same period, the volume of SMS declined to about 361.9 million in 2008 from 412.5 in 2007; representing a 12.3 per cent volume decline.

**Table 14.12: Telecommunications Traffic, 2004 - 2008**

**Internet Penetration** 14.27 Among the telecommunication services, the Internet has been among the least accessible service in the country. The low uptake of this service is attributed to lack of infrastructure and relevant local content. Enhancement of the competition regulatory framework as well as operationalization of the National Fiber Optic cable is expected to boost internet penetration. The Communications Commission of Kenya (CCK) issued 127 licenses to Internet Service Providers (ISPs) out of which 56 were operational compared to 50 in 2007 as Detailed in Table 14.12. The estimated cumulative number of internet users increased from 2.9 million in 2007 to about 3.4 million in 2008; representing an increase of 17.2 per cent. There was a steady increase in the demand for internet services in the country. Introduction of broadband services by mobile operators is expected to further support increase internet penetration and use which has remained low in the past.

**Information and Mass Media** 14.28. **Broadcasting:** In the year under review, there was increased demand for spectrum allocation in the broadcasting sub-sector. CCK assigned a total of 30 FM new frequencies out of 295 applications for FM broadcasting. At the same time, the number of applicants awaiting allocation for TV frequencies increased from 143 in 2007 to 192 in 2008.

14.29. The year under review witnessed the launch of the first digital mobile television broadcast network in the country. The CCK assigned a total of nine (9) TV broadcast channels to Digital Video Broadcasting-Handheld (DVB-H) during the period under review. A number of the frequencies assigned were recalled due to non-utilization leading to the decline in both TV and FM frequencies assigned in 2008. This resulted in the total number of frequencies in operation dropping from 127 in 2007 to 81 in 2008. Radio frequencies in use dropped from 368 in 2007 to 268 in 2008. The CCK continued to spearhead the preparatory process for the transition to digital TV broadcasting. It is anticipated that the transition from analogue to digital broadcasting will help in reducing the number of applicants and those on the waiting list due to the spectral efficiency of this technology.

14.30. In order to improve access to ICT services, the CCK implemented 16 school-based ICT centres spread across the eight provinces. In addition, the CCK funded the establishment of four (4) ICT Community access points.

14.31. **Print Media:** The number of morning and weekly newspapers circulated is presented Table 14.14. The readership of the morning newspapers increased in the year under review as reflected by the Circulation of English morning papers which rose by 4.6 per cent in 2008. Circulation of the Swahili morning paper also rose in 2008, whereas there was a notable improvement in the English Weeklies of about 25.8 per cent in 2008. The improved performance in the English Weeklies could have been driven by the release of the Kriegler and Waki reports of inquiry to post election violence, the US elections and also the release of the KCPE results in December 2008.

## Chapter 15

### Governance

**Overview** **T**he Government has continued to provide public safety, law and order to facilitate economic development. This is crucial especially after the post election violence that hit some parts of the country in 2008 disrupting some sectors of the economy. Key areas of governance addressed in this chapter include crimes reported to the police; firearms recovered/surrendered; persons reported to have committed offences; cases filed, disposed of and pending in Law Courts; corruption cases reported to Kenya Anti-Corruption Commission (KACC); prison population; number of offenders put on probation, community service orders and rehabilitation; issuance of identity cards, passports and permits, and voters registration.

15.2. The number of crimes reported to the Police increased marginally by 0.7 per cent from a total of 63,028 crimes reported in 2007 to 63,476 in 2008. Overall, the number of persons reported to have committed crimes reduced by 11.6 per cent from 69,484 in 2007 to 61,438 in 2008. At the same time, the number of firearms recovered increased by 60.2 per cent from 447 in 2007 to 716 in 2008. There was a reduction in the number of cases reported to KACC by 45.9 per cent from 6,728 in 2007 to 3,637 in 2008. The number of cases forwarded to the office of the Attorney General (AG) increased marginally from 122 in 2007 to 126 in 2008.

