Foreword

The Economic Survey is an annual publication of the Kenya National Bureau of Statistics (KNBS). It presents socio-economic highlights of the economy for the last five years. The report forms an important source of input into the budgeting process, planning, monitoring and policy formulation processes.

Vision

The Vision of the Bureau is "to be a centre of excellence in statistics production and management"

Mission

The mission of the Bureau is "to effectively manage and coordinate the entire National Statistical System to enhance Statistical Production and Utilization".

Mandate

The KNBS is a Semi Autonomous Government Agency (SAGA) mandated by law (Statistics Act 2006) to collect, analyze and disseminate socio-economic statistics needed for planning and policy formulation in the country.

Organization

The Kenya National Bureau of Statistics comprises of six Directorates namely;
Production Statistics
Macroeconomic Statistics
Strategy and Development
Finance and Administration
Population and Social Statistics
Information and Communication Technology

Teamwork

We are committed to face challenges and opportunities of the 21st Century together with our stakeholders.

Director General Kenya National Bureau of Statistics

Metadata

Kenya National Bureau of Statistics is dedicated to presenting statistics produced according to internationally sound and scientific methods. Below are observations to be taken into account when using the statistics in Economic Survey 2016.

Data sources

The statistics presented in Economic Survey 2016 are based on a wide variety of sources. In order to provide the most comprehensive picture of the economy and social situation in Kenya during 2015, KNBS gathers data from surveys, surveys and censuses and obtains administrative data from Ministries, Government Departments and Agencies.

The source of the data is always noted directly alongside the table or in the explanatory text. More details about the data may be obtained from the responsible primary data source agency.

Accuracy and reliability

The surveys carried out by KNBS are primarily based on samples of the population. Although the sample surveys are representative of the total units, in some instances, sampling errors may occur. Other non-sampling errors may also exist, such as respondent fatigue (when respondents do not answer a questionnaire, either fully or partially). However, the Surveys conducted by KNBS always based on international standards and methods, and mitigation measures are always taken to minimize errors. Whenever such errors occur, they are documented appropriately and shared widely.

Data from administrative sources may also be subject to certain errors, such as undercoverage in the source (where it has not been possible to collect data) and differences in definitions and categorization.

Periodicity

Some of the data presented cover the calendar year (e.g. 2015) and some cover financial years, (e.g. from July 2014 to June 2015, presented as 2014/15). Where necessary, the period covered by the data is specified in the table and/or the explanatory text.

Consistency

Where data is available, KNBS has endeavoured to provide statistical tables that are comparable over time. In terms of consistency between data, some definitions and categories, such as age groups, may differ due to varying data sources.

Data Revision

It should be noted that extensive minor revisions of the macroeconomic data has continued in 2015 in order to capture in the published figures the most recent picture of the economy, in partcular there are some changes in the 2013 and 2014 data.

Accessibility

Economic Survey reports, including this edition, are uploaded on KNBS 'website for download free-of-charge in pdf format. The publication is also available in hard copy from KNBS at a small fee. Further details on the data are available from respective Directorates in KNBS.

Summary and Outlook

International Scene

World real Gross Domestic Product (GDP) growth decelerated to 3.1 per cent in 2015 from 3.4 per cent in 2014. World current account balance as a percentage of GDP stood at 0.3 per cent in 2015 relative to 0.4 per cent in 2014. Global inflation rate eased from 3.5 per cent in 2014 to 3.3 per cent in 2015 as a result of decline in international oil and other commodity prices. Total global unemployment stood at 197.1 million in 2015. The world merchandise trade volume grew by 3.2 per cent. The advanced economics experienced a modest economic recovery, mainly driven by stronger domestic demand as labour markets and credit conditions improved.

Emerging markets and developing economies experienced low commodity prices, weaker capital flows, subdued global trade and increasing financial market volatility. The economic growth in Sub-Saharan Africa (SSA) slowed from 5.1 per cent in 2014 to 3.8 per cent in 2015. Similarly there was a slowed growth of 3.4 per cent for the East Africa Community mainly associated with political instability in Burundi and uncertainties associated with general elections in Tanzania and Uganda.

Domestic Economy

The Gross Domestic Product (GDP) grew by 5.6 per cent in 2015 compared to 5.3 per cent growth in 2014. This expansion was as a result of significant growth in some key sectors among them agriculture; construction; real estate; and financial and insurance. However, growths in mining and quarrying; information and communication; and wholesale and retail trade decelerated during the same period. Accommodation and food services was the only sector whose growth contracted by 1.3 per cent which was however an improvement from the previous year decline of 16.7 per cent.

Key macroeconomic indicators remained relatively stable during the review period. Overall, inflation eased from 6.9 per cent in 2014 to 6.6 per cent in 2015 due to lower energy and transport prices. The current account deficit as a percentage of GDP narrowed from 14.5 per cent in 2014 to 11.4 per cent in 2015. This was due to a substantial growth in export of goods and services and a reduction in the import bill. The Kenyan Shilling depreciated against its major trading currencies during the review period but appreciated against the Euro, South Africa Rand and the Japanese Yen, respectively. Despite the monetary authorities adjusting the Central Bank rate (CBR), the weighted average interest rates on commercial banks loans and advances rose by 1.40 percentage points to 17.45 per cent in December 2015 compared to a rise of 15.99 per cent in December 2014. The volume of stocks traded at the Nairobi Securities Exchange (NSE) declined significantly from a high of 5,346 points in the first quarter of 2015 to 4,040 points in December 2015.

Social Scene

During the period under review, the National Government expenditure on social sector is expected to continue increasing as a result of the demand for basic social services by the population. National Government total expenditure on the social sector is expected to increase by 19.8 per cent to KSh 430.1 billion in 2015/16. The recurrent expenditure is expected to increase from KSh 309.8 billion in 2014/15 to KSh 359.4 billion in 2015/16. Development

expenditure on social sector by the National Government is expected to increase by 44.0 per cent from KSh 49.1 billion in 2014/15 to KSh 70.7 billion in 2015/16. The total number of educational institutions increased by 4.6 per cent from 79,641 in 2014 to 83,336 in 2015. The number of pre-primary schools increased by 1.4 per cent while the number of primary and secondary schools each grew by 7.9 per cent in 2015. The number of public Technical Vocational Educational Training (TVET) institutions rose by 15.8 per cent. Total enrolment in pre-primary schools increased by 6.7 per cent to 3.2 million while total enrolment in primary schools grew from 10.0 million in 2014 to 10.1 million in 2015. Total enrolment in secondary schools rose by 13.0 per cent to 2.6 million in 2015.

The coverage rate for registered births decreased from 63.4 per cent in 2014 to 60.4 per cent in 2015 while total death registration coverage rates declined from 45.8 per cent in 2014 to 45.2 per cent in 2015. The number of births that occurred in health facilities increased by 7.0 per cent in 2015. During the review period, malaria, pneumonia, cancer and HIV/AIDS were the leading causes of death.

The overall membership of National Hospital Insurance Fund (NHIF) increased by 17.8 per cent to 5.3 million in 2014/15. The formal sector contributed the bulk of the membership at 3,221,621, representing 61.1 per cent of the total membership in 2014/15. The number of registered employees by NSSF rose from 3,981.0 thousand in 2014 to 3,981.3 thousand in 2015. Annual contributions went up by 39.8 per cent to KSh 9,209.9 million in 2015 with benefits paid to members rising by 38.8 per cent to KSh 3,999.2 million in the same period.

Employment and Earnings

In 2015, total employment outside small-scale agriculture and pastoralist activities increased by 5.9 per cent to 15,160.8 thousand persons. The economy generated a total of 841.6 thousand jobs of which 128.0 thousand jobs were in the modern sector while 713.6 thousand were in the informal sector, during the period under review. Wage employment within the public sector increased from 700.8 thousand persons in 2014 to 718.4 thousand persons in 2015.

Overall, total earnings increased from KSh 1,311.1 billion in 2014 to KSh 1,497.3 billion in 2015, representing a rise of 14.2 per cent. Nominal average earnings per employee increased by 9.2 per cent to KSh 604,255.8 per annum in 2015. Real average earnings per employee increase by 2.1 per cent from KSh 368,979.9 per annum in 2014 to KSh 376,577.2 per annum in 2015 on account of easing of inflation rates coupled with faster growth in wages. Inflation rate as measured by Consumer Price Index (CPI) declined from 6.9 per cent in 2014 to 6.6 per cent in 2015. The easing of inflation rate was largely due to reduced cost of petroleum products, electricity and tight monetary policies

Money, Banking and Finance

In 2015 the Central Bank of Kenya (CBK) undertook several policies to support price stability and economic growth. Through the Monetary Policy Committee (MPC), it focused on achieving and maintaining stability in the general price levels and raised the Central Bank Rate (CBR) from 8.5 per cent to 10.0 per cent in June, and further to 11.5 per cent in July, 2015 to contain incipient inflationary pressures and stem exchange rate volatility. The CBK also used Open Market Operations (OMO), repo securities and Term Auction Deposits (TAD), to sterilize excess liquidity in the money market and to reduce volatility of the interbank rate during the year.

During the review period, total domestic credit grew by 19.2 per cent compared to a growth of 16.1 per cent in December 2014. This was as a result of increased credit to the National Government that rose to KSh 538.0 billion as at December 2015 compared to KSh 424.9 billion as at December 2014. Credit to the private sector including other public bodies also expanded by 17.5 per cent in the review period to reach KSh 2,292.4 billion. Broad money supply M3 grew by 14.1 per cent in 2015 to KSh 2,658.2 billion compared to an expansion of 16.7 per cent in 2014. Interest rates recorded mixed performance with spikes and dips for most nominal rates in 2015. The Commercial banks' Loans-Deposit interest rate spread rose from 9.18 percentage points in December 2014 to 9.53 percentage points in December 2015.

The capital market performance was depressed in 2015. The Nairobi Securities Exchange (NSE) 20-Share index recorded a high of 5,346 points during the first quarter of the year but dipped to 4,040 points in December 2015, representing a drop of 21.0 per cent compared to December 2014. The total number of shares traded during the review period also went down to 6,812 million from 8,134 million reported in 2014.

Public Finance

The fiscal plan in 2015/16 entailed a deliberate effort to continue exercising prudence in public expenditure management with the principal goal of containing fiscal risks, gradually lower the fiscal deficit, and contain growth of recurrent expenditures in favor of productive capital spending. To achieve this, the Government endeavoured to accelerate spending in infrastructure, agriculture, security, health, education, social protection and youth empowerment. The overall objective of this will be to realise sustainable, shared and equitable growth that would in return lead to job creation. Against this backdrop, the National Government budget estimates for 2015/16 amounts to KSh 2,224.0 billion, an increase from KSh 1,950.7 billion spent in 2014/15. Total recurrent expenditure is estimated at KSh 1,238.2 billon, while development expenditure is expected to grow by 22.8 per cent to KSh 985.8 billion. In 2015/16, total recurrent revenue is estimated to register a 26.6 per cent growth to stand at KSh 1,401.2 billion, out of which tax revenue will account for 92.0 per cent.

Total stock of debt as at end of 2014/15 stood at KSh 2,601.4 billion, of which external debt stock accounted for 54.7 per cent. Debt servicing charges net of repayments from on lending are expected to stand at KSh 399.0 billion. During the period under review,KSh 259.8 billion will be transferred to county Governments. The total budgeted expenditure for county Governments is estimated at KSh 361.1 billion against an estimated revenue of KSh 343.7 billion.

International Trade and Balance of Payments

Total exports rose by 8.2 per cent to KSh 581 billion in 2015, while total imports declined by 2.5 per cent to KSh 1,578 billion. This resulted to the balance of trade improving from a deficit of KSh 1,081 billion in 2014 to a deficit of KSh 997 billion. The volume of trade increased marginally from KSh 2,156 billion in 2014 to KSh 2,158 billion in 2015. The rise in the total export earnings compared to the decline in the total import bill led to the improvement of export-import ratio from 33.2 per cent in 2014 to 36.8 per cent in 2015. Terms of trade of all items improved from 73.1 per cent in 2014 to 84.9 per cent in 2015, mainly due to improved unit prices of the export commodities coupled with a decline in import prices of mineral fuels.

In 2015, Africa remained the leading destination of the country's exports accounting for 41.7 per cent of the total exports at KSh 242 billion, with exports to EAC partner states accounting for 52.3 per cent of the total exports to Africa. Europe was the second leading destination of

exports, accounting for 25.1 per cent of the total exports at KSh 146 billion. Asia was the main source of imports in 2015, accounting for 62.2 per cent of the total value of imports, with China being the main source of imports.

The balance of payments position deteriorated from a surplus of KSh 128 billion in 2014 to a deficit of KSh 25 billion in 2015 largely attributed to repayments of external loans. The current account balance improved by 19.5 per cent to a deficit of KSh 425 billion from a deficit of KSh 526 billion in 2014, as a result of a 7.4 per cent increase in merchandise exports. The financial account net inflows recorded a surplus of KSh 616 billion in 2014 compared to a surplus of KSh 498 billion in 2015.

Agriculture

Performance of the agricultural sector in 2015 improved against a backdrop of good weather and abundant rainfall, hence Gross Value Added improved from 3.5 per cent in 2014 to 6.2 per cent in 2015. This was largely achieved through improved crop and livestock production over the review period. Maize production increased by 9.0 per cent from 39.0 million bags in 2014 to 42.5 million bags in 2015. Sugar cane production increased by 4.6 per cent from 6.5 million tonnes in 2014 to 6.8 million tonnes in 2015. The quantity of horticultural exports increased by 8.4 per cent from 220.2 thousand tonnes in 2014 to 238.7 thousand tonnes in 2015. Export earnings from horticulture rose by 7.6 per cent to KSh 90.4 billion in 2015. The volume of marketed milk increased by 10.9 per cent from 541.3 million litres in 2014 to 600.4 million litres in 2015. Earnings from milk sales during the review period rose by 10.0 per cent to KSh 20.7 billion in 2015. However, tea production declined by 10.3 per cent from 445.1 thousand tonnes in 2014 to 399.1 thousand tonnes in 2015. However, the crop earnings increased by 39.5 per cent from KSh 84.9 billion in 2014 to KSh 118.4 billion in 2015. Coffee production declined by 16.0 per cent from 49.5 thousand tonnes in 2013/14 to 41.6 thousand tonnes in 2014/15. Coffee earnings also declined from KSh 16.6 billion in 2014 to KSh 12.1 billion in 2015. Overall, the food supply situation as monitored through the Food Balance Sheet improved as reflected in the energy supply improving from 2,202 Kilo Calories in 2014 to 2,293 kilo calories in 2015. The Self Sufficiency Ratio (SSR) improved from 74.4 per cent in 2014 to 75.2 per cent in 2015. The Import Dependency Ratio also improved slightly from 29.2 per cent in 2014 to 28.3 per cent in 2015.

Environment and Natural Resources

The Government continued to review and enforce policy measures that govern the exploitation, management and conservation of the environment and natural resources. During the review period, the Environment Management and Co-ordination Act 2015 (Amendment) was enacted to facilitate effective management of the environment and natural resources. In 2015, there were variations in the performance of selected environment and natural resources indicators. Total development expenditure on water supplies and related services by the national government is expected to rise from KSh 32.5 billion in 2014/15 to KSh 41.3 billion in 2015/16. Total area under the Government's forest plantation stocking increased marginally to 130.5 thousand hectares from 129.4 thousand hectares in 2014. Total value of fish output decreased from KSh 22.4 billion in 2014 to KSh 22.2 billion in 2015, mainly on account of reduced fish landings. The overall value of mineral output rose by 14.7 per cent from KSh 21.1 billion in 2014 to 24.2 billion in 2015. The increase was mainly attributed to high earnings from titanium minerals of illmenite, rutile and zircon in the export markets. Assessment of long and short rain distribution in time and space was generally good over most parts of the country.

Energy

In 2015, the energy sector witnessed a steady rise in global crude oil and other liquid inventories. Murban crude prices decreased to an average of USD 52.53 per barrel in 2015, from an average of USD 99.45 per barrel in 2014. The volume of petroleum product imports increased marginally from 4,409.0 thousand tonnes in 2014 to 4,431.7 thousand tonnes in 2015. However, the total import bill for petroleum products declined by 32.6 per cent to KSh 226.1 billion during the same period.

Total installed electricity capacity increased by 6.3 per cent to 2,333.6 MW, while total electricity generation expanded by 4.1 per cent to 9,514.6 GWh in 2015. Demand for electricity increased from 7,415.4 million KWh to 7,826.4 million KWh during the same period. The number of customers connected under the Rural Electrification Programme (REP) rose by 33.0 per cent to stand at 703,190 customers as at July 2015, up from 528,552 as at July 2014. In 2015, Rural Electrification Authority financed electricity supply to a total of 21,487 public primary schools, 17,809 on grid and 3,678 on solar.

Manufacturing

The sector's real output grew by 3.5 per cent in 2015 compared to a slower growth of 3.2 per cent in 2014. This was attributed to reduced production costs arising from lower cost of petroleum and electricity inputs. The manufacturing quantum index recorded a slower growth of 3.9 per cent in 2015 compared to 6.3 per cent registered in 2014. This increase was mainly driven by increased production of pharmaceutical products; beverages; meat and meat products; and non-metallic minerals and plastic products. Producer Price Index (PPI) increased by 3.91 per cent in 2015 compared to an increase of 3.03 in 2014, mainly due to high cost of imported raw materials arising from depreciation of the Kenya Shilling against major currencies.

Credit to manufacturing sector increased from KSh 237,422 million in 2014 to KSh 290,069 million in 2015. Formal employment in the sector rose by 2.7 per cent from 287.4 thousand persons in 2014 to 295.4 thousand persons in 2015. The Export Processing Zone (EPZ) program recorded improved performance in employment, exports, imports, and expenditure on local goods and services, with total sales increasing by 12.1 per cent to KSh 64.1 billion in 2015. Export of apparel under the African Growth and Opportunity Act (AGOA) increased by 14.4 per cent to KSh 34.6 billion in 2015.

Building and Construction

The country witnessed a thriving building and construction sector in 2015 registering a growth of 13.6 per cent in value added. Formal employment in the sector grew by 11.4 per cent to stand at 148.0 thousand in 2015 up from 132.9 thousand in 2014. Total proposed development expenditure on roads increased by 79.2 per cent. Consequently, the index of Government expenditure on roads increased from 263.4 in 2014 to 386.7 in 2015 to support projects being undertaken during the year.

Cement consumption went up by 9.9 per cent in 2015 in tandem with the growth in the building and construction sector. Total construction cost index increased by 4.9 per cent compared to an increase of 10.1 per cent in 2014, mainly attributable to the fall in fuel prices, a key input component of the index. The index of reported private building works completed in major towns rose from 341.4 in 2014 to 367.1 in 2015. In addition, the index of reported public building works completed in main towns registered an increase from 106.1 in 2014 to 116.2 in 2015. Loans and advances to the sector increased by 32.3 per cent from KSh 80.4 billion to KSh 106.4 billion in 2015. As at December 2015, 174 kilometres of the Standard

Gauge Railway (SGR) from Mombasa to Nairobi had been constructed at a cost of KSh 113.9 billion

Tourism

Tourism earnings went down to KSh 84.6 billion in 2015 compared to KSh 87.1 billion in 2014. Similarly, international visitor arrivals declined by 12.6 per cent from 1,350.4 thousand in 2014 to 1,180.5 thousand in 2015. The suppressed performance was on account of security concerns, particularly in the coastal region and restrictive travel advisories from some European source markets.

Bed-nights occupancy decreased by 6.4 per cent from 6,281.6 thousand in 2014 to 5,878.6 thousand in 2015. Number of visitors to museums, snake parks and other historical sites went up by 15.4 per cent to 797.5 thousand in 2015 compared to 690.9 thousand in 2014. The number of visitors to national parks and game reserves declined by 10.8 per cent to 1,953.8 thousand in 2015.

Transport and Storage

The Transport and Storage sector output expanded by 6.4 per cent from KSh 894.1 billion in 2014 to KSh 951.4 billion in 2015. The road transport sub-sector posted a growth of 4.5 per cent in output to KSh 613.9 billion in 2015. The performance of the Port of Mombasa improved further during the period under review with the total cargo throughput handled increasing from 24,875 thousand tonnes in 2014 to 26,732 thousand tonnes in 2015. Total container traffic handled rose by 6.3 per cent to 1,076,118 Twenty-foot Equivalent Units (TEUs) in 2015.

Total throughput of white petroleum products transported through the pipeline increased by 2.8 per cent to 5,712.1 thousand cubic metres in 2015. The air transport sub-sector recorded a growth of 1.3 per cent in total commercial passengers handled during the period under review compared to a growth of 7.9 per cent in 2014.

The performance of the freight transport segment of the railway transport sub-sector has been on the upward trend for the third consecutive year. Total cargo traffic grew from 1,509 thousand tonnes recorded in 2014 to 1,575 thousand tonnes in 2015. Similarly, the revenue earned from freight transport increased from KSh 6.1 billion in 2014 to KSh 6.2 billion in 2015. Passenger journeys and revenue from passenger traffic stream however declined further during the reference period.

Newly registered motor vehicles increased by 5.0 per cent to 107,761 units in 2015. On the other hand, total motor cycles registered increased by 20.8 per cent to 139,420 over the same period. Total reported road traffic accidents dropped by 6.4 per cent from 5,672 in 2014 to 5,310 in 2015 partly attributable to sustained government enforcement of road safety rules.

Information and Communication Technology

The value of Information Communication Technology output expanded by 8.1 per cent from 259.0 million in 2014 to KSh 280.0 million in 2015. Digital TV stations increased from 36 in 2014 to 62 in 2015 following successful completion of the digital migration. In 2015, mobile telephone subscriptions increased to 37.7 million subscribers, resulting to penetration rate of 85.4 per cent.

Internet subscriptions increased significantly from 16.4 million in 2014 to 23.9 million in 2015. The number of licensed Internet Service Providers (ISPs) increased from 177 in 2014 to 221 in 2015. Data speed for computer modems and transmission carriers increased by 66.9 per cent to 20,293 bits per second per capita (BPs/person) owing to accessibility of fiber optic.

The international telephone traffic increased by 11.4 per cent to 1,173 million minutes. Similarly, domestic telephone calls traffic increased by 27.7 per cent to 39.2 billion minutes in 2015. The number of messages sent via Multimedia Messaging Services (MMS) rose by 13.9 per cent to 13.7 million in 2015 while of Short Messaging Services (SMS) increased by 3.3 per cent. The number of international SMS received declined by 19.0 per cent to 131.1 million in 2015.

The number of mobile money transfer service subscribers grew to 26.8 million in 2015. Total amount of money transacted through mobile money platform expanded by 18.7 per cent to KSh 2,816 billion over the review period.

Governance

The Governance, Justice, Law and Order sector recorded improved performance in service delivery in the year 2015. The Kenya Police Service was bolstered with the commissioning of the national surveillance, communication control system in Nairobi and Mombasa, procurement of armoured Police vehicles and recruitment of more officers. The Judiciary recruited more judicial officers and opened up more court stations.

In the year under review, crimes reported to the police increased by 4.5 per cent to 72,490 cases while persons reported to the police to have committed crimes decreased by 8.3 per cent from 34,561 in 2014 to 31,695 in 2015. Cases filed in courts decreased from 500,349 in 2014 to 330,553 in 2015 with cases disposed of declined by about 31 per cent to 247,743. However, pending cases grew by 13.6 per cent to 693,100 in 2015. The number of judicial officers increased from 623 in 2014 to 666.

Prison population declined by 10.6 per cent from 248,390 in 2014 to 221,974 in 2015. Daily Average Prison Population (DAP) decreased from 55,270 to 54,631 inmates during the year under review. The number of offenders serving probation and community service orders increased by 13.4 per cent to 13,422 and 27.5 per cent 43,380 respectively. Cases handled by the Ethics and Anti-Corruption Commission increased from 4,013 in 2014 to 5,551. The Commission traced assets worth KSh 3,900 million and actualized recoveries valued at KSh 140 million. New identity cards produced in 2015 were 816,477 compared to 738,064 in 2014. In 2015 a total of 764,445 identity cards were collected, compared to 709,573 in 2014.

Outlook

The performance of Kenya's economy in 2016 is likely to be determined largely by internal factors. However, exogenous factors will also shape the economy but probably to a lesser extent. Generally, all the sectors of the economy are expected to continue in their current growth trajectory. The long rains are forecasted to be depressed in some parts of the country but sufficient and well spread in the main food growing regions. Against this background, agriculture sector's output is likely to slowdown but record a moderate positive growth. Similarly, the manufacturing sector is also likely to be supported by lower fuel prices and improved supply of electricity as well as sustained delivery of inputs from the agriculture sector.

Summary and Outlook

The financial intermediation sector is likely to remain robust despite the recent takeover of three commercial banks by the Central Bank of Kenya due to financial impropriety. The expected sustenance of growth momentum by most of the economic activities is likely to boost credit uptake and therefore favour the financial and insurance activities. The construction industry is also expected to maintain an increased role in the creation of value addition due to the ongoing public infrastructure development and continued investment in fixed assets by the private sector.

Fuel prices are expected to remain at around the level experienced during the first quarter of 2016 and therefore help contain inflation within the Central Bank's target. The Kenya shilling is likely to remain stable against its major trading currencies similar to all other key macroeconomic indicators. The value of Kenya's import of goods is likely to decline further mainly due to low international oil prices. On the other hand, export earnings are expected to grow in line with a projected growth of world merchandise trade in 2016. The current account deficit will most probably narrow further due to the expected slowdown in imports.

Table 0: Key Economic and Social Indicators, 2011 – 2015

	le U: Key Economic and Social Indicato			2012	2012	2211	2015*	-

Chapter 1

International Scene

Overview

orld real Gross Domestic Product (GDP) growth decelerated to 3.1 per cent in 2015 from 3.4 per cent in 2014. This was as a result of low commodity prices, weaker capital flows, subdued global trade and increasing financial market volatility particularly in emerging markets and developing economies. However, the advanced economies experienced a modest economic recovery, mainly driven by stronger domestic demand as labour markets and credit conditions improved.

- 1.2. The economic growth in Sub-Saharan Africa (SSA) slowed from 5.1 per cent GDP growth in 2014 to 3.8 per cent growth in 2015. This was attributed to the weak global economic growth and lower commodity prices. However, there was a slowed growth of 3.4 per cent in 2015 from 5.8 per cent in 2014 in the East Africa Community (EAC). This was mainly associated with political instability in Burundi and uncertainties associated with general election in Tanzania and Uganda. The devastating impact of Ebola in some West African countries was reflected in the Economic Community of West African States (ECOWAS) growth that decelerated to 4.0 per cent in 2015 compared to 6.0 per cent in 2014.
- 1.3. Global inflation rate eased from 3.5 per cent in 2014 to 3.3 per cent in 2015. This was attributed to a decline in international oil and other commodity prices. High supplies and weak demand for commodities contributed to the lowering of most commodity prices. Lower crude oil prices caused by sluggish demand were driven by expectations of slowing global growth particularly in the emerging markets and developing economies. Similarly, the revolution in technology in the United States (US) and Canada led to increased global oil production. This led to a reduction in the import of oil in the US, thereby contributing to the fall in oil prices. The Murban ADNOC crude oil price averaged at \$52.53 per barrel in 2015, a decline from \$99.46 per barrel in 2014.
- 1.4. The world merchandise trade volume grew by 3.2 per cent in 2015 compared to an increase of 3.3 per cent in 2014. This performance was due to a slump in import volumes in both emerging markets and developing economies, reflecting both weaker demand in growth and reduction in the intensity of imports.
- 1.5. Despite narrowing of the global current account imbalances, current account deficits remained relatively high in many economies. World current account balance stood at 0.3 per cent of GDP in 2015 relative to 0.4 per cent of GDP in 2014. However, SSA's current account balance recorded a deficit of 5.7 per cent in 2015 compared to a deficit of 2.6 per cent of GDP in 2014. This was on account of reduced export revenues, especially for the commodity exports. The emerging markets and developing economies current account balance recorded a surplus of 0.1 per cent of the GDP in 2015.
- 1.6. OECD countries fiscal deficits improved from 3.8 per cent of GDP in 2014 to 3.3 per cent in 2015. High fiscal deficits in SSA economies were due to falling commodity prices, geopolitical tensions, rising infrastructural spending and construction of mining projects.
- 1.7. Over the review period, global unemployment rate decelerated to 5.8 per cent in 2015, mainly occasioned by the sluggish global economic performance. Total global unemployment

Regional stood at 197.1 million in 2015. In the OECD block, the unemployment rate (as a per cent Economic of labour force) declined to 6.8 per cent in 2015 compared to 7.3 per cent in 2014 due to **Analysis** improved labour markets.

Organization for Economic Co-operation and Development (OECD)

1.8. Table 1.1 highlights key economic indicators and their projections for selected OECD countries for the period 2013 to 2017. The OECD's real GDP grew by 2.0 per cent in 2015 compared to a growth of 1.9 per cent in 2014. This was mainly attributed to improvements in economic performance in Japan and Euro Area. Inflation rate eased to 0.8 per cent in 2015 compared to 1.7 per cent recorded in 2014. This was as a result of drop in inflation rate in all the selected OECD countries. Current account surplus as a percentage of GDP improved for the second consecutive year to 0.2 per cent in 2015 compared to 0.0 per cent increase in 2014. This could be explained by improvement in current account of all selected OECD countries except USA.

Euro Area

1.9. Real GDP in the Euro Area went up by 1.5 per cent in 2015 compared to a growth of 0.9 per cent recorded in 2014. The modest growth was supported by both domestic demand and exports. Inflation rate within the region eased to 0.1 per cent in 2015 compared to 0.4 per cent in 2014, mainly due to the decline in fuel prices. Unemployment rate improved to 10.9 per cent in 2015 compared to 11.5 per cent in 2014. Current account surplus as a percentage of GDP improved from 3.3 per cent in 2014 to 3.8 per cent in 2015.

United States of America

1.10. The economic growth of USA in real terms remained unchanged at 2.4 per cent in 2015 mainly supported by robust consumer spending and investment in the non-oil private sector. Current account deficit as a percentage of GDP worsened to 2.5 per cent in 2015 compared to a deficit of 2.2 per cent in 2014. This was attributed to strengthening of the US Dollar and weakening external demand that weighed on exports and manufacturing activities. Solid labour market conditions and the dynamic investment in non-oil private sector led to an improvement in unemployment rate from 6.2 per cent in 2014 to 5.3 per cent in 2015.

United Kingdom

1.11. The UK's economy recorded a slowed growth of 2.4 per cent in 2015 compared to 2.9 per cent recorded in 2014. This was mainly on account of reduced domestic demand. Inflation rate eased to 0.1 per cent in 2015 compared to 1.5 per cent in 2014. A similar trend was witnessed in the country's unemployment rate that slowed to 5.6 per cent in 2015 compared to 6.2 per cent rate in 2014. Current account deficit as a percentage of GDP narrowed to 4.0 per cent in 2015 from 5.1 per cent in 2014, due to improvement of exports.

Japan

1.12. Japan's real GDP grew by 0.6 per cent in 2015 after a contraction of 0.1 per cent in 2014. The country's unemployment rate improved from 3.6 per cent in 2014 to 3.4 per cent in 2015. Inflation rate eased to 0.8 per cent in 2015 compared to 2.7 per cent recorded in 2014, mainly on account of the decline in oil prices during the year. Current account surplus as a percentage of GDP improved from 0.5 per cent in 2014 to 3.3 per cent in 2015.

Germany

1.13. The economic growth of Germany slowed marginally to 1.5 per cent in 2015 compared to a growth of 1.6 per cent recorded in 2014. Inflation rate improved to 0.2 per cent in 2015 from 0.8 per cent in 2014. Current account surplus as a percentage of GDP widened to 8.3 per cent in 2015 compared to 7.5 per cent in 2014. Unemployment rate eased from 5.0 per cent in 2014 to 4.6 per cent in 2015.

⁺ Revised

¹ Projections

 $^{^2\}mbox{Refers}$ to arithmetic average of world merchan dise import and export volumes.

Brazil, Russia, India, Indonesia, China and South Africa

1.14. The economic performance of the emerging economies of Brazil, Russia, India, Indonesia, China and South Africa (BRIICS) decelerated for the second consecutive year in 2015 as shown in Table 1.2. Average real GDP in the BRIICS recorded a growth of 2.2 per cent in 2015 compared to an increase of 3.4 per cent in 2014. This was mainly attributed to underperformance of the economies of Brazil, Russia and China. However, inflation rate worsened from 6.0 per cent in 2014 to 7.2 per cent in 2015. The current account balance improved from a deficit of 1.7 per cent in 2014 to a deficit of 0.7 per cent in 2015.

1.15. Real GDP growth of Brazil worsened to a contraction of 3.0 per cent compared to a growth of 0.3 per cent in 2014. This was a reflection of the recession caused by political uncertainty that resulted to low economic confidence. Inflation increased to 8.9 per cent in 2015 compared to 6.3 per cent rate in 2014. Real GDP growth of Russia, contracted by 3.8 per cent in 2015 compared to a marginal growth of 0.2 per cent in 2014. This was attributed to lower oil prices, international sanctions and capital flight that reduced investment, domestic consumption and imports. The large depreciation of the Russian currency (ruble) pushed inflation to double digits, from 7.4 per cent in 2014 to 15.8 per cent over the year under review.

1.16. China's economy grew by 6.8 per cent in 2015 compared to 7.4 per cent in 2014. This was explained by slowdown in the manufacturing sector and decline in real estate investment that recorded large unsold inventories. The financial market turbulence in China led to capital flight that significantly affected all the BRIICS countries except India. The economy of India recorded a significant real GDP growth of 7.3 per cent in 2015 compared to growth of 5.6 per cent in 2014. This was driven by increased consumption and public investment. In Indonesia, real GDP grew by 4.7 per cent in 2015, a slower growth compared to 5.2 per cent growth in 2014. During the year under review, South Africa's economy grew by 1.4 per cent, similarly to that recorded in 2014. However, the economy was affected by strikes in the mining sector, continued electricity shortages that hampered the manufacturing sector and severe drought that reduced the agricultural production in 2015. The decline in global oil prices eased inflation from 6.3 per cent in 2014 to 4.8 per cent in 2015.

Association of South Eastern Asia Nations

1.17. The average real GDP of the Association of South Eastern Asia Nations (ASEAN-5) grew by 4.6 per cent in 2015 compared to growth of 4.8 per cent in 2014. This was attributed to reduced external demand resulting from a slowdown in economic performance in China. Inflation in the region dropped to 3.0 per cent in 2015 compared to 4.1 per cent in 2014 mainly due to lower food and oil prices. Current account surplus as a percentage of GDP grew by 1.3 per cent during the year under review compared to 2.3 per cent growth in 2014.

Sub-Saharan Africa

1.18. Economic growth in the SSA slowed from 5.1 per cent in 2014 to an estimated 3.8 per cent in 2015. The slowdown in the economic performance was attributed to a decline in the prices of the main commodities and weak global economic performance. Inflation rate in the region worsened from 6.7 per cent in 2014 to 7.8 per cent in 2015. This was mainly due to depreciation in value of currencies of the region's major economies. The current account deficit as a percentage of GDP worsened from a contraction of 2.6 per cent in 2014 to a contraction 5.7 per cent in 2015.

Table 1.2: Real GDP Growths, Inflation Rates and Current Account Balances for Selected Regions and Countries

	Real GDP Growth Rates			Inflation				Current Account Balance (Percent of GDP)

Notes:

 $Southern\ African\ Development\ Community (SADC)\ includes; Angola, Botswana\ , Democratic\ Republic\ of\ Congo,\ Lesotho,\ Madagascar,\ Malawi,\ Mauritius,\ Mozambique\ , Namibia\ , Seychelles\ , South\ Africa\ , Swaziland\ , United\ Republic\ of\ Tanzania\ , Zambia\ and\ Zimbabwe\ .$

West African Economic and Monetary Union (WAEMU) includes; Benin, Burkina Faso, Côte d'Ivoire, Guinea Bissau, Mali, Niger, Senegal, and Togo. Economic and Monetary Union of Central Africa (CEMAC) and includes; Cameroon, Chad, Central African Republic, Equatorial Guinea, Gabon, and Republic of Congo

East African Community

1.19. During the 2015, economic performance in the East Africa Community (EAC) experienced a slowed growth. Real GDP declined by 3.4 per cent compared to 5.8 per cent growth registered in 2014. In Tanzania, real GDP growth slowed to 6.9 per cent in 2015, compared to an expansion of 7.2 per cent in 2014. The slowdown in growth was mainly associated with uncertainties emanating from general elections during the year under review.

^{*} Provisional

⁺ Revised

¹ Projections

 $^{^2\,\}mathrm{Excludes}$ Syria due to unavailability of data

The contraction in economic growth of 7.2 per cent in Burundi was attributed to political instability experienced during the year under review. The EAC's inflation eased to 5.5 per cent in 2015 compared to 5.6 per cent rate in 2014. The current account as a percentage of GDP improved from a deficit of 12.7 per cent in 2014 to a deficit of 9.5 per cent in 2015.

Southern African Development Community

1.20. The Southern African Development Community (SADC) recorded a slowed growth of 3.0 per cent in 2015 compared to a 3.2 per cent growth in 2014. This was mainly due to constant economic growth registered in South Africa. Inflation rate improved to 5.6 per cent in 2015 compared to 6.3 per cent in 2014, explained by decline in global oil prices. The region's current account widened to a deficit of 6.6 per cent in 2015 from a deficit of 5.4 per cent in 2014.

Maghreb

1.21. Real GDP growth in Maghreb region grew from a contraction of 0.6 per cent in 2014 to 1.4 per cent in 2015. The performance was associated with improved Euro Area economic growth that raised export demand, tourism, and remittances. In Libya, real GDP improved from a contraction of 19.8 per cent in 2014 to 6.1 per cent in 2015. The improved performance resulted from increased fiscal revenues from oil exports. Inflation in the region worsened from 3.6 per cent in 2014 to 4.4 per cent in 2015. Current account as a percentage of GDP worsened to a deficit 21.8 per cent in 2015, from a deficit of 14.3 per cent in 2014.

Outlook

- 1.22. On the global perspective, real GDP is projected to grow by 3.6 per cent in 2016. This growth is predicted on continuous gains in major high-income countries, a gradual tightening of financing conditions especially in the USA, a stabilization of commodity prices, and a gradual economic rebalancing in China. Global trade is also projected to grow by 3.6 per cent in 2016, rising broadly in line with global output growth.
- 1.23. In the OECD economies, real GDP is projected to grow by 2.2 per cent in 2016. Euro Area economic performance is projected to grow by 1.8 per cent in 2016. This is due to the expected improvements in credit growth and a decline in unemployment. Similarly, real GDP growth in the emerging economies of BRIICS is projected to grow by 3.1 per cent in 2016.
- 1.24. Growth in SSA is projected to increase by 4.3 per cent in 2016, on the account of commodity prices stabilization and decline infrastructure constraints. Real GDP in the EAC region is projected to grow to 6.6 per cent in 2016. Lower commodity prices and high expected investment costs are projected to increase the risk of delaying investments particularly in energy and mining sectors in the region.
- 1.25. The ongoing economic rebalancing in China is expected to create external demand in Asia and BRIICS. These regions are expected to register growth in real GDP of 4.9 and contraction of 0.6 per cent in 2016. Real GDP in Maghreb countries is expected to remain robust with a projected growth of 3.8 per cent. In Libya, a UN sponsored political agreement reached at the end of 2015 is expected to allow oil production and GDP growth recovery.

Chapter 2

Domestic Economy

Overview

he Gross Domestic Product (GDP) is estimated to have expanded by 5.6 per cent in 2015 which was a slight improvement compared to a 5.3 per cent growth in 2014. This growth was mainly supported by a stable macroeconomic environment and improvement in outputs of agriculture; construction; finance and insurance and real estate. However, growth slowed in a number of sectors including; information and communication, mining and quarrying, and wholesale and retail trade. Similarly, growth in taxes on products slowed during the review period. The growth of accommodation and food services contracted by 1.3 per cent, a less severe performance compared to a revised decline of 16.7 per cent in 2014.

- 2.2. The growth in agriculture was mainly supported by improved weather condition that resulted in significant increases in output of maize, horticultural produce and livestock. However, heavy rains in 2015 were unfavorable to cultivation of some crops like potatoes and tomatoes. Nevertheless the significance of crops that were favoured by the weather far outweighed that of crops negatively impacted upon, resulting in an impressive growth of 5.6 per cent in the agriculture sector. Construction recorded the fastest growth of 13.6 per cent in 2015 compared to 13.1 per cent in 2014. Growth in construction activities was mainly driven by the ongoing public infrastructure development coupled with the resilient private sector's expansion in the real estate sector. The financial and insurance sector maintained a robust expansion to grow at 8.7 per cent in 2015 from 8.3 per cent in 2014. This growth was mirrored by a 19.2 per cent rise in the total domestic credit to KSh 2,830.5 billion in December 2015 compared to a growth of 16.1 per cent in December 2014.
- 2.3. Key macroeconomic indicators remained relatively stable and supportive of the growth during the year under review. Overall inflation eased from 6.9 per cent in 2014 to 6.6 per cent in 2015 mainly due to lower prices of energy and transport. Monthly inflation rates fluctuated between 5.5 per cent and 8.0 per cent but were largely contained within the Central Bank's target throughout the year. Generally, the Shilling depreciated against its major trading currencies as reflected by the weighted trade index which worsened by 5.7 per cent during the review period. The Shilling was mainly supported by a significant fall in the international oil prices as the country cut-back expenditure on importation of petroleum fuels and increased diaspora remittances. However, lower earnings from the tourism sector impacted negatively on the exchange rate of the Shilling in 2015.
- 2.4. In response to rising inflation at the beginning of the year and instability of the shilling, the monetary authorities adjusted the Central Bank Rate (CBR) from 8.50 per cent to 10.0 per cent in June and later to 11.5 per cent in July 2015. The weighted average interest rates on commercial banks loans and advances rose by 1.40 percentage points to 17.45 per cent in December 2015 compared to 15.99 per cent in December 2014. The index of stocks traded at the Nairobi Securities Exchange (NSE) declined significantly from a high of 5,346 points in the first quarter of 2015 to 4,040 points in December 2015.
- 2.5. In 2015, the current account balance improved largely due to a decline in the import bill against a substantial growth in export earnings. The decrease in the import bill was mainly

due to the fall in the international oil prices. The growth in export earnings was largely driven by improved prices for some commodities which more than offset the effects of the fall in quantities of export. However, the country's export growth was curtailed by suppressed external demand.

2.6. The effects of the fall in fuel prices were experienced across most of the industries, with the main beneficiary being transport and storage where there was a significant decline in costs of production. Other sectors that significantly gained from the lower fuel prices include construction and thermal generation of electricity.

Agriculture, Forestry and Fishing

- **Sectoral** 2.7. The sector's performance was largely influenced by weather patterns in 2015 with heavy Analysis and well spread long rains experienced in most parts of the country. The short rains period was characterized by the El Niño weather phenomenon that started in November 2015. In the end, output of livestock and most crops was boosted by the weather but a few crops were negatively affected, resulting to a decline in their production. Consequently, the sector recorded an accelerated growth of 5.6 per cent in 2015 compared to 3.5 per cent in 2014. The agriculture sub-sector grew by 6.2 per cent in 2015 and considerably influenced the performance of the whole sector.
 - 2.8. Production of maize increased from 39.0 million bags to 42.5 million bags in 2015 due to favourable weather and reduced incidences of the Maize Lethal Necrosis Disease (MLND). Beans and sorghum also recorded substantial growths of 24.2 per cent and 10.5 per cent, respectively. However, production of potatoes declined by 14.8 per in 2015 due to severe effects of frost during the season. Similarly, production of tea and coffee contracted by 10.3 per cent and 16.0 per cent, respectively in 2015. The value of horticultural exports rose by 7.5 per cent in 2015 on account of increased exports of cut flower and fruit. On the other hand, export of vegetables declined marginally in 2015.
 - 2.9. In the livestock sub-sector, the volume of marketed milk increased by 10.9 per cent from 541.3 million litres in 2014 to 600.4 million litres in 2015. The number of cattle and calves sold to abattoirs rose by 9.5 per in 2015 to stand at 2,274.5 thousand head. Similarly, sheep and goats slaughtered in 2015 increased from 6,138.5 thousand head in 2014 to 6,560.8 thousand head in 2015.

Manufacturing

- 2.10. The macroeconomic environment in 2015 was favourable for the performance of the manufacturing sector except for the cost of borrowing that somewhat curtailed the availability of cheap credit to fund the sector's activities. In addition, key sectors that heavily influence the performance of the sector namely agriculture and electricity posted impressive performance in the year under review. There was a significant decline in fuel prices, especially light diesel that is used in an array of manufacturing processes, which consequently resulted in a drop in the cost of production. The robust growth in agriculture also influenced the sector's performance especially in food processing. Against this backdrop, the manufacturing sector expanded by 3.5 per cent in 2015 compared to 3.2 per cent in 2014.
- 2.11. Manufacturing of food products in all categories increased in 2015 except processing and preservation of fish that registered a decline of 21.8 per cent. Growth in the sector was mainly driven by a 22.0 per cent growth in manufacture of beverages. Manufacture of nonfood products registered an impressive performance in 2015 buoyed by production of wearing

apparel, pharmaceutical products and furniture that grew by 10.8, 23.9, and 20.6 per cent, respectively. Production of cement increased from 5,882.5 thousand tonnes in 2014 to 6,352.9 thousand tonnes in 2015.

Transport and Storage

2.12. The sector's growth accelerated to 7.1 per cent in 2015 from the previous growth of 4.6 per cent in 2014. The improved performance was against a background of reduced intermediate consumption as domestic retail prices for petroleum products fell in line with fall in the international oil prices. Globally, Murban crude oil prices almost halved to average at US\$ 52.5 per barrel in 2015 compared to US\$ 99.5 2014. Domestically, the retail prices for light diesel declined by 9.0 per cent during the review period. The decrease in the international oil prices was driven by increased global production and slowdown in demand from US and China.

2.13. Land transport which comprises road, rail and pipeline expanded by 5.2 per cent in 2015 compared to 4.0 per cent in 2014. Air transport contracted for the second year in a row against suppressed international visitor arrivals, suspension of the national carrier's operations in some routes in Western Africa and increased competition. All other transport and related activities jointly grew by 16.4 per cent in 2015 compared to a growth of 8.4 per cent in 2014. This growth was mainly on account of rapid expansion in warehousing and storage and cargo handling activities.

Information and Communication

2.14. The sector's growth slowed to 7.3 per cent in 2015 after a robust expansion of 14.6 per cent in 2014. The slowdown was mainly occasioned by a dampened growth in the telecommunications subsector in 2015. Publishing, broadcasting, other Information Technologies and information activities recovered from a 1.8 per cent decline in 2014 to record a growth of 2.9 per cent in 2015. However, the growth remained robust on account of resilient expansion in mobile telephony networks and increased uptake of internet services. The freeing up of valuable portions of the TV broadcast spectrum that emanated from the successful completion of the digital migration facilitated significant growth of digital TV stations thereby boosting the sector's growth.

Financial Intermediation

2.15. Overall, the sector sustained its vibrant performance in 2015 mainly owing to a 9.4 per cent growth in the financial services sub-sector despite the placing of two banks under statutory management. The growth was somehow dampened by the continued decline in the level of activity in the insurance sub-sector whose growth slowed down to 4.9 per cent in 2015. The sector's performance is clearly manifested in the performance of other sectors especially construction, manufacturing and agriculture that recorded significant rise in credit advanced by commercial banks and cooperative societies. The period under review was also characterized by a significant growth in domestic credit to the National Government from KSh 424.9 billion in 2014 to KSh 538.0 billion in 2015.

2.16. In 2015, the monetary policy principally aimed at achieving and maintaining stability in the general price levels in the economy with the ultimate goal of achieving an inflation target of 5.0 per cent. The year under review was characterized by inflationary pressures and volatility in exchange rate. As a result, the Monetary Policy Committee (MPC) raised the Central Bank Rate (CBR) from 8.5 per cent to 10.0 per cent in June, and further to 11.5 per cent in July. There was mixed performance in interest rates during 2015 on account of the changes in the

CBR.The 91-day Treasury bill rate dropped from 8.58 per cent in December 2014 to 8.26 per cent in June 2015 and rising to 9.81 by December. Commercial banks' loans and advances and lending interest rates rose to 17.45 per cent in December 2015 from 15.99 per cent in December 2014.

2.17. During the same period, the Central Bank of Kenya negotiated a precautionary support programme to cushion the economy from inherent external shocks especially emanating from unforeseen financial instability in the world economy.

Electricity Supply

2.18. The sector recorded an accelerated growth of 9.7 per cent in 2015 compared to a growth of 7.3 per cent in 2014. The improved growth was attributed to increased production of geothermal electricity coupled with lower fuel costs for thermal power generation. In addition, there was a significant increase in generation of wind electric power that also boosted the sector's contribution to GDP. Commissioning of new geothermal plant in late 2014 led to a 55.0 per cent rise in generation of geo-thermal electric power during the review period. Generation of hydroelectric power increased by 1.3 per cent over the same period. In total, 9,455.8GWh was produced in 2015 compared to 8,980.3 GWh in 2014. Effective installed capacity of hydro, thermal oil, and geothermal increased by 0.3, 11.9 and 10.9 per cent, respectively. Effective capacity of wind power almost quadrupled in 2015.

Construction

2.19. The construction sector maintained the momentum realized in 2014 to post a growth rate of 13.6 per cent in 2015. This growth was to a great extent buoyed by the development of transport infrastructure such as the continued implementation of the first phase of the Standard Gauge Railway, development of the road network, expansion and rehabilitation of facilities at the airports and improvement of port facilities to enhance operational efficiency. The sector also benefited from the implementation of mega energy projects in line with the flagship projects of the Vision 2030. These include Olkaria 1V (unit 1 &2) and Olkaria 1(unit 4 &5) and wellhead Geothermal projects. Further, the sustained growth in demand for both residential and non-residential structures to house the fast growing urban populations and provision of sufficient office space has positively impacted on the performance of the sector in 2015. Consequently, the real estate sector remained on the growth trajectory that started in 2012 to record a 8.9 per cent in 2015.

2.20. Evidently, the financial services sub-sector also gained from the impressive performance exhibited by the construction sector in the period under review. Loans and advances to building and construction activities registered a substantial increase from KSh 80.4 billion in 2014 to KSh 106.3 billion in 2015.

Accommodation and Food Services (Hotels and Restaurants)

2.21. Performance in the accommodation and food services sector has been greatly constrained in the last three years. During this period, the sector showed some signs of recovery by slowing the rate of contraction to 1.3 per cent compared to a revised contraction of 16.7 per cent in 2014. This rejuvenation may partly be as a consequence of the visits by eminent world personalities as well as the hosting of the World Trade Organization (WTO) talks in Nairobi. However, the subdued performance was an indication that the sector was still reeling from the effects of past shocks that adversely impacted on its performance. International visitor arrivals has been on a downward trend in the last five years. It maintained the trend to stand at 1,180 thousand visitors in 2015. Similarly, bed occupancy rate declined from 31.6 per cent in 2014

Chapter 2: Domestic Economy

to 29.1 per cent in 2015. In the same way, hotel bed nights declined from 6,281.6 thousand in 2014 to 5,878.6 thousand in 2015. The dismal performance in the sector was attributed to security risks posed by terrorism, the aftermath of *ebola* pandemic in West Africa and partly to some countries' failure to lift travel advisories issued in the past.

2.22. Tables 2.1 to Table 2.6 present the Gross Domestic Product (GDP) disaggregated by the gross value added generated by the economy. As shown in Table 2.1, the value of GDP at current prices rose by 15.3 per cent from KSh 5,398.0 billion in 2014 to KSh 6,224.4 billion in 2015. Table 2.2 on the other hand depicts the contribution of the various sectors of the economy to total GDP. In the year under review, the contribution of the agriculture, forestry and fishing sector grew markedly from 27.0 to 30.0 per cent mostly on account of a substantial growth in the contribution of growing of crops sub-sector. Similarly, the contribution of the manufacturing sector grew to 10.3 per cent in 2015 from 10.0 per cent in 2014 and maintained the second position in ranking.

2.23. Contribution of most of the other sectors remained largely unchanged but notable movements were observed in wholesale and retail, and transport and storage that shrank by 0.5 and 0.2 percentage points, respectively.

2.24. The contribution of the various sectors to GDP at constant prices is provided in Table 2.3 while growth rates for the respective sectors and sub-sectors are shown in Table 2.4. The value of all goods and services produced, net of goods and services consumed as inputs and valued at 2009 prices is estimated to have increased to KSh4,050.8 billion in 2015 from KSh3,834.2 billion in 2014. In 2015, all sectors recorded positive growths of varying magnitudes except accommodation and food services (hotels and restaurants) the performance of which remained subdued to contract by 1.3 per cent, an improvement from the 16.7 per cent contraction in 2014. Contrary to the dismal performance recorded in 2014, the publishing, broadcasting, other information activities recovered from a revised contraction of 1.8 per cent in 2014 to post a 2.9 per cent growth in 2015. Growth in the financial and insurance sector accelerated from 8.3 per cent in 2014 to 8.7 per cent in 2015, mainly buoyed by the significant expansion of the financial sector despite a notable decelerated growth in the insurance sub-sector. Overall, Kenya's GDP expanded by 5.6 per cent in 2015 compared to 5.3 per cent in 2014.

2.25. The various sectors' contribution to overall growth are presented in Table 2.5. The growth in GDP in 2015 was mainly attributed to significantly improved performance in key sectors of the economy such as agriculture (22.0 per cent), construction (11.7 per cent), real estate (8.9 per cent) and, financial and insurance (9.3 per cent). Growth attributable to wholesale and retail tradedeclined from 10.6 per cent in 2014 to 8.1 per cent in 2015.

2.26 Table 2.6 shows the annual production accounts by industry for the period 2011 to 2015. Total output from all industries rose from KSh 8,840.0 billion in 2014 to KSh 9,971.4 in 2015. The value of output at basic prices, intermediate consumption, value added and operating surplus/mixed income for most industries recorded growths in 2015. The value of compensation of employees in the manufacturing and construction sectors grewfaster than other industries at 25.7 and 46.3 per cent, respectively. The growth in employment in the construction sector may be on account of the ongoing infrastructural projects such as the Standard Gauge Railway (SGR) and, construction and rehabilitation of roadsand construction of non-residential structures.

2.27. Tables 2.7 and 2.8 present the components of expenditure on GDP at current prices and their respective shares to GDP at market prices. Gross domestic expenditure rose from KSh 6,308.3 billion in 2014 to KSh 7,159.4 billion in 2015 mainly owing to considerable growth in the values of final government consumption and private final consumption. The value of imports of goods and services went down by 2.1 per cent compared with a 7.4 per cent growth realized in the value of export of goods and services in 2015. The share of private final consumption to GDP at market prices declined slightly to 78.6 per cent while that of government final consumption rose by 0.3 percentage points to reach 14.5 per cent in 2015. The proportion of import of goods and services to GDP declined from 34.2 per cent in 2014 to 29.0 per cent in 2015 as a consequence of a slow growth in the value of imports in 2015.

2.28. Table 2.9 presents GDP expenditure items valued at 2009 prices and provides an insight on how resources were broadly used in the economy. In addition, Table 2.10 shows the growth of each category of expenditure for the period 2011 to 2015. Gross domestic expenditure prices increased from KSh 4,348.9 billion in 2014 to KSh 4,615.8 billion in 2015. The change was mainly as a result of a 15.4 per cent growth in government final consumption expenditure and a moderate rise in private final consumption expenditure. Both export and import of goods and services contracted modestly in 2015, while the contribution of gross fixed capital formation declined substantially from 14.8 per cent in 2014 to 5.2 per cent in 2015. The kink observed in 2014 was as a result of imports related to the ongoing infrastructure development projects as well as a remarkable growth in importation of aircraft during the year.

2.29. Details of the value of additions to fixed assets less disposals by type at current prices for the period 2011 to 2015 are shown in Table 2.11a. The share of each type of asset for the same period is presented n Table 2.11b. The value of additions to fixed assets in 2015 amounted to KSh 1,339.4 billion up from KSh 1,237.6 billion in 2014. The share of various type of assets to total gross fixed capital formation for most assets remained relatively the same though some assets recorded modest changes.

2.30. Values of real gross fixed capital formation by type of asset and the corresponding growth rates for the period 2011 to 2015 are shown in Tables 2.12a and 2.12b. Overall, the growth of the value of real GFCF declined from 14.8 in 2014 to 5.2 per cent in 2015. The growth was mainly driven by a substantial increase in the value of other structures which mainly constitute investment in civil works. The value of intellectual property products grew from 10.5 per cent in 2014 to 18.1 per cent in 2015 mainly on the account of the on going mineral exploration.

2.31. Tables 2.13 and 2.14 details the relationship between the GDP and gross national income for the period 2011 to 2015. Gross National Income (GNI) registered a nominal growth of 15.3 per cent to stand at KSh 6,180.7 billion in 2015. Similarly, the Gross National Disposable Income (GNDI) at current prices increased by 15.1 per cent mainly due to a significant rise in diaspora remittances. Gross domestic product per capita rose from KSh 124,710 in 2014 to KSh 140,961 in 2015.

Chapter 3

Social Scene

Overview

In 2015/16, the National Government expenditure on social sector is expected to continue increasing as a result of the demand for basic social services by the population. The increase in expenditure will mainly target hiring of contract teachers, infrastructure development and funding of Free Primary Education and Free Day Secondary Education. National Government total expenditure on the social sector is expected to increase by 19.8 per cent to KSh 430.1 billion in 2015/16, compared to an 8.7 per cent increase in 2014/15. The recurrent expenditure is expected to increase by 16.0 per cent from KSh 309.8 billion in 2014/15 to KSh 359.4 billion in 2015/16. The gross recurrent expenditure for the Ministry of Education, Science and Technology is expected to grow by 13.9 per cent from KSh 261.6 billion in 2014/15 to KSh 297.9 billion in 2015/16. The recurrent expenditure for Youth Development is expected to substantially increase from KSh 702.5 million in 2014/15 to KSh 1.2 billion in 2015/16. Development expenditure on social sector by the National Government is expected to increase by 44.0 per cent from KSh 49.1 billion 2014/15 to KSh 70.7 billion in 2015/16.

- 3.2. The total number of educational institutions increased by 4.6 per cent from 79,641 in 2014 to 83,336 in 2015. The number of pre-primary schools increased by 1.4 per cent while the number of primary and secondary schools each grew by 7.9 per cent in 2015. The number of Teacher Training Colleges increased by 1.5 per cent while that of public Technical Vocational Educational Training (TVET) institutions rose by 15.8 per cent, mainly due to the increase in the number of Youth Polytechnics and Technical and Vocational Colleges. The total number of public universities increased to 23 in 2015. Total enrolment in universities increased by 15.6 per cent to 512,924 in 2015. Total enrolment in pre-primary schools increased by 6.7 per cent to 3.2 million while total enrolment in primary schools grew from 10.0 million in 2014 to 10.1 million in 2015. Total enrolment in secondary schools rose by 13.0 per cent to 2.6 million in 2015.
- 3.3. In 2015, the total number of registered births marginally declined to 950,224 while the coverage rate decreased from 63.4 per cent in 2014 to 60.4 per cent in 2015. The number of births that occurred in health facilities increased by 7.0 per cent in 2015. Similarly, the total death registration coverage rates declined from 45.8 per cent in 2014 to 45.2 per cent in 2015, with malaria, pneumonia, cancer and HIV/AIDS being the leading causes of death.
- 3.4. The overall membership of National Hospital Insurance Fund (NHIF) increased by 17.8 per cent to 5.3 million in 2014/15. The total receipts of the Fund grew by 16.2 per cent in the period under review. The formal sector contributed the bulk of the membership at 3,221,621, representing 61.1 per cent of the total membership in 2014/15. However, the informal sector registered an increase of 38.9 per cent compared to an increase of 10.2 per cent in the formal sector.
- 3.5. The number of registered employers by NSSF increased marginally from 92.3 thousand in 2014 to 93.0 thousand in 2015, while that of registered employees rose from 3,981.0 thousand in 2014 to 3,981.3 thousand in 2015. Consequently, the annual contributions went up by 39.8 per cent to KSh 9,209.9 million in 2015, with benefits paid to members rising by 38.8 per cent to KSh 3,999.2 million

Social Sector 3.6. Table 3.1 shows the National Government expenditure on social sector services for the **Expenditure** period 2011/12 to 2015/16. Total expenditure in the social sector is expected to grow by 19.8 per cent from KSh 358.9 billion in 2014/15 to KSh 430.1 billion in 2015/16. The total recurrent expenditure is expected to increase by 16.0 per cent from KSh 309.8 billion in 2014/15 to KSh 359.4 billion in 2015/16 compared to an increase of 8.6 per cent in 2014/15. The gross recurrent expenditure for the Ministry of Education, Science and Technology is expected to increase by 13.9 per cent from KSh 261.6 billion in 2014/15 to KSh 297.9 billion in 2015 /16 compared to an increase of 10.3 per cent in the previous period. This is partly attributed to hiring of contract teachers, increased enrolment at basic and higher educational level as well as promotion of teachers. In 2015/16, recurrent expenditure of the Ministry of Health is expected to increase by 38.9 per cent to KSh 28.9 billion. The recurrent expenditure by the Ministry of Labour, Social Security and Services is expected to grow by 15.2 per cent to KSh 9.1 billion in 2015/16 from 7.9 billion in 2014/15. The recurrent expenditure by the Prisons Service Department, Probation and Aftercare Department is expected to increase from KSh 16.1 billion in 2014/15 to KSh 17.6 billion in 2015/16. The recurrent expenditure for youth development is expected to substantially increase from KSh 702.5 million in 2014/15 to KSh 1,202.7 million in 2015/16 while that of Ministry of Sports, Culture and Arts is expected to grow by 73.1 per cent to KSh 4.5 billion in 2015/16 from KSh 2.6 billion in 2014/15.

> 3.7. The National Government social sector total development expenditure is expected to increase by 44.0 per cent from KSh 49.1 billion in 2014/15 to KSh 70.7 billion in 2015/16. Development expenditure by the Ministry of Education, Science and Technology is expected to decline by 4.4 per cent to KSh 21.6 billion in 2015/16 from KSh 22.6 billion in 2014/15. Development expenditure on Gender and Social Development is expected to substantially increase from KSh 209.8 million in 2014/15 to KSh 606.1 million in 2015/16. Development expenditure for youth development is expected to more than double from KSh 558.0 million in 204/15 to KSh 1.3 billion in 2015/16, mainly due to continued support for youth empowerment services by the National Government.

Education 3.8. Expenditure: The breakdown in expenditure by the Ministry of Education, Science and Technology is presented in Table 3.2. The gross total expenditure is expected to grow by 12.4 per cent to KSh 319.4 billion in 2015/16 on account of recurrent expenditure, which is expected to increase by 13.9 per cent to KSh 297.9 billion. The recurrent expenditure for primary, secondary and university education is expected to grow by 6.8, 16.9 and 2.3 per cent, respectively, in 2015/16. Expenditure on Youth Polytechnics and Training is expected to drastically reduce from KSh 691.3 million in 2014/15 to KSh 179.0 million in 2015/16.

> 3.9. During the review period, the total development expenditure is expected to reduce by KSh 1,044.4 million to KSh 21,574.3 million. More than 80 per cent of the development expenditure will be spend on university education, general administration and planning, and primary education.

¹ Includes gender, child services and the cash transfer programme

 $^{^{\}rm 2}$ Includes Youth empowerment services , youth polytechniques and training

[†] Revised Estimates

3.10. **Educational Institutions:** The total number of educational institutions increased by 4.1 per cent from 79,641 in 2014 to 82,889 in 2015, as shown in Table 3.3. The number of pre-primary schools rose by 1.4 per cent from 40,219 in 2014 to 40,775 in 2015 while that of primary schools grew by 6.4 per cent from 29,460 in 2014 to 31,333 in 2015. A higher growth was registered in the number of private primary schools compared to the public. The number of secondary schools grew by 7.9 per cent from 8,747 in 2014 to 9,440 in 2015 with public and private secondary schools recording growths of 8.0 per cent and 7.1 per cent, respectively. The number of public Technical Vocational Educational Training (TVET) institutions rose by 15.8 per cent from 755 in 2014 to 874 in 2015, mainly due to the increase in the number of youth polytechnics. During the period under review, one public university college was granted a charter to full university status while the license for one private university was withdrawn.

3.11. **Pre-Primary Education:** The pupil enrolment and the number of teachers in Early Childhood Development Education (ECDE) centers from 2011 to 2015 are presented in Table 3.4. The total enrolment in pre-primary schools increased by 6.7 per cent from 3.0 million in 2014 to 3.2 million in 2015. The total number of ECDE teachers increased by 2.3 per cent from 104, 784 in 2014 to 107,187 in 2015. The number of trained ECDE teachers rose by 5.4 per cent from 88,154 in 2014 to 92,906, mainly due to employment of more teachers by the County Governments. During the review period, the Pupil Teacher Ratio in ECDE was 30:1 compared to 29:1 in 2014. Gross Enrolment Rate (GER) rose from 73.6 per cent in 2014 to 76.4 per cent in 2015 while the Net Enrolment Rate (NER) increased from 70.4 per cent in 2014 to 74.6 per cent in 2015 as presented in Figure 3.1. The increase in enrolment at pre-primary education is mainly attributed to investment in pre-primary education by County Governments.

3.12. **Primary Education:** Enrolment in primary and secondary schools by class and sex for the period 2011 to 2015 is shown in Table 3.5. Total enrolment rose from 10.0 million in 2014 to 10.1 million in 2015. However, enrolment in Standard one decreased from 1,382.5 thousand in 2014 to 1,361.4 thousand in 2015 mainly due to adherence to the admission of children of official school age of six years. During the period under review, the number of boys and girls enrolled increased by 75.4 thousand and 64.4 thousand, respectively, in 2015.

3.14. **Kenya Certificate of Primary Education (KCPE):** Table 3.6 shows the number of candidates by sex and mean subject percentage score in KCPE from 2011 to 2015. The number of candidates increased by 5.4 per cent from 880,486 in 2014 to 927,789 in 2015. The number of male candidates rose by 5.6 per cent to 467,904 in 2015, while that of female increased by 5.2 per cent to 459,885 in 2015. The national mean score declined from 54.30 in 2014 to 52.78 in 2015. During the year under review, English Language, Mathematics and Religious Education registered increases in the mean scores while Science registered the highest decline of 10.52 percentage points. The most improved subject was Mathematics by of 4.12 percentage points in the mean score.

3.16. **Primary Teachers:** Table 3.7 presents the number of public primary school teachers by qualification and sex from 2011 to 2015. The total number of teachers in public primary schools grew by 5.1 per cent from 200,697 in 2014 to 210,991 in 2015 partly due to engagement of teachers on contract. The number of graduate and S1/diploma teachers increased by 9.6 per cent and 8.5 per cent , respectively, in 2015, due to the upgrading of teachers with relevant qualifications. The number of P1 teachers rose by 2.8 per cent to 98,149 in 2015. The public primary school pupil teacher ratio improved from 43:1 in 2014 to 41:1 in 2015.

1 Data is exclusively for public schools and does not include teachers on study leave, disciplinary cases and those performing non-teaching duties.

3.17. **Secondary Education:** Table 3.8 shows enrolment in secondary schools by class and sex from 2011 to 2015. The total enrolment in both public and private secondary schools increased by 13.0 per cent from 2.3 million in 2014 to 2.6 million in 2015. Total enrolment of boys grew by 16.7 per cent from 1.2 million in 2014 to 1.4 million in 2015 while that of girls rose by 9.1 per cent to 1.2 million in 2015. The survival rate at secondary school level from Form 1 to 4 improved from 89.5 per cent in 2014 to 95.4 per cent in 2015. The Form 4 retention rate for girls was 87.3 per cent while that of boys was 94.1 per cent.

3.18. Figure 3.4 presents trends in the secondary school GER and NER from 2011 to 2015. The GER increased from 58.7 per cent in 2014 to 62.9 per cent in 2015. The NER marginally increased from 47.4 per cent in 2014 to 47.8 per cent in 2015. The marginal change in the NER is partly attributed to fewer under, and over age students enrolled, the continued implementation of Free Day Secondary Education (FDSE) as well as infrastructure development in various schools.

3.19. Figure 3.5 indicates the schooling profiles for the years 2014 and 2015. The schooling profile shows the overall advancement of students within the education system from standard one to form four and also the change in schooling profile. The 2015 schooling profile indicates general improvement from 2014. Retention in Std 4 and Std 6 was above universal. However, there was a sudden drop in promotion from Std 7 to Std 8 similar to that in 2014. Almost all target children were enrolled in Std 1 over the period. In 2015, the transition rates from Primary to secondary improved further from the 2014 levels.

3.20. **Kenya Certificate of Secondary Education (KCSE):** Table 3.9 shows the number of candidates by mean grade attained in KCSE from 2011 to 2015. The number of KCSE candidates rose by 6.3 per cent from 482,133 in 2014 to 512,630 in 2015. The number of female candidates grew by 9.7 per cent from 223,237 in 2014 to 244,866 in 2015 while the number of male candidates increased by 5.4 per cent. The number of candidates who scored a minimum university entry score of C+ and above increased by 10.7 per cent from 149,717 in 2014 to 165,766, with the number of female candidates increasing by 14.4 per cent compared to that of male candidates at 8.2 per cent. The number of candidates who scored A minus and above decreased by 4.0 per cent from 14,841 in 2014 to 14,254 in 2015. The number of candidates who scored grade "C" plain and below increased by 4.3 per cent to 346,864, in 2015.

3.21. **Secondary School Teachers:** The number of secondary school and tertiary college teachers by sex and qualification from 2011 to 2015 is shown in Table 3.10. The total number of public secondary school and tertiary teachers increased by 8.5 per cent from 78,727 in 2014 to 85,438 in 2015. The increase can be attributed to the recruitment of teachers, as well as reinstatement of teachers who had been out of service due to study leave and disciplinary cases. The total number of male trained teachers increased by 7.6 per cent to 51,350, while that of female teachers grew by 9.2 per cent to 33,881 in 2015. During the period under review, the number of male and female trained graduate and S1/Diploma teachers increased significantly. In public secondary schools, the pupil teacher ratio was 27:1 in the same period.

3.22. **Teacher Training Institutions:** Teacher trainee enrolment by year and sex from 2011 to 2015 is presented in Table 3.11. The total number of teacher trainees in both P1 and Diploma colleges rose by 3.9 per cent from 39,853 in 2014 to 41,402 in 2015. This decelerated growth compared to a 7.4 per cent growth recorded in 2014, is mainly attributed to a single intake as opposed to the double intake for diploma trainee teachers in January and September 2014. The enrolment of P1 teacher trainees increased by 5.2 per cent from 37,471 in 2014 to 39,431 in 2015 with the number of teacher trainee in public colleges increasing by 7.6 per cent compared with private colleges growth of 2.2 per cent. First year diploma trainees enrolment declined by 30.1 per cent from 1,187 in 2014 to 830 in 2015 mainly as a result of the double intake in 2014 while enrolment of first year public primary P1 trainees increased by 14.3 per cent.

3.23. **Technical and Vocational Educational Training Institutions** (**TVET**): Table 3.12 shows enrolment in TVET institutions from 2011 to 2015. The total enrolment in TVET institutions rose by 4.7 per cent from 148,142 in 2014 to 155,176 in 2015. The increase is partly attributed to expansion of TVET institutions. Student enrolment in national polytechnics and technical universities declined by 5.0 per cent from 23,583 in 2014 to 22,403 in 2015. However, the enrolment of females in these institutions increased by 17.4 per cent compared to a decrease of 18.6 per cent for males. During the review period, enrolment in Technical and Vocational Colleges, formerly Institutes of Technology and Technical Training Institutes, increased from 50,864 in 2014 to 55,308 in 2015. The enrolment in youth polytechnics grew by 5.1 per cent from 73,695 in 2014 to 77,465 in 2015, mainly due to the expansion of the youth ppolytechnics and infrastructure development by the County Governments.

3.24. **University Education:** The enrolment of students by sex in public and private universities from 2012/13 to 2015/16 academic years is presented in Table 3.13. Total university student enrolment is expected to grow by 15.6 per cent from 443,783 in 2014/15 to 512,924 in 2015/16 compared to a 22.8 per cent increase recorded in 2014/2015. This may partly be attributed to expansion of universities' infrastructure, and establishment of more constituent colleges. Male student enrolment is expected to rise by 15.2 per cent to 299,133 in 2015/16 compared to a 13.2 per cent increase in female student enrolment. During the review period, enrolment in public universities is expected to increase by 16.1 per cent from 363,334 in 2014/15 to 421,783 in 2015/16. The number of males enrolled in public universities is expected to increase by 16.9 per cent to 253,874 2015 compared to a 14.9 per cent growth in enrolment of females in 2014. Total enrolment at private universities is expected to grow by 6.8 per cent from 80,448 in 2014/15 to 85,889 in 2015/16.

512,924

Table 3.14 shows information on the registration of universities and other institutions offering degree programmes from 2011 to 2015. The number of universities with Letters of Interim Authority (LIA) decreased from 13 in 2014 to 12 in 2015 after revocation of the license of one private university. The number of public universities increased from 22 to in 2014 to 23 in 2015 due to granting of a full university charter to one more university.

Statistics

Health 3.27. The number of births registered by county from 2013 to 2015 is presented in Table and Vital 3.16 (a). The total number of registered births marginally decreased from 954,254 in 2014 to 950,224 in 2015. Similarly, the coverage rate declined marginally from 63.4 per cent in 2014 to 60.4 per cent in 2015. Disparities in registration of births were observed across counties with Garissa recording the highest coverage rate of 93.3 per cent while Mandera recorded the least coverage rate at 16.0 per cent. Other counties which registered high coverage rates of over 70.0 per cent were Nairobi City, Kiambu, Bomet, Embu and Mombasa. Counties with low birth registration coverage rates of less than 20.0 per cent were: Wajir, Mandera and Turkana.

> 3.28. Table 3.16 (b) shows the number of registered births by county and place of occurrence from 2013 to 2015. Overall, 90.0 per cent of births were registered in health facilities in 2015 compared to 83.0 per cent in 2014. However, Marsabit, Tana River and Wajir Counties recorded relatively high rates of over 40 per cent of births registered at home.

> 3.29. Table 3.17 (a) presents the number and coverage rate of deaths registered by county from 2013 to 2015. The total death registration coverage rate declined marginally from 45.8 per cent in 2014 to 45.2 per cent in 2015. During the review period, Embu and Nairobi City Counties recorded high death registration coverage rates of 80.4 per cent and 73.6 per cent, respectively. On the other hand, lower rates continued to be observed in the Northern corridor of Kenya with Mandera and Wajir Counties recording low death coverage rates of 5.1 per cent and 8.4 per cent, respectively, in 2015.

> 3.30. Table 3.17(b) presents the number of registered deaths by county and place of occurrence from 2013 to 2015. The total number of registered deaths in health facilities declined from 113,311 in 2014 to 112,201 in 2015. The total deaths registered at home increased by 3.1 per cent from 85,300 in 2014 to 88,004. More than half of the counties registered more deaths at home than in health facilities with Muranga, Kakamega, Vihiga, Siaya, Marsabit, Wajir and Mandera recording high rates of over 60 per cent.