15.3. As reported by the judiciary, total the number of cases filed, disposed of and pending reduced by 15.9, 29.5 and 1.5 per cent, respectively, in 2008. However, there was a tremendous increase of affiliation cases filed, pending before the court and those disposed of, each of which more than tripled in 2008. The number of pending land cases increased by 62.5 per cent while those disposed of rose by 85.4 per cent over the same period. During this period, the number of magistrates increased from 252 in 2007 to 287 in 2008 with the number of resident magistrates increasing by 42.

15.4. The prison population declined by 1.5 per cent from 89,770 in 2007 to 88,414 in 2008. Major declines of 27.1 per cent and 15.9 per cent were witnessed among the youth ages 16-17 and 21-25 years, respectively. On the hand, an increase of 60.3 per cent of prison population of persons aged above 50 years and 14.1 per cent of those under 16 years of age. The number of prisoners committed to safe custody (remand) increased by 94.1 per cent from 36,794 in 2007 to 71,411 in 2008.

15.5. The number of new applicants for identity cards reduced by 61.9 per cent from 1,925,737 in 2007 to 733,103 in 2008. This reduction could be attributed to the large number of people who registered during the election year in 2007. The number of entry permits issued increased by 6.6 per cent from 10,812 in 2007 to 11,530 in 2008. Similarly, the number of passports issued increased marginally from 126,213 in 2007 to 128,345 in 2008.

**Public Safety, Law and Order** 15.6. Crimes reported to the police give an indication of the offences committed in a country. The number of crimes reported increased marginally from a total of 63,028 crimes reported in 2007 to 63,476 in 2008 as shown in Table 15.1. Stock theft related offences increased by 44.7 per cent, rising from 1,568 in 2007 to 2,269 in 2008. Major reductions in crime reported to the Police were noted in corruption (24.9 per cent), handling dangerous drugs (18.4 per cent) and offences against morality (15.2 per cent).

15.7. Table 15.2 presents the breakdown of crimes recorded by Police in the Provinces from 2004 to 2008. Crime reduction was reported in Nairobi, Rift valley and Kenya Airports Police Unit (KAPU). KAPU recorded the highest reduction of 56.6 per cent, followed by Nairobi at 27.0 per cent and Rift Valley with 21.0 per cent. The number crimes reported in Railways Police Unit increased by 88.5 per cent compared to the previous year. This was followed by Central (19.1 per cent), Coast (17.8 per cent) and Nyanza (12.7 per cent).

15.8. The Government endeavours to eliminate, through recovery and surrenders of firearms and ammunitions that are in the hands of criminals. Most incidences of criminal activities such as murder, robbery with violence, carjacking, cattle rustling and motor vehicle robberies reported in the country mainly involve use of small arms acquired illegally. Table 15.3 presents data on firearms and ammunitions recovered and/or surrendered to the Government from 2004 to 2008. The data shows that firearms recovered increased by 60.2 per cent from 447 in 2007 to 716 in 2008. The number of recovered and surrendered rifles increased by 28.0 per cent and 61.2 per cent, respectively, in 2008. The number of ammunitions surrendered and those recovered

increased from 204 and 7,084 in 2007 to 1,540 and 8,081 in 2008, respectively.

15.9. Table 15.4 presents the number of persons reported, by gender, to have committed crimes in various provinces across the country. Overall, the number of persons reported to have committed crimes reduced by 11.6 per cent from 69,484 in 2007 to 61,438 in 2008. Major reductions were reported in Nairobi (58.1 per cent), Rift Valley (47.0 per cent) and KAPU (21.4 per cent). On the other hand, the Railways Police Unit recorded an increase of 24.4 per cent, followed by Eastern (16.5 per cent) and Central Province (15.0 per cent). Male criminals dominate the number of crimes reported to police,

accounting for over 80 per cent since 2005. During the review period, the share of reported women criminals increased from 13.0 per cent in 2007 to 14.4 per cent.