¹No deaths registered at home 2015

3.31. Information on the number of registered deaths by major causes from 2011 to 2015 is presented in Table 3.18. The total number of registered deaths by major causes declined by 598 to 108,337 in 2015. Pneumonia, Malaria, Cancer, HIV/AIDS and Tuberculosis remained the top five leading causes of death in Kenya.

Table 3.18: Registered Deaths by Major Causes, 2011 - 2015

3.32. **National Hospital Insurance Fund (NHIF):** The NHIF is a compulsory contributory health insurance scheme for all formal employees. The resource base of the Fund for the period 2010/11 to 2014/15 is shown in Table 3.19(a). The total receipts of the Fund grew by 16.2 per cent from KSh 13.6 billion in 2013/14 to KSh 15.8 billion in 2014/15 on account of enhanced monthly contributions, in the last quarter of 2014/15, and growth in membership. Similarly, the benefits accrued to members rose by 16.0 per cent from KSh 9.4 billion in 2013/14 to KSh 10.9 billion in 2014/15. The overall net income for the Fund increased by 16.7 per cent from KSh 4.2 billion in 2013/14 to KSh 4.9 billion in 2014/15.

3.33. National Hospital Insurance Fund Membership: The number of registered members of the National Hospital Insurance Fund from 2010/11 to 2014/15 is shown in Table 3.19 (b). Overall, membership rose by 17.1 per cent from 4,450.4 thousand in 2013/14 to 5,213.2 thousand in 2014/15. The formal sector contributed the bulk of the membership with a share of 61.8 per cent. Over the same period, the informal sector registered a growth of 32.9 per cent compared to a 9.1 per cent growth in the formal sector. The increase in the number of registered members in the informal sector may partly be explained by sustained campaigns by the Fund.

^{*}Provisional

¹The data includes deaths that occur after the road accidents have been reported

3.34. The total number of registered medical personnel and those in training for the years 2014 and 2015 is shown in Table 3.20. The total number of registered medical personnel rose by 9.4 per cent from 121,578 in 2014 to 133,002 in 2015. Consequently, the ratio of registered medical personnel per 100,000 people grew to 301 in 2015 from 282 in 2014. During the review period, of all the registered medical personnel, only the ratio of Dentists and Public Health Technicians remained at the same level as that of 2014 at 3 and 14 per 100,000 population, respectively. The total number of medical students in-training increased from 14,751 in 2014/16 to 14,826 in 2015/16. Increases were noted for all in trainee medical personnel except for trainee dentists, pharmaceutical technologists and enrolled nurses.

3.35. Table 3.21 presents the total number of undergraduate and postgraduate medical students at the universities by course and sex from 2011/12 to 2015/16 academic years. The total number of undergraduate and postgraduate medical students is expected to marginally decline from 11,488 in 2014/15 to 11,435 in 2015/16. The number of students undertaking Medicine and Surgery is expected to rise by 6.5 per cent to 3,493 in 2015/16. The number of students undertaking Dental Surgery, BSc Nursing and Environmental Health is expected to decline by 13.3 per cent, 14.3 per cent and 14.0 per cent, respectively, during the review period. The number of medical postgraduate students is expected to grow by 22.0 per cent from 1,430 in 2014/15 to 1,745 in 2015/16.

*Previous and

3.36. The number of middle level students registered to undertake various courses at the Kenya Medical Training College (KMTC) from 2011 to 2015 is shown in Table 3.22. The total number of trainees increased substantially by 14.5 per cent from 8,079 in 2014 to 9,254 in 2015. The number of students undertaking diploma courses in Community Health Nursing grew from 1,342 in 2014 to 3,000 in 2015, while those undertaking a diploma in Clinical Medicine and Surgery increased to 1,520.

3.37. Information on under one year old children who have received all basic vaccinations by nine months after birth is presented in Table 3.23. The number of children fully immunized declined from 1,128.8 thousand in 2014 to 1,124.1 thousand in 2015. During the review period, slightly more than half of the counties recorded an increase in immunization coverage. Kwale, Nyeri and Taita Taveta Counties registered high increases in the percentage points of 28.9 per cent, 24.0 per cent and 18.5 per cent, respectively, in 2015.

3.38. The incidence of diseases causing morbidity for the period 2011 to 2015 is presented in Table 3.24. Overall, cases of morbidity increased by 2,000 to 47,040,650 in 2015. Malaria and respiratory infections continued to be the leading diseases collectively accounting for 55.3 per cent of total diseases causing morbidity. The number of reported malaria cases reported continued to decline by 19.6 per cent to 7,770,124 in 2015. This may be attributed to the Ministry of Health anti-malaria campaigns.

3.40. **Adult Education:** Table 3.26 gives details on adult education enrolment by Sex and County for the year 2015. Nationally, 246,215 adults were enrolled under the adult education program, out of which 68.2 per cent were females and 31.8 per cent were males. Nairobi City County recorded the highest number of adult learners while Taita Taveta registered the lowest number.

3.41. Details on adult private candidates registered for proficiency and KCPE by sex and county in 2015 are presented in Table 3.27. Adult learners registered for proficiency and KCPE were 19,359 and 7,558, respectively, in 2015. Garissa County recorded the highest number of adult learners for proficiency followed by Meru, Migori and Kitui Counties. In KCPE registration, Meru County recorded the highest number of adults registered or KCPE accounting for 10.3 per cent of the total number registered followed by Nairobi with 618 adult learners. Wajir, Murang'a and Marsabit counties did not register any candidate for proficiency in the reviewperiod.

 $^{^{\}rm 1}$ Refers to exams given to a dult learners to asses their reading, writing and counting skills.

3.42. Gender and Development: Engendering the development process enables men and women participate on an equal basis in determining their common future. The number of registered women groups by membership, contributions, Government loans to groups through Uwezo Fund and Women Enterprise Fund is presented in Table 3.28. The number of registered women groups increased from 150,857 in 2014 to 154,425 in 2015. The total membership rose by 3.3 per cent from 6.0 million in 2014 to 6.2 million in 2015. The group contributions also grew by a similar margin to KSh 623 million in 2015.

Table 3.28: Women Groups Registration, Contributions and Source of Loans, 2011-2015

		Numbers		Loans ¹		
Year	No. of Women Groups	Membership	Group contributions (KSh Million)	Uwezo Fund (KSh Million)	Women Enterprise Fund (KSh Million)	
2011	143,792	5,618,064	553.8	80.0	440.0

Source: Ministry of labour & EAC Affairs, The Uwezo Oversight Board and Women Enterprise Fund, ¹Loans by National Government only

Other 3.43. Uwezo Fund: The *Uwezo Fund* was established in 2014 with the objective of expanding Social access to finances for youth and women in business. During the review, the Fund disbursed **Services** KSh 4,240 million in 2015 as shown in Table 3.28.

- 3.44. Women Enterprise Fund: Women Enterprise Fund is one of the flagship projects under the Vision 2030. Government loans disbursed through the Women Enterprise Fund increased from KSh 169 million in 2014 to KSh 524 million in 2015, being the highest amount so far disbursed over the last five years.
- 3.45. Women in Decision-Making: Gender equality in decision making has improved in recent years, although wide disparities still exist. Participation of men and women in key decision making positions is shown in Table 3.29. The share of female Members of Parliament in the National Assembly remained at 19.8 per cent of total legislators in 2015. The share of female Cabinet Secretaries declined from 33.3 per cent in 2014 to 25.5 per cent in 2015. The categories where the constitutional threshold of one-third was met was in Principal Secretaries, County Commissioners, Judges, Magistrates, Lawyers and Members of County Assembly.

3.46. **Social Protection Fund:** The social protection fund was established to facilitate access to credit and cash transfers in a bid to attain a meaningful and better quality of life of poor and vulnerable individuals in the society. The beneficiaries of the fund are the elderly aged 65 years and above and, Orphaned and Vulnerable Children (OVC). The funds allocated towards for social protection for older persons increased by 57.7 per cent from KSh 5,051.5 million in 2014/15 to KSh 7,966.3 million in 2015/16 as shown in Table 3.30.The direct cash disbursed increased by 49.8 per cent to KSh 7,334.5 million in 2015/16 due to an increase in the targeted number of beneficiaries. During the period under review, funds allocated for the OVC increased by 63.6 per cent from KSh 5,957.6 million in 2014/15 to KSh 9,746.3 million in 2015/16.

Chapter 4

Employment, Earnings and Consumer Prices

Employment, Earnings and Consumer Prices

Overview

otal employment outside small-scale agriculture and pastoralist activities increased by 5.9 per cent to 15,160.8 thousand persons in 2015. Informal sector employment rose by 6.0 per cent to 12,559.6 thousand persons, and accounted for 82.8 per cent of total persons engaged during the period. Employment in the modern sector expanded by 5.2 per cent to 2,601.2 thousand persons; consisting of 2,478.0 thousand wage employees and 123.2 thousand self-employed and contributing family workers. Wage employment within the public sector increased slightly from 700.8 thousand persons in 2014 to 718.4 thousand persons in 2015.

4.2. Overall, total earnings increased from KSh 1,311.1 billion in 2014 to KSh 1,497.3 billion in 2015, representing a rise of 14.2 per cent. Nominal average earnings per employee increased by 9.2 per cent to KSh 604,255.8 per annum in 2015. The easing of inflation rate coupled with faster upward movement of wages led to a 2.1 per cent increase in real average earnings per employee from KSh 368,979.9 per annum in 2014 to KSh 376,577.2 per annum in 2015. Inflation rate as measured by the Consumer Price Index (CPI) declined from 6.9 per cent in 2014 to 6.6 per cent in 2015. The easing of inflation rate was largely due to reduced cost of petroleum products, electricity and tight monetary policies.

Employment

4.3. Employment in the modern and informal sectors went up by 5.9 per cent from 14,319.2 thousand in 2014 to 15,160.8 thousand in 2015 as shown in Table 4.1. Wage employment in the modern sector recorded a growth of 4.5 per cent in 2015 compared to 3.8 per cent registered in 2014. In the year under review, total number of new jobs generated in the economy is estimated to have increased by 4.9 per cent to 841.6 thousand, of which 128.0 thousand jobs were in the modern sector. The number of self-employed and unpaid family workers engaged in the modern sector grew by 19.6 per cent in 2015 compared to 22.9 per cent recorded in 2014. The informal sector created 713.6 thousand new jobs in 2015 compared to 695.9 thousand new jobs in 2014. This constituted 84.8 per cent of all new jobs created outside small scale agriculture sector and pastoralist activities.

^{*} Provisional

 $^{^1}$ Figures refer to employment stock as at 30^{th} June and excludes small scale farming and pastoralist activities

² Estimated

- **Modern sector** 4.4. Details of wage employment in the modern sector by industry and sector are presented in Table 4.2. Wage employment in the modern sector registered an increase of 107.8 thousand persons in 2015 compared to 87.1 thousand in 2014.
 - 4.5. Private sector: The share of private sector employment in modern sector wage employment was 71.0 per cent in 2015, slightly higher than 70.4 per cent recorded in 2014. This was attributed to the slow growth in employment in the public sector relative to the private sector. During the period under review, the private sector recorded a growth of 5.4 per cent in employment levels compared to 4.4 per cent registered in 2014. Overall, the private sector created 90.2 thousand new wage employment compared to 69.6 thousand in 2014.
 - 4.6. In 2015, the largest contributors to wage employment in the private sector were agriculture, forestry and fishing; manufacturing; wholesale and retail trade, repair of motor vehicles and motor cycles; and education accounting for 16.7, 15.3, 13.1 and 10.7 per cent of the total private sector employment, respectively. There was a turn-around in agriculture, forestry and fishing industry, which recorded a 1.2 per cent growth in 2015 compared to a decline of 3.1 per cent registered in 2014. The education sector registered the highest growth of 13.4 per cent in 2015. This was followed by mining and quarrying industry, which registered an increase of 13.1 per cent to 13.8 thousand persons employed in the sector in 2015. This was however, a deceleration compared to a growth of 40.2 per cent realized in 2014. Construction; and finance and insurance activities maintained an upward trend registering a rise of 11.8 per cent and 7.9 per cent in job employment, respectively. Wage employment in accommodation and food service activities registered a growth of 4.2 per cent in 2015 compared to a decline of 0.6 per cent registered in 2014.
 - 4.7. **Public sector:** Public sector employment increased by 2.5 per cent from 700.8 thousand persons in 2014 to 718.4 thousand persons in 2015. The slow down in public sector employment is attributed to restricted recruitment mainly to essential services and replacement of those leaving the service through natural attrition in an effort to contain the public sector wage bill. In the education sector, an additional 16,300 persons were employed while in human health and social work activities; and electricity, gas, steam and air conditioning supply industries, each had additional 1,600 persons in 2015. Employment in public administration and defence; compulsory social security activities recorded a decline of 2.2 per cent compared to an increase of 2.0 per cent in 2015.

4.8. Figure 4.1 shows percentage changes in wage employment in public, private and self-employed from 2011 to 2015. The rate of increase for self-employed and unpaid family workers continued to be the highest in 2015 albeit slower than that recorded in 2014. In the private sector, wage employment increased by 5.4 per cent in 2015. During the same period, wage employment in the public sector rose by 2.5 per cent.

Figure 4.1: Percentage changes in Wage Employment in Public, Private and Self – Employed, 2011 - 2015

4.9. Figure 4.2 depicts new jobs created in the formal and informal sectors from 2011 to 2015. Majority of new jobs are in the informal sector.

■ Private sector

4.10. Wage employment in various public sector domains is presented in Table 4.3. Overall, wage employment in the public sector grew by 2.5 per cent to 718.4 persons in 2015. Employment in county governments registered the highest rise of 10.9 per cent to 110.5 thousand persons during the period. The Teachers Service Commission (TSC), which is the largest employer in the public sector, registered a 3.2 per cent growth in employment to 290.7 thousand persons in 2015. Employment in corporations having majority control by the public sector and parastatal bodies each went up by 0.7 per cent in 2015. Whereas institutions in the public sector increased their levels of employment, the National Government registered a decline of 1.8 per cent in 2015.

4.11. Wage employment by industry and sex is presented in Table 4.4. Number of males employed in the modern sector accounted for 62.9 per cent of the total wage employment in 2015. Education, Manufacturing and agriculture, forestry and fishing services engaged the largest number of males accounting for 17.2, 15.8 and 14.3 per cent of total males engaged in 2015, respectively. On the other hand, majority of female employees were working in educational services (26.1%), public administration and defence; compulsory social security (15.5%) and agriculture, forestry and fishing services (12.4%) of total females engaged in the modern sector. Casual employment registered a growth of 9.6 per cent to 540.2 thousand persons in 2015 and accounted for 21.8 per cent of the total wage employment.

¹ Includes employees of Judiciary and Parliament

Wage Earnings 4.12. Total wage payments by industry in the modern sector for the period 2011 to 2015 in the Modern is shown in Table 4.5. The nominal wage bill rose from KSh 1,311.1 billion in 2014 to KSh **Sector** 1,497.3 billion in 2015, an increase of 14.2 per cent. The private sector wage bill went up by 16.7 per cent from KSh 897.7 billion in 2014 to KSh 1,047.3 billion in 2015. The share of public sector wage bill decreased to 30.1 per cent in 2015 from 31.5 per cent in 2014 mainly attributable to the National Government efforts to reduce the public sector wage bill.

¹ Annualised June wages

4.13. Wage payment in the public sector by type of employer is summarised in Table 4.6. Total public wage bill rose by 8.8 per cent to 450.0 billion in 2015. The TSC wage bill registered a 10.5 per cent rise to KSh 160.7 billion accounting for the largest share of public sector wage bill in 2015. The share of the National Government wage bill to the total public sector wage bill was 20.1 per cent in 2015. County governments registered the highest increase of 14.8 per cent in earnings in the public sector, rising from KSh 62.0 billion in 2014 to KSh 71.2 billion in 2015. Parastatal bodies and corporations with majority control by the public sector each recorded an increase of 5.6 per cent.

^{*} Provisional.

4.14. Annual average earnings for the period 2011 to 2015 is presented in Table 4.7. Overall, annual earnings per employee increased by 9.2 per cent from KSh 553,137.7 in 2014 to KSh 604,255.8 in 2015. The average annual earnings in the private sector increased by 10.7 per cent compared to 6.2 per cent growth in the public sector. In the private sector, activities of extraterritorial organizations and bodies recorded the highest annual average earnings followed by finance and insurance activities while water supply, sewerage and waste management activities recorded the lowest annual average earnings. Within the public sector, finance and insurance activities, recorded the highest earnings while mining and quarrying recorded the lowest.

4.15. Table 4.8 presents the percentage change in wage employment and average earnings for the periods 2010 and 2015 and; 2014 and 2015. Over the five year period, total wage employment rose by 22.9 per cent. Over the same period, wage employment in the private sector increased by 26.0 per cent while that of public grew by 15.9 per cent. Annual average earnings have risen by 52.8 per cent over the five year period, with the public sector average earnings rising by 55.7 per cent. Private sector employees in mining and quarrying continued recording the highest increase in average earnings.

4.16. Private sector employees in the water supply; sewerage, waste management and remediation activities had the highest rise in average earnings over the period 2014 to 2015. Public sector workers in accommodation and food service activities recorded the highest increase in average earnings over the same period.

4.17. Table 4.9 shows the estimated real average earnings for the period 2011 to 2015. Real average earnings per employee per annum, in the private sector increased by 3.4 per cent from KSh 358,662.1 in 2014 to KSh 370,940.8 in 2015. However, real average earnings per employee in the public sector declined by 0.8 per cent to KSh 390,383.3 per annum in 2015.

4.18. Table 4.10 shows changes in inflation, wage employment and real average earnings from 2011 to 2015. Inflation rate as at June declined from 7.4 per cent in 2014 to 7.0 per cent in 2015. On the other hand, average earnings per employee at current prices increased by 9.2 per cent in 2015. Real average earnings increased by 2.1 per cent during the period under review. Since 2013, average earnings have been increasing at a faster rate than inflation and hence the positive real average earnings during the period.

4.19. The informal sector, also referred to as the *jua kali* sector continues to play an important role in absorbing unemployed persons in the labour force. Informal sector covers all small scale activities that are semi organized and unregulated, use low and simple technologies. Majority of the small businesses such as retailers, hawkers, *boda boda* riders and other service providers fall in this sector. The ease of entry and exit into the sector coupled with the use of low level or no technology makes it an easy avenue for employment creation.

4.20. Employment in the informal sector grew by 6.0 per cent from an estimated 11,846.0 thousand persons in 2014 to 12,559.6 thousand persons in 2015. As it may be derived in Table 4.11, a total of 713.6 thousand jobs were created in the sector over the review period compared to 695.9 thousand jobs created in 2014. The proportion of persons engaged in the informal sector in the rural areas was 64.5 per cent of the total persons engaged in 2015.

4.21. On labour day 2015, the Government increased the statutory minimum wages by 12.0 per cent as specified in both the Regulation and Wages Agriculture Order, 2015 and the Regulation of Wages (General) Order, 2015. During the year under review, real minimum wages, increased by 5.1 per cent.

¹ Refers to June

¹ Estimated

² Includes mainly support services to transport activity

4.22. Table 4.12 presents gazetted monthly basic minimum wages for the agricultural industry. The lowest paid category of workers, unskilled employees, had their monthly wages increased from KSh 4,854 in 2014 to KSh 5,437 in 2015. Farm foreman and farm clerks who are the highest paid workers in the agricultural industry, had their minimum wages increased to KSh 9,808 in 2015. House servants or cooks had their gazetted minimum monthly basic salary increased to KSh 6,207 in 2015.

4.23. As shown in Table 4.13, the average gazetted monthly basic minimum wages in Nairobi, Mombasa and Kisumu cities increased to KSh 17,200 in 2015. Employees working in county headquarters and in towns in Nairobi environs had their basic monthly minimum wages increased from KSh 14,267 in 2014 to KSh 15,980 in 2015. In all other towns, occupations with the highest pay were cashiers, heavy commercial vehicle drivers and artisans grade1 whose basic minimum was KSh 21,811 per month.

¹ Excluding Housing Allowance

4.24 Table 4.14 shows the number of collective bargaining agreements registered by the Industrial Court in 2014 and 2015. Total number of agreements registered in 2015 were 230 compared to 328 in 2014, indicating a reduction in industrial disputes during the year. Workers in the manufacture of textile, wearing apparel and leather industries; and in electronics and electrical products registered the highest reductions in registered agreements. Electricity and water sub-sectors were the only ones that registered an increase in bargaining agreements. The agreements registered resulted into average monthly basic wage increasing from KSh 30,316 in 2014 to KSh 38,521 in 2015. This was a 19.6 per cent increase compared with the 12.0 per cent raise in minimum wages announced on labour day of 2015. During the same period, average monthly housing allowance offered increased by 21.6 per cent to KSh 4,960 in 2015.

Chapter 4: Employment, Earnings and Consumer Prices

Consumer 4.25. The annual inflation rate as measured by the Consumer Price Index (CPI) decelerated **Price Index** marginally from 6.9 per cent in 2014 to 6.6 per cent in 2015. The easing of inflation was largely due to reduced costs of petroleum products, electricity and tight monetary policies. The first quarter of 2015 was characterized by drought conditions that pushed up prices of some food items such as potatoes, tomatoes, milk, cabbages, beans and onions. However, during the second half of the year, weather conditions improved resulting in increased supplies and corresponding decreases in prices of several food items.

> 4.26. Table 4.15(a) shows percentage changes of the indices in the broad divisions of all consumer goods and services from 2011 to 2015. Food and Non-alcoholic beverages's index which has largest weight in the CPI basket increased by 11.4 per cent to 188.22 in 2015. The Transport index decreased by 0.5 per cent to 160.61 points in 2015 compared with 2014 mainly due to lower costs of petrol and diesel. Housing, water, electricity, gas and other fuels index went up by 3.2 per cent during the review period mainly due to increases in house rents. In December 2015, excise tax was increased and this pushed up the prices of beer and cigarettes leading to an increase of Alcoholic Beverages, Tobacco & Narcotics index.

4.27. Table 4.15(b) shows a breakdown of food and non-alcoholic beverages division according to Classification of Individual Consumption by Purpose (COICOP) from 2011 to 2015. Fruits and vegetables had the highest increase of 21.9 per cent and 32.4 per cent in 2015, respectively. On the other hand, oils and fats as well as Sugar, jam, honey, chocolate and confectionery classes recorded declines during the same period. Meat, fish and sea foods, also recorded significant increases of 6.7 per cent and 9.6 per cent, respectively during the year under review.

4.28. Table 4.16 shows variation in annual inflation rates across the Nairobi lower, middle and upper income groups, as well as for other urban areas outside Nairobi. Nairobi upper recorded the lowest annual inflation of 2.6 per cent, while the rest of urban areas and Nairobi lower income groups both had equal and the highest inflation of 6.9 per cent, in 2015.

Table 4.16: Annual Inflation Rates, 2011-2015

Per ceni						
Income Group	2011	2012	2013	2014	2015	
Nairobi Lower Income Inflation	15.1	9.5	5.9	5.8	6.9	
Nairobi Middle Income Inflation	9.9	7.8	4.5	4.7	4.3	
Nairobi Upper Income Inflation	9.9	5.8	3.4	6.0	2.6	
Nairobi Inflation	14.1	9.0	5.5	5.6	6.1	
Rest of Urban Towns Inflation	14.3	9.7	5.9	7.8	6.9	
Overall Inflation Rate	14.0	9.4	5.7	6.9	6.6	

Note:

- $1: The \ lower income \ group \ comprises \ households \ with \ monthly \ expenditure \ below \ KSh \ 23,670 \ in \ October \ 2005$
- 2: The middle income group comprises households with monthly expenditure between KSh 23,671 and KSh 119,999 in October 2005
- 3 The upper income group comprises households with monthly expenditure above KSh 120,000 in October 2005

4.29. Table 4.17 shows that the annual average CPI for Nairobi lower income group rose from 151.59 in 2014 to 161.98 in 2015. The highest index of 167.48 was recorded in December, while the lowest of 155.65 was recorded in January 2015.

4.30. Tables 4.18, 4.19, 4.20, 4.21 and 4.22 present a five year series of CPI for the Nairobi middle and upper income groups, overall Nairobi, rest of urban areas and the aggregated national indices.

Chapter 5

Money, Banking and Finance

Overview

he Central Bank of Kenya (CBK) through the Monetary Policy Committee (MPC) focused on achieving and maintaining stability in the general price levels in the economy. The monetary policy aimed to achieve the inflation target of 5.0 per cent as set out in the budget for the fiscal year 2014/15. The MPC raised the Central Bank Rate (CBR) from 8.5 per cent to 10.0 per cent in June, and further to 11.5 per cent in July, 2015 to contain incipient inflationary pressures and stem exchange rate volatility. As a result, the overall annual inflation eased slightly to 6.58 per cent in 2015 from 6.88 per cent in 2014. The Government negotiated a precautionary programme support with the International Monetary Fund (IMF) to mitigate the impact of possible exogenous shocks in 2015. Through the programme, the IMF made available the cumulative amount of Special Drawing Rights (SDR) 434.24 million (USD 610.7 million) that provided adequate buffer against short-term shocks and strengthened Kenya's external position. In view of this, the Central Bank set out the optimal path for both reserve money and money supply expansion consistent with the Government's inflation target and the expected economic growth. Money supply, M3, was targeted to grow by 14.2 per cent in the review period.

- 5.2. The Central Bank of Kenya used Open Market Operations (OMO), repo securities and Term Auction Deposits (TAD), to sterilize excess liquidity in the money market and to reduce volatility of the interbank rate during the year. The Monetary Policy Committee adjusted the pricing of the TAD instrument by 250 basis points above the CBR in May 2015 to enhance liquidity management. The excess liquidity was occasioned by net redemptions of government securities as well as government payments. During this period, CBK sold and purchased foreign exchange from the interbank market to stabilize liquidity and mitigate exchange rate volatility. The short-term money market interest rates trended close to the CBR corridor. The interbank rate increased from an average of 6.60 per cent in June 2014 to 11.8 per cent in June 2015.
- 5.3. Interest rates recorded mixed performance with spikes and dips for most nominal rates in 2015. The CBR increased from 8.50 per cent in December 2014 to 10.00 per cent and 11.50 per cent in June and December 2015, respectively. Lending interest rates for loans and advances from commercial banks rose from 15.99 per cent in December 2014 to 17.45 per cent in December 2015. Similarly, the Commercial banks' Loans-Deposit interest rate spread rose from 9.18 percentage points in December 2014 to 9.53 percentage points in December 2015.
- 5.4. Performance of the capital market in 2015 was depressed. The Nairobi Securities Exchange (NSE) 20-Share index recorded a high of 5,346 points during the first quarter of the year but dipped to 4,040 points in December 2015, representing a drop of 21.0 per cent compared to December 2014. The total number of shares traded during the review period also went down to 6,812 million from 8,134 million reported in 2014. Similarly, there was a drop in the value of shares traded during 2015 compared to 2014.

Selected 5.5. Table 5.1 shows selected monetary indicators for the period 2011 to 2015. The net foreign Monetary assets (NFA) held by the banking system increased by 2.5 per cent to stand at KSh 493.5 **Indicators** billion in December 2015. There was accelerated growth of 19.2 per cent in total domestic and the credit in December 2015 compared to a growth of 16.1 per cent in December 2014. This was Consolidated as a result of increased credit to the National Government that rose to KSh 538.0 billion as at Accounts of December 2015 compared to KSh 424.9 billion as at December 2014. Credit to the private the Banking sector including other public bodies also expanded by 17.5 per cent in the review period to System reach KSh 2,292.4 billion. Broad money supply M3 grew by 14.1 per cent in 2015 to KSh 2,658.2 billion compared to an expansion of 16.7 per cent in 2014. The ratio of liquid assets to deposit liabilities of commercial banks (liquidity ratio) improved to stand at 44.1 per cent in December 2015 compared to 38.8 per cent in December 2014. The advances to deposits ratio improved from 83.0 per cent in December 2014 to 86.3 per cent in December 2015 reflecting increased uptake of loans issued by commercial banks.

Notes:

(a) Broad Money, ${\bf M2}$, is money supplied by the Central Bank, Commercial Banks and NBFIs.

The items include currency outside banking institutions, deposits held by non-banking institutions with Central Bank, all deposits as well as certificates of deposits held by the private and other public sectors with banking institutions. Excluded are National Government, County Government and Non-residents deposits with banking institutions.

- $(b) Broad\ Money, \textbf{M3}, comprises\ M2\ and\ foreign\ currency\ holdings\ by\ residents.$
- (c) Overall Liquidity, ${f L}$, comprises M3 and Treasury Bill holdings by the non-bank public.

5.6. Table 5.2 presents money and quasi money supply for the period 2011 to 2015. Money Supply M1 and quasi money deposits held by commercial banks expanded by 9.3 per cent and 15.7 per cent respectively in December 2015. Consequently, broad money supply M2 grew by 12.8 per cent to KSh 2,234.8 billion. The benchmark broad money supply M3 expanded by 14.1 per cent which was within monetary policy target on account of foreign currency deposits growing by 21.6 per cent. The overall liquidity expanded by 15.0 per cent to stand at KSh 3,390.8 billion by the end of the review period.

¹ Currency outside banks plus all demand deposits except; those of National Government, County Government, Commercial Banks, Non Residents and foreign currency denominated deposits

² Following the conversions and mergers there are no operational Non Bank Financial Institutions (NBFIs).

5.7. Consolidated accounts of the banking system for the period 2011 to 2015 are presented in Table 5.3. The total liabilities and assets of the banking system for the period under review grew to KSh 3,324.0 billion, an increase of 16.4 per cent. Total liabilities of the banking system increased on account of expansion in broad money supply, foreign currency holdings and other items net. Other Items Net, which include SDR allocated by IMF, increased by 26.4 per cent from KSh 526.8 billion in December 2014 to KSh 665.8 billion in December 2015. The increase in assets of the banking system was due to increases in domestic credit to the National Government and private sector, which grew by 26.6 per cent and 18.1 per cent respectively, leading to an increase of 19.2 per cent in overall domestic credit. The share of credit to National Government to total credit rose from 17.9 per cent to 19.0 per cent.

Sources of Change in M3 and Real Values of Selected Financial Aggregates

5.8. Table 5.4 presents the changes in money supply and their sources for the period 2011 to 2015. Broad money, M3 increased by KSh 328.2 billion in December 2015 compared to KSh 333.7 billion recorded in December 2014. The major changes that contributed to the expansion of broad money supply M3 was a KSh 159.1 billion increase in quasi money held by banks, followed by an increase of KSh 87.2 billion in currency in circulation and demand deposits held by commercial banks. Foreign currency deposits also contributed to the increase in M3 changing by KSh 75.3 billion. The main source of the growth in broad money M3 was

^{*} Provisional

¹NBFIs refer to Microfinance Institutions and Mortgage finance

^{*}Revised

increase in credit both to private sector by KSh 344.1 billion and National Government by KSh 113.2 billion.

Trends in Real Values of Selected Financial Aggregates

5.9. The trend of real values of selected financial aggregates are presented in Table 5.5. In real terms, broad money supply (M3) grew by 5.6 per cent to stand at KSh 1,613.7 billion in December 2015 compared to a growth of 10.1 per cent recorded in 2014. Real overall liquidity (L) expanded during the review period to KSh 2,058.5 billion from KSh 1,933.7 billion recorded in 2014. Most notable change was in the expansion of total commercial bank credit which increased by 41.9 per cent to KSh 1,699.5 billion in 2015. This was however, a recovery from a 15.8 per cent contraction recorded in December 2014. Real commercial bank's credit to private sector increased by 8.8 per cent during the review period while the banks deposit liabilities increased by 8.4 per cent. The overall banking system liabilities increased by 7.7 per cent while the ratio of deposit liabilities to total liabilities rose marginally to 78.8 per cent.

Nominal and Real Interest Rates

5.10. There was mixed performance of spikes and dips in most of the nominal interest rates during 2015 as shown in Table 5.6. Most notable are the upward revisions of the Central Bank Rate (CBR). The CBR was revised upwards twice during the review period. The rate increased from 8.50 per cent in December 2014 to 10.00 per cent and 11.50 per cent in June and December 2015, respectively. The 91-day Treasury bill rate dropped from 8.58 per cent in December 2014 to 8.26 per cent in June 2015 and rising to 9.81 per cent by December

⁺ Revised

⁺ Revised

2015. The interbank lending rate spiked in June 2015 to 11.78 per cent from 6.91 per cent in December 2014 before dropping to 7.27 per cent in December 2015.

5.11. Similar oscillations were reported for all commercial banks interest rates in 2015 with the exception of savings deposits rate that dropped in December 2015. Commercial banks loans and advances lending interest rates rose to 17.45 per cent in December 2015 from 15.99 per cent in December 2014. The fluctuations in interest rates by commercial banks was similarly reflected in the Loans-Deposits interest rate spread which dropped from 9.18 percentage points in December 2014 to 8.84 percentage points in June 2015 and rose to 9.53 percentage points in December 2015.

5.12. There was a general decline in real interest rates during the review period as shown in Table 5.7. Real interest rates for commercial bank savings deposit rate and the inter-bank rate were negative at 4.46 per cent and 0.74 per cent, respectively. The real interest rate for 91 day treasury bills dropped from 2.56 per cent in 2014 to 1.80 per cent in 2015, while real interest for loans and advances from commercial banks dipped slightly to 9.44 per cent in 2015 from 9.97 per cent recorded in 2014.

5.13. Table 5.8 presents the balance sheet of the Central Bank of Kenya (CBK). The total assets and liabilities of the CBK increased by 12.6 per cent to KSh 885.2 billion in December 2015. Notable increases in assets were other assets including treasury bills and bonds that more than doubled to reach KSh 74.8 billion in 2015, and direct advances and overdraft to Kenya Government that increased by 46.2 per cent during the review period. The increase in liabilities of the Central Bank is attributed to increases in other liabilities, other deposit liabilities and growth in total currency which rose by 125.0 per cent, 10.9 per cent, and 8.6 per cent, respectively during the review period.

5.14. Table 5.9a presents commercial banks credit for the years 2011-2015. Overall commercial banks credit grew significantly by 19.3 per cent to KSh 2,799.5 billion in December 2015 compared to an increase of 16.9 per cent recorded in December 2014. The sector which recorded the highest percentage increase in uptake of credit was building and construction recording 32.2 per cent increase in December 2015 compared to 13.6 per cent increase in a similar period in 2014. Credit to the mining and quarrying sector declined for the second consecutive year to stand at KSh 20.8 billion. Credit to public sector increased by 24.5 per cent in 2015 with county governments uptake increasing significantly from KSh 278 million in 2014 to KSh 1,149 million in December 2015.

5.15. The uptake of commercial banks credit to sectors exhibited mixed performance as shown in Table 5.9b. The National Government was a key gainer with share of credit extended to it increasing from 16.9 per cent to 18.1 per cent of the total credit. This was occasioned by the effort to finance Government fiscal deficit. The share of credit to private sector increased from 62.8 per cent in 2014 to 64.2 per cent in 2015.

5.16. The deposit liabilities and liquid assets of commercial banks for the period 2011 to 2015 are presented in Table 5.10. Deposit liabilities held by commercial banks grew by 17.1 per cent to reach KSh 2,619.3 billion in December 2015 from KSh 2,236.4 billion in December 2014. Liquid assets increased significantly by 33.1 per cent in December 2015 compared to a 14.6 per cent rise recorded in December 2014. The overall liquidity ratio rose to 44.1 per cent by December 2015 from 38.8 per cent recorded at end of December 2014.

Insurance 5.17. Life insurance claims grew to KSh 33.1 billion in 2015 from KSh 23.8 billion in 2014 while earned premiums grew from KSh 57.6 billion in 2014 to KSh 61.0 billion during the review period. The gross earned premiums from non-life insurance increased by 9.5 per cent in 2015 to KSh 110.8 billion. Similarly, claims increased from KSh 42.7 billion in 2014 to KSh 48.8 billion in 2015. Claims for Private Motor Vehicle and Commercial Motor Vehicles increased from KSh 11.0 billion and KSh 10.7 billion to KSh 12.8 billion and KSh 12.9 billion, respectively over the same period. Gross earned premiums for medical insurance rose from KSh 25.5 billion in 2014 to KSh 29.5 billion in 2015 compared to claims which rose by 17.2 per cent to KSh 15.0 billion in 2015.

Capital 5.18. The performance of the stock market in 2015 was bearish as depicted by all indicators as **Markets** shown in Table 5.11. The NSE 20-Share index recorded a high of 5,346 points during the first quarter of 2015 but started to dip in the second quarter to record 4,040 points in December 2015, representing a drop of 21.0 per cent compared to December 2014. The share volume dropped from 8,233 million in 2014 to 6,812 million in 2015 resulting to a corresponding drop in equity turnover from KSh 216 billion in 2014 to KSh 209 billion in 2015. Total bond turnover decreased from KSh 506 billion in 2014 to KSh 305 billion in 2015. Notable changes in the number of licensed players in the capital markets was the increase in investment banks, fund managers, and collective investment schemes all of which their number increased by one.

 $^{^{\}mathrm{1}}$ Deposits and Liquid Assets are calculated as an average of three days balances

Deposit 5.19. Key performance indicators of the deposit taking savings and credit cooperatives (DTSs) **Taking** are highlighted in Table 5.12. The assets of the DTSs grew by 12.2 per cent to stand at KSh **Savings** 338.2 billion in December 2015. While deposits recorded a significant growth of 14.6 per cent, and Credit loans and advances grew by 8.9 per cent during the review period. This mixed performance can **Cooperatives** partly be explained by the savings requirement of at least six months.

Banking sector

Developments in the **Financial** Sector

5.20. During the year under review, the Kenya Government negotiated a precautionary programme support with the IMF to mitigate the impact of possible exogenous shocks in 2015. The programme, which is a blend of the Stand-By Arrangement (SBA) and Stand-By Credit Facility (SCF) took effect in February 2015. Through this programme, the IMF undertook to provide US\$ 696.7 million (SDR 488.2 million) 2015 of which US \$ 503.2 million is under SCF and US \$193.5 million under the SBA to strengthen Kenya's external position. The IMF

^{*} Provisional

made available the cumulative amount under the arrangements to SDR 434.24 million (about USD 610.7 million). The arrangements boosted the Bank's capacity to respond to short-term volatility in the foreign exchange market.

5.21. To strengthen the banking sector's capital position, the Central Bank introduced a 2.5 per cent capital conservation buffer in 2013 and which became effective on 1st January 2015. The capital buffer is to be maintained by institutions as a cushion for losses during periods of financial and economic stress. As a consequence of this introduction, the effective minimum core and total capital requirements rose from 8.0 per cent and 12.0 per cent to 10.5 per cent and 14.5 per cent, respectively. As at December 2015 these ratios had risen above the statutory requirements at 15.6 per cent and 18.6 per cent respectively. The money market experienced a small turbulence from August to October 2015 following pressures on the Government borrowing programme and the placement of two commercial banks under receivership in the months of August and October respectively. However, given the two institutions small market share, the receivership/liquidation did not cause any systemic concern for the banking sector. The CBK used Reverse Repos to address the temporary liquidity shortages in segments of the market arising from these stresses.

Market

- Capital 5.22. In the primary equity market, the first Real Estate Investment Trust (REIT) namely, Stanlib Fahari REIT got listed through an Initial Public Offer (IPO) process in the newly created Real Estate Investment Segment of the NSE in October 2015. The Stanlib REIT raised KSh 3.6 billion against a minimum target of KSh 2.6 billion. Further, during the year there was one (1) new rights issue by Housing Finance. In this cash call, Housing Finance sought to raise KSh 3.5 billion by issuing 116,666,667 new ordinary shares at an Offer Price of KSh 30.00 (28.9 per cent discount) per share in the ratio of 1:2. The issue received a 257 per cent subscription level, raising KSh 9.01 billion.
 - 5.23. In the primary Treasury Bonds space, during the period under review, there were sixteen (16) bond issue offers including re-openings. The bonds' tenure ranged between 2 and 20 years. In 2015, the Government of Kenya sought to raise KSh 270 billion and received subscriptions worth KSh 346.5 billion. However, it accepted to issue bonds worth KSh 256.7 billion. Subscription levels for the various tenures of bonds were between 46.5 per cent and 204.5 per cent. The Corporate Bonds space was also relatively active in 2015, with Five (5) companies (East African Breweries, Centum Investment Company Limited, Chase Bank, Real People and Family Bank) raising a total of KSh 19.5 billion.
 - 5.24. The Authority approved Nairobi Securities Exchange (NSE) to operate a derivatives exchange business in Kenya in December 2015. The approval was the final step towards confirmation of a provisional license that the NSE had been granted in January 2015. The approval confirms NSE's full compliance with The Capital Markets (Futures Exchanges) (Licensing Requirements) Regulations, 2013 which were drafted in line with the International Organization of Securities Commissions (IOSCO) Principles for the Regulation and Supervision of Commodity Derivatives Markets.
 - 5.25. In line with the principle-based approach to approval of new product launch, the Authority issued a Policy Guidance Note (PGN) in September 2015 on issuance and listing of exchange-traded funds (ETFs), pending the development of a comprehensive regulatory framework for ETFs. Consequently, the Nairobi Securities Exchange and Central Depository and Settlement Corporation were required to amend their Listing and Trading Rules; and Central Depository Rules respectively to include the ETFs component, as well modernizing

their respective market infrastructure.

5.26. The first set of EAC Council Directives on Securities Legal and Regulatory was gazetted on 29th May 2015. The objective is to ensure harmonization of the capital markets legal and regulatory framework by way of issuance of Council Directives by the Council of Ministers. This set includes Directives covering the following areas; public offers of equity, debt, and corporate governance for market intermediaries, listing on exchanges and admission to secondary exchanges. There are six proposed Directives focusing on; Credit Rating Agencies, Regulated Activities, and Corporate Governance for Public Listed Companies, Real Estate Investment Trusts, Securities Exchanges and Central Securities.

Insurance 5.27. In 2015 the Insurance Regulatory Authority (IRA) made a number of initiatives aimed at ensuring the stability and growth in the insurance industry. Key among these initiatives were review of the legal framework with respect to minimum capital requirement, which was amended, vide Finance Act 2015 and new capital requirements adopted and expected to be implemented in phased approach up to 2018. Guidelines were developed for Takaful or Islamic insurance to ensure growth of the segment that is critical in enhancing insurance growth and coverage, and penetration. The aim of the guidelines is to provide a framework for the establishment and growth of *Takaful* business that will be efficient, thereby leading to financially sound and sustainable Takaful funds.

5.28. During the period (2015) there were 20 fund managers, 29 administrators and 11 custodians registered by the Retirement Benefits Authority (RBA). The pension assets are expected to grow during the period though at a slow pace due to the dampened stock market activity. The assets are expected to exceed KSh 800 billion. The assets and membership of the individual retirement benefits schemes grew during the period from 144,000 members in December 2014 to 162,000 members in December 2015 while the assets grew from KSh 23.3 billion in 2014 to KSh 28.8 billion in 2015. The growth in membership in the individual retirement benefit schemes can be attributed to the intense public campaigns and member education undertaken by the RBA and the various service providers.

Chapter 6

Public Finance

Overview

The Government's Fiscal Framework is aimed at supporting rapid and inclusive economic growth, ensuring sustainable debt position and supporting devolution for effective delivery of services. In 2015/16 the Fiscal plan was aligned to the second Medium Term Plan (MTP II) and strategic interventions of National interest. The framework involves a continued prudent public expenditure management to contain fiscal risks, gradually lower the fiscal deficit and contain growth of recurrent expenditure in favour of productive capital spending. The 2015/16 budget emphasizes resource allocation towards development programmes in infrastructure, agriculture, security, health, education, social protection and youth empowerment; aimed at enhancing sustainable and equitable growth and job creation.

6.2. Overall Fiscal Results: The National Government budget estimates for 2015/16 amounts to KSh 2,224.0 billion, an increase from KSh 1,950.7 billion spent in 2014/15. Total recurrent expenditure is estimated at KSh 1,238.2 billon, while development expenditure is expected to grow by 22.8 per cent to KSh 985.8 billion. In this period, KSh 398.0 billion is budgeted for public debt repayment and KSh 259.8 billion will be transferred to county Governments. In 2015/16, total recurrent revenue is estimated to register a 26.6 per cent growth to stand at KSh 1,401.2billion, out of which tax revenue will account for 92.0 per cent. Total stock of debt as at end of 2014/15 stood at KSh 2,601.4 billion, of which external debt stock accounted for 54.7 per cent. In 2015/16, county governments overall budgeted expenditure is estimated at KSh 361.1 billion against an estimated revenue of KSh 343.7 billion.

National 6.3. The statement of National Government operations for the period 2011/12 to 2015/16 is **Government** presented in Table 6.1. In 2015/16, the total revenue inclusive of grants is estimated to amount to KSh 1,474.6 billion while total expense is estimated to grow by 17.9 per cent to stand at KSh 1,607.1 billion. Acquisition of non-financial assets is expected to grow by 9.0 per cent to KSh 340.1 billion in 2015/16. In the period under review, the Net Operating Balance (NOB) is estimated to improve significantly to KSh 132.5 billion while the net borrowing position is estimated to improve by 12.7 per cent to KSh 472.6 billion.

6.4. Details of key fiscal ratios for the period 2011/12 to 2015/16 are given in Table 6.2. In 2015/16, the ratio of Net Operating Balance to expenditure on acquisition of non-financial assets is estimated to improve notably from 73.4 per cent in 2014/15 to 39.0 per cent in 2015/16. This demonstrates the deliberate effort by the government to reorient spending from recurrent to capital expenditure. Net borrowing as a percentage of revenue is estimated to register an improvement of 15.7 percentage points in 2015/16 mainly attributable to a faster growth in anticipated revenue. Similarly, the ratio of net borrowing to total expenditure is estimated to improve from 28.1 per cent in 2014/15 to 21.5 per cent in 2015/16. In the same period, the ratio of total external loans and grants to acquisition of non-financial assets is estimated to increase by 30 percentage points principally as a result of a significant growth in borrowing to finance development of key physical infrastructure. The ratios of revenue and expenditure as a percentage of GDP are expected increase to 23.6 and 35.7 per cent in 2015. Net borrowing is expected to improve from a deficit of 9.3 in 2014 to 7.6 per cent in 2015. The ratio of public debt to GDP stood at 41.8 in 2014/15.

6.5. Table 6.3 details the comparison between National Government Budget Estimates and actual out-turns of revenue and expenditure for the period 2012/13 to 2014/15, and revised budget estimates for 2015/16. In 2014/15, actual recurrent revenue realized was 94.9 per cent of the targeted estimates. Absorption of funds meant for recurrent spending remained relatively high as has been the case in the previous financial years averaging 99.7 per cent of the budgeted funds. There was a significant improvement in the absorption of development funds from 80.5 per cent in 2013/14 to 93.8 per cent in 2014/15.

6.6. Table 6.4 presents ordinary revenue receipts for the National Government on recurrent account from 2011/12 to 2015/16. In 2015/16, the total ordinary revenue is projected to grow by 26.6 per cent compared to a growth of 13.5 per cent in 2014/15. Total tax revenue is expected to amount to KSh 1,288.9 billion, accounting for 92.0 per cent of total ordinary revenue during the period under review. Revenue from Income tax and Value Added Tax (VAT) are expected to increase by 22.5 per cent and 25.1 per cent, respectively. Revenue from excise taxes is expected to grow by 24.7 per cent to stand at KSh 144.5 billion. This growth will be supported by the enactment of the Excise Tax Act 2015 which has led to the expansion of the tax bracket to include products that were previously not covered such as airtime and financial transactions. The Government has also instituted other administrative reforms to enhance compliance with the tax system and ensure stable tax revenue collections. Further, the reform measures are expected to enhance revenue collection through increased tax base, reduced compliance costs and efficient revenue administration.

6.7. Table 6.5 gives details of import duty levied on selected commodities from 2011 to 2015. Import duty collection realised in 2015 was KSh 71.2 billion; representing a slower growth of 8.8per cent, compared to a growth of 18.4 per cent in 2014. Import duty from food drinks and tobacco category recorded a notable increase of 16.9per cent, whilethat from transport equipment category registered a growth of 9.9per cent. Import duty from machinery category declined by 2.7 per cent in 2015, a reversal from a 10.8 per cent growth in 2014 possibly due to duty free imports associated with the standard gauge railway.

6.8. Table 6.6 presents excise revenue collected from selected commodities and services produced domestically, for 2011 to 2015. Excise revenue for the selected commodities grew significantly by 70.0 per cent to KSh 62.7 billion in 2015, following the introduction of cellular and telephone airtime, and financial transactions excise duty which contributed KSh 14.1 billion and KSh 7.2 billion, respectively. Beer and airtime were the largest source of excise revenue, even though the value of excise revenue from beer recorded a marginal growth.

6.9. Table 6.7 presents the financing of investment in non-financial assets for the period 2011/12 to 2015/16. In 2015/16, total financing is estimated at KSh 578.9 billion compared to KSh 560.3 billion, in 2014/15. Borrowing from external loans are estimated to grow by 73.7 per cent, to KSh 384.9 billion while grants are estimated to more than double to KSh73.4 billion, during the same period. Total long-term and short-term domestic borrowing is projected at KSh 120.7 billion in 2015/16, compared to KSh 127.9 billion in 2014/15.

6.10. Table 6.8 shows the functional classification of National Government outlays for the period 2012/13 to 2015/16. Total estimated outlays are projected to grow by 14.0 per cent to KSh 2,224.0 billion up from KSh 1,950.7 billion in 2014/15. In the same period, recurrent expenditure is estimated to rise by 7.9 per cent compared to 22.8 per cent growth for development expenditure estimates. In the period under review, expenditure on economic affairs is estimated to register a significant growth of 26.8 per cent and account for 25.3 per cent of the total outlays in 2015/16. In this category, expenditure on transport is expected to increase by 10.8 per cent mainly attributable to the continued investment in construction of the standard gauge railway and, construction and rehabilitation of other general transport infrastructure and civil works. Similarly, the estimated expenditure in energy related activities is expected to more than double in 2015/16, owing to the massive investmentaimed at expanding the country's energy sources to meet the targets in the Vision 2030.

6.11. In 2015/16, Public debt transactions are expected to register a decline of KSh 2.3 billion, and account for 17.9 per cent of total budgetary outlays. Expenditure on education is projected to register a slower growth of 6.0 per cent to KSh 319.4 billion in 2015/16, from 18.9 per cent growth in 2014/15. Education expenditure is also expected to account for 14.4 per cent of the budget. Expenditure on general public services, defense, and public order and safety are expected to grow by 38.5, 15.7 and 12.7 per cent, respectively.

¹Total in this Table vary with that in Table 6.9 by disposal of non financial assets item

6.12. Table 6.9 presents the National Government expenditure by economic classification for the period 2011/12 to 2015/16. The overall budgeted expenditure in 2015/16 (excluding disposal of non-financial assets) is expected to grow by 14.2 per cent to KSh 2,201.1 billion. Consumption expenditure on goods and services is estimated to grow by 14.1 per cent to KSh 613.0 billion and account for 27.8 per cent of the total expenditure. Current grants are estimated to increase by 14.1 per cent to KSh 463.0 billion in 2015/16. During this period, transfers to County Governments and other General Government units are estimated at KSh 259.8 billion and KSh 192.4 billion, respectively. Total current expenditure, inclusive of social benefits and other expenses is estimated at KSh 1,338.0 billion and will account for 60.8 per cent of the total expenditure. Interest paymentson debt are expected to register a slower growth of 10.7 per cent to KSh 185.3 billion, with interest on domestic debt accounting for 83.5 per cent.

6.13. In 2015/16, capital grants to State Owned Enterprises (SOEs) are expected to increase by 45.1 per cent to KSh 269.1 billion from KSh 185.4 billion in 2014/15. These funds are directed towards government priority programmes in irrigation and agriculture, energy and general infrastructure. Expenditure on acquisition of non-financial assets is expected to grow by 9.0 per cent, to KSh 340.1 billion in 2015/16. This is attributable to expected increase inexpenditure on building and structures which is estimated to account for 14.6 per cent of the total budget. Machinery and equipment component is estimated to register a significant growth of 16.0 per cent, in the period under review.

6.14. Table 6.10 presents the statement of General Government operations for 2014/15. General Government institutional units' transactions presented are classified as revenue, expense, net investment in non-financial assets, net acquisition of financial assets, or net incurrence of liabilities. In the period under review, total revenue realized was to KSh 1,395.5 billion, with National Government revenue accounting for 81.3 per cent of the total revenue. General Government expenditure amounted to KSh 1,373.2 billion, of which compensation of employees and use of goods and services jointly accounted for 69.6 per cent of the amount. The net acquisition of non-financial assets amounted to KSh 549.0 billion, with building and structures amounting to KSh 477.9 billion. The Net borrowing position of the General Government stood at KSh 526.7 billion.

Chapter 6: Public Finance

6.15. Table 6.11 details the National Government outstanding debt by source for the period 2011 to 2015. The total stock ofdebt grew by 17.3 per cent to KSh 2,601.4 billion in June 2015, of which the external debt amounted to KSh 1,423.3 billion. Stock of debt from the International Sovereign Bond constituted 19.1 per cent of the total external debt as at June 2015 compared to 15.4 per cent as at June 2014. Bilateral external debt from all the traditional lenders declined with the exception of debt stock from the People's Republic of China, which grew significantly by KSh 171.2 billion to KSh 252.0 billion in June 2015. This growth was driven by the continued bilateral engagements in infrastructural development initiatives between the two countries. The stock of debt from multilateral lenders grew by 15.4 per cent to KSh684.6 billion in June 2015.

6.16. Stock of debt from African Development Fund/African Development Bank (ADF/AfDB) registered the largest growth of 47.1 per cent while stock of debt from International Development Association/International Fund for Agricultural Development (IDA/IFAD) and International Monetary Fund (IMF) grew marginally by 10.7 per cent and 3.4 per cent, respectively, as at the end of June 2015. Debt from Commercial banks decreased significantly to KSh 5.7 billion, from KSh 59.5 billion in June 2014, attributed to the repayment of the syndicated loan using proceeds from the International Sovereign Bond during the period under review. The gross internal debt position increased by 9.6 per cent from KSh 1,284.3 billion in June 2014 to KSh 1,420.4 billion in June 2015. This growth was occasioned by the rise in stocks of treasury bonds by 13.2 per cent and the rise in treasury bills by 6.5 per cent. Government deposits and on-lending stood at KSh 242.3 billion in June 2015.

6.17. Details of the National Government debt servicing charges and receipts from interest and loan repayments on on-lending for the period 2010/11 to 2014/15 are given in Table 6.12. The gross debt servicing charges in 2014/15 increased by 15.8 per cent to KSh 400.3 billion compared to 35.2 per cent growth in 2013/14. Net external debt servicing charges grew to KSh 112.7 billion from KSh 98.0 billion in 2013/14, while the net internal debt servicing charges increased by 16.3 per cent to KSh 286.3 billion in 2014/15. Receipts on interest and loan repayments declined to KSh 1.3 billion as at the end of June 2015 from KSh 1.6 billion as at June 2014.

6.18. The ratio of National Government external public debt servicing charges to earnings from export of goods and services for the period 2011 to 2015 are presented in the Table 6.13. The ratio gives an assessment of the economy's ability to service external debt by measuring the cost of servicing debt in terms of export earnings. In 2014/15, the debt servicing charges as a percentage of export earnings, increased to 11.0 per cent from 9.9 per cent in 2013/14. This is attributable to a faster growth in debt servicing charges compared to the growth in export earnings.

Table 6.13: The Ratio of National Government Debt Service Charges on External Debt to Exports of Goods and Services, 2011-2015

	Debt ServiceCharges on 'External Debt ¹ (Fiscal Year)	Exports of Goods and Services (Calender Year)	External debt service Charges as a percentage of Exports of Goods and Services

County 6.19. Table 6.14 gives the County Governments' revenue by source for 2014/15 and 2015/16. Governments As per the County Allocation of Revenue Act, 2015, a total of KSh 287.0 billion is expected to be transferred to the county governments in 2015/16. This amount comprises equitable share of national revenue (KSh 259.8 billion), conditional additional allocations to County Governments from National Government revenue (KSh 16.6 billion) and loans and grants from development partners (KSh 10.7 billion). The additional allocations from National Government revenue consists of, KSh 3.6 billion (level-5 hospitals), KSh 4.3 billion (free maternal health care), KSh 0.9 billion (compensation for user fees foregone), KSh 4.5 billion (leasing of medical equipment) and KSh 3.3 billion (road maintenance fuel levy fund). The conditional additional allocations to County Governments from loans and grants includes; World Bank loan of KSh 508.2 million and DANIDA grant of KSh 844.7 million both budgeted to supplement financing of county health facilities.

> 6.20. In 2015/16, County Governments expect to collect KSh 56.6 billion as local revenue compared to KSh 33.8 billion collected in 2014/15. In addition, county governments approved the spending of KSh 30.2 billion cumulative cash balance brought forward from 2014/15. Nairobi City County had the highest allocation of equitable share revenue of KSh 13.0 billion in 2015/16, while Lamu County had the least at KSh 2.1 billion. Nairobi City County had the largest overall total budgeted revenue with KSh 37.4 billion, while Turkana, Mombasa and Kakamega have KSh 11.0 billion, KSh 11.1 billion and KSh 11.0 billion, respectively.

 $^{^{++}}$ Includes Conditional Additional Allocations to County Governments from National Government Revenue & Conditional Additional Allocations to County Governments from Loans and Grants

6.21. Table 6.15 details the economic classification of county governments' expenditure for the period 2013/14 to 2015/16. County governments' expenditure is expected to grow by 33.1 per cent to KSh 361.1 billion in 2015/16. Expenditure on use of goods and services is expected to grow by 41.2 per cent to KSh 78.3 billion, in 2015/16, and account for 21.7 per cent. Salaries and allowances are estimated to grow by 19.2 per cent to cost KSh 112.5 billion, and will account for 32.2 per cent of the total expenditure. In the same period, acquisition of non-financial assets is expected to increase by 39.9 per cent to KSh 127.7 billion, representing 35.3 per cent of the total budget. Expenditure on building and structures, and plant and machinery will account for 76.3 per cent and 22.2 per cent of the total budget, respectively.

6.22. The classification of county governments' expenditure by functions for 2013/14 and 2015/16 is provided in the Table 6.16. In 2015/16, total expenditure by county governments is expected to increase from KSh 271.3 billion in 2014/15 to KSh 361.1 billion. Expenditure on general public services is projected grow marginally and account for 38.0 per cent of the total expenditure during the review period. Expenditure on economic affairs is expected to more than double from KSh 40.2 billion in 2014/15 to KSh 90.1 billion in 2015/16. During this period, expenditure on transport infrastructureis expected to grow to KSh 46.7 billion, and account for 51.9 per cent of the total economic affairs expenditure. Expenditure on agriculture is estimated to increase to KSh 23.1 billion 2015/16 from KSh14.2 billion in 2014/15. Further, expenditure on health is expected to grow by 15.5 per cent to KSh 63.1 billion, and account for 17.5 per cent of the total expenditure in 2015/16. In the same period, budgeted expenditure on education and social protection are expected to increase to KSh 27.1 billion and KSh 1.6 billion, respectively.

Chapter 7

International Trade and Balance of Payments

Overview

Tn 2015, the balance of trade improved from a deficit of KSh 1,081 billion recorded in 2014 to a deficit of KSh 997 billion. Total exports rose by 8.2 per cent to KSh 581 billion Lin 2015 while total imports declined by 2.5 per cent to KSh 1,578 billion over the same period. As a result, the volume of trade increased marginally from KSh 2,156 billion in 2014 to KSh 2,158 billion in 2015. The rise in the total export earnings compared to the decline in the total import bill led to the improvement of export-import ratio from 33.2 per cent in 2014 to 36.8 percent in 2015. The leading export earners were tea; horticulture; articles of apparel and clothing accessories; and coffee, collectively accounting for 54.6 per cent of the total export merchandise.

7.2. Favourable unit prices of the export commodities coupled with a decline in import prices of mineral fuels resulted to an improvement in the terms of trade for all items to 84.9 per cent in 2015. During the review period, Africa remained the leading destination of the country's exports accounting for 41.7 per cent of total exports. Within the African continent, Uganda continued to be the leading destination of Kenya's exports, that grew by 12.8 per cent to KSh 69 billion in 2015. Over the review period, Asia continued its dominance as the leading source of the country's imports despite contracting from KSh 990 billion recorded in 2014 to KSh 982 billion in 2015. Consequently, the balance of payments position deteriorated from a surplus of KSh 128 billion in 2014 to a deficit of KSh 25 billion in 2015 largely attributed to repayments of external loans. The current account balance improved by 19.5 per cent to a deficit of KSh 425 billion, as a result of a 7.4 per cent increase in merchandise exports. The financial account net inflows declined from a surplus of KSh 616 billion in 2014 to a surplus of KSh 498 billion in 2015. This was mainly occasioned by increased bearish activities at the Nairobi Securities Exchange.

Balance 7.3. The value of total exports recorded an increase of 8.2 per cent to KSh 581 billion in 2015, of Trade with domestic exports rising to KSh 500 billion as shown in Table 7.1. However, the value of imports decreased by 2.5 per cent from KSh 1,618 billion in 2014 to KSh 1,578 billion in 2015. Consequently, the balance of trade deficit improved from KSh 1,081 billion in 2014 to KSh 997 billion in 2015. The increase in the value of exports and the decrease in the value of imports resulted in the improvement of the export-import ratio. As a result, exports accounted for 36.8 per cent of the import expenditure for 2015 from 33.2 per cent in the previous year, and better than the 35.5 per cent recorded in 2013.

Price 7.4. Table 7.2(a) shows export and import unit price indices by commodity groups based on changes the Standard International Trade Classification (SITC) for the period 2011 to 2015. The unit price indices for all exports and non-oil exports increased by 12.9 per cent and 13.0 per cent, respectively, in 2015. This could mainly be explained by rise in export unit price of food and live animals, chemicals and miscellaneous manufactured articles, which increased by 28.1, 15.7 and 10.9 per cent, respectively, in 2015. However, the mineral fuels export price index contracted by 11.9 per cent following the decline in oil prices during the review period. The unit price index for all imports decreased by 2.8 per cent mainly due to a drop of 58.3 per cent of unit price indices of mineral fuels. Decrease in import unit price indices of animal and vegetable oil and fats; and miscellaneous manufactured articles also contributed to the drop in the overall imports unit price. This compensated for the increase in import prices of machinery and transport equipment; and manufactured goods whose unit price indices rose by 21.1 per cent and 19.0per cent, respectively, in 2015. The unit price index for non-oil imports increased by 20.2 per cent during the review period.

Terms 7.5. Terms of trade for the period 2011 to 2015 are shown in Table 7.2(b). Terms of trade of of all items improved by 11.8 percentage points to 84.9 per cent in 2015. This was mainly due to improved unit prices of the export commodities coupled with a decline in import prices of mineral fuels. However, the terms of trade for non-oil items worsened further by 3.9 percentage points to 69.2 per cent during the period under review owing to the increase in import price indices of machinery and transport equipment; and manufactured goods.

^{*}Provisional

changes

Volume 7.6. Quantum indices for all exports and non-oil exports decreased by 4.5 per cent each, in 2015, as presented in Table 7.2(c). This was mainly on account of export quantities of animal and vegetable oil and fats; and manufactured goods whose export quantum indices declined by 27.5 per cent and 10.8 per cent, respectively. All imports quantum index remained relatively unchanged in 2015 despite a drastic increase of 64.3 per cent in mineral fuels import quantum index. The import quantum index for non-oil imports declined by 11.4 per cent during the review period, owing to the declines in the import quantum indices of machinery and transport equipment, beverages and tobacco; and manufactured goods of 18.0, 9.5 and 5.3 per cent, respectively.

Quantities 7.7. Table 7.3(a) shows the quantities of principal domestic exports for the last five years. The of volume of exports of horticultural products continued to grow for the fifth year in a row to **Principal** 445,703 tonnes, reflecting a 4.0 per cent growth in 2015. Similarly, the quantity of titanium **Domestic** ores and concentrates; and salt rose by 36.8 per cent and 12.8 per cent to 493,201 tonnes and Exports 303,452 tonnes, respectively, in 2015. In contrast, the volumes of tea exported declined from and 456,492 tonnes in 2014 to 420,527 tonnes in 2015, reflecting a 7.9 per cent drop. The quantity Imports of soda ash exported declined by 34.0 per cent for the second consecutive year to 261,304 tonnes in 2015. The volumes of exported cement; and iron and steel declined further by 5.4 and 9.7 per cent to 681,665 tonnes and 124,190 tonnes, respectively, in 2015. Tobacco and tobacco manufactures; animal and vegetable oils; and essential oils continued on a declining trend.

> 7.8. The volume of imported wheat rose by 16.0 per cent from 1,225,690 tonnes in 2014 to 1,421,785 tonnes in 2015 as presented in Table 7.3(b). The volume of imported maize also recorded 6.8 per cent increase to 490,024 tonnes in the same period. Other commodities that registered increases in the volume of imports included iron and steel; cement clinkers, chemical fertilizers and plastics in primary and non-primary forms. The volume of imported rice declined by 3.6 per cent from 459.2 thousand tonnes in 2014 to 442.7 thousand tonnes in 2015. Similarly, the quantity of imported organic and inorganic chemicals recorded 31.0 per cent drop to 268.5 thousand tonnes in 2015.

 $^{^{2}}$ Items have different units of measurements

Exports and **Imports**

Values of 7.9. Tea was the leading source of foreign exchange with revenue from the commodity rising **Principal** by 30.9 per cent to KSh 123 billion in 2015, as shown in Table 7.4(a). Value of horticultural **Domestic** exports rose from KSh 97 billion in 2014 to KSh 101 billion, in 2015. Foreign earnings from coffee rose for the second consecutive year to KSh 21 billion in 2015. Revenue from the sale of articles of apparel and clothing accessories, tobacco and tobacco manufactures and; iron and steel shrunk to KSh 28 billion, KSh 16 billion and KSh 12 billion, respectively, in 2015. Revenues arising from the export of soda ash and fluorspar declined by 23.9 per cent and 24.2 per cent, respectively, during the review period.

> 7.10. Petroleum products continued to account for the largest share of imports at 13.6 per cent of the total import bill, as presented in Table 7.4(b). This was in spite of 26.6 per cent drop in the value of imported petroleum products to KSh 215 billion in 2015. Industrial machinery was the second major import expenditure item which registered a 17.5 per cent decline in value to KSh 212billion, in 2015. Similarly, expenditure on aircraft and associated equipment registered a decline from KSh 130 billion in 2014 to KSh 83 billion in 2015. There was continued increase in the importation of motor vehicles with import expenditure amounting to KSh 118 billion in 2015 from KSh 102 billion in 2014. Expenditure on iron and steel grew by 16.7 per cent to KSh 88 billion in the review period, owing to construction activities, particularly the road and railway line infrastructure. Other commodities that registered increased import expenditure during the review period included plastics in primary and non-primary forms; medicinal and pharmaceutical products; wheat; and organic and inorganic chemicals.

 $^{^{1}\}mathrm{The}\,$ importation of crude almost ceased after 2013 due to the closure of the Kenya Petroleum Refineries Ltd

^{*} Provisional

Prices of 7.11. The average prices of principal domestic exports and imports are presented in Table **Principal** 7.5(a). The unit price of one Kilogram of tea recorded 42.2 per cent increase to KSh 293 in **Domestic** 2015 due to international supply constraints. The unit price of coffee recorded an improvement **Exports** during the year with earnings from one Kilogram of coffee rising from KSh 420 in 2014 to KSh and 472 in 2015. The average price of soda ash increased from KSh 19,774 per tonne in 2014 to **Imports** KSh 22,825 per tonne in 2015 although production and value of export declined. Unit price of maize exports recorded a drop of 19.3 per cent to average at KSh 155,622 per tonne in 2015. The average price of metal scrap dipped despite an increase in the volumes exported.

> 7.12. Average prices of imported paper and paperboard dropped by 5.2 per cent from KSh 93,377 per tonne in 2014 to KSh 88,532 per tonne in 2015 as shown Table 7.5(b). Wheat and maize imports per tonne were cheaper in 2015 compared to 2014. Expenditure on imports of road motor vehicles continued to rise with the average price of a motor vehicle increasing from KSh 983,339 in 2014 to KSh 1,071,563 in 2015. The amount spent to import a tonne of non-ferrous metal rose by 4.3 per cent to KSh 287,634 per ton in 2015. Similarly, a tonne of imported second hand clothing cost KSh 9,333 more in 2015 compared to 2014.

Composition 7.13. Table 7.6 shows the composition of domestic exports by Broad Economic Category. of Exports Food and beverage remained the dominant source of export earnings in 2015, accounting for 44.7 per cent. The bulk of this category was in unprocessed form for household consumption. Non-food industrial supplies were the second leading category of exports recording a marginal growth to KSh 129 billion in 2015. Consumer goods not elsewhere specified accounted for 24.9 per cent of export earnings, valued at KSh 124 billion in 2015.

¹The importation of crude almost ceased after 2013 due to the closure of the Kenya Petroleum Refineries Ltd

Composition 7.14. Non-food industrial supplies were the leading class of imports with expenditure growing of Imports by 13.5 per cent to KSh 525 billion in 2015, as shown in Table 7.7. This represents 33.3 per cent of total imports during the year. Importation of machinery and other capital equipment rose for the second consecutive year from KSh 279 billion in 2014 to KSh 288 billion in 2015. Transport equipment accounted for 16.9 per cent of the total imports despite declining from KSh 279 billion in 2014 to KSh 267 billion in 2015. The drop was mainly driven by a 13.1 per cent reduction in expenditure on other industrial transport equipment, which amounted to KSh 158 billion. The least expenditure was on goods not elsewhere specified that dropped significantly from KSh 27 billion in 2014 to KSh 12 billion in 2015.

Direction 7.15. Africa remained the leading destination of the country's exports accounting for 41.7 of Trade per cent of total exports at KSh 242 billion in 2015, as shown in Table 7.8. The EAC partner states accounted for 52.3 per cent of the total exports to Africa. Europe was the second leading destination of exports with the export earnings growing by 5.0 per cent to KSh 146 billion, during the review period. This was mainly attributed to the increase in export earnings to EU except to Belgium, Italy and Sweden. Netherlands, United Kingdom and Germany were the three major export destinations within the EU region with main exports being horticultural products in 2015. Export earnings from Asia rose to KSh 131 billion in 2015, representing 31.0 per cent growth. Pakistan earned KSh 35.3 billion worth of exports to Kenya in 2015. The growth in export earnings from Pakistan was mainly on account of domestic exports of tea. Similarly, exports earnings from United Arab Emirates (UAE) and Afghanistan rose to KSh 29 billion and KSh15 billion respectively. Export earnings from America grew by 10.8 per cent in 2015. Slightly over80 per cent of export earnings were from United States. Articles of apparel

and clothing accessories were the leading class of commodities that were exported to the US, under African Growth Opportunity Act (AGOA) arrangement.

7.16. Asia continued its dominance as the leading source of the country's imports despite the value contracting from KSh 990 billion recorded in 2014 to KSh 982 billion in 2015 as presented in Table 7.9. Within the region, China was the leading source of imports that expanded significantly from KSh 249 billion in 2014 to KSh 321 billion in 2015. This was explained by substantial increases in import expenditure for railway construction materials from China. Despite recording a 4.5 per cent drop in the value of imports, India remained the second largest source of imports in 2015. The United Arab Emirates, Japan and Saudi Arabia had imports valued at KSh 91 billion, KSh 88 billion and KSh 55 billion, respectively, in 2015. The value of imports from the United Arab Emirates dropped by 12.3 per cent over the same period.

7.17. Imports from the EU had a value of KSh 233 billion, accounting for 14.8 per cent of the total import bill in 2015. Germany continued to be the leading source of imports from the EU for the second consecutive year with imports valued at KSh 47 billion in 2015. Import expenditure from the United Kingdom and France dropped by 8.7 and 6.2 per cent to KSh 43 billion and KSh 21 billion, respectively, in 2015. However, import expenditure from Italy, Netherlands and Russian Federation rose during the review period. Imports from Africa rose from KSh 146 billion in 2014 to KSh 149 billion in 2015. Imports from America registered a significant drop from KSh 187 billion in 2014 to KSh 146 billion in 2015. The drop in the expenditure on imports from America was mainly attributed to 25.3 per cent decline in imports from the USA. The decline in import from the USA was mainly as a result of 35.1 per cent drop in value of aeroplanes and other aircraft amounting to KSh 75 billion in 2015.

7.18. Table 7.10 shows the trade with African countries from 2011 to 2015. Imports from Africa constituted 9.5 per cent of total imports valued at KSh 149 billion in 2015. Imports expenditure to COMESA countries increased by 11.2 per cent in 2015 accounting for 45.0 per cent of total imports from Africa. Egypt and Uganda were the main sources of imports from COMESA with expenditure totalling KSh 26 billion and KSh 22 billion respectively, in 2015. The country's imports from South Africa amounted to KSh 61 billion, representing a share of 41.1 per cent of imports from Africa.

7.19. Total exports to African countries rose marginally from KSh 241 billion in 2014 to KSh 242 billion in 2015, to account for 41.7 per cent. COMESA countries constituted the leading destinations of Kenya's exports in 2015 with total exports amounting to KSh 179 billion. Export earnings from Egypt recorded a 15.2 per cent growth to KSh 20 billion, mainly attributed to an 8.9 per cent increase in exports of tea to the country. However, within the same region, export earnings from the Democratic Republic of Congo and South Sudan deteriorated to KSh 21 billion and KSh 17 billion, respectively, in 2015.

7.20. Uganda remained the leading destination of Kenya's exports which grew by 12.8 per cent to KSh 69 billion in 2015. This was mainly on account of increased exports of other lubricants, medicaments and salt which jointly rose by more than KSh 6 billion in 2015. Similarly, growths in export earnings were recorded for goods destined to Rwanda, Somalia and Nigeria. However, export earnings from Tanzania contracted by 21.2 per cent to KSh 34 billion in 2015. Similarly, Burundi, Sudan, South Africa, Zambia and Zimbabwe registered depressed values of export earnings in 2015 compared to 2014.

Balance of 7.21. Kenya's Balance of Payments (BOP) statistics are compiled according to Balance of **Payments** Payments and International Investment Position Manual, 6th edition (BPM6). BOP statistics for the period 2011 to 2014 have been revised. The revision was necessitated by the new data sources including data collected through informal cross border trade and foreign investment surveys. Three rounds foreign investment surveys have conducted namely; Foreign Investment Survey (FIS) 2010, FIS 2013 and FIS 2015 which captured international financial transaction flows.

> 7.22. As presented in Table 7.11, the balance of payments position deteriorated from a surplus of KSh 128 billion in 2014 to a deficit of KSh 25 billion in 2015, largely attributed to repayments of external loans. The current account balance improved by 19.5 per cent from a deficit of KSh 528 billion in 2014 to a deficit of KSh425 billion in 2015. This was as a result of 7.4 per cent increase in merchandise exports and a marginal decline in merchandise imports on free on board basis. This decline in merchandise imports was on account of decrease in expenditure on petroleum products owing to the decline in international oil prices. Increased export earnings from tea boosted the value of domestic exports during the review period. Consequently, the current account deficit as a percentage of GDP improved to 6.8 in 2015 from 9.8 in 2014.