<sup>1</sup> The number of persons committing offences may not necessarily equal to the number of offences committed

15.10. As presented in Table 15.5, the total number of persons reported to have committed offences against morality and other offences against persons reduced by 13.2 per cent from 23,323 in 2007 to 20,242 in 2008. The number of persons reported to have committed crimes against morality and other offences reduced by 11.1 per cent and 13.6 per cent, respectively. Apart from indecent assault which went up by 10.1 per cent and bestiality which doubled, all the other offences recorded declines in 2008. The highest reduction is noted among persons reported to have committed abduction offences (45.5 per cent), followed by incest (40.5 per cent), affray (32.4 per cent) and rape (10.2 per cent).

15.11. Cases falling under homicide constitute capital offences punishable by death penalty if convicted. As shown in Table 15.6, the number of persons reported to the Police for having committed homicide by gender from 2004 to 2008. There was a general increase of 13.3 per cent of homicide offences reported in 2008 compared to a 12.8 per cent increase in 2007. The data indicates increases among cases of manslaughter, concealing birth, murder and procuring abortion. The number of persons who committed offences related to suicide and infanticide reduced by 27.6 per cent and 26.9 per cent, respectively, in 2008.

15.12. Robbery is an act of taking or attempting to take something of value from another person by violence or threat of violence. Table 15.7 gives the number of persons reported to have committed robbery and theft by gender from 2004 to 2008. The number of persons reported to have committed robbery, breakings and theft by servant reduced by 13.8, 20.7 and 22.4 per cent, respectively, in 2008. However, those reported to have

committed offences related to vehicle and other theft, general stealing and theft of stock increased by 14.3, 5.5 and 2.5 per cent, respectively, in 2008. The number of persons reported to have been involved in offences related to carjacking more than doubled in 2008. The number of persons reported to have committed offences of theft of motor vehicles increased by 14.6 per cent while the number of those who committed burglary reduced by 29.9 per cent in 2008.

15.13. Table 15.8 shows the number of persons reported to the police to have committed offences related to dangerous drugs and criminal damage. The number of persons reported to the police to have committed offences related to dangerous drugs reduced by 22.6 per cent in 2008 while those who caused criminal damage increased marginally by 1.8 per cent. The number of persons who cultivated dangerous drugs increased by 53.7 per cent in 2008 while the number of those in possession, handled and trafficked in drugs reduced by 22.4, 76.4 and 39.3 per cent, respectively.

15.14. Corruption is complex and dynamic in nature. It diverts resources from the poor to the rich, increases the cost of running business, distorts public expenditure, and discourages foreign investment. Thus corruption is a fundamental development problem that must be fought in all ways. Economic crime is conceived of as any offence in which individuals purposely act in an illegal manner in order to gain financial. Table 15.9 shows the number of persons reported to Police to have committed economic crimes and corruption by gender from 2004 to 2008. Overall, the number of persons that committed offences related to economic crimes and corruption reversed the increasing trend observed since 2005 to record declines of 18.2 and 76.1 per cent, respectively, in 2008. This was mainly driven by reduction in the number of persons reported to have committed economic crimes by way of false pretences (13.7 per cent) and currency forgery (59.3 per cent).

**Cases Handled by Kenya Anti-Corruption Commission** 15.15. The Kenya Anti-Corruption Commission (KACC) is mandated by Law to investigate corruption cases and forward to the AG those files that merit prosecution. Cases reported and handled by the Kenya Anti-Corruption Commission (KACC) from 2004 to 2008 are presented in Tables 15.10 and 15.11. There was a reduction of all cases reported to KACC by 45.9 per cent from 6,728 in 2007 to 3,637 in 2008. This could be attributed to the awareness created by the various agencies fighting corruption in the country. The number of cases forwarded to the AG on quarterly basis increased marginally from 122 in 2007 to 126 in 2008.