> 7.23. International services receipts decreased by 0.9 per cent to KSh 422 billion in 2015. Over the same period, services payments declined by 9.1 per cent to KSh 213 billion. These developments translated into a surplus of KSh 229 billion in international services flows in 2015 from a surplus of KSh 211billion in 2014.

> 7.24. The financial account net inflows decreased by 19.2 per cent from a surplus of KSh 616 billion in 2014 to a surplus of KSh 498 billion in 2015. The decrease in the financial account surplus was partly occasioned by increased external repayments of loans and bearish activities at the Nairobi Securities Exchange that may have discouraged foreign inflows in the market. Direct investment net inflows increased from a surplus of KSh 92 billion in 2014 to a surplus of KSh 107 billion in 2015.

International 7.25. Table 7.12 presents the stock of foreign reserves of Central Monetary Authorities held by Liquidity the Central Bank of Kenya (CBK) and the National Treasury from 2011 to 2015. The gross stock of foreign reserves narrowed by 5.4 per cent as at December 2015, compared to an increase of 31.6 per cent as at December 2014. Consequently, the net foreign assets of the CBK, increased from KSh 606 billion as at December 2014 to KSh 661 billion as at December 2015. The reserve position in the International Monetary Fund (IMF) improved from a contraction of 1.2 per cent as at December 2014 to an expansion of 7.9 per cent as at December 2015. Special Drawings Rights (SDRs) also rose by 26.3 per cent in 2015. The combined external Banks' Deposits and Use of Fund Credit which form the Central Bank's foreign liabilities increased by 7.6 per cent to KSh 104,157 million as at December 2015 up from KSh 96,761 million as at December 2014.

 $^{^{1}\,}$ Reserves constitute foreign assets which are readily available for meeting external financial needs

Foreign 7.26. Generally, the Kenya Shilling depreciated against the major trading international **Exchange** currencies as reflected in the trade-weighted index. The index worsened by 5.7 per cent from Rates 108.10 in 2014 to 114.30 in 2015 as presented in Table 7.13. The Kenya Shilling weakened against the US Dollar, Chinese Yuan, Indian Rupee and Pound Sterling by 11.7, 9.5, 6.3 and 3.7 per cent, respectively, in 2015. However, the Kenya Shilling gained against the Euro, South African Rand and 100 Japanese Yen by 6.7, 4.7 and 2.6 per cent, respectively, in 2015. The Kenya Shilling exhibited instability against the major world trading currencies during the year but stabilised from the month of November 2015.

> 7.27. The Kenya Shilling displayed mixed performance against the currencies of major trading partners within the EAC during the year 2015. It strengthened against the Ugandan Shilling and Tanzanian Shilling by 11.5 per cent and 9.5 per cent, respectively but weakened against the Rwandese Franc by 9.0 per cent, in 2015.

Trade and Export Promotion

Developments in the External 7.28. In 2015, the Export Promotion Council (EPC) continued with engagements under the trade policy facilitation platform to advocate for a trade policy environment that aids growth and development of Kenya's export sector. This was achieved through participating and contributing in several bilateral and multilateral trade negotiations policy forums to ensure expansion of export markets for the country's products. The key for a included EAC-EU Economic Partnership Agreements (EPAs), EAC-COMESA-SADC tripartite negotiations, the African Growth and Opportunity Act (AGOA), the Common Market for Eastern and Southern Africa (COMESA), and the East African Community (EAC) common market negotiations, among others.

 $^{^1}$ Countries in the Euro area included in the computation of Trade Weighted Fisher's Ideal Index are:

 $Germany, France, Switzerland, Netherlands, Belgium \, and \, Italy.$

²Via US \$ Exchange Rates (DR Congo, Egypt, Pakistan and Rwanda)

7.29. During the review period, the Council undertook a market research in the Republic of Nigeria and the Republic of Ethiopia to identify market opportunities, and to ascertain the depth of these opportunities. The studies, whose results were disseminated to the exporting fraternity, identified business opportunities for expanding Kenya's export of goods and services, and pointed out the market entry requirements for Kenyan investors and business persons into both countries. The results from the study revealed reasonable business opportunities for products ranging from the agriculture, manufacturing, food and service industries sectors.

7.30. The Council also engaged in higher-level activities towards market development, which facilitated engagements with the established and the high potential markets. These engagements entailed participation of Kenya's exhibitors in major international trade fairs, and exhibitions in Tanzania, China, Zambia, Uganda, DRC, Zimbabwe, USA, Mozambique, and EXPO Milan Italy. The events contributed towards consolidation and expansion of Kenya's export market, enabling the Kenyan exhibitors to gauge competitiveness of their products, appoint distributors, study consumer trends, and identify opportunities for joint ventures in these markets.

7.31. In view of mainstreaming the export agenda in the Counties' development programmes, the Council continued with the exporters' county clinics, export awareness programmes, and outreach visits, in the counties. The main objective of the county engagement initiative was to enlist the support of county governments in prioritising export agenda, prioritising products for exports, and nurturing enterprises to engage in export businesses. This culminated in increased export awareness throughout the country; increased exports from the counties; identification of new export products; and enhancement of export competitiveness at the county level. To this end, the council has visited 37 counties under the programme with the initiative is still ongoing.

7.32. In the enterprise and product development services, the Council assisted the firms, with the aim of strengthening export supply base, and mainstreaming Micro, Small and Medium Enterprises (MSME) into the export process. This was achieved through the export capacity building programmes for potential and exporting MSMEs to sensitize them on the opportunities available in export trade, the associated market entry requirements, and services provided by relevant trade support organizations.

Chapter 8

Agriculture

Overview

'n 2015, the Agricultural Sector recorded mixed performance, partially influenced by abundant rainfall characterized by the el nino weather phenomenon. Agriculture value added rose from 3.5 per cent in 2014 to 6.2 per cent in 2015. Maize production increased from 39.0 million bags to 42.5 million bags in 2015 due to adequate rainfall and reduced incidences of the Maize Lethal Necrosis Disease (MLND). Sugarcane deliveries to factories rose by 4.6 per cent from 6.5 million tonnes in 2014 to 6.8 million tonnes in 2015. The volume of exports of fresh horticultural produce increased by 8.4 per cent to 238.7 thousand tonnes in 2015. The volume of marketed milk increased by 10.9 per cent to 600.4 million litres in 2015. However, tea and coffee production declined by 10.3 per cent and 16.0 per cent, to 399.1 thousand tonnes and 41.6 thousand tonnes, respectively, in 2015.

8.2. Overall, total value of marketed production at current prices increased by 11.3 per cent from KSh 333.2 billion in 2014 to KSh 371.0 billion in 2015. Total earnings from crop sales increased by 15.5 per cent to KSh 271.8 billion in 2015. Wheat earnings increased from KSh 7.6 billion in 2014 to KSh 8.2 billion in 2015. However, the value of marketed maize declined by 11.4 per cent from KSh 9,604.4 million in 2014 to KSh 8,506.0 million in 2015, mainly due to lower prices paid to farmers. Earnings from cane deliveries increased by 5.5 per cent to KSh 21.4 billion in 2015. The value of exports of fresh horticultural produce increased from KSh 84.1 billion in 2014 to KSh 90.4 billion in 2015. During the period under review, the value of tea increased by 39.5 per cent to KSh 118.4 billion in 2015, as a result of improved international prices. However, earnings from coffee sales decreased from KSh 16.6 billion in 2014 to KSh 12.1 billion in 2015. The value of marketed milk rose from KSh 18.8 billion in 2014 to KSh 20.7 billion in 2015.

Output and

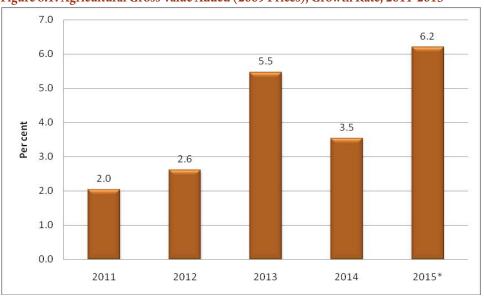

Agricultural 8.3. Agriculture output and input at current and constant prices is presented in Table 8.1 and Figure 8.1. The value of output in real terms increased from KSh 975.4 billion in 2014 to KSh **Input** 1,014.3 billion in 2015, while that of intermediate consumption decreased by 4.9 per cent from KSh 193.8 billion in 2014 to KSh 184.3 billion in 2015. This resulted in the Gross Value Added (GVA) increasing by 6.2 per cent to KSh 830.0 billion in 2015. In nominal terms, the output of Agriculture grew to KSh 2,021.7 billion in 2015, while that of intermediate consumption increased by 3.1 per cent to KSh 539.4 billion in 2015.

Table 8.1: Agricultural Output and Input, 2011-2015

					KSh Million
	2011 ⁺	2012+	2013 ⁺	2014	2015*

^{*} Provisional

Figure 8.1: Agricultural Gross Value Added (2009 Prices), Growth Rate, 2011-2015

Marketed Production

8.4. The value of marketed production for the period 2011 to 2015 is presented in Table 8.2. Total value of marketed production at current prices increased by 11.3 per cent from KSh 333.2 billion in 2014 to KSh 371.0 billion in 2015. Overall, the value of marketed crops increased by 15.5 per cent from KSh 235.3 billion in 2014 to KSh 271.8 billion in 2015. Marketed crops continued to account for over 70 per cent of total marketed production in 2015, largely due to improved earnings from tea and horticulture exports.

8.5. The value of marketed maize declined by 11.4 per cent from KSh 9.6 billion in 2014 to KSh 8.5 billion in 2015, mainly on account of lower prices paid to farmers. The lower prices were mainly triggered by increased production which improved largely as a result of adequate rainfall and a lower incidence of the Maize Lethal Necrosis Disease. During the review period, there was a 7.6 per cent increase in the value of marketed wheat from KSh 7.6 billion in 2014 to KSh 8.2 billion. The value of marketed fresh horticultural produce increased from KSh 84.1 billion in 2014 to KSh 90.4 billion in 2015. This was attributed to better unit prices for vegetables and higher volumes of fruits exported. The value of vegetables exported increased by 11.2 per cent from KSh 18.8 billion in 2014 to KSh 20.9 billion in 2015. Improved international tea prices more than offset the effects of reduced marketed production, resulting in a 39.5 per cent increase in earnings to KSh 118.4 billion in 2015. During the year under review, international coffee prices deteriorated significantly. The decline in marketed production coupled with a reduction in international coffee prices, resulted in a 27.4 per cent decrease in domestic coffee earnings to KSh 12.1 billion in 2015. In contrast, value of marketed milk increased by 10.1

⁺ Revised

¹Excludes forestry and fishing

per cent from KSh 18.8 billion in 2014 to KSh 20.7 billion in 2015 as a result of increased production.

8.6. The quantum and price indices for marketed agricultural produce for the period 2011 to 2015 are presented in Table 8.3. Overall quantum index increased from 203.5 in 2014 to 215.1 in 2015. The index for various categories of marketed crops increased except for permanent crops, which declined in 2015. The increases are attributed to increased production of marketed cereals and temporary crops during the review period. Quantum index for horticulture rose from 237.6 in 2014 to 251.8 in 2015. Quantum index for permanent crops dropped from 140.1 in 2014 to 124.4 in 2015, mainly on account of reduced tea and coffee production. During the review period, overall agricultural price index increased from 228.7 in 2014 to 246.5 in 2015. Increases were recorded in the price indices of horticulture, permanent crops and, livestock and products. However, price indices for cereals and temporary crops declined.

8.7. Average gross commodity prices paid to farmers for various commodities are presented in Table 8.4. Price paid per 100 Kg of tea to farmers rose by 55.6 per cent from KSh 19,063.96 in 2014 to KSh 29,656.27 in 2015. Increases were also recorded in prices paid to farmers for wheat, sisal, beef and pig meat. However, the price per 100 Kg of coffee paid to farmers declined by 4.4 per cent from KSh 39,185.89 in 2014 to KSh 37,480.02 in 2015. Sugarcane and milk prices declined marginally during the review period.

8.8. Table 8.5 shows the sales of agricultural produce to marketing boards from large and small farms for the last five years. Total value of sales to marketing boards increased by 11.3 per cent from KSh 333.2 billion in 2014 to KSh 371.0 billion in 2015. The value of output from large farms sold through marketing boards increased by 12.2 per cent from KSh 89.6 billion in 2014 to KSh 100.5 billion in 2015. Similarly, sales from small farms increased from KSh 243.6 billion in 2014 to KSh 270.5 billion in 2015, accounting for 72.9 per cent of total sales in 2015.

8.9. The quantum and price indices for purchased agricultural inputs for the period 2011 to 2015 are shown in Table 8.6. The overall price index for agricultural inputs decreased from 191.3 in 2014 to 186.6 in 2015 as a result of lower prices paid for fuel and power. The overall quantum index decreased from 221.6 in 2014 to 186.5 in 2015, while that for fertilizer and purchased seeds increased from 240.1 and 206.3 in 2014 to 245.0 and 210.5, respectively, in 2015. The increase in the quantum index for fertilizer was partly due to the continued provision of subsidized fertilizers to farmers by the Government. The quantum index for fuel and power increased from 101.1 in 2014 to 101.6 in 2015, while that for manufactured feeds reduced marginally from 434.3 in 2014 to 430.8 in 2015.

 $^{^{1}}$ Prices refer to the calendar year and may differ from those based on crop years. For tea and coffee , the prices are for black tea and coffee beans, respectively.

8.10. Expenditure on purchased agricultural inputs for the period 2011 to 2015 is shown in Table 8.7. Overall, the value of inputs sold increased by 1.4 per cent from KSh 53,586.9 million in 2014 to KSh 54,340.1 million in 2015. Fertilizer, fuel and power, and manufactured feeds accounted for 68.2 per cent of total inputs purchased. Fuel and power accounted for the largest share of expenditure at 23.7 per cent. The value of purchased manufactured feeds increased by 5.7 per cent to KSh 12,018.7 million in 2015.

8.11. Table 8.8 shows the agriculture Terms of Trade for the period 2011 to 2015. The index of purchased inputs decreased from 191.3 in 2014 to 186.6 in 2015, mainly due to a reduction in the price of fuel and power. The general index of agricultural output prices rose from 150.9 in 2014 to 162.6 in 2015, due to improved prices for some of the agricultural commodities. Similarly, the index of purchased consumer goods in rural areas rose from 420.7 in 2014 to 449.7 in 2015. The resultant effect of improved output prices outweighed the increased farm input prices. Consequently, the overall agriculture terms of trade improved from 49.3 in 2014 to 51.1 in 2015.

8.12. The estimated production for selected agricultural commodities in the country is presented in Table 8.9. Maize production increased from 39.0 million bags in 2014 to 42.5 million bags in 2015. Reduced incidences of the Maize Lethal Necrosis Disease (MLND) was one factor that enhanced production during the review period. Production of Irish potatoes decreased from 2.3 million tonnes in 2014 to 2.0 million tonnes in 2015. Production of beans and sorghum rose by 25.0 per cent and 10.5 per cent to 8.5 million bags and 2.1 million bags, respectively, in 2015.

8.13. Retail market prices for selected food crops are presented in Table 8.10. The months of March and September are highlighted to account for seasonality in production. All food items except maize and bananas recorded increases in March 2015 compared to a similar period in 2014. The price of a Kilogramme of maize declined by 13.2 per cent from KSh 38.24 in March 2014 to KSh 33.19 in March 2015, making it the lowest price since 2012. The price of tomatoes in September 2015 was almost at the same level as that of March 2014 after peaks in September 2014 and March 2015. Similarly, the price of cabbages peaked at KSh 38.86 per Kilogramme in March 2015 before dropping to KSh 22.17 per Kilogramme in September 2015. The price of finger millet exhibited a steady increase over the review period.

8.14. Sales of selected crops to marketing boards, as shown in Table 8.11, recorded mixed performance. Sales of maize improved marginally after recording declines for four years. However, the amount of tea and coffee sold centrally declined by 10.3 per cent and 24.2 per cent to 399.2 thousand tonnes and 32.2 thousand tonnes, respectively, in 2015.

^{*} Provisional

^{*} Provisional.

8.15. **Wheat:** Production of wheat has continued to increase over the last five years as shown in Table 8.12. During the year under review, wheat production increased by 4.2 per cent from 228.9 thousand tonnes in 2014 to 238.6 thousand tonnes. This production was mainly due to favourable weather conditions in the wheat growing areas. High demand for wheat products has seen the quantity of wheat imports rise over the last two years with imports increasing from 1,225.7 thousand tonnes in 2014 to 1,421.8 thousand tonnes in 2015.

Table 8.12: Production and Imports of Wheat, 2011-2015

2015*	238.6	1,421.8	1,660.4	

^{*} Provisional.

8.16. **Coffee:** The area, production and average yield of coffee by type of grower for crop year 2010/11 to 2014/15 is shown in Table 8.13. During the period under review, production decreased by 16.0 per cent from 49.5 thousand tonnes in the year 2013/14 to 41.6 thousand tonnes in 2014/15. Production by estates has exhibited downward trend since 2011/12 as compared to that of cooperatives, which recorded a mixed performance. The decrease in production during the review period was mainly as a result of high cost of labour, escalating cost of farm inputs and poor cooperate governance at grower institutions. The average yield for estates and cooperatives declined by 13.3 per cent and 17.2 per cent to 589.5 Kg per hectare and 317.0 Kg per hectare, respectively, in 2014/15.

 $^{^{\}rm 1}$ Includes purchases by National Cereals and Produce Board and millers.

8.17. **Tea:** Table 8.14 presents the annual performance of tea sub-sector from 2011 to 2015. The area planted with tea increased by 3.2 per cent from 203.0 thousand hectares in 2014 to 209.4 thousand hectares in 2015, primarily from smallholders. Despite the increase in area under tea, production decreased significantly by 10.3 per cent from 445.1 thousand tonnes in 2014 to 399.1 thousand tonnes in 2015. Consequently, the average yield decreased by 9.4 per cent for the smallholders, and by 13.2 per cent for the estates.

8.18. **Sugarcane**: Table 8.15 shows the performance of sugarcane sub-sector from 2011 to 2015. During the period under review, the area under cane increased by 5.8 per cent from 211,342 hectares in 2014 to 223,624 hectares in 2015. This increase was partly due to the introduction of Kwale International Sugar Company which started its operations early 2015. As a result, area harvested increased significantly by 8.3 per cent from 72,181 hectares recorded in 2014 to 78,140 hectares in 2015. Overall, cane deliveries increased by 4.6 per cent to 6.8 million tonnes in 2015.

8.19. Table 8.16 shows domestic sugar production, imports and exports over the past five years. Total sugar production increased by 6.6 per cent in 2015 to reach an all-time high of 632.0 thousand tonnes. The increase was attributed to increased cane yields and increased crushing capacities by newly licenced private sugar mills. However, inspite of the increased production, imports of sugar increased significantly by 28.8 per cent from 192.1 thousand tonnes in 2014 to 247.4 thousand tonnes in 2015. In March 2015, the Kenyan sugar sector was granted a one year extension of the existing special safeguards on the importation of duty-free sugar from the 19-member Common Market for Eastern and Southern Africa (COMESA).

8.20. **Horticulture**: Table 8.17 presents the volumes and values of fresh horticultural exports for the last five years. The total volume of fresh horticultural exports increased by 8.4 per cent from 220.2 thousand tonnes in 2014 to 238.7 thousand tonnes in 2015. The increase may be explained by exports of fresh fruit which rose by 31.6 per cent to 46.2 thousand tonnes. Cut flower exports recorded a decelerated growth of 7.0 per cent in volume during the period under review compared to the 8.7 per cent growth recorded in 2014. Earnings from cut flowers, mainly exported to the European Union through the Netherlands, have maintained an upward trend since 2013 increasing by 5.0 per cent to KSh 62.9 billion in 2015. The volume of vegetable exports declined for the second year running partly due to delays in signing the Economic Partnership Agreement and stringent checks for pesticide levels. However, vegetable export earnings increased from KSh 18.8 billion in 2014 to KSh 20.9 billion in 2015.

8.21. Figure 8.3 presents a monthly analysis of the performance of exports within the horticultural sub-sector in 2015. As with previous years, the highest earnings were recorded in the month of March due to favorable price per metric tonne. The volume of fresh horticultural exports was highest in the month of September 2015.

Figure 8.3: Monthly Performance of Fresh Horticultural Exports, 2015

^{*} Provisional.

 $^{^{1}}$ Excludes exports of processed horticultural produce and nuts.

8.22. **Irrigation:** Table 8.18 presents data on the performance of various irrigation schemes across the country for the last five years. Total paddy production rose by 24.0 per cent from 96,029 tonnes in 2014 to 119,094 tonnes in 2015 despite area cropped and number of farmers remaining constant. Paddy production by the Mwea irrigation scheme increased by 30.1 per cent to 91,624 tonnes in 2015, to account for 76.9 per cent of total production. However, all other schemes jointly recorded a 7.0 per cent increase. During the period under review, gross value of rice output increased from KSh 4.5 billion in 2014 to KSh 6.7 billion in 2015. Payment to plot-holders almost doubled from KSh 3.3 billion in 2014 to KSh 6.3 billion in 2015.

8.23. **Dairy Produce**: Table 8.19 presents data on the production of livestock and dairy products for the last five years. The quantity of raw milk delivered to processing plants continued on an upward trend for the third consecutive year increasing from 541.3 million litres in 2014 to 600.4 million litres during the review period. This increase was mainly realized during the second half of the year due to availability of enough pastures and fodder. Processed milk and cream increased from 419.6 million litres in 2014 to 437.9 million litres in 2015. Similarly, volume of butter and ghee processed increased by 14.0 per cent to 1,646.4 tonnes in 2015. During the year under review, the number of all categories of livestock slaughtered increased by 7.6 per cent.

8.24. **Agricultural Training**: Table 8.20 gives detailed information on enrolment numbers at various institutions that offer agricultural training at degree, diploma, certificate and short-term vocational courses. In 2015, enrolment for agriculture training courses showed a mixed performance. Enrolment of trainees in the universities has been on an upward trend over the past five years. During the year under review, enrolment for degree courses increased by 24.8 per cent to 15,220 trainees. Enrolment of male trainees continued to be higher than that of female trainees. Enrolment of diploma level trainees at Egerton University continued to decline, decreasing from 1,470 in 2014 to 1,124 trainees in 2015. Animal health training colleges recorded an increase of 151 trainees from 560 in 2014 to 711 in 2015. Demand for short term vocational courses increased from 372 in 2014 to 396 in 2015.

8.25. Information on the number of societies and unions by type is presented in Table 8.21. During the year under review, the number of societies and unions increased by 529 from 16,969 in 2014 to 17,498. Agricultural societies increased by 111 new societies from 5,340 in 2014 to 5,451 in 2015. There were 418 additional non-agricultural societies registered from 11,530 in 2014 to 11,948 in 2015, of which 322 were savings and credit.

8.26. Table 8.22 presents data on sales of agricultural produce from co-operative societies and the percentage share to marketed production. In 2015, the total value of sales from co-operative societies slightly increased to KSh 10,509 million from KSh 10,496 million in 2014, mainly due to revenues from milk sales. The decline in the share of milk marketed through cooperatives from 29.2 per cent in 2014 to 26.6 per cent in 2015 may be a reflection of availability of alternative milk market channels.

8.27. The Food Balance Sheet (FBS) presents a comprehensive picture of the pattern of a country's food supply situation during a specific reference period. The FBS shows the sources of supply and respective utilization for each food item. The food supply is presented in terms of Per Caput Daily Supply of calories, proteins and fats. These are obtained by subjecting the total food supply to relevant food conversion factors and averaging for the total population during the reference period. Further, the country's dependence on own production is monitored by the Self Sufficiency Ratio (SSR). The Import Dependency Ratio (IDR) monitors the country's dependence on imported food commodities.

FBS Indicators

8.28. Table 8.23 shows the Food Balance Sheet (FBS) indicators trend for the period 2011 to 2015. The Per Caput Daily Supply of Calories improved modestly from 2,202 kilo calories in 2014 to 2,293 kilo calories in 2015. During the review period, per caput supply of proteins and fats improved to 69 grammes and 47 grammes, respectively. The improvement in the FBS indicators is consistent with increase in agricultural production during the year 2015. As shown in the FBS, vegetable products (which include all food commodities other than animal products) have over the years remained the preferred foods, contributing 1,979 kilo calories in 2015 compared to 313 kilo calories for animal products.

8.29. The SSR improved slightly from 74.4 per cent in 2014 to 75.2 per cent in 2015. The SSR for vegetable increased by 0.6 per cent to 72.1 per cent in 2015 compared to 2014. The country's level of self sufficiency on animal products improved from 99.9 per cent in 2014 to 100.0 per cent in 2015. The level of dependency on imported foods slowed from 29.2 per cent in 2014 to 28.3 per cent in 2015. Over the years, most imported food supplies are vegetable products. In 2015, IDR for vegetables declined slightly to 31.7 per cent. This indicates that during the review period, the country depended slightly less on imports of vegetables compared to 2014. Figures 8.4 and 8.5 present SSR and IDR; and caloric supply by main food groups for 2015 while Tables 8.24(a) and 8.24(b) depict the food balance situation for the last two years.

Chapter 9

Environment and Natural Resources

The country's level of development and prospects for economic prosperity are influenced by the sustainable utilization of its diverse natural resource endowment. Increased human socio-economic activities are likely to deplete the resource base and cause environmental degradation. In this regard, the Government continued to review and enforce policy measures that govern the exploitation, management and conservation of the environment and natural resources. During the review period, the Environment Management and Co-ordination Act 2015 (Amendment) was enacted to facilitate effective management of the environment and natural resources.

9.2. In 2015, there was mixed performance in the selected environmental and natural resources indicators. Area under forest plantation stocking increased marginally to 130.5 thousand hectares from 129.4 thousand hectares in 2014. However, the total mineral output declined by 11.3 per cent from 1,772.9 thousand metric tonnes in 2014 to 1,572.1 thousand metric tonnes in 2015. The decline in production was offset by good prices for gemstones and titanium ore, resulting in a 14.7 per cent rise in value of minerals from KSh 21.1 billion in 2014 to 24.2 billion in 2015. The total output value of fish decreased slightly from KSh 22.4 billion in 2014 to KSh 22.2 billion in 2015, occasioned by reduced fish landings.

9.3. Total development expenditure on water supplies and related services by the national government is expected to rise from KSh 32.5 billion in 2014/15 to KSh 41.3 billion in 2015/16. The projected expenditure on environment protection by the county governments is expected to more than triple from KSh 5.2 billion in 2014/15 to KSh 16.6 billion in 2015/16.

and Natural Resources **Gross Value** Added

Environment 9.4. The Gross Value Added (GVA) of selected activities under the environment and natural resources sector are shown in Table 9.1. Forestry and logging continued to contribute the highest share of environment and natural resources sector GVA in 2015. Fishing and aquaculture, water supply and, mining and quarrying related industries contributed 18.5, 20.8 and 23.9 per cent of the Sector's GVA, respectively.

Table 9.1: Trends in Environment and Natural Resources Gross Value Added., 2011/12-2015/16

^{*} Provisional

Water 9.5. The Government continued to focus on improving the management and protection Supply of water resources for domestic, agricultural and industrial use; through construction of new water supply projects, rehabilitation and, expansion of existing water supplies. Major water supplies projects completed in 2015 included: Kithuru, Kathangachiini, Othaya, Mukurweini, Lumakanda - Kipkaren and Mutito-Thua-Kinakoni. In addition, small scale projects such as drilling of boreholes and construction of small dams and water pans, were undertaken by the county governments. Water Services Providers (WSPs), which fall under the county government, also continued to provide water services in the period under review. Consequently, water supply coverage across the country is expected to increase.

9.6. Table 9.2 shows the number of Water Purification Points (WPPs) and Boreholes drilled from 2011/12 to 2015/16. The number of WPPs is expected to increase by eight to 242 in 2015/16. During the year under review, the total number of boreholes drilled across the country is expected to increase from 607 boreholes in 2014/15 to 628 boreholes in 2015/16.

Table 9.2: Water Purification Points and Boreholes Drilled, 2011/12-2015/16

					Number
	2011/12	2012/13	2013/14	2014/15	2015/16*

Public	86	99	74	13	28
Private Sector			302	594	600

Source: Ministry of Water and Irrigation

9.7. Development expenditure by the national government on water supplies and related services over the period 2011/12 to 2015/16 is presented in Table 9.3. Total expenditure is expected to increase by 26.7 per cent from KSh 32.6 billion in 2014/15 to KSh 41.3 billion in 2015/16. The increase is attributed to concerted efforts by the government and development partners to enhance water coverage, sewerage infrastructure, irrigation and dam construction. Water development will account for more than half of the total expenditure on water supplies in 2015/16.

¹ Includes sewerage and waste management

^{*} Provisional

Data not available

9.8. Development expenditure by the National Irrigation Board (NIB) is expected to rise by 15.3 per cent to KSh12.6 billion in 2015/2016, partly due to implementation of the 10,000 acres of the Galana-Kulalu irrigation project. Similarly, expenditure on Irrigation development and rural water supplies is expected to rise from KSh 0.2 billion and KSh 1.3 billion in 2014/15 to KSh 2.2 billion and KSh 1.4 billion in 2015/16, respectively. However, expenditure on National Water Conservation and Pipeline Corporation is expected to decline from KSh 2.5 billion in 2014/15 to KSh 1.2 billion in 2015/16, partly due to ceding of some functions to the county governments.

Table 9.3: Development Expenditure on Water Supplies and Related Services by the National Government. 2011/12-2015/16

					KSh Million
Item	2011/12	2012/13	2013/14	2014/15	2015/16*

Source: Ministry of Water and Irrigation

Fisheries 9.9. There was a decline in production of fish from both fresh water and marine sources in 2015, albeit a minimal fluctuation in the value of fish landed. Fish production from fresh water sources remained the major source of fish landed, accounting for over 90 per cent of the total output in the year under review. The high cost of acquiring deep water facilities coupled with inadequate deep water fishing technology remains a limiting factor in the growth of fish production from marine sources.

> 9.10. Details of quantity and value of fish landed are given in Table 9.4. During the year under review, total fish output declined by 14.3 per cent from 168.4 thousand metric tonnes in 2014 to 144.3 thousand metric tonnes in 2015. Fish landed from fresh water sources dropped by 15.0 per cent from 159.3 thousand metric tonnes in 2014 to 135.4 thousand metric tonnes in 2015, mainly attributed to decline in fish catches from Lake Victoria and fish farming. The decline in landings from Lake Victoria is partly explained by dwindling stocks of the Nile Perch species in the lake. Fish output from fish farming reduced by 22.4 per cent from 24.1 thousand metric tonnes in 2014 to 18.7 thousand metric tonnes in 2015. This was partly attributed to failure by farmers to re-stock fish ponds in 2015.

> 9.11. Total earnings decreased slightly from KSh 22.4 billion in 2014 to KSh 22.2 billion in 2015. Earnings from fresh water fish slightly dropped from KSh 20.9 billion in 2014 to KSh 20.5 billion in 2015. However, earnings from Crustaceans and Molluscs increased substantially in 2015 compared to 2014.

Forestry

9.12. Increasing tree cover to the set target of 10 per cent of total land area remained a focus for the National Government in 2015. Some of the achievements in the period under review included enhanced public-private partnerships in forest management, restoration of degraded forests and continued tree planting campaigns on individual farms and schools.

9.13. The forest plantation stocking by the Government for the period 2011 to 2015 is shown in Table 9.5. The total area under plantation stocking increased to 130.5 thousand hectares in 2015 from 129.4 thousand hectares in 2014. Area clear-felled decreased by 23.0 per cent from 6.1 thousand hectares in 2014 to 4.7 thousand hectares in 2015. The decline was partly attributed to the heavy rains experienced during the year, hampering access to the forests. Area planted increased by 40.8 per cent from 7.1 thousand hectares in 2014 to 10.0 thousand hectares in 2015 as a result of favorable weather, availability of seedlings and community participation in planting trees in government forests. The forest plantation stocking area affected by planting failures and/or fire damages increased by 3.2 thousand hectares to 4.2 thousand hectares in 2015.

9.14. Table 9.6 gives the recorded sale of forest products from government forests for the years 2011 to 2015. Total sales of timber decreased by 47.1 per cent from 1,197.6 thousand true cubic metres in 2014 to 633.5 thousand true cubic metres in 2015. The decline is mainly explained by the huge reduction in harvesting of softwood timber from 1,167.0 thousand true cubic metres in 2014 to 621.1 thousand true cubic metres in 2015. Sale of hardwood timber more than halved from 30.6 thousand true cubic metres in 2014 to 12.4 thousand true cubic metres in 2015. The reported quantity of hardwood tree species was as a result of clearing part of the natural forests for electricity way-leaves. Sale of fuel wood/charcoal, normally obtained as waste from the sale of forest products, stood at 43.7 thousand stacked cubic metres in 2015. The number of power and telegraph poles decreased from 43.3 thousand in 2014 to 34.5 thousand in 2015.

Table 9.6: Recorded Sale of Government Forest Products, 2011 - 2015

Mining 9.15. In 2015, the Government through the Ministry of Mining launched an automated system to manage licensing of mineral prospecting. The online transactional mining register will be used to process fresh applications for mining rights and hence improve efficiency of operations. Implementation of the new mining system is geared towards enhancing transparency and accountability while providing a platform to attract, guide and encourage private investors to tap into the country's huge mineral potential.

9.16. The quantity and value of mineral production over the last five years is reflected in Table 9.7. Total mineral output declined by 11.3 per cent from 1,772.9 thousand tonnes in 2014 to 1,572.1 thousand tonnes in 2015. Production of soda ash dropped by 27.9 per cent from 409.8 thousand tonnes in 2014 to 295.4 thousand tonnes in 2015, as a result of the continued closure of one of the processing plants, and the siltation of Lake Magadi. Over the last four years, fluorspar output has been declining to stand at 70.1 thousand tonnes in 2015, mainly

^{*} Provisional

¹ Opening stock at the beginning of the year

^{*} Provisional.

attributed to unfavourable world export prices since the year 2013.

9.17. Production of salt, carbon dioxide, gold, gemstones and, illmenite and rutile titanium ores increased during the period under review. Production of gemstones increased significantly from 247.3 tonnes in 2014 to 442.0 tonnes in 2015. This was as a result of increased demand of low grade ruby, sapphire and opals from Sri Lanka, Thailand and India in the year under review. Illmenite and rutile registered growths in production of 58.1 per cent and 50.5 per cent, respectively in 2015. In contrast, production of zircon which is also a titanium ore declined by 35.3 per cent to 26.0 thousand tonnes in 2015.

9.18. The overall value of mineral output rose by 14.7 per cent from KSh 21.1 billion in 2014 to KSh 24.2 billion in 2015. The increase was mainly attributed to high earnings from titanium minerals of illmenite, rutile and zircon in the export markets. Earnings from titanium ores accounted for more than half of the minerals value.

9.19. The average export prices of soda ash, fluorspar and titanium ore and its concentrates over the period 2011 to 2015 are presented in Table 9.8. The export price per tonne of soda ash rose by 15.4 per cent to KSh 22,825 per tonne while that of fluorspar improved by 1.7 per cent to KSh 20,368 per tonne in 2015, but remained unfavorable. However, the average export price per tonne of titanium ore and its concentrates declined by 5.4 per cent to KSh 19,100.

Refuse 9.20. The total budgeted expenditure for refuse management by Nairobi City County is Management expected to increase by 8.5 per cent from KSh 419.1 million in 2014/15 to KSh 454.6 million in 2015/16 as shown in Table 9.9. The increase will mainly be driven by expenditure on refuse removal which is expected to increase by 11.8 percent to KSh 285.0 million in 2015/16. Refuse removal accounted for more than 60 per cent of the total expenditure. Expenditure on cleaning and administration is however, expected to decline from KSh143.0 million in 2014/15 to KSh139.6 million in 2015/16. The budgeted expenditure for cleaning- general in 2015/16 is expected to increase tremendously by 43.5 per cent to KSh 30.0 million in 2015/16 on account of payments incurred during engagement of the youth in monthly street clean up exercises.

Wildlife 9.21. The diverse wildlife species in the country continues to attract both domestic and international visitors. Consequently, the Government has continued to implement measures aimed at combating poaching and illegal trade in wildlife products.

> 9.22. Wildlife population by species within the Kenyan rangelands, derived through the use of aerial sample surveys is shown in Table 9.10. The population of buffaloes, Burchell's zebras, elands, Thompson's gazelles, warthogs and impalas increased in the review period. Conversely, the population of elephants, giraffes, wildebeests, gerenuks, ostriches, oryx and waterbucks declined over the same period. The decline in some of the wildlife herbivores was mainly attributed to cross border movements in search of vegetation and poaching of some of the species like Elephants. Other species that showed miniminal variation in numbers were Grant's gazelle, Grevy zebra, Hunters' hartebeest, kongoni, kudu and topi.

Environmental 9.23. The number of projects with activities of high environmental risk reported to the Impact National Environment Management Authority (NEMA) in the year 2015 is shown in Table Assessments 9.11. There was a general upward trend in the number of Environmental Impact Assessments (EIAs) in most sectors except Agriculture and Forestry; Commerce and Industry; and Mining and Quarrying. The transport sector reported the highest number of EIAs in 2015 which was attributed to increased road construction, Base Transmission Stations (BTS) and fiber optic cabling. About two thirds of the EIAs were issued to Transport and Communication; and Human Settlements and Infrastructure.

> 9.24. Table 9.11 shows that the number of EIAs reported from the Energy sector increased from 326 in 2014 to 399 in 2015, mainly attributed to the rural electricity expansion program by the government. The number of EIAs reported under the Mining and Quarrying sector remained at 27 due to minimal activities in the sector following temporary suspension of licensing to mining enterprises.

^{*} Provisional

Table 9.11: Number of High Risk Environment Impact Assessments (EIA) by Sector, 2011-2015

Weather Patterns

9.25. The 2015 long rains distribution, both in time and space, was generally good over most parts of Western and Central Kenya as depicted in Figure 9.2. Sunny and dry weather conditions were, however, dominant over the entire country during the onset month of March 2015. Most of the rainfall was recorded during the second half of April and throughout the month of May 2015.

Figure 9.1: Long Rains (March to May) Performance, 2015

Source:Kenya Meteorological Deparment

TOT- Total rainfall

LTM - Long Term Mean

MAM -March-April-May

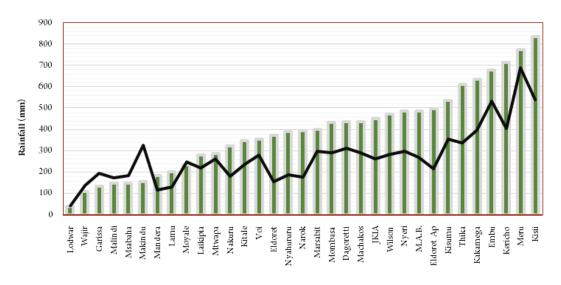

M.A.B-Moi Air Base

9.26. The assessment of the March-April-May (MAM) 'long rains' depicted generally good rainfall over most parts of the country. Most meteorological stations recorded rainfall amounts that were above 50 per cent of their Long-Term Means (LTMs). Kakamega, Moi Air Base, Dagoretti, Embu, Kisumu, Wilson Airport, and Kitale stations received rainfall that was above their LTM. However, Wajir, Mandera, Machakos, Nyahururu, Laikipia, Marsabit, Nyeri, Nakuru and Moyale recorded rainfall that was well below their LTM.

^{*} Provisional

Figure 9.2: Short Rains (October to December) Performance, 2015

Weather Stations

Source: Kenya Meteorological Deparment

TOT- Total rainfall

LTM - Long Term Mean

9.27. Most parts of the country experienced heavy and continuous rainfall during the October-November-December (OND) 2015 "short-rains" season. The rainfall was especially heavy over the Western and Central regions as well as several parts of North Eastern, South Eastern and the Coastal strip. This resulted in massive flooding, landslides/mudslides and loss of lives and property as well as destruction of the infrastructure. The areas that were significantly affected included counties in the Western, Rift Valley and North Eastern parts of Kenya.

9.28. Most meteorological stations recorded rainfall amounts well above 125 per cent of their seasonal LTMs. Eldoret station, for example, recorded more than double the amount normally recorded at the station during the OND season. Other stations that recorded very high amounts included Eldoret Airport, Narok and Nyahururu. Further analysis indicates that the rainfall amounts recorded in some parts of the country were comparable to those recorded during the El Niño episode of OND in 1997. Indeed, the rainfall at Kitale, Kisii, Kakamega and Nyahururu stations exceeded that of 1997. Elsewhere, Makindu in South Eastern Kenya and Garissa in North Eastern Kenya were the only stations in the entire country that experienced depressed rainfall of less than 75 per cent of their short rains LTMs.

in Environment and Natural Resources

Recent 9.29. Kenya has made remarkable steps towards achieving a green economy. Renewable **Developments** energy development and restoration of dilapidated forestry land are among the initiatives the country undertook towards transformation into a green economy. In 2015, the Government enhanced Public-Private Partnerships (PPPs) to reinforce the Intended Nationally Determined Contributions (INDC's) towards reducing the greenhouse gas emissions.

> 9.30. The Environment Management and Co-ordination Act (Amendment) No. 5 of 2015 was enacted with the aim of entrenching the county governments in environment and natural resources management. The Act recognizes the 'Polluter Pays Principle' that requires future projects to set aside funds to mitigate against any resulting pollution damage.

9.31. The 21st session of the United Nations Climate Change Conference, COP 21 was held in Paris, France in 2015. A major outcome of the Conference was the consensus to limit global warming to less than 2°C. The country commemorated the World Environment Day on 5th June 2015 in accordance with the global calendar of environmental events. The 2015 theme of 'Seven Billion Dreams, One Planet, Consume with Care' focused on building a more sustainable future for everyone all over the world in line with Sustainable Development Goals (SDGs).

Chapter 10

Energy

Overview The energy sector witnessed a steady rise in global crude oil and other liquid inventories in 2015. Murban crude prices decreased to an average of USD 52.53 per barrel in 2015, down from an average of USD 99.45 per barrel in 2014. The lowest price observed in 2015 was USD 37.25 per barrel recorded in December 2015, while the highest was recorded in May 2015 at USD 65.75 per barrel. This was mainly due to sustained excess supply of crude oil compared to global demand driven by slowed pace of growth in the Chinese economy, increased US production of shale oil and the over-supply by the Organization of the Petroleum Exporting Countries (OPEC). The over-supply by OPEC was due to a substantial increase in production by Iraq. The low international crude oil prices translated into cheaper refined petroleum products in the domestic market.

> 10.2. The volume of petroleum product imports increased marginally from 4,409.0 thousand tonnes in 2014 to 4,431.7 thousand tonnes in 2015. The total import bill for petroleum products however decreased by 32.6 per cent to KSh 226.1 billion during the same period.

> 10.3. Total installed electricity capacity increased by 6.3 per cent to 2,333.6 MW in 2015, while total electricity generation expanded by 4.1 per cent to 9,514.6 GWh during the same period. Demand for electricity increased from 7,415.4 million KWh in 2014 to 7,826.4 million KWh in 2015. The number of customers connected under the Rural Electrification Programme (REP) rose by 33.0 per cent to stand at 703,190 customers as at July 2015, up from 528,552 as at July 2014.

Petroleum

10.4. Table 10.1 presents the quantity and value of imports and exports of petroleum products for the period 2011 to 2015. Total quantity of petroleum products imports increased from 4,409.4 thousand tonnes in 2014 to 4,431.7 thousand tonnes in 2015. The import bill for petroleum products declined from KSh 335.7 billion in 2014 to stand at KSh 226.1 billion in 2015. This was mainly due to reduced oil prices in the international market.

10.5. The quantity of total petroleum product exports increased by 24.3 per cent to 765.5 thousand tonnes in 2015. Re-exports constituted 98.3 per cent of the total volume of petroleum product exports during the review period. The value of total petroleum product exports expanded by 12.0 per cent from KSh 53,165 million to KSh 59,543 million during the same period. The value of domestic exports of petroleum products increased by 9.3 per cent to stand at KSh 5,957.0 million, while that of re-exports rose by 12.3 per cent to KSh 59.5 billion in 2015. The value of petroleum products available for domestic market (net balance) dropped by 41.0 per cent to KSh 166,583 million in 2015 compared to KSh 282,507 million in 2014.

10.6. Table 10.2 shows the supply and demand for petroleum products for the period 2011 to 2015. Total demand for petroleum products rose to 4,742.7 thousand tonnes in 2015, mainly due to growth in domestic demand for illuminating kerosene, motor gasoline and light diesel oil which increased by 29.9, 22.5 and 20.9 per cent, respectively. Light diesel oil, the main type of fuel sold in the country, accounted for 43.9 per cent of the total domestic demand in 2015.

^{*} Provisional.

10.7. Net domestic sales of petroleum fuels by consumer category for the period 2011 to 2015 are shown in Table 10.3 and Figure 10.1. Net domestic sales of petroleum products increased significantly by 20.3 per cent to 4,738.5 thousand tonnes in 2015. During the period under review, retail pump outlets, road transport, industrial, commercial and other, and aviation (excluding Government.) were the main consumers contributing to the increase in net domestic sales of petroleum products, each contributing 623.7, 120.9 and 107.3 thousand tonnes respectively. Consumption of fuel for power generation declined by more than 60.0 per cent to stand at 32.3 thousand tonnes during the review period. The transport sector (roads and aviation - excluding Government) remain the main consumer of petroleum fuels, jointly accounting for 85.5 per cent of total sales in 2015 up from 84.3 per cent in 2014. Government consumption registered a decrease of 17.2 per cent in 2015 to 7.7 thousand tonnes from 9.3 thousand tonnes in 2014.

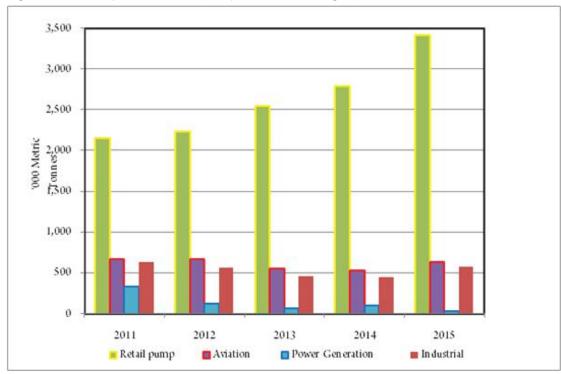

¹Adjustment for inventory changes and losses in production.

10.8. Table 10.4 presents wholesale prices of Petroleum Products in Mombasa for December 2011 to December 2015. In general, wholesale prices for all petroleum products were lower in 2015 compared to 2014 due to the prevailing low prices in the international market. Wholesale prices for illuminating kerosene declined substantially by 46.9 per cent from KSh 86,449 per tonne in December 2014 to KSh 45,890 per tonne in December 2015. Similarly, wholesale prices for premium motor gasoline decreased by 38.5 per cent from KSh 133,711 per tonne in December 2014 to KSh 82,240 per tonne in December 2015. Wholesale prices for Light diesel, mainly used by vehicles, dropped from KSh 104,097 per tonne in December 2014 to KSh 99,360 in December 2015.

10.9. Murban crude oil prices at the international market for the period 2011 to 2015 are shown in Table 10.5 and Figure 10.2. The price of Murban crude oil dropped significantly by over 47 per cent in 2015, from an average of USD 99.45 per barrel in 2014 to an average of USD 52.53 per barrel in 2015. This was mainly occasioned by the surge in supply over demand. The highest average crude oil price was USD 65.75 per barrel recorded in May 2015, while the lowest was USD 37.25 per barrel recorded in December 2015.

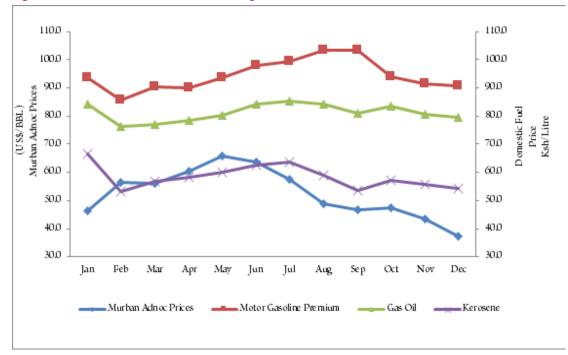

Figure 10.2: International Crude Oil Prices against Domestic Fuel Prices, 2015

10.10. There was a general decline in the average retail prices of petroleum products in 2015. This was occasioned by the fall in international petroleum prices as presented in Table 10.6. Domestic retail prices for illuminating kerosene recorded the largest decline of 25.0 per cent to KSh 54.23 per litre in December 2015. Similarly, the average price of liquefied petroleum gas (LPG) for a 13Kg cylinder dropped from KSh 3,018.45 per cylinder to KSh 2,369.46 per cylinder during the same period. The average retail price of gas oil and motor gasoline (premium) dropped by 13.4 per cent and 11.6 per cent, respectively, in the review period.

Electricity 10.11. Details of installed capacity and generation of electricity by source is shown in Table

10.7a, Table 10.7b and Figure 10.3. Installed capacity refers to the maximum theoretical electric output a power station can produce when operating at 100 per cent while Effective capacity is the capacity a power station is expected to achieve given current operating constraints. During the period under review, total installed capacity rose by 6.3 per cent from 2195.3 MW in 2014 to 2333.6 MW in 2015. Total effective capacity expanded by 8.0 per cent from 2,094.9 MW in 2014 to 2,263.2 MW in 2015. Co-generation effective capacity remained at the 2014 level of 21.5 MW, while thermal effective capacity expanded from 712.6 MW recorded in 2014 to 797.1 MW in 2015.

10.12. Total electricity generation increased from 9,138.6 GWh in 2014 to 9,514.6 GWh in 2015. Generation from geothermal plants shot up by 55.0 per cent to 4,520.6 GWh in 2015 due to installation of new geothermal plant, Orpower4 plant IV. Thermal generation declined significantly from 2,585.2 GWh to 1,412.2 GWh during the same period. Hydro and geothermal power accounted for 84.5 per cent of the total power generated in 2015.

¹ Megawatt = million watts = 1,000 kilowatts.

³1 Gigawatt hour = 1,000,000 kilowatt hours

10.13. Demand and supply balance of electricity are shown in Table 10.8 for the period 2011 to 2015. Total domestic demand for electricity increased by 57.8 GWh in 2015 from 7,768.6 GWh in 2014. Sales to large and medium commercial and industrial consumers increased by 3.2 per cent, accounting for 42.2 per cent of total demand in 2015. Similarly, domestic and small commercial consumption rose by 9.8 per cent to account for 34.2 per cent of the total demand.

10.14. Demand for electricity under rural electrification decreased from 504.7 GWh in 2014 to 496.6 GWh in 2015. Local electricity generation increased by 5.3 per cent from 8,980.3 GWh to 9,456.3 GWh in 2015. Exports to Uganda and Tanzania rose substantially by 51.6 per cent to stand at 46.7 GWh during the same period. In contrast, total electricity imports from Uganda and Tanzania decreased by 62.9 per cent from 158.4 GWh in 2014 to 58.8 GWh in 2015. Transmission and distributive losses decreased by 3.0 per cent to 1,641.5 GWh in 2015.

Table 10.8: Electricity Supply and Demand, 2011-2015

10.15. Demand and supply of commercial energy by primary source for the period 2011 to 2015 is presented in Table 10.9. Total energy consumption increased by 27.7 per cent to 5,883.7 thousand tonnes of oil equivalent in 2015. Consumption of liquid oil increased by 20.3 per cent to 4,738.5 thousand tonnes of oil equivalent while that of hydro and geothermal energy rose by 21.9 per cent to 696.6 thousand tonnes of oil equivalent during the review period. This was mainly due to a 54.9 per cent increase in local production of geothermal power in 2015. Consumption of coal and coke also expanded by 6.1 per cent from 328.7 thousand tonnes to 348.6 thousand tonnes of equivalent oil in the review period.

Table 10.9: Production, Trade and Consumption of Energy¹ by Primary Sources, 2011-2015

^{*} Provisional.

¹ Excludes wood fuel and charcoal.

10.16. Local production of energy as a percentage of total energy consumption increased by 11.8 per cent in 2015. Energy consumption per capita increased by 18.4 per cent to 133.2 kilogramme equivalent of oil in 2015.

Rural Electrification

Developments in the Energy Sector

10.17. In 2014/15, Rural Electrification Authority (REA) targeted to supply electricity to all un-electrified primary schools in preparation for the implementation of the class one laptop programme in public primary schools. In 2015/16, the Government implemented the Last Mile Connectivity Project which aims at increasing electricity access to Kenyans. Through this initiative, REA was to exploit to the maximum the existing distribution transformers through extension of low voltage network to reach households lying within transformers protection distance.

10.18. In 2015, REA financed electricity supply to a total of 21,487 public primary schools, 17,809 on grid and 3,678 on solar. Further, 490 other public facilities were also connected to the grid during the period. In 2015/16, major electrification projects in progress include connection of 3,638 public primary schools to the national grid and 286 public primary schools to electricity through solar.

10.19. The number of customers connected under the rural electrification programme expanded by 33.0 per cent to 703,190 customers as at July 2015 up from 528,552 customers as at July 2014. Electricity sold increased by 15.6 per cent from 454 million units in 2013/14 to 525 million units in 2014/2015. This resulted in revenue growth of 11.4 per cent from KSh 7,229 million to KSh 8,051 million during the review period.

10.20. Olkaria 1V (unit 1 & 2) and Olkaria 1(unit 4 & 5) and wellhead Geothermal projects under Vision 2030 Flagship Projects, with a total capacity of 330.6 MW; Ngong 1 Wind Phase 2-6.8 MW, Ngong 11 Wind-13.6 MW plants were the major electric-power energy projects implemented and commissioned in 2014/2015.Olkaria 1 Unit 6, Olkaria 1 rehabilitation, Olkaria V, Olkaria V1, wellhead Units and Meru Wind Project Phase 1 with installed capacities of 70, 51, 140, 140, 350 and 100 MW, respectively are the power generation projects under construction.

Progress in Oil Exploration

10.21. In the third quarter of 2015, Tullow finalized the drilling of three wells in the South Lokichar Basin in Blocks 10BB and 13T. In the same period, an extensive appraisal programme of the Ngamia and Amosing fields in the South Lokichar Basin Block 10BB continued. These oil fields are expected to form the foundation for a phased development of the South Lokichar Basin. One drilling rig is currently active in the South Lokichar Basin. Towards the end of December 2015, Tullow begun the process of oil exploration in Block 12A within Kerio Basin.

10.22. Maersk Oil, one of the leading independent oil and gas companies in the world, acquired half of Africa Oil Corporation's shares in three onshore exploration licenses in Kenya in the third quarter of 2015. This was one of the most significant oil and gas transaction in Africa in 2015.

Chapter 11

Manufacturing

Overview

The manufacturing sector grew by 3.5 per cent in 2015 compared to 3.2 per cent recorded in 2014. The growth was partly attributed to reduced cost of inputs such as petroleum products and electricity. Overall, credit to the manufacturing sector increased from KSh 237,422 million in 2014 to KSh 290,069 million in 2015. The value of manufacturing projects approved by industrial financial institutions also increased to KSh 1,092.0 million in 2015 from KSh 569.1 million in 2014. The sector was negatively affected by cheap imports, high cost of capital and disincentives to export because of delayed Value Added Tax refunds.

- 11.2. In 2015, enterprises operating under Export Processing Zone (EPZ) program recorded increase in employment, exports, imports, and expenditure on local goods and services. Total EPZ sales went up by 12.1 per cent from KSh 57.2 billion in 2014 to KSh 64.1 billion in 2015.
- 11.3. Producer prices as measured by Producer Price Index (PPI) increased by 3.9 per cent from 109.17 in 2014 to 113.43 in 2015. The increase was mainly due to high cost of imported raw materials arising from depreciation of the Kenya Shilling against major currencies.
- 11.4. Formal employment in the manufacturing sector went up by 2.7 per cent from 287.4 thousand persons in 2014 to 295.4 thousand persons in 2015. The sector contributed 11.9 per cent of the formal jobs in the country. Food products and beverage industry contributed about one third of employment in the manufacturing sector.

Output

Manufacturing 11.5. Table 11.1 presents details of nominal output, intermediate consumption, value added and compensation of employees for the manufacturing sector. Intermediate consumption grew by 3.9 per cent compared to 4.7 per cent in 2014. The slowed growth was due to lower cost of energy in 2015. Value added increased by 19.4 per cent to KSh 644.1 billion. As a result, value of output at current prices increased by 8.5 per cent to KSh 1,986.7 billion in 2015.

Table 11.1: Manufacturing Output, Compensation of Employees and Value Added, 2011-2015

^{*} Provisional.

Quantum 11.6. The manufacturing sector quantum index (volume) recorded a slower growth of 3.9 per Index cent in 2015 compared to 6.3 per cent in 2014. Most industries in the sector, recorded growth, key among them being the manufacture of pharmaceutical products; beverages; meat and meat products; and non-metallic minerals and plastic products. There was a notable decline in fish processing; other food products, which include tea and coffee; tobacco products; leather

and related products; rubber products and basic metal. Tables 11.2 and 11.3 present quantities of selected products and quantum index of manufacturing sector.

- 11.7. Production of meat and meat products registered a 9.3 per cent growth in 2015. Beef production went up from 419.1 thousand tonnes in 2014 to 459.4 thousand tonnes in 2015. Production of sausages and processed chicken went up by 10.7 per cent and 0.1 per cent, respectively. However, production of processed fish dropped significantly by 21.8 per cent. As a result, the quantities of fish and fish preparations exported declined by 29.0 per cent from 15,213 tonnes in 2014 to 10,801 tonnes in 2015.
- 11.8. Preparation and preservation of fruits and vegetables increased by 2.3 per cent in 2015 after a contraction of 15.9 per cent in 2014. Quantities of prepared and preserved vegetables went up by 12.1 per cent while that of prepared and processed fruits dropped by 2.3 per cent during the year under review.
- 11.9. Manufacture of animal and vegetable fats and oils increased by 6.5 per cent in 2015. The amount of processed vegetable oils increased by 12.2 per cent and that of vegetable fats grew marginally by 0.8 per cent during the review period. There has been a rising demand for vegetable oils compared to vegetable fats over the years mainly due to health awareness and concerns.
- 11.10. Production of dairy products registered a growth of 8.2 per cent in 2015. Quantity of processed milk increased by 4.3 per cent from 419.3 million litres in 2014 to 437.5 million litres in 2015. The rise is attributable to favourable weather conditions in 2015, which led to increase in pasture and fodder. Production of yoghurt and other fermented milk went up significantly by 24.5 per cent during the same period.
- 11.11. Grain mill products recorded an impressive growth of 7.8 per cent in 2015 mainly driven by increased processing of wheat flour which grew by 11.1 per cent from 988.7 thousand tonnes in 2014 to 1,098.6 thousand tonnes in 2015. Maize milling in the formal sector rose marginally by 1.7 per cent while milled rice went up by 3.1 per cent from 60.5 thousand tonnes in 2014 to 62.4 thousand tonnes in 2015. Production of animal feeds grew by 4.5 per cent. Manufacture of bakery products increased by 7.2 per cent in 2015, of which biscuits and bread went up by 9.5 per cent and 7.0 per cent, respectively.
- 11.12. Production of sugar increased by 6.6 per cent from 592.7 thousand tonnes in 2014 to 632.0 thousand tonnes in 2015 mainly attributable to improved supply of cane. However, the sugar industry is still under global and regional threat due to high cost of production, and is therefore uncompetitive in the region and locally. Other challenges are low yields; obsolete milling technology, which leads to inefficiency; and poor transport infrastructure in accessing the cane from the farms. Manufacture of cocoa, chocolate and sugar confectionery registered a marginal growth of 0.8 per cent in 2015. Sweets and chewing gum posted growths of 1.2 per cent and 1.0 per cent, respectively.

Table 11.2: Production of Selected Commodities 2011-2015

Commodity	Units	2011	2012	2013	2014	2015*
Processed Milk	Million litres	375.8	325.4	350.4	419.1	437.5

^{*} Provisional

- 11.13. There was a decline in quantities of processed tea and coffee, classified under food products not elsewhere classified. Tea processed declined by 10.3 per cent from 445.1 thousand tonnes in 2014 to 399.2 thousand tonnes in 2015. Production of semi-processed coffee dropped by 15.9 per cent from 49.5 thousand tonnes in 2014 to 41.6 thousand tonnes in 2015. However, production of roasted coffee went up by 7.8 per in 2015. During the same period, processed refined salt increased by 8.7 per cent.
- 11.14. Manufacture of beverages grew by 22.0 per cent in 2015 mainly driven by production of spirits and beer, which went up by 27.9 and 28.9 per cent, respectively. The remarkable growth in beer production is attributed to a 90 per cent remission of excise duty for beer made from domestically grown sorghum, millet or cassava. Volume of carbonated drinks produced increased by 8.5 per cent from 457.5 million litres in 2014 to 496.0 million litres in 2015. During the same period, production of mineral drinking water grew by 11.7 per cent.
- 11.15. Manufacture of tobacco products went down by 4.4 per cent in 2015. Production of cigarettes declined by 4.7 per cent to 27.2 million milles. However, other manufactured tobacco products increased by 18.7 per cent leading to an increase of 326 .6 thousand tonnes in exports.
- 11.16. Textile production went up by 8.1 per cent while that of twine, cordage and rope recovered to grow by 25.1 per cent in 2015. Over the same period, manufacture of blankets increased by 11.7 per cent. On the other hand, production of woven fabrics and knitting wool declined by 0.3 per cent and 8.2 per cent, respectively.
- 11.17. Production of wearing apparel registered an impressive growth of 10.8 per cent in 2015 mainly driven by T-shirt production, which went up by 19.0 per cent. On the other hand, production of knitted fabrics and shirts dropped by 7.8 per cent and 2.3 per cent, respectively.
- 11.18. Leather and related products recorded a decline of 12.2 per cent in 2015. This was due to a drop of 16.3 per cent in finished leather products. Quantities of exported leather dropped by 11.0 per cent in 2015 to 23,329 tonnes. The drop in exported leather products may be attributed to the imposition of 80 per cent export tariff on raw hides and skin to encourage value addition. However, production of shoes with uppers of leather went up marginally by 0.8 per cent while production of shoes with uppers of plastic and rubber increased by 2.0 per cent. The sluggish growth in the shoes industry is attributed to competition from imports of new low cost leather and non-leather footwear and second hand footwear.
- 11.19. Manufacture of wood and products of wood, which are mainly plywood and block boards registered a 9.2 per cent growth in 2015. Production of paper and paper products increased marginally by 0.4 per cent. Manufacture of toilet paper and exercise books went up by 2.3 per cent and 1.7 per cent, respectively. However, production of corrugated cartons went down by 3.7 per cent during the review period. In the same year, printing and production of recorded media decreased by 0.1 per cent.
- 11.20. Output of chemical and chemical products grew by 2.1 per cent in 2015 while industrial spirits and industrial gases increased by 17.9 per cent and 0.2 per cent, respectively. Manufacture of paints went up by 6.2 per cent from 47.8 million litres in 2014 to 50.7 million litres in 2015. Production of soap, detergent and shoe polish increased by 2.4, 1.8 and 0.2 per cent, respectively. On the other hand, production of sodium silicate dropped by 1.2 per cent.

- 11.21. Manufacture of pharmaceutical products registered a growth of 23.9 per cent during the review period. Production of syrup, tablets and capsules went up by 26.4, 24.7 and 20.4 per cent respectively.
- 11.22. Production of rubber and plastic products rose by 5.7 per cent in 2015 driven by polythene bags, plastic pipes and plastic tanks, which went up by 13.7, 8.0 and 6.1 per cent, respectively. However, production of motor vehicle tyres dropped further by 17.9 per cent for the second consecutive year. The industry has experienced depressed growth due to competition from imports.
- 11.23. Production of basic metals went down by 5.1 per cent during the period under review. This is attributed to a decline of 9.7 per cent in the production of corrugated iron sheets from 284.5 thousand tonnes in 2014 to 256.9 thousand tonnes in 2015. The continued drop is partly linked to imports, which increased by 27.9 per cent to 1.5 million tonnes and the introduction of new roofing materials such as stone coated steel roofing sheets, and asphalt shingles in the market. On the other hand, manufacture of iron bar, rods and angles decelerated by 4.3 per cent during the review period.
- 11.24. Manufacture of fabricated metal products went down by 9.5 per cent in 2015 partly due to the decline in production of steel structures, which went down by 7.1 per cent. Over the same period, production of aluminium circles(sufurias) and nails dropped by 20.3 per cent and 3.8 per cent, respectively. During the review period, imports of structure and parts of structures went up by 43.2 per cent to 95.1 thousand tonnes in 2015 from 66.4 thousand tonnes in 2014.
- 11.25. Production of electrical equipment registered a marginal drop of 0.1 per cent in 2015 mainly due to a decline of 4.4 per cent in copper and aluminium cables occasioned by the influx of counterfeits. Manufacture of primary car batteries increased by 6.3 per cent while that of machinery and equipment not elsewhere classified went up by 4.4 per cent.
- 11.26. Motor vehicle, trailers and semi-trailers production went up by 6.8 per cent in 2015. The number of assembled motor vehicles increased by 7.0 per cent from 9,514 vehicles in 2014 to 10,181 vehicles in 2015. Similarly, production of trailers and semi-trailers increased by 13.2 per cent while that of motor vehicle bodies went up by 1.3 per cent.
- 11.27. Manufacture of furniture sub-sector registered a growth of 20.6 per cent in 2015 on account of production of mattresses, which went up by 31.2 per cent. Manufacture of pens, which are categorized under other manufacturing not elsewhere classified, increased by 20.4 per cent. Repair and installation of machinery and equipment went up by 3.6 per cent.
- 11.28. Manufacture of other non-metallic mineral products has continued to record vibrant growth over the years registering an increase of 8.9 per cent in 2015. The number of manufactured glass bottles went up by 24.3 per cent during the review period.

Cement 11.29. Cement production went up by 8.0 per cent from 5,882.5 thousand tonnes in 2014 to **Production** 6,352.9 thousand tonnes in 2015, as shown in Table 11.4. Cement consumption and stocks and rose to 5,708.8 thousand tonnes in 2015 from 5,196.7 thousand tonnes in 2014 as a result of Utilisation increased demand in the construction sector. However, total exports of cement declined by 5.7 per cent to 681.7 thousand tonnes in 2015. Exports of cement to Uganda and Tanzania

decreased to 487.4 thousand tonnes in 2015 from 547.7 thousand tonnes in 2014. On the other hand, imports of cement rose marginally to 37.6 thousand tonnes in 2015.

Table 11.4: Cement Production and Utilization, 2011-2015

'000 Tonnes

				Exports to		
Year	Production	Imports	Consumption and Stocks	Uganda and Tanzania	All Other Countries	
2011	4,478.4	53.0	3,870.9	583.1	125.3	
2012	4,693.7	35.3	3,991.2	561.7	176.7	
2013	5,059.1	34.4	4,266.5	594.0	233.9	
2014	5,882.5	36.4	5,196.7	547.7	175.2	
2015*	6,352.9	37.6	5,708.8	487.4	194.2	

Provisional.

Credit to 11.30. The number of manufacturing projects approved by financial institutions and other Manufacturing commercial banks is shown in Table 11.5. Approved expenditure increased by 22.4 per cent Sector from KSh 238.0 billion in 2014 to KSh 291.2 billion in 2015. The value of projects approved by industrial financial institutions almost doubled to KSh 1,092.0 million in 2015 from KSh 569.1 million in 2014 as a result of increased lending by Development Bank of Kenya (DBK). Total number of projects endorsed by the financial institutions decreased from 549 in 2014 to 251 in 2015. Increased lending during the year under review, coupled with a decrease in the number of projects approved is an indication that there was an increase in average loan size per enterprise.

11.31. Industrial Development Bank (IDB) Limited approved five projects of which two were green field projects to finance acquisition of machinery and working capital amounting to KSh 252.0 million in 2015. This was an increase from three manufacturing projects approved in 2014 valued at KSh 74.2 million.

11.32. Development Bank of Kenya (DBK) recorded an increase in value of approved projects from KSh 66.6 million in 2014 to KSh 341.0 million in 2015. DBK approved six projects to finance expansion and product diversification projects in food, textile, steel and plastics manufacturing activities. Industrial and Commercial Development Corporation (ICDC)

¹ Source: Central Bank of Kenya (excludes DBK)

approved seven manufacturing projects worth KSh 378.2 million in 2015 mainly in food processing.

11.33. Table 11.6 shows projects by manufacturing industry approved by Kenya Industrial Estates (KIE) for the period 2011 to 2015. KIE advances credit to entrepreneurs with a view to financing and developing small and micro enterprises. Loans advanced decreased to KSh 120.8 million in 2015 down from KSh 194.3 million in 2014 mainly in the manufacture of food industry. The number of manufacturing projects funded by KIE reduced from 543 in 2014 to 233 in 2015.

11.34. The number of manufacturing projects approved by Kenya Investment Authority increased from 19 in 2014 to 50 in 2015. The value of these investment projects increased to KSh 8.8 billion in 2015 from KSh 7.4 billion in 2014. In 2015, 68.3 per cent of the total capital investments were financed locally.

Export 11.35. The performance of some selected EPZ indicators in the last five years is presented in **Processing** Table 11.7. In 2015, the EPZ recorded increase in employment, exports, imports, number of **Zones** gazetted zones and expenditure on local goods and services.

11.36. Total sales from EPZ enterprises increased by 12.1 per cent to KSh 64,115 million in 2015 of which KSh 60,326 million were exports. Domestic sales declined by 34.8 per cent to KSh 3,789 million in 2015 while exports increased by 17.4 per cent. Imports increased by 4.2 per cent to KSh 30,681 million in the year under review and were in form of inputs, equipment and machinery. Local purchases increased by 10.7 per cent to KSh 9,043 million in 2015.

11.37. Total capital investment of EPZ enterprises rose to KSh 47.3 billion in 2015 from KSh 44.2 billion in 2014. The number of local employees increased by 8.7 per cent to 50,523 persons in 2015. The bulk of employment was in the garment/apparel enterprises with a total of 41,548 persons mainly due to expansion of existing apparel, and agro-processing firms.

African Growth and **Opportunity** Act

11.38. African Growth and Opportunity Act (AGOA) is a US initiative meant to increase exports, especially apparels, from accredited Sub-Saharan Africa (SSA) countries. Table 11.8 show selected EPZ garment/apparel indicators under AGOA. Exports of apparel increased by 14.4 per cent from KSh 30.2 billion in 2014 to KSh 34.6 billion in 2015. Direct employment generated under AGOA increased by 10.0 per cent to 41,548 persons in 2015 from 37,785 persons engaged in 2014.

11.40. The overall upstream inflation as measured by Producer Price Index (PPI) increased by 3.9 per cent from 109.17 in 2014 to 113.43 in 2015, as shown in Table 11.9. The increase was mainly due to high cost of imported raw materials arising from the depreciation of the Kenya Shilling against other major currencies. Industries that contributed to the increase were manufacture of textiles, manufacture of furniture, manufacture of food products and manufacture of beverages. However, manufacture of lubricating petroleum oils and lower costs of electricity helped in easing the industrial inflation. The increase in excise tax on beer, mineral water and soft drinks was increased in December 2015, caused the PPI of beverages to rise. The PPI for manufacture of food products increased mainly due to high prices of tea recorded in 2015 compared to the previous year.

Developments 11.41. In 2015, the Government through the Ministry of Industry, Investment and Trade initiated programmes aimed at improving the output of the manufacturing sector and developing a favourable environment to shift into production of higher value-added goods that will be competitive in the export market. The plan aims to tap into new markets in textile and apparel, leather, food processing, fish processing and agro-processing sectors by establishing industrial parks, clusters, hubs and zones in different parts of the country.

> 11.42. Further, to simplify both local and foreign investment, Special Economic Zones Act, 2015, was enacted in December 2015, to provide for the establishment of Special Economic Zones (SEZs). The Government also introduced tamper proof tax stamps to enhance the fight against counterfeit products in the market.

Chapter 12

Building and Construction

Overview

▼he Government has continued to develop an efficient and effective infrastructure for rapid and sustained economic growth as well as enhancing national, regional and international integration and trade facilitation. In 2015, the country witnessed a thriving construction industry registering a growth of 13.6 per cent compared to an expansion of 13.1 per cent recorded in 2014. Formal sector employment in the Building and Construction industry grew by 11.4 per cent in 2015, to stand at 148.0 thousand up from 132.9 thousand in 2014. Majority of these jobs were created in the private sector. Construction in the railways and roads sub-sectors was on-going with the national and county governments allocating resources to the improvement of the road network.

12.2. Total expenditure for the State Department of Infrastructure is expected to rise by 54.5 per cent to KSh 124.5 billion in 2015/16 compared to KSh 80.6 billion in 2014/15. This increase is mainly attributed to increased budgetary allocations towards development expenditure on roads for the financial year 2015/16, which is expected to rise from an expenditure of KSh 54.8 billion in 2014/15 to KSh 98.3 billion. Disbursements to various road agencies by the Kenya Roads Board (KRB) for maintenance and repair of roads is expected to increase from KSh 25.8 billion allocated in 2014/15 to KSh 26.2 billion in 2015/16.

12.3. Approved expenditure on housing is expected to increase by 7.4 per cent to KSh 7.9 billion in 2015/16. Actual expenditure on housing went down from KSh 6.1 billion in 2013/14 to KSh 5.9 billion in 2014/15, as fewer projects were completed. Although the approved expenditure in 2014/15 was KSh 7.4 billion, the amount actually spent was KSh 5.9 billion. The National Housing Corporation (NHC), which is the public agency responsible for real estate development, completed 45 housing units in Nyeri at a cost of KSh 61.5 million in 2015. In addition, NHC advanced housing loans amounting to KSh 14.9 billion to the Counties. The value of reported building plans approved went up from KSh 205.4 billion in 2014 to KSh 215.2 billion in 2015, representing an increase of 4.8 per cent. The value of reported new buildings completed in Nairobi increased by 15.1 per cent to stand at KSh 68.6 billion in 2015. Cement consumption, which is a key indicator of the level of activity in the construction industry, rose by 9.9 per cent to 5,708.8 thousand tonnes in 2015.

Key 12.4. Selected key economic indicators in the building and construction sector for the period **Economic** 2011 to 2015 are presented in Table 12.1. The index of Government expenditure on roads **Indicators** increased from 263.4 in 2014 to 386.7 in 2015 to support projects being undertaken during the year. Cement consumption went up by 9.9 per cent from 5,196.7 thousand tonnes in 2014 to 5,708.8 thousand tonnes in 2015. The index of reported private building works completed in major towns rose from 341.4 in 2014 to 367.1 in 2015. Similarly, the index of reported public building works completed in major towns registered an increase from 106.1 in 2014 to 116.2 in 2015. Loans and advances to the sector increased by 32.3 per cent from KSh 80.4 billion in 2014 to KSh 106.4 billion in 2015. The loans and advances to the sector have more than doubled since 2011.

^{*} Provisional.