### Cases Handled by the Judiciary

15.16. The Judiciary plays an important role in protecting personal and property rights. Table 15.12 shows the number of various types of cases filed, pending and those disposed of in the Law courts from 2004 to 2008. There was a general reduction in the number of cases filed (15.9 per cent), pending (1.5 per cent) and disposed of (29.5 per cent) in 2008. The table shows that there was a tremendous increase in the number of affiliation cases filed, pending before the court and those disposed of, each of which more than tripled in 2008. Similarly, there was an increase in miscellaneous cases filed (60.8 per cent) and those disposed of (74.4 per cent). The number of pending land cases increased by 86.7 per cent while those disposed of almost doubled over the same period.

**Table 15.12: Cases Handled by Various Magistrates' Courts by Category, 2004 – 2008**

Notes:

- Filed refers to all cases brought before the magistrates' courts during the year under reference
- Pending cases refer to the cases which had not been arbitrated on by 31st December
- Disposed of cases refer to cases that judgment was entered by 31st December
- All cases in Table 15.12 exclude those of High Courts and the Court of Appeal

1.17. Table 15.13 presents the distribution of Magistrates and Judges in the Law Courts and High Courts by cadre. The number of judges and magistrates serving in the Judiciary increased from 312 in 2007 to 345 in 2008. The number of magistrates increased from 252 in 2007 to 287 in 2008 while that of judges reduced from 60 to 58 in the period under review. The table further shows that the number of resident magistrates increased by 42 in 2008 due to hiring of more resident magistrates in order to reduce the backlog of cases in the judiciary.

**Prison Population** 15.18. Table 15.14 shows the convicted prison population by age and gender for the period 2004 to 2008. Convicted prison population declined marginally from 89,770 in 2007 to 88,414 persons in 2008. Major declines of 27.1 per cent and 15.9 per cent were witnessed among the youth age 16 -17 and 21 -25, respectively. There was an increase of 60.3 per cent of prison population of persons aged above 50 years and of 14.1 per cent for those under 16 years of age.

**Table 15.14: Convicted Prison Population by Age and Gender, 2004 – 2008**

15.19. The daily average population (DAP) of both convicted and remand prisoners by gender from 2004 to 2008 is shown in Table 15.15. The total daily average population increased by 11.2 per cent from 41,917 in 2007 to 46,602 in 2008. The number of those convicted prisoners increased by 14.3 per cent from 22,249 in 2007 to 25,429 in 2008. Similarly, the DAP of remand prisoners increased by 7.7 per cent from 19,668 in 2007 to 21,174 in 2008. There was a large reduction of 60.2 per cent in the daily average population of female remand prison population.

15.20. Table 15.16 gives the prison population by sentence duration from 2004 to 2008. The number of prisoners committed to safe custody (remand) almost doubled, rising from 36,794 in 2007 to 71,411 in 2008. The number of persons jailed for a minimum of 2 years declined by 55.8 per cent from 10,384 in 2007 to 4,589 in 2008 followed by those imprisoned for less than one month (37.6 per cent). The number of prisoners who succumbed to natural death increased by 60.6 per cent from 475 in 2007 to 763 in 2008.

15.21. Table 15.17 shows the number of convicted prisoners by type of grouped offences. The number of convicted prisoners who had committed offences under the Employment Act more than doubled in 2008. Convicts who had committed various crimes under the 'Various Cases' category increased by 46.1 per cent while those convicted for drug related offences rose by 31.5 per cent during the review period. Major reductions were noted among those who committed offences related to order and administration of lawful authority (48.2 per cent) and offences injurious to the public (20.9 per cent).

15.22. Personnel in the three key Departments of Police, Prisons and Probation play an important role of ensuring that there is public safety, law and order. Their population *vis a vis* the population they take care of to a large extent determines their efficiency and effectiveness in the performance of their duties. Table 15.18 presents the total number of police, prisons and probation officers from 2004 to 2008. The total number of Police, Prisons and Probation officers increased by 9.9, 4.4 and 12.0 per cent, respectively, in 2008. The number of female Police officers declined by 7.9 per cent from 3,615 in 2007 to 3,330 in 2008. On the other hand, the number of Prisons female officers increased by 9.0 per cent from 2,573 in 2007 to 2,805 in 2008. Similarly, the number of Probation female officers increased by 14.7 per cent from 156 in 2007 to 179 in 2008. There were increases in the number of Police, Prison and Probation male officers of 11.6 per cent, 3.6 per cent and 10.4 per cent, respectively in 2008.