Construction 12.5. Table 12.2 gives a trend of the annual percentage changes in construction input price Price Indices indices for the period 2013 to 2015. Wages in the Building and Construction sector rose by 10.0 per cent in 2015 from a 7.9 per cent growth in 2014 due to successful Collective Bargaining Agreements (CBAs) reached between unions in the sector and the employers. The rate of change of the total cost index of residential buildings and other construction went up by 4.4 per cent and 5.6 per cent, respectively, in 2015. Overall, total cost index increased by 4.9 per cent in 2015 compared to an increase of 10.1 per cent in 2014. The decline in the index is mainly attributable to the fall in fuel prices, a key component of the index. The year witnessed a steady decline in the prices of industrial diesel, automobile diesel fuel and petrol. However, other material inputs to the compilation of the index such as timber, hydrated lime, explosives, hard-core filling, aggregates and structural steel, recorded increases in prices during the review period.

Table 12.2: Annual Average Percentage Changes in Construction Input Price Indices, 2013 - 2015

12.10. Reported value of new private buildings in Nairobi City County (NCC) and that of public buildings countrywide is shown in Table 12.6. The value of new private buildings increased by 14.5 per cent to KSh 68.1 billion in 2015, on account of an increase in the value of residential buildings. The value of public buildings completed decreased to KSh 61.5 million in 2015 from KSh 502.1 million in 2014.

Housing 12.11. Approved and actual Government expenditure on housing for the financial years 2011/12 to 2015/16 is shown in Table 12.7. The housing sector has been characterized by inadequacy of affordable and decent housing. There is a low level of urban home ownership, extensive and inappropriate dwelling units, including slums and squatter settlements. To improve the situation, approved expenditure on housing is expected to increase significantly to KSh 7.9 billion in 2015/16. Actual expenditure on housing decreased from KSh 6.1 billion in 2013/14 to KSh 5.9 billion in 2014/15 as fewer projects were completed. Although the approved expenditure in 2014/15 was KSh 7.4 billion, the amount spent was KSh 5.9 billion representing 79.2 per cent utilization.

12.12 National Housing Corporation (NHC) is the Government agency responsible for implementing housing programmes and policies. The number of completed units during the review period was 45 in 2015 compared to 243 in 2014. A total of six projects were on-going in various parts of the country as at the close of the calendar year in 2015. The projects upon completion will produce 460 housing units. In the financial year 2015/16, the corporation plans to undertake eight housing projects in major towns across the country, and this will add to the national housing stock a total of 3,820 units. The Corporation advanced housing loans to counties amounting to KSh 14.9 billion in 2014/15 as shown in Table 12.8.

Roads 12.13. Improved road network enhances connectivity, mobility and promotes trade and investments by reducing cost of doing business. The sector therefore, remains crucial in the promotion of socio-economic growth and prosperity. Table 12.9 shows the total expenditure on roads for the period 2011/12 to 2015/16. The total proposed development expenditure on roads increased significantly to stand at KSh 98.3 billion in 2015/16. This was mainly attributed to increased budgetary allocations, which is expected to translate to more roads being constructed, rehabilitated and maintained. Expenditure on maintenance and repair by Kenya Roads Board to the road agencies is anticipated to stand at KSh 26.2 billion in 2015/16. Trunk and primary roads (class A, B and C) accounted for 48.7 per cent of the total expenditure, with an allocation of KSh 60.7 billion in the 2015/16 budget. The overall expenditure is expected to rise by 54.4 per cent to KSh 124.5 billion in financial year 2015/16 compared to KSh 80.6 billion in 2014/15.

12.14. Collaboration between National and County Governments and other stakeholders led to significant works on road rehabilitation, periodic maintenance, upgrading and new construction of Roads under the 2000 programme. The main objective of the Road 2000 programme is to improve rural roads and train small local contractors in the routine maintenance of roads using labour-based methods. Table 12.10 presents work in progress of Road 2000 programme. Fifteen counties benefitted from the programme whereby out of the planned 724.15 kilometers, an estimated 434.20 kilometers had been completed as at December 2015.

12.15. Table 12.11 shows the road network by type and classification as at 1st July 2013 and as at 1st July 2015. During the period under review, there was an increase of road under bitumen from 11.3 thousand kilometres in 2013 to 13.9 thousand kilometres. The total kilometres of road under earth/gravel increased from 52.4 thousand kilometres in 2013 to 65.6 thousand kilometres in 2015 due to the adoption of the low volume sealed roads technology for road improvement and upgrading.

12.16. Table 12.12 presents information on major road works completed, being constructed, maintained, improved, bridges constructed and rehabilitated during the financial year 2015/16. Overall, a total of KSh 84.1 billion is expected to be utilised on road works covering a total distance of 1,092 kilometres during the financial year. A total of KSh 12.5 billion is expected to be used to rehabilitate 164.8 kilometres of roads, while KSh 70.7 billion is earmarked for the construction and improvement of 927.8 kilometres of roads. Nairobi City County had the longest uncompleted road works, which covered: Missing Link Roads and Non-Motorised Transport (NMT) facilities in Nairobi and the Nairobi Outering road. Other uncompleted projects included; Kamkuoya-Kaptoma-Kapsokwony-Siriswa, Naro Moru-Munyu-Karisheri and Meru bypass roads, among others.

Railways 12.17. The Kenya Railways provides rail transport services mainly across the main towns of Nairobi, Mombasa and Kisumu. Over the review period, there was remarkable activity within the railways sub-sector in the proposed construction of the Standard Gauge Railway (SGR). The first phase of construction of the single-track standard gauge from Mombasa to Nairobi is in progress and 174km had been constructed with an investment level of KSh 113.9 billion as at December 2015. The line is expected to have a route length of 472km and a total length of 609km.

Table 12.13: Status of on-going SGR project, December 2015

CHAPTER 13

Tourism

Overview

ourism remains a key source of foreign exchange earnings in the country. Tourism earnings went down to KSh 84.6 billion in 2015 compared to KSh 87.1 billion in 2014. International visitor arrivals declined by 12.6 per cent to 1,180.5 thousand in 2015. The sector's suppressed performance was mainly due to security concerns, particularly in the coastal region, and negative travel advisories from some European source markets. The aftermath of Ebola outbreak in West Africa in 2014 also slowed international visitor arrivals in 2015. In an effort to revive the sector, the Government increased budgetary allocation to the State Department of Tourism from KSh 5.6 billion in 2014/15 to KSh 10.7 billion in 2015/16, to among others, market Kenya as a preferred tourism destination.

13.2. Bed-nights occupancy decreased by 6.4 per cent from 6,281.6 thousand in 2014 to 5,878.6 thousand in 2015. The number of local conferences held increased by 4.0 per cent from 3,077 in 2014 to 3,199 in 2015. Although the number of international conferences contracted by 9.5 per cent in 2015, Kenya played host to a number of high profile conferences including the 10th World Trade Organisation (WTO) Ministerial Conference (MC10) and the Global Entrepreneurship Summit. Conference tourism is one of the rapidly growing segments in the tourism sector and is largely associated with travel for business purposes.

13.3. Number of visitors to museums, snake parks and other historical sites went up by 15.4 per cent to 797.5 thousand in 2015 compared to 690.9 thousand in 2014. The number of visitors to national parks and game reserves declined by 10.8 per cent to 1,953.8 thousand in 2015.

Arrivals and Departures

13.4. International visitor arrivals and tourism earnings from 2011 to 2015 are presented in Figure 13.1. Both visitor arrivals and tourism earnings have been on a downward trend since 2011. This was mainly attributed to security concerns associated with terrorism activities. Tourism earnings declined further to KSh 84.6 billion in 2015 despite the high level events that took place in the country such as the 10th WTO Ministerial Conference, the visit by the US President and the Papal visit.

Figure 13.1: International Visitor Arrivals and Tourism Earnings, 2011 – 2015

13.5. Monthly visitor arrivals through Moi International Airport (MIA) and Jomo Kenyatta International Airport (JKIA) for 2014 and 2015 are presented in Figures 13.2(a) and 13.2(b), respectively. Monthly visitor arrivals through MIA were lower in 2015 in comparison with 2014 for all the months except November. Similarly, arrivals through JKIA were lower in most months of 2015 compared to 2014 though there was a slight improvement in the last half of the year.

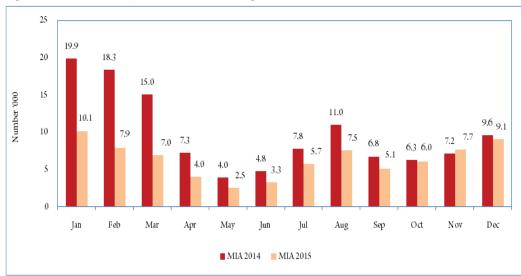

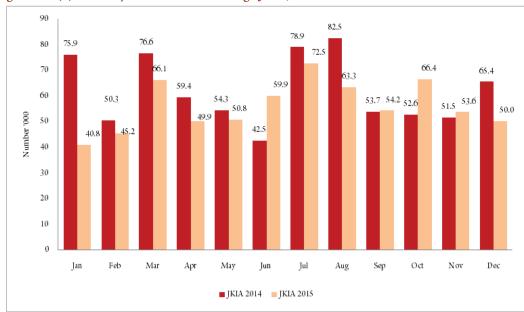

Figure 13.2(a): Monthly Visitor Arrivals through MIA, 2014 -2015

13.6. Figure 13.2(c) depicts the trend of international visitor arrivals from the two major international airports and other cross borders from 2011 to 2015. Visitors who passed through MIA and JKIA in 2015 constituted 63.4 per cent of the total visitors compared to 58.7 per cent in 2014.

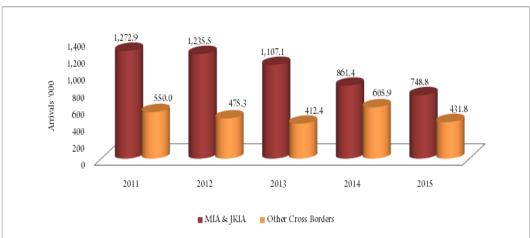

Figure 13.2(c): Number of Visitor Arrivals through the two Major International Airports and other Cross Borders, 2011-2015

13.7. Table 13.1 presents the number of international arrivals by purpose of visit on a quarterly basis from 2011 to 2015. In 2015, the total number of visitors went down by 23.3, 11.4 and 12.9 per cent in the first, second and third quarters, respectively. Overall, international visitor arrivals contracted by 12.6 per cent to 1,180.5 thousand in 2015. Notable drops in visitor arrivals by purpose were registered in those arriving on holiday and on transit.

13.8. Table 13.2 shows that the number of international departures declined by 4.0 per cent from 1,403.7 thousand in 2014 to 1,347.6 thousand in 2015. In the second and third quarters of 2015, the number of visitors departing registered a growth of 2.3 per cent and 8.9 per cent, respectively. On the other hand, the first and fourth quarters recorded a drop of 14.1 per cent and 11.7 per cent in visitor departures, respectively. There was a decline in international visitor departures for all purposes of visitors.

13.9. Table 13.3 presents the number of departing visitors by country of residence and purpose of visit. Departures declined by 3.7 per cent to 1,199.7 thousand in 2015. Departures destined to Italy and Scandinavian countries decreased by 30.9 per cent and 42.8 per cent, respectively, while those to United Kingdom and Switzerland increased marginally in 2015. Visitors departing to African destinations excluding Tanzania and Uganda increased by 11.0 per cent to 242.1 thousand in 2015. Departures to "All Other Countries" more than doubled.

13.10. Number of visitor-days stayed by purpose of visit and the average length of stay is shown in Table 13.4. The total number of days stayed by all categories of departing visitors excluding "Other" visitor contracted from 16,114.3 thousand in 2014 to 15,837.0 thousand in 2015 mainly due to a decline in holiday and business visitors. However, the average length of stay improved from 12.9 days in 2014 to 13.2 days in 2015. The continued assessment of security measures across the country including enhanced checks in public areas and increased police to citizen ratio encouraged the longer stay of tourists.

during the period under review.

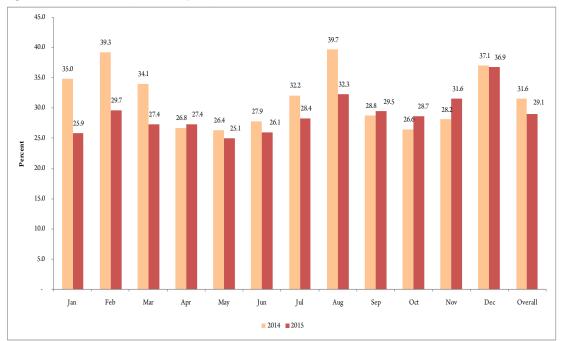

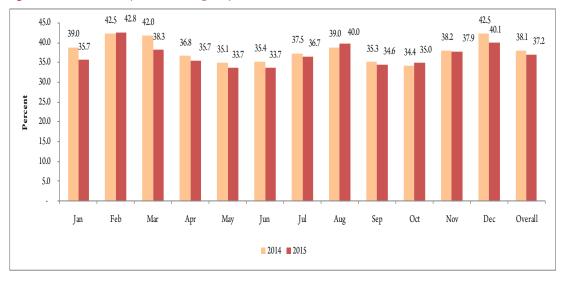

Figure 13.3(a): Monthly Bed Occupancy Rates, 2014-2015

13.12. Hotel bed-nights occupancy by country of residence from 2011 to 2015 is presented in Table 13.5. The number of hotel bed-nights occupied declined by 6.4 per cent to 5,878.6 thousand in 2015. Bed occupancy by residents of Europe went down by 23.6 per cent. The highest decline was registered for residents of Italy from 156.2 thousand in 2014 to 74.1 thousand in 2015. The number of occupants who were residents of Africa grew by 6.5 per cent to 3,619.3 thousand in 2015 with the highest number being Kenyan residents. The number of hotel bed-nights available in hotels, lodges and other rooming houses grew by 1.6 per cent from 19,877.2 thousand in 2014 to 20,187.2 thousand in 2015 mainly due to increased investments in the hospitality industry.

13.13. Hotel bed-nights occupancy by zone for the period 2011 to 2015 is shown in Table 13.6. Occupancy in coastal beach zone dropped by 16.4 per cent from 2,527.7 thousand in 2014 to 2,113.8 thousand in 2015. Bed-nights occupied in Nairobi-High Class also registered a drop from 1,119.1 thousand in 2014 to 1,014.9 thousand in 2015. However, some zones, which included the Coastal Other, Maasailand, Nyanza Basin, Western and Northern Kenya, reported notable improved performances. The Northern Kenya zone occupancy more than doubled from 60.9 thousand in 2014 to 135.1 thousand in 2015.

13.14. Figure 13.4 shows the bed-nights occupied at the coast by zone in 2014 and 2015. The South Coast was the most preferred destination, a shift from the North Coast. Mombasa Island registered improved bed-nights occupancy at the Coast in 2015 mainly due to its proximity to the international airport.

Figure 13.4: Bed-Nights Occupancy at the Coast, 2014 – 2015

13.15. Table 13.7 presents the analysis of the number of bed-nights occupied by area and country of residence. The share of hotel bed-nights occupied in lodges expanded from 8.6 per cent in 2014 to 10.7 per cent in 2015. The number of bed-nights occupied by Kenyans in the lodges increased from 171.0 thousand in 2014 to 300.9 thousand in 2015. However, the percentage share of bed-nights occupied in Nairobi and the Coast continued to decline for the third year running. Notable declines were observed in Coast region for residents from USA, United Kingdom, Italy, Germany and Scandinavia.

13.16. Table 13.8 presents bed-nights occupancy in game lodges and type of catering offered to foreign and East African residents. Despite the decrease in the number of visitors to national parks and game reserves, the number of bed-nights occupied in hotel establishments located in these areas improved significantly from 540.4 thousand in 2014 to 626.7 thousand in 2015, representing 16.0 per cent rise. The number of bed-nights occupied by foreign residents dropped by 11.8 per cent to 323.1 thousand in 2015. However, bed-nights occupied by East Africa residents grew by 74.8 per cent from 173.9 thousand in 2014 to 303.7 thousand in 2015. More than 85 per cent of the visitors preferred full catering services to self-service.

National Parks and Game Reserves 13.17. Table 13.9 presents the number of visitors to national parks and game reserves from 2011 to 2015. The number of visitors dropped by 9.7 per cent from 2,164.6 thousand in 2014 to 1,953.8 thousand in 2015. This drop may partly be attributed to competition from neighbouring countries that do not charge Value Added Tax on park entry fees. Amboseli and Lake Nakuru national parks recorded major declines of 25.7 per cent and 16.4 per cent, respectively, in 2015. However, Nairobi Safari Walk and Hell's Gate registered improvements of 4.7 per cent and 6.7per cent, respectively.

13.18. Figure 13.5 depicts visitors to national parks and game reserves in 2013 to 2015. Children citizens and residents categories recorded increases in 2015 compared to 2014, with children citizens registering the highest number of all visitors. Most of the visitors to national parks and game reserves in 2015 continued to be the adult non-residents and citizens; children citizens and student citizens.

^{*} Provisional

¹Other include Arabuko Sokoke, Ol-Donyo Sabuk, Marsabit, Saiwa swamp, Sibiloi, Bamburi, Chyulu, Ruma National Park, Mwea National Reserve, Central Island National Park, Kiunga, Mt.Elgon, Nasolot, Ndere and Kakamega.

Museums, Snake Parks and Historical Sites 13.19. The number of visitors to Museums, Snake Parks and Historical Sites is presented in Table 13.10. Overall, the number of visitors to these attraction sites rose by 15.4 per cent to 797.5 thousand in 2015 on account of increases in the number of visitors to the National Museum and Fort Jesus while the rest of the sites recorded decreases. The National Museum main gate recorded a remarkable performance of 264.0 thousand visitors in 2015 following the re-opening after renovations. Similarly, visitors to Fort Jesus increased by 7.0 per cent from 113.4 thousand in 2014 to 121.3 thousand in 2015. The number of visitors to Museums, Snake Parks and Historical Sites was highest in August while May registered the lowest as shown in Figure 13.6.

Conference 13.20. Conference tourism is one of the rapidly growing segments in the tourism sector and is largely associated with travel for business purposes. However, the number of international conferences and delegates dropped by 9.5 per cent and 8.0 per cent, respectively, in 2015 as presented in Table 13.11. Over the same period, local conferences and delegates increased by 4.0 per cent and 7.4 per cent, respectively. The average occupancy rate of conference facilities declined by 0.3 percentage points to 11.1 per cent in 2015.

Training 13.21. The Kenya Utalii College (KUC) is one of Africa's leading hospitality and training institutions whose graduates serve locally and internationally. The total number of graduates who pursued various courses at KUC declined from 2,350 in 2014 to 2,324 in 2015 as shown in Table 13.12. This was mainly attributed to the decrease in the number of people pursuing refresher courses. The number of graduates in short courses rose by 26.0 per cent in 2015 mainly as a result of increase in enrolments in food and beverage service basic course, food production and front office courses.

Developments in the Tourism Sector

13.22. In 2015/16, the Government increased budgetary allocation to the State Department of Tourism from KSh 5.6 billion to KSh 10.7 billion, to among others, market Kenya as a preferred tourism destination. This was to counter the negative publicity occasioned by restrictive travel advisories in our key source markets. In addition, the Government created a stand-alone Ministry of Tourism, which is intended to focus more on issues that directly affect the sector.

13.23. The sector is expected to improve following the scrapping of landing fees at Mombasa and Malindi international airports for chartered planes from January 2016 till June 2018 and a subsidy of US\$ 30 for each passenger who disembarks in Kenya during the period.

Transport and Storage

Overview

n efficient and effective transport system is crucial in promoting social and economic activities at the national, regional and international levels. Sufficient road, rail, air, pipeline and maritime transport infrastructural facilities are important in enhancing trade and mobility. The Government continued to undertake various activities aimed at improving the transport network in the country. These included the construction of the first phase of the Standard Gauge Railway (SGR) from Mombasa to Nairobi, the improvement of facilities and enhanced operational efficiency at the Port of Mombasa, the expansion and rehabilitation of facilities at the airports, particularly at the Jomo Kenyatta International Airport (JKIA), Mombasa International Airport (MIA) and Kisumu International Airport (KIA).

14.2. The Port of Mombasa recorded a growth of 7.5 per cent in total throughput handled from 24,875 thousand tonnes in 2014 to 26,732 thousand tonnes in 2015. Similarly, container traffic rose by 6.3 per cent to stand at 1,076,118 Twenty-foot Equivalent Units (TEUs) during the review period compared to 1,012,002 TEUs in 2014.

14.3. The total throughput of refined petroleum products transported via pipeline increased by 154.2 thousand cubic metres to 5,712.1 thousand cubic metres in 2015. In the air transport sub-sector, total commercial passengers handled expanded by 1.3 per cent during the reference period, which was lower than 7.9 per cent recorded in 2014. Suppressed activity of the tourism sector and the closure of some routes in some parts of Western Africa due to the Ebola disease impacted negatively on the performance of air transport. The rail transport exhibited mixed performance during the reference period. Total freight traffic transported by rail grew by 4.4 per cent in 2015 while total passenger journeys declined by 38.6 per cent in the same period.

14.4. The road transport sub-sector posted improved performance during the review period as reflected by; the increase in consumption of fuel such as light diesel oil and the number of licenses issued to Passenger Service Vehicle (PSV) operators. In 2015, total newly registered motor vehicles stood at 107,761 units compared to 102,606 units in 2014, an increase of 5.0 per cent. Similarly, the number of newly registered motor and auto cycles increased by 21.2 per cent to 134,645 in 2015. The number of reported road traffic accidents dropped by 6.4 per cent in the review period. However, the number of persons killed went up by 5.2 per cent in the same period.

Value of 14.5. The output of the transport and storage sector increased by 6.4 per cent in 2015 to KSh **Output** 951.4 billion compared to a 15.3 per cent increase in 2014 as shown in Table 14.1. Increases in the consumption of fuel and registration of new motor vehicles supported growth in road transport sub-sector which expanded by 4.5 per cent during the review period. Notable growths were also recorded in the pipeline and railway transport, which grew by 26.8 per cent and 17.3 per cent, respectively.

Table 14.1: Transport and Storage - Value of Output, 2011 - 2015

Road 14.7. Table 14.2 shows details of funds disbursed from the Roads Maintenance Fund to Transport the various road agencies for maintenance and rehabilitation of roads in the country. Total funds approved for disbursement by the Kenya Roads Board (KRB) are expected to increase by 1.6 per cent from KSh 25.8 billion in 2014/15 to KSh 26.2 billion in 2015/16. Fuel levy collection is projected to expand by KSh 0.4 billion to KSh 25.8 billion in 2015/16. Likewise, collection from transit toll is expected to increase slightly by 1.8 per cent from KSh 454 million in 2014/15 to KSh 462 million in 2015/16.

14.8. Earnings from road traffic rose from KSh 587.3 billion in 2014 to KSh 613.9 billion in 2015. There was a 6.4 per cent growth in earnings from freight transported by road, which outpaced earnings from road passenger transport, which grew by 2.9 per cent to KSh 291.7 billion and KSh 322.2 billion, respectively in 2015 as highlighted in Table 14.3. Nevertheless, this was a decelerated growth in both road passenger and freight traffic compared to 2014.

Vehicles and

New 14.9. Details of newly registered motor vehicles and motor cycles in the country for the period **Registration** 2011 to 2015 are shown in Table 14.4 and Figure 14.1. Total units registered rose by 13.4 per **of Motor** cent from 218,057 in 2014 to 247,181 in 2015.

Motor Cycles 14.10. Motor vehicles: Newly registered motor vehicles increased from 102,606 units in 2014 to 107,761 units in 2015, representing a growth of 5.0 per cent. Overall, the number of newly registered motor vehicles maintained an upward trend during the review period except for saloon cars which declined by 9.6 per cent to 14,369. Similarly, registration of other vehicles declined marginally from 2,533 in 2014 to 2,522 in 2015. The number of station wagons registered in 2015 rose slightly by 1.1 per cent to 54,120 units compared to a growth of 10.0 per cent in 2014. However, there are significantly higher number of registrations of station wagons in 2015 compared to 2011 as shown in Figure 14.1.

> 14.11. Lorries/Trucks: There has been a significant increase in the annual number of new registrations over the last five years as shown in Figure 14.1. During the review period, new registration of lorries and heavy trucks, panel vans and pick-ups; and buses and coaches rose by 29.1, 10.4 and 6.0 per cent respectively. The notable rise in registration of lorries and trucks could be attributed to increased construction activities. The number of trailers registered went up by 33.5 per cent from 2,925 in 2014 to 3,905 in 2015.

> 14.12. Motor cycles: Total motor cycles registered rose by 20.8 per cent to 139,420 in 2015 which is reflected by a 22.8 per cent growth in imports of motorcycles. The number of motor and auto cycles registered increased from 111,124 in 2014 to 134,645 in 2015, reflecting a growth of 21.2 per cent. The increase may be partly due to the rising demand for motor cycles as an alternative mode of passenger transport. Likewise, the number of three wheelers rose by 10.4 per cent during the review period.

Table 14.4: New Registration of Road Motor Vehicles and Motor cycles, 2011 – 2015

					Number

Road 14.13. The various types of road licenses issued by the National Transport and Safety Authority Licenses (NTSA) are shown in Table 14.5. The total number of Public Service Vehicle (PSV) licenses issued went up by 12.3 per cent from 27,153 in 2014 to 30,506 in 2015. PSV licenses issued to matatus, buses and mini buses recorded increases in the review period with matatus accounting for more than half of total PSV licenses issued.

> 14.14. In 2015, the total number of driving licenses issued rose by 3.5 per cent to 120,016 from 115,966 in 2014. Original driving licenses issued increased by 3.0 per cent to 91,336 in 2015, while issuance of duplicate and foreign licenses also maintained upward trends in 2015, registering increases of 5.3 and 3.3 per cent, respectively.

¹ Includes Tour Vans

Road Traffic 14.15. The number of reported road traffic accidents has been on a downward trend over time Accidents partly attributable to sustained government enforcement of road safety rules and sensitization of the public on road safety. Total reported accidents dropped by 6.4 per cent from 5,672 in 2014 to 5,310 in 2015 as shown in Table 14.6. However, fatalities increased by 5.2 per cent from 2,907 in 2014 to 3,057 during the review period. The number of persons who suffered serious injuries dropped further to 4,731 in 2015, while those with slight injuries increased from 3,971 in 2014 to 4,350 in 2015.

Transport

Railway 14.16. The performance of the railway transport sub-sector for the last five years is shown in Table 14.7. In 2015, total cargo traffic registered a growth of 4.4 per cent to 1,575 thousand tonnes from 1,509 thousand tonnes recorded in 2014. Likewise, revenue earned from freight transport increased from KSh 6.1 billion in 2014 to KSh 6.2 billion during the review period. There has been a continuous decline in rail passenger indicators of journey, passenger-km and revenue. The major reason is prioritizing on the freight, which is more profitable than passengers' services hence the available locomotives are prioritized to freight. Passenger journeys declined to 2,359 thousand in 2015 compared to 3,845 thousand in 2014. This led to a 38.9 per cent drop in earnings from passenger traffic stream in 2015.

Table 14.7: Railway Traffic, 2011 – 2015

Water 14.17. Table 14.8 presents details of cargo throughput handled at the Port of Mombasa for the **Transport** period 2011 to 2015. The number of vessels that docked decreased by 7.5 per cent from 1,832 in 2014 to 1,694 in 2015. However, total throughput handled at the port recorded 26,732 thousand tonnes of cargo in 2015 against 24,875 thousand tonnes handled in 2014, reflecting a growth of 7.5 per cent. This is explained by the fact that the vessels that docked at the Port were of higher capacity. In 2015, the Port of Mombasa handled a 6000 TEU capacity vessel, the biggest vessel to ever dock at the Port of Mombasa. Nevertheless, this was a slower growth compared to the 11.5 per cent growth recorded in 2014. Total throughput handled rose from

^{*} Provisional.

24.4 million dead weight tonnes (DWT) in 2014 to 26.7 (DWT) during the review period. Total container traffic handled increased by 6.3 per cent to 1,076,118 TEUs in 2015 up from 1,012,002 TEUs in 2014.

14.18. Total imports handled expanded by 9.2 per cent from 20.8 million tonnes in 2014 to 22.7 million tonnes in 2015. Imports of dry bulk cargo handled increased by 21.4 per cent to 6,350 thousand tonnes in 2015. Likewise, imports of dry general cargo and bulk liquids handled went up by 8.9 per cent and 0.6 per cent respectively, in 2015. The number of motor vehicles landed declined by 8.9 per cent from 157,856 units in 2014 to 143,833 units in 2015.

14.19. During the review period, total exports handled rose slightly to 3.5 million tonnes from 3.4 million tonnes in 2014. This small gain is partly on account of increased dry bulk exports handled which grew by 37.0 per cent in 2015. The volume of dry general cargo exports handled increased marginally in 2015, while bulk liquid exports handled dropped by 11.1 per cent from 45 thousand tonnes to 40 thousand tonnes over the same period.

Pipeline 14.20. Total throughput of refined petroleum products transported through the pipeline rose **Transport** by 2.8 per cent in 2015 to 5,712.1 thousand cubic metres from 5,557.9 thousand cubic metres in 2014 as shown in Table 14.9. The growth in throughput volumes is lower than the 7.5 per cent growth recorded in 2014. The volume of petroleum products for export expanded by 2.1 per cent from 1,985.5 thousand cubic metres in 2014 to 2,026.4 thousand cubic metres in 2015. Similarly, throughput of refined petroleum products for domestic consumption recorded a 3.2 per cent increase to 3,685.7 thousand cubic metres during the review period from 3,572.4 thousand cubic metres in 2014.

Air 14.21. Passenger traffic: Details of commercial traffic handled at the airports for the period **Transport** 2011 to 2015 are shown in Table 14.10(a). During the review period, total passenger traffic handled recorded a slow growth of 1.3 per cent compared to 7.9 per cent in the previous year. This is partly attributed to a decline of 3.0 per cent in the number of international passengers handled in 2015. The total number of passengers handled stood at 8,993.2 thousand in 2015 up from 8,882.0 thousand in 2014. While total domestic passengers handled rose by 9.0 per cent to 3.4 million in 2015, total international passengers handled contracted by 3.0 per cent from 5.7 million in 2014 to 5.6 million in the year under review. This decline is partly due to negative travel advisories by some key tourist source countries especially during the first half of 2015 that impacted negatively on tourist arrivals. Total passengers handled at Jomo Kenyatta International Airport (JKIA) stood at 6.5 million passengers in 2015 up from 6.4 million passengers recorded in 2014. Domestic and international passengers handled at Moi International Airport (MIA) were 902,600 and 329,400 respectively, during the review period.

> 14.22. Cargo and Mail Traffic: Table 14.10(b) shows the commercial cargo and mail traffic by airport from 2011 to 2015. During the reference period, total cargo traffic handled at the airports decreased by 5.9 per cent from 279.4 thousand in 2014 to 263.0 thousand. Total mail traffic handled at both JKIA and MIA increased 15.6 per cent in 2015.

Postal 14.23. Table 14.11 shows the performance of the postal service sub-sector for the period 2011 Services to 2015. The courier market segment remained buoyant during the review period as reflected in increased outlets and the number of licensed courier operators. Total private courier operator outlets rose by 3.4 per cent from 2,048 in 2014 to 2,117 in 2015. Likewise, the number of licensed courier operators increased by 4.8 per cent to 241 in the review period. The total items handled recorded an increase of 2.2 per cent. Total items handled by the Expedited Mail Service (EMS) went up from 1,801 thousand in 2014 to 1,840 thousand in 2015, representing a 2.2 per cent increase.

> 14.24. Total registered and insured items posted dropped by 20.0 per cent from 1.0 million in 2014 to 0.8 million during the review period. Total parcels handled increased marginally from 48,000 in 2014 to 49,000 in 2015. Whereas domestic parcels handled increased by 23.1 per cent to 32,000 in 2015, international parcels handled dropped from 22,000 in 2014 to 17,000 in the same period. During the period under review, total money orders issued rose by 11.4 per cent from 1.3 million in 2014 to 1.5 million in 2015 mainly as a result of a significant increase of 44.6 per cent in domestic money orders issued.

Container Freight Stations

Storage 14.25. The Container Freight Stations (CFS) offer services in cargo handling and in the process help decongest the Port of Mombasa. There were no additional CFSs' registered in 2015 with the number of licensed CFSs' remaining constant at twelve with a combined holding capacity of about 1.2 million TEUs during the review period.

CHAPTER 15

Information and Communication Technology

full of the state enabler of economic growth. Over the years, increased deployment of fiber optic cables, Worldwide Interoperability for Microwave (WIMAX) and Very Small Aperture Terminal (VSAT) technologies have seen a steady growth of the internet and broadband market, which have resulted in improved competitive data services to consumers. Further, the Government has continued to focus on the implementation of e-government to enhance the uptake of ICT in its operations for effective and efficient delivery of services to its citizens. The sustained uptake of ICTs in the country is expected to continue supporting economic growth and modernization as well as enabling optimization of production in every sector of the economy. In 2015, the country successfully concluded the digital migration for TV broadcasting ahead of the global deadline of 17th June 2015. The switch-off of analogue signals started on 30th December 2014 and was finalized on 30th March 2015.

15.2. Key ICT indicators show that the sector's growth slowed in 2015 compared to 2014. However, the growth remained robust because of resilient expansion in mobile telephony networks and increased uptake of internet services. The freeing up of valuable portions of the TV broadcast spectrum that emanated from the successful completion of the digital migration facilitated significant growth of digital TV stations from 36 in 2014 to 62 in 2015. This has benefited the consumers through more options, better sound and picture quality. In 2015, mobile telephony continued to revolutionize the uptake of ICT services, in particular, the mobile broadband and mobile money services. Consequently, mobile telephone subscriptions increased leading to a rise in penetration from 78.3 per cent in 2014 to 85.4 per cent in 2015. Internet subscriptions increased significantly from 16.4 million in 2014 to 23.9 million in 2015. This resulted in increased internet and broadband penetration from 38.3 per cent and 9.9 per cent in 2014 to 54.2 per cent and 16.4 per cent in 2015, respectively. Similarly, data speed for computer modems and transmission carriers increased by 66.9 per cent to 20,293 bits per second per capita (BPs/person) owing to availability of fiber optic. However, the mobile telephone capacity decreased by 3.5 per cent due to the exit of Essar Kenya (YU) limited from the Kenyan market. The fixed network capacity declined sharply due to the decommissioning of fixed wireless in 2015, which resulted in a reduction of its penetration from 0.52 per cent in 2014 to 0.19 per cent.

Value of 15.3. Details on value of output, intermediate consumption and value added for the ICT sector Output at current prices is presented in Table 15.1. The value of ICT output increased by 8.1 per cent to stand at KSh 280.0 million in 2015 compared to KSh 259.0 million in 2014. Intermediate consumption increased by 14.9 per cent. As a result value added decreased from KSh 66.3 in 2014 to KSh 58.7 in 2015, representing 11.4 per cent drop.

Table 15.1: Communications Output, Intermediate Consumption and Value Added, 2011-2015

KSh Million

		Intermediate	
Year	Value of Output	Consumption	Value Added
2011	186,039.9	124,658.6	61,381.3
2012	203,692.9	135,255.4	68,437.5
2013	228,352.5	160,053.6	68,298.9
2014	258,970.6	192,660.5	66,310.1
2015*	279,994.0	221,273.2	58,720.8

^{*} Provisional

Fixed 15.4. **Fixed Telephone:** The performance of fixed and mobile network services is shown in **Telephone** Table 15.2. During the year under review, Telkom Kenya decommissioned the fixed wireless and Mobile network due to the obsolete technology, expensive maintenance cost and high competition **Network** from other telephone technologies. Consequently, subscribers under Code Division Multiple Services Access (CDMA) network were migrated to the company's mobile network. This resulted in a decline of fixed wireline capacity from 340 thousand in 2014 to 75 thousand in 2015. However, the wireline connections, increased by 77.1 per cent from 48 thousand in 2014 to 85 thousand in 2015.

> 15.5. Mobile Network Services: In 2015, the mobile telephone capacity declined by 3.5 per cent to 62.8 million owing to the exit of Essar Kenya (YU) limited. Airtel Kenya and Safaricom took over subscribers and infrastructure from the exiting operator, respectively. However, Equitel, which is a Mobile Virtual Network Operator (MVNO) on Airtel infrastructure, entered the market during the same year. This led to an increase of 12.1 per cent mobile connections to stand at 37.7 million subscribers in 2015. The growth in the subscribers resulted in an expansion in used mobile capacity from 51.7 per cent in 2014 to 60.1 per cent in 2015. In the mobile money sector, the number of agents increased by 16.4 per cent from 123,703 in 2014 to 143,946 in 2015. Similarly, the number of mobile money transfer service subscribers grew by 2.8 per cent to 26.8 million over the same period. Total amount of money transacted through mobile money platforms expanded by 18.7 per cent to KSh 2,816 billion during the review period.

Voice call 15.6. International Telephone Traffic: Voice call traffic for the period 2011 to 2015 is traffic presented in Table 15.3. The international telephone traffic increased by 11.4 per cent from 1,053 million minutes in 2014 to 1,173 million minutes in 2015. This was a reversal from the declines that had been recorded since 2013. The outgoing and incoming international telephone traffic increased by 17.9 per cent and 6.3 per cent, respectively, in 2015 as shown in Figure 15.1. However, fixed line traffic has been declining since 2012 as shown in Figure 15.2. The increase in the international mobile traffic was partly due to the reduction of international mobile rates within the East African Community, except Tanzania, through the One Network Area Initiative that enhanced the standardization of the calling rates. The decline in fixed line traffic may be attributed to the decommissioning of the fixed wireless network during the review period.