**Table 15.17: Number of Convicted Prisoners by Type of Offence, 2004– 2008**

**Convicted Prisoners Handled by Probation and Aftercare Departments** 15.23. Tables 15.19 and 15.20 give the number of offenders on probation and community service orders by gender and type of offence from 2004 to 2008. Overall, there was a substantial increase of 48.3 per cent of offenders put on probation from 11,817 in 2007 to 17,529 in 2008. Whereas the number of male offenders on probation increased by 67.8 per cent, that of females reduced by 23.8 per cent in the period under review. Male adult offenders put on probation increased by 95.5 per cent while the adult female offenders reduced by 27.5 per cent. On the other hand, male juvenile offenders put on probation reduced by 27.9 per cent compared to an increase of 3.7 per cent for female juvenile offenders

15.24. The number of offenders serving community service orders reduced by 11.2 per cent from 34,709 in 2007 to 30,813 in 2008. Females and males on community service orders reduced by 27.4 per cent and 8.3 per cent, respectively, in 2008. Although there were tremendous increases in male and female juveniles on community service orders, the number of male and female adults on community service orders reduced by 12.1 and 30.2 per cent, respectively in 2008.

15.25. Table 15.21 presents the number of offenders on aftercare rehabilitation by gender and type of offence from 2004 to 2008. There was a reduction of 49.8 per cent of persons serving aftercare rehabilitation from 1,965 in 2007 to 986 in 2008. Majority of offenders serving aftercare rehabilitation were jailed for crimes related to general stealing.

**Voter Registration** 15.26. The number of registered voters is one of the key indicators of citizens' preparedness to exercise their democratic right of voting for their preferred candidates in general elections. Table 15.22 presents the number of registered voters by gender from 2004 to 2008.

**Table 15.22: Number of Registered Voters by Province and Gender, 2004 – 2008**

<sup>1</sup> No registration of voters was done in 2008

**Registration of Persons** 15.27. National Identity Cards (IDs) are crucial for proving citizenship and are required in most transactions that require identification. Table 15.23 shows the number of identity card applications made from the various stations spread across the country to the headquarters by province from 2004 to 2008. The number of new applicants (Not Previously Registered- NPR) reduced by 61.9 per cent from 1,925,737 in 2007 to 733,103 in 2008. This reduction could be attributed to the large number of people who registered during the election year in 2007. The numbers of identity card applications made due to changes on IDs increased by 13.9 per cent from 97,696 in 2007 to 111,314 in 2008. Applications made due to duplicate (lost IDs) and replacement of old IDs reduced by 31.8 per cent and 43.6 per cent, respectively in 2008.

15.28. Table 15.24 presents the number of identity card applications processed at the headquarters and received in stations as IDs by province from 2004 to 2008. The number of new IDs processed and received in stations reduced by 66.7 per cent from 1,608,529 in 2007 to 535,378 in 2008. The number of applications processed and received in stations due to lost IDs and replacements declined by 42.3 per cent and 53.6 per cent, respectively.

15.29. Entry permits are issued on arrival to visitors on holiday from many eligible countries. Those who are not entitled to an entry permit require visas before entering the country. Passports are authentic means of identification and protection of people while they are traveling overseas. Table 15.25 presents the number of passports

and entry permits issued from 2004 to 2008. The number of entry permits issued increased by 6.6 per cent from 10,812 in 2007 to 11,530 in 2008. Similarly, the number of passports issued increased marginally by 1.7 per cent from 126,213 in 2007 to 128,345 in 2008.