> 15.7. Roaming Traffic: Total roaming traffic more than doubled to 194.8 million minutes in 2015. Similarly, both outbound and inbound roaming more than doubled to 91.2 and 103.6 million minutes, respectively, during the review period. The increase in roaming traffic may partly be attributed to the reduced calling rates within the East African Community (EAC) and the visits by high-level dignitaries during the review period.

> 15.8. **Domestic Traffic:** The total domestic telephone call traffic increased by 27.7 per cent from 30.7 billion minutes in 2014 to 39.2 billion minutes in 2015. Mobile to mobile telephone traffic increased by 28.2 per cent to 39.1 billion minutes, to account for 99.7 per cent of the total domestic telephone traffic. Mobile to fixed telephone traffic increased by 13.3 per cent to 75.4 million minutes. However, fixed to fixed telephone traffic registered a drastic decline from 23.3 million minutes in 2014 to 5.3 million minutes in 2015 mainly attributed to the decommissioning of the fixed wireless network.

> 15.9. **VoIP Traffic:** The volume of the international outgoing fixed Voice over Internet Protocol (VoIP) traffic declined by 34.8 per cent to 4.8 million minutes in 2015. The VoIP traffic has been declining since 2011 mainly due to shift in preference to instant messaging applications and social media.

Message 15.10. Message Services Traffic: The message service traffic is presented in Table 15.4. The Multimedia Messaging Services (MMS) enables individuals mainly to send graphics, sound **Traffic** or video. The number of messages sent via MMS rose by 13.9 per cent to 13.7 million in 2015. The total number of messages sent via Short Messaging Services (SMS) increased by 3.3 per cent compared to a 38.2 per cent increase recorded in 2014. The number of international SMS received declined by 19.0 per cent to 131.1 million in 2015 compared to a 60.7 per cent increase recorded in 2014 as depicted in Figure 15.3. The slowed growth in SMS was associated with high uptake of Over The Tops (OTTs) platform such as WhatsApp and use of social media during the review period.

Internet 15.11. **Internet:** The number of licensed Internet Service Providers (ISPs) increased by 24.9 per cent from 177 in 2014 to 221 in 2015 as shown in Table 15.5. The estimated internet users also expanded by 35.9 per cent to 35.6 million users over the same period. Total wireless internet subscriptions increased by 45.4 per cent to 23.8 million with the terrestrial mobile data subscribers having the largest share. Total wired internet subscriptions increased by 20.2 per cent to 115,111 with fixed fiber optic data accounting for 96.7 per cent of the total wired subscriptions in 2015. Fixed fiber optic data grew by 37.1 per cent to 111,354 subscriptions in 2015. However, fixed Digital Subscriber Line (DSL) data reduced significantly from 14,512 subscriptions in 2014 to 3,732 subscriptions in 2015.

Broadband 15.12. **Bandwidth Capacity:** Available bandwidth capacity increased by 83.0 per cent from Services 847,523 megabits per second (mbps) in 2014 to 1,550,768 mbps in 2015 as presented in Table 15.6. The increase in the bandwidth capacity was attributed to fiber installation in the counties during the review period. The utilized bandwidth capacity increased by 71.6 per cent to 854,551 mbps in 2015. The ratio of total utilized bandwidth to available capacity shrank from 58.8 per cent in 2014 to 55.1 per cent during the period under review.

^{*} Provisional

15.13. **Broadband Subscriptions:** The total wireless broadband subscriptions increased from 4.2 million to 7.1 million due to significant uptake of the Global System for Mobile (GSM), which went up by 85.6 per cent to 6.3 million subscribers in 2015. This was occasioned by migration of CDMA to mobile technology and the entry of Equitel subscribers. Fiber to home and office increased by 35.9 per cent and 37.2 per cent, respectively, during the review period.

Tariffs 15.14. Fixed and Mobile Telephone Charges: Table 15.7 presents information on fixed and mobile charges for the period 2011 to 2015. In 2015, the telephone services installation and subscription fees remained unchanged at KSh 3,394 and KSh 580 per month, respectively. During the period, the average call cost per minute of fixed to fixed local calls decreased from KSh 4.50 to KSh 3.00 while that of fixed to mobile remained unchanged at KSh 9.00. The average call cost per minute of mobile-to-mobile decreased from KSh 3.10 in 2014 to KSh 3.08 in 2015 while that of mobile to fixed remained unchanged at KSh 3.25. However, the average price of SMS went up from KSh 1.00 to KSh 1.25 during the review period.

Domains 15.15. The total number of domains grew by 33.8 per cent to 51,543 in 2015 as presented in Table 15.8. The number of ".co.ke" domains increased by 35.5 per cent to account for 92.7 per cent of the total registered domains in 2015. The growth in the number of registered Kenyan based domains was mainly attributed to the reduction in renewal and average annual fees from KSh 2,320 to KSh 580 and KSh 2,300 to KSh 650, respectively, during the period under review.

Chapter 15: Information and Communication Technology

Media 15.16. Media Frequencies and Subscriptions: Information on media frequencies and mobile Frequencies transceivers for the period 2011 to 2015 is presented in Table 15.9. The number of Frequency **and Mobile** Modulation (FM) for radio increased to 608 while television frequencies rose to 302 in 2015. The number of digital signal distributors in the country increased to five due to the entry of the self-provisioning and common carrier signal distributors in the market. The number of digital TV stations increased to 62 due to the migration from analogue to digital platform. Digital Terrestrial Televisions (STBs) subscriptions more than tripled to 3.7 million in 2015 while cable TV and direct to home satellite subscriptions increased by 44.6 per cent and 18.3 per cent, respectively. The number of radio stations increased by four to 139 stations in 2015.

> 15.17. Mobile Transceivers: The total mobile transceivers increased by 9.3 per cent to 109,294 in 2015. The second generation (2G) increased by 6.3 per cent while the third generation (3G) rose by 25.5 per cent during the review period. The 2G accounted for 82.3 per cent of the total transceivers in 2015.

and Revenue

Employment, 15.18. Employment: Table 15.10 presents employment, investment and revenue on mobile **Investment** operators and Internet Service Providers (ISPs) for the period 2011 to 2015. There was a marginal decline in the level of employment by telecommunication operators from 6,201 in 2014 to 6,147 in 2015. Over the same period, employment in the ISPs increased by 25.3 per cent to 7,817. This was partly due to the laying of fiber optic in the country.

Information 15.20. **ICT Penetration Rate (Total Population):** Table 15.11 shows key indicators used for **Society** measuring information society. During the year under review, ICT penetration rate improved for all categories except that of the fixed line, which declined from 0.52 in 2014 to 0.19 in 2015. The improvement in the uptake of ICT was partly attributed to the affordability of mobile phones in the market; cheaper internet bundles offered by mobile operators and finalization of phase one of laying the fiber optic cables across the country. The internet penetration stood at 54.2 per cent in 2015 with that of wireless internet increasing to 53.9 per cent. Total broadband penetration increased to 16.4 per cent in 2015 from 9.9 per cent in 2014. The bits per second per capita (Bps/person) increased by 66.9 per cent to 20,293.0 in 2015. The mobile money penetration remained unchanged in the period under review.

> 15.21. **ICT Penetration Rate (3 years and above):** This measures the ICT penetration for the population aged three years and above which is considered capable of owning and using ICT equipment. The mobile penetration stood at 94.0 per cent while internet penetration stood at 59.6 per cent in 2015. Broadband subscriptions increased to 18.1 per cent in 2015 from 10.9 per cent in 2014.

¹ Include operators offering fixed, mobile and satellite telecommunication activities

² Include Application Service Providers (ASPs)

Newspaper Circulation and Online Newspaper Readership

15.23. In 2015, the circulation of daily English and Kiswahili newspapers continued to decline due to online readership of newspaper as presented in Table 15.13. The English and Kiswahili daily circulations declined by 3.4 per cent and 10.2 per cent, respectively. Similarly, the number of weekly English newspapers in circulation decreased by 5.8 per cent over same period. However, the average online users went up by 53.7 per cent in 2015.

Chapter 16

Governance

n 2015, the Judiciary implemented a number of institutional changes aimed at improving delivery of justice. This included recruitment of more judicial officers, opening up of new court stations and launching the Magistrates and Kadhis Courts Registry Manual. The registry manual is intended to improve registry staff performance to facilitate effective and efficient service delivery. In the review period, the number of judicial officers (Kadhis, Magistrates and Puisne Judges) increased by 43 corresponding to an increase of 6.9 per cent. The growth of pending cases in 2015 significantly slowed to 13.6 per cent compared to 30.3 per cent in 2014.

- 16.2. During the review period, the Police continued to implement the Police Service modernization programme. This involved procurement of police armoured vehicles and operation of the Incidents Command Centre (IC3) in Nairobi and its environs, and Mombasa. Consequently, additional police officers were recruited during this period.
- 16.3. The number of crimes reported to the Police in 2015 was 72,490 compared to 69,376 in 2014. A significant increase in the number of crimes reported to the Police was observed among offences involving police officers (34.0 per cent) and traffic offences (20.0 per cent).
- 16.4. The number of persons reported to have committed offences stood at 31,695 in 2015, 8.3 per cent lower than reported in 2014, with males accounting for 80.3 per cent. During this period, persons reported to have committed assault, creating disturbance and defilement stood at 14,529, 5,528 and 4,107, respectively. The prison population declined by 10.6 per cent to 221,974 in 2015, partly attributed to continued implementation of policies to decongest the prisons.
- 16.5. The number of cases handled by the Ethics and Anti-Corruption Commission in 2014/15 was 5,551. During this period, public assets worth KSh 3.9 billion were traced while assets valued at KSh 140 million were recovered by the EACC.

Public 16.6. Table 16.1 shows the number of crimes reported to the police from 2011 to 2015. The Safety, total number of crimes reported stood at 72,490 in 2015, compared to 69,376 in 2014. The Law and highest increase in the number of crimes reported was in other offences against persons, which Order rose by 1,263 to 21,174 crimes in 2015. This was followed by offences against morality which grew by 980 to 6,164.

16.7. The number of crimes reported to the Police by command stations for 2014 to 2015 is provided in Table 16.2. In 2015, the highest crimes reported were in Kiambu (4,768), Nakuru (4,384), Nairobi City (4,383), Meru (4,215) and Mombasa (3,194). The highest increase in the number of crimes reported were in Meru (2,244), Kitui (851), Machakos (723) and Bungoma (702). The highest declines were recorded in Nairobi, Kirinyaga and Elgeyo Marakwet respectively.

16.9. Table 16.4 shows the number of persons reported to the police to have committed offences by sex and county for 2014 to 2015. Overall, the proportion of female offenders was higher in 2015 (19.7 per cent) than in 2014 (16.4 per cent). In 2015, counties that reported a high number of female offenders were Nyeri, Meru and Kirinyaga at 34.8, 31.0 and 30.4 per cent respectively. Counties with a low female offenders were Isiolo, Mandera, Garissa and Turkana.

^{*} Provisional

¹ Means non pharmaceutical harmful and outlawed susbstances. 705 tablets of psychostrophic susbstances (Rohypnol) were also seized in 2015. This quantity is not included in the 4,420 Kg reported because weight of the tablets was not ascertained

Note: The number of persons reported to have committed offences may differ with that of crimes reported to the Police (Table 16.1) because a person may commit more than one crime or a crime may be committed by more than one person.

16.10. Table 16.5 gives the number of persons reported to have committed offences against morality and other offences against persons by sex from 2011 to 2015. The number of persons who committed offences against morality and other offences against persons stood at 26,250 in 2015. This was 8.0 per cent lower than the 28,525 reported in 2014. However, the number of persons reported to have committed offences against morality was 5,700 in 2015, 6.1 per cent higher than that reported in 2014. Further, the number of persons who committed offences against persons in 2015 was 20,550 compared to 23,125 reported in 2014. Defilement accounted for 72.1 per cent of all offences against morality, while assault accounted for 70.7 per cent of other offences against persons during the review period. For all reported offences, the number of males was higher than that of females.

Note: The number of persons reported to have committed offences may differ with that of crimes reported to the Police (Table 16.1) because a person may commit more than one crime

16.11. Table 16.6 shows the number of persons reported to have committed homicide by sex from 2011 to 2015. The number of persons who were reported to have committed homicide offences was 2,047 in 2015, 7.6 per cent lower than that reported in 2014. However, the number of persons reported to have either committed manslaughter or caused death by dangerous driving in 2015 was higher than that reported in 2014. In 2015, the number of males and females reported to have committed homicide stood at 1,625 and 422 compared to 1,759 and 444 in 2014, respectively. Murder, causing death by dangerous driving and suicide accounted for 66.2, 14.0 and 10.8 per cent of the total cases of homicide, respectively.

Note: The number of persons reported to have committed offences may differ with that of crimes reported to the Police (Table 16.1) because a person may commit more than one crime or a crime may be committed by more than one person.

16.12. The number of persons reported to have committed robbery and theft from 2011 to 2015 are shown in Table 16.7. The number of persons reported to have committed robbery and theft was 22,869 in 2015, 10.9 per cent lower than was reported in 2014. During the period under review, cases of theft of motor vehicles and other vehicle related theft stood at 922, and was 20.8 per cent lower than in 2014. Further, reported cases on robbery were also lower by 17.2 per cent during this period compared to those reported in 2014. Reported cases of stealing were the highest in 2015 just as was the case in 2014. Females accounted for 16.2 per cent of all persons reported to have committed robbery and theft in 2015. The highest number of females (1,847) who were reported to have committed robbery and theft, were in the stealing category, followed by theft by servant category (667). During the same period, majority of the males who were reported to have committed theft and robbery were in the stealing category (7,346) and breakings category (5,326).

Note: The number of persons reported to have committed offences may differ with that of crimes reported to the Police (Table 16.1) because a person may commit more than one crime or a crime may be committed by more than one person. 16.13. Persons reported to have committed offences related to drugs, criminal damage, economic crimes and corruption by sex for the period 2011 to 2015 are shown in Table 16.8. In 2015, the number of offences reported (12,206) were 5.3 per cent lower than those reported in 2014. Dangerous drugs and criminal damage jointly accounted for 72.5 per cent of all reported offences in 2015. The proportion of female offenders in 2015 was 20.7 per cent compared to 18.4 per cent in 2014. The number of females reported to have involved in economic crimes was 831 in 2015, lower than the 913 reported in 2014. On the other hand, the number of females engaged in criminal damage was 893 and was higher than the 878 reported in 2014. The number of offences reported against police officers involved in crime was 118 in 2015 compared to 146 in 2014. The number of corruption cases reported in 2015 was 331, more than three times that reported in 2014.

Note: The number of persons reported to have committed offences may differ with that of crimes reported to the Police (Table 16.1) because a person may commit more than one crime or a crime may be committed by more than one person.

Ethics and 16.14. Table 16.9a shows the number of corruption cases handled by the Ethics and Anti-**Corruption** Corruption Commission (EACC) for the period 2010/11 to 2014/15. The number of cases handled in 2014/15 stood at 5,551 compared to 4,013 in 2013/14. Among the cases handled by EACC in 2015, close to 50 per cent of the cases were recommended for investigations, while 30.1 per cent were advised on the right authority to report to. Terminated cases in 2014/15 were 395, more than double those terminated in 2013/14 and constituted 7.1 per cent of all cases handled by EACC in the review period.

Judiciary 16.19. The number of cases filed, disposed of, and pending for the period 2011 to 2015 are given in Table 16.12. The number of new cases filed were 330,553 in 2015 compared to 500,349 in 2014. The same period recorded a reduction in the number of cases arbitrated and disposed of, to stand at 247,743. The Supreme Court disposed of 62 cases in 2015 compared to 53 in 2014, while the court of appeal disposed of 1,785 in 2015 compared to 368 in 2014. On the other hand, the magistrates' courts disposed of fewer cases (201,439) in 2015 than (318,225) in 2014.

16.20. The number of judicial officers by cadre and practicing lawyers for the period 2011 to 2015 are shown in Table 16.13. The number of judicial officers increased by 43 to 666 in 2015 with female officers constituting 42.3 per cent. The increase was recorded in the magistrate cadre, with the number of Kadhis increasing from 35 in 2014 to 56 in 2015. The High Court Judges increased by eight, during the same period while that of court of Appeal and Supreme judges remained the same. During the period under review, the number of practicing lawyers declined by 5.9 per cent to 6,775. This was attributed to suspensions and de-registration of some lawyers by the Law society among other factors.

16.22. Table 16.15 presents the daily average population of prisoners by sex from 2011 to 2015. The daily average population of prisoners decreased slightly by 1.2 per cent to 54,631 in 2015. The daily average convicted population declined by 5.5 from 32,686 in 2014 to 30,886 in 2015. The decline is partly attributed to continued implementation of non-custodial policy by the judiciary to decongest the prisons. Daily average remanded population however increased by 5.1 per cent to 23,745 in 2015. During the review period, the daily average remanded female and male prisoners increased by 17.6 per cent and 4.1 per cent to 1,985 and 21,760, respectively.

16.24. Table 16.17 presents convicted prisoners by type of offence and sex for 2011 to 2015. Most convictions were mainly offences under the Liqour Act (30.5 per cent) with over half of the total female convicts falling under this category. The persons convicted under Employment Act increased by 28.6 per cent to 6,104 in 2015. There was a huge decline in the number of convicts for crime involving registration of persons, which reduced to 448 in 2015 from 4,817 in 2014.

Police, Prison and Probation Personnel

16.25. The number of serving Police, Prison and Probation officers from 2011 to 2015 are shown in Table 16.18. The number of police officers increased by 9.3 per cent to 42,853 in 2015, with the female officers increasing by 31.1 per cent to 6,668 in 2015. During the same period, the number of probation officers increased by 6.4 per cent to 579. The number of female probation officers increased to 258 while that of males rose to 321. Number of male prison officers however, declined from 19,587 in 2014 to 19,389 in 2015. Prison officers taking care of the juveniles increased to 321 in 2015.

Aftercare

Probation 16.26. Non-custodial sentences have continued to be implemented to alleviate congestion in government prisons and ease correction of offenders committing serious crimes. These sentences include probation, community service orders and aftercare service. Table 16.19 shows the number of offenders serving probation sentence, community service and aftercare by sex and type of offence from 2014 to 2015. A total of 58,003 offenders served probation, community service orders and aftercare service in 2015 representing an increase of 23.3 per cent. About three quarters of the offenders were committed to serve community service orders. Most offenders placed under probation had engaged in offences involving general stealing, dangerous drugs, assault and other offences against persons.

Immigration 16.27. Table 16.20 shows the number of passports and work permits issued, and foreign nationals registered for the period 2011 to 2015. The number of passports issued stood at 151,589 in 2015, 17.2 per cent lower than those issued in 2014. The number of foreign nationals registered were 25,091 in 2015, 12.4 per cent higher than those registered in 2014. Foreign nationals issued with work permits during the year under review were 7,683 compared to 10,540 in 2014, while work permits renewed in 2015 were 11,125.

16.28. Kenyan citizens who attain 18 year are required by law to avail themselves for registration and issuance of national identity cards by the National Registration Bureau. Table 16.21 shows the number of applications made by persons not previously registered, the number of cards produced and collected in the period 2012 to 2015 by County. The number of new applications made increased by 22.1 per cent from 913,087 in 2014 to 1,115,081 in 2015. New applications increased significantly in Mandera, Wajir, Lamu, Vihiga and Nandi while Laikipia and Taita Taveta experienced a decline. New ID cards produced in 2015 were 816,477 compared to 738,064 in 2014. In 2015, a total of 764,445 identity cards were collected, compared to 709,573 in 2014.

16.29. Out of the new Identity Card applications made in 2015, about 73 per cent were processed. The proportion of identity cards collected relative to applications processed was highest in Lamu, Nandi and Nakuru. On the other hand, Kericho, Meru and Tana River recorded the lowest rate for identity cards collected relative to applications processed.

Registration 16.30. Table 16.22 presents the number of registered voters by county and sex as at of Voters December 2015. The proportion of registered voters to total eligible population stood at 62.6 per cent nationally. However there were variations in the proportion of registered voters to total eligible population across counties. Lamu registered the highest with 79.9 per cent, followed by Kiambu 77.3 per cent, and Murang'a and Nyeri at 74.3 per cent each. Turkana, Mandera and West Pokot had the lowest proportion of registered voters to total eligible population at 26.7, 36.7 and 44.9 per cent, respectively.

Refugees 16.31. Table 16.23 shows the number of refugees in the country by age and sex from 2012 $in\ Kenya$ to 2015. The registered refugee population remained stable both in size and composition. In 2015, total number of refugees stood at 593,881, a 1.5 per cent increase from the 2014 levels. The proportion of male refugees was 52.3 per cent in 2015 compared to 50.8 per cent in 2014. In 2015, the proportion of children refugees was 55.8 per cent compared to 56.2 per cent in 2014.

Appendix 16.2: Description of Offences

Treason, incitement to mutiny, aiding civil disobedience
Stealing government property, stealing by person in public service, stealing from state corporation
Assault, grievous harm, murder etc
Theft, robbery with violence, arson
Attempts to commit offences, neglect to prevent offence, conspiracies to commit offences
Employment of aliens without permit
Possession, manufacture, trafficking etc of any quantity
By-laws under the Llocal Government Act, Traffict Act, Tax Act etc

Chapter 17

Highlights of FinAccess Household Survey, 2016

The 2016 FinAccess Household Survey is the fourth in a series of surveys that measure the financial inclusion landscape (access, usage, quality and impact) in Kenya. The survey was conducted in 2015 and the report launched in early 2016. The 2006, baseline survey and the subsequent surveys of 2009 and 2013, have shown that Kenya has made significant progress in fostering financial inclusion, with the latest survey providing a ten year perspective on Kenya's financial landscape. The 2015FinAccess Household Survey was jointly conducted by the Central Bank of Kenya (CBK), Kenya National Bureau of Statistics (KNBS) and Financial Sector Deepening Kenya (FSD Kenya) between August and October 2015. The findings from the survey showed that Kenya has made significant progress in fostering financial inclusion over the past decade. Following the growth in access and usage of financial services across the financial sector, Kenya's progress in formal financial inclusion has made it a leader across the continent, after South Africa, but considerably above countries in the East African Community (EAC) region.

Objectives 17.2. The overall objective of the FinAccess survey is to measure and provide better of the understanding of the financial inclusion landscape in Kenya and monitor progress overtime survey under the Kenya Vision 2030 Medium Term Plan (MTP) targets for the financial sector. The specific objectives of the survey were to: provide information to policymakers about the main barriers to financial inclusion; provide information to the private sector about market opportunities in the financial sector; track progress and evaluate the effect of various government and donor led initiatives in the financial sector; and provide data for use in research into the impact of enhanced financial inclusion and innovations on growth and poverty reduction.

Survey 17.3. The survey sample was designed to achieve a statistically valid, nationally representative **Methodology** sample of individuals aged 16 years and above. The sample was drawn using the KNBS National Sample Surveys and Evaluation Programme (NASSEP V) sampling frame. The sample was allocated to sub-domains using the probability proportional to size (PPS) method. The target sample size for the survey was 10,008 households.

> 17.4. The sample was distributed to known sub-regions based on similarities in the key geographic, demographic and economic indicators. The 13 sub-regions are shown in Figure 17.1. They are; North Rift, Central Rift, South Rift, Nyanza, Western, Central, Lower Eastern, Middle Eastern, Upper Eastern, Coastal, North Eastern, Nairobi and Mombasa.

Figure 17.1: Sub-regional distribution of the sample

	Sub region	Counties			
1	North Rift region	Turkana, Samburu and West Pokot			
2	Central Rift region	TransNzoia, Uasin Gishu, Elgeyt Marakwet, Laikipia, Nakuru and Nandi			
3	South Rift region	Kajiado, Narok, Bornet, Kericho			
4	Nyanza region	Kisumu, Siaya, Migori, Homa Bay Kisii, Nyamira			
5	Western region	Kakamega, Vihiga, Bungoma, Busia			
6	Central region	Nyandarua, Nyeri, Kirinyaga, Murang'a Kiambu			
7	Lower Emtern region	Kitui, Machakus, Makueni			
8	Upper Emtern region	Marsabit, Isiolo			
9	Middle Eastern region	Meru, Tharaka Nithi, Embu			
10	Coastal region	Tana River, Lamo, Taita Taveta Kwale, Kilifi			
11	North Eastern region	Garissa, Wajir, Mandera			
12	Nairobi	Nairobi			
13	Mombasa	Membasa			

Response 17.5. There were 8,665 interviews successfully completed, representing an 87 per cent response Rate rate. Some regions had better success rates than others due to challenges such as insecurity, rough terrain and the difficulty in locating interviewees' especially nomadic pastoralists.

Access strands to finance

Key 17.6. The access strand classifies users according to the most formal financial service provider survey that they used during the review period. Formal providers included banks, Savings and Credit findings Co-operative (SACCO), mobile phone financial service providers (MFSs) and insurance, among other providers. Respondents who used at least one formal service provider were classified as formally included. Respondents who did not use any formal provider, but used at least one informal service provider (e.g. groups, chamas, shopkeeper credit, etc.) were classified as informally included. Respondents who did not use any formal or informal service providers were classified as financially excluded. The excluded population often relied on basic financial mechanisms such as saving in secret/hiding places or borrowing from a family member or a friend in case of need.

> 17.7. Kenya has made considerable progress in financial inclusion since 2006, as depicted in Figure 17.2. The survey findings showed that more than three-quarters of Kenyans are now formally included. Financial exclusion, which is now down to 17.4 per cent, has more than halved since 2006. Reliance on informal financial providers remains high but is increasingly combined with formal services providers such as banks, SACCOs and MFSs. The percentage of Kenyans relying solely on informal services providers have decreased from 32.1 per cent in 2006 to 7.2 per cent in 2015.

2015 75.3 17.4 7.2 2013 66.9 25.3 2.009 26.8 32.7 2006 0 20 40 60 80 100 ■ Formal ■ Informal ■ Excluded

Figure 17.2: Access strands between 2006 and 2015

Access strand by gender, age, and education 17.8. As indicated in Figure 17.3, the survey revealed that formal inclusion for men has risen steadily from 33.2 per cent in 2006 to 79.7 per cent in 2015, whereas for women, it has risen from 20.5 per cent in 2006 to 71.2 per cent in 2015. This has mainly been driven by the spread of Mobile Financial Services (MFSs) whereby the usage by men and women was 75.5 per cent and 67.5 per cent, respectively. Ultimately, this has lessened women's previous exclusive reliance on the use of informal financial services providers. However, women still have lower access to formal prudentially regulated service providers compared to men, such as, banks (46.8 per cent for men and 30.6 per cent for women) and insurance (29.8 per cent for men and 17.0 per cent for women). Reliance on groups is far more common among women (51.4 per cent) compared to men (30.9 per cent).

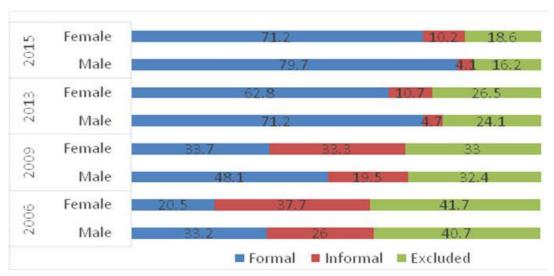

Figure 17.3: Access strand by gender between 2006 and 2015

17.9. The survey findings show that age plays an important role in financial inclusion. The oldest and youngest age groups (below 25 and above 55 years) are more likely to be excluded and less likely to have formal financial services than the middle band of the population (Figure 17.4). The survey revealed that 23.1 per cent of young adults aged 18 to 25 years are excluded compared to the national average of 17.4 per cent. Exclusion for the elderly population above 55 years is even higher at 28.4 per cent. Younger adults had higher adoption rates for MFSs and mobile banking technologies. Further, over 23 per cent of people aged 18 to 25 were actively using a mobile banking account against less than 4 per cent of the population above 55 years.

Formal inclusion was highest in the age band between 26 years and 35 years, at almost 82.6 per cent.

17.10. Formal inclusion is also related to the level of education. Almost all Kenyans (98.0 per cent) with tertiary education have access to a formal financial service provider as reflected in Figure 17.4, whereas only 37.3 per cent of adults with no education use formal financial service providers. Exclusion for Kenyans without formal schooling is extremely high, at 46.2 per cent, indicating that illiteracy is a significant barrier to financial inclusion.

Access strand by age group Access strand by education level 0.4 1.6 >55yrs Tertian 2.8 46-55yrs Secondary 8.6 36-45yrs Primary 26-35yrs None 18-25yrs ■ Informal ■ Excluded ■ Formal ■ Informal ■ Excluded

Figure 17.4: Access strands by age group and education level in 2015

Geographical 17.11. The survey findings showed that progress in the level of financial inclusion in Kenya over the last decade is not evenly distributed across the country. For instance, Nairobi, Central in financial region and Mombasa registered the highest levels of formal inclusion at 93.4, 87.4 and 86.8 per inclusion in cent, respectively. As shown in Figure 17.5, North Rift and North Eastern regions registered 2015 the lowest levels of financial inclusion at 46.8 per cent and 24.6 per cent, respectively. The Western region and the Coastal region were also below the national average of 75.3 per cent in formal financial inclusion.

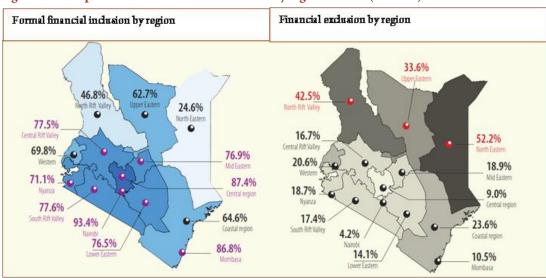

Figure 17.5: Map of formal inclusion and exclusion by region in 2015 (Per cent)

17.12. The analysis further showed that there exists a rural-urban gap in financial inclusion, which has grown over the last decade, as shown in Figure 17.6. The use of formal financial services in urban areas is higher than that of rural areas, mostly due to poor connectivity in some areas and lower level of infrastructural development. Further, the survey findings showed that financial exclusion has decreased in both urban and rural areas with a widening gap.

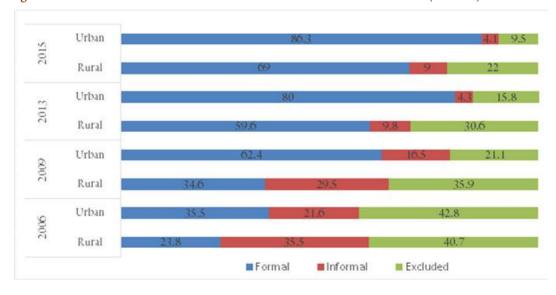

Figure 17.6: Access strands in rural versus urban areas between 2006 and 2015 (Per cent)

17.13. As shown in Figure 17.7, on average, over 90 per cent of the population is able to reach a financial service provider with less than KSh50. The survey data showed that almost all urban residents (97 per cent) can reach a financial service provider for less than KSh 50, while approximately 15 per cent of rural residents have to spend over KSh50. Hence, this adversely affects the total costs of conducting basic financial transactions such as depositing, withdrawing or transferring money.

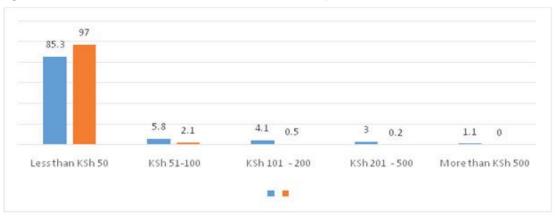

Figure 17.7: Cost to reach the nearest financial service access point in 2015

Usage of 17.14. The usage of financial services has increased across all types of providers and products, financial for both formal and informal services compared to a decade ago. It is estimated that usage services of formal services has increased from 25 per cent in 2006, to 75 per cent in 2015. Banks and groups are equally popular among users of financial services, with 8.1 million users and 8.7 million users, respectively, as depicted in Figures 17.8. The data also shows that nearly twice as many Kenyans use mobile financial services. Usage of insurance services, for both private and statutory insurance services, has increased with 4.9 million Kenyans using insurance services and 2.6 million Kenyans using pension schemes. There are considerable differences between men and women, with men having higher access to banks, insurance and Savings and Credit Co-operative (SACCOs), while women participate more often in groups such as Rotating Savings and Credit Association (ROSCAs) and Accumulating Savings and Credit Association(ASCAs).

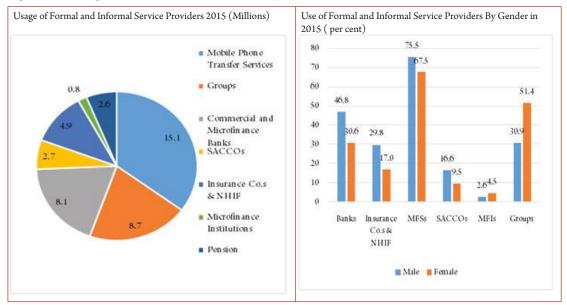

Figure 17.8: Usage of formal and informal service providers in 2015

17.15. There has been a positive trend in the access of all the financial service providers as shown in Figure 17.9. For instance, banks' penetration has increased steadily in the last 10 years from 14.0 per cent in 2006 to 38.4 percent in 2015, driven by expansion of banks and increased uptake of agency banking and mobile banking services. The most widely used financial service in Kenya are services from mobile phone financial service providers (MFSs), which is used by 71.4 per cent of the population, followed by groups such as ROSCAs and ASCAs at 41.4 per cent, in 2015. Uptake of insurance has grown to 23.2 per cent by the population in 2015 from 4.3 per cent in 2006. Growth in the insurance sector has been driven primarily by uptake of statutory health insurance from the National Hospital Insurance Fund (NHIF).

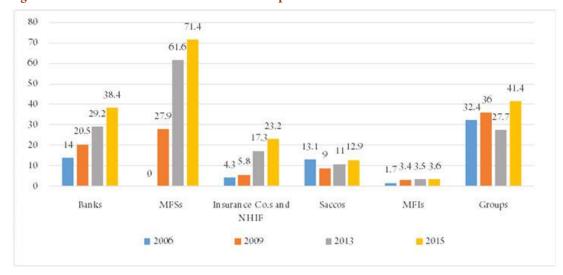

Figure 17.9: Access to formal and informal service providers between 2006 and 2015

17.16. Accessibility to formal financial services providers differs widely across different regions as shown in Table 17.1. Overall, accessibility is higher in the cities (Nairobi and Mombasa) and in the Central region, while it is substantially lower in the northern regions. However, the difference in access to specific financial service providers shows diverse patterns of financial sector development in the country. For instance, there is huge disparity in access and usage of services from mobile phone financial service providers between Nairobi (91.6 per cent) and the North Eastern region (22.6 per cent). Usage of SACCOs is highest in the Central region (25.0 per cent), while it is virtually non-existent in North Eastern (0.7 per cent). On the other hand, Mombasa and the Coastal region reported the highest usage of microfinance services at 6.6 per cent and 5.9 per cent, respectively, considerably above the national average 3.6, while usage of microfinance services in the Central region is below the national average at only 3.0 per cent. Usage of insurance services is relatively high in Nairobi, Mombasa, Central Region and South Rift, while it is lowest in the North Eastern region. Similar patterns are observed in access to private and statutory pension services.

Access to 17.17. The analysis showed that usage of formal credit has grown across most types of formal and providers over the last 10 years, as presented in Table 17.2. Banks are the most widespread informal source of formal credit at 9.5 per cent, with mobile banking loans penetration at 5.9 per cent **credit** while SACCOs are the second most used source of formal credit at 5.0 per cent.

> 17.18. Informal credit markets continue to play a prominent role in Kenya, particularly, for the poor and low-income segments and those without regular income. Shopkeeper credit and loans from family and friends have experienced mixed trends in the last decade, but they are still the most widely used, accounting for 9.9 per cent and 6.6 per cent, respectively. While family and shopkeepers were of major significance in 2006 and 2009, they were much less important, thereafter. On the other hand, Mobile Financial Services (MFSs) were only introduced in 2007, and the adoption rate was still low in 2009. Besides bank loans being the counterpart of MFSs, also reflects the special expansion of banking industry footprint (including agency banking). Employer loans have grown remarkably as well, being used by 5.1 per cent of adults in 2015 compared to 0.9 per cent in 2006.

Table 17.2: Access to formal and informal credit between 2006 and 2015

				Per cent
Source of credit	2006	2009	2013	2015
Bank Loans (personal, overdraft, mobile bank account loans *)	1.9	2.7	3.9	9.5
Credit Card	0.8	0.8	1.8	1.2
SACCO Loan	4.2	3.1	4	5

17.19. The survey results further established that access to credit is closely related to the type of employment and livelihood sources. Overall, salaried employees have the highest access to credit (52 per cent), followed by entrepreneurs (40.4 per cent) and agriculture (30.9 per cent), as reflected in Figure 17.10. The lowest is registered by dependents and casual labourers at 27.3 per cent and 28.3 per cent, respectively. Regular salaried persons have the highest access to formal credit sources, with 29.8 per cent against 7.0 per cent of adults in agriculture, and 5.9 per cent of adults in casual labour. On the other hand, informal sources of credit are the most widely used across different types of livelihoods, including agriculture, entrepreneurs, casual workers and dependents.

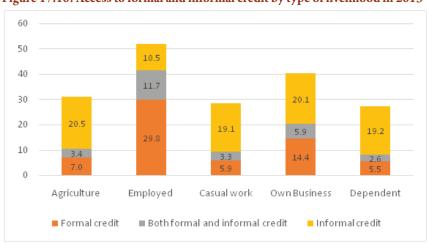

Figure 17.10: Access to formal and informal credit by type of livelihood in 2015

17.20. The number of Kenyans using at least one formal or informal saving/deposit instrument has increased since 2013 as presented in Table 17.3. Growth in usage of saving instruments has been driven by services from mobile phone financial service providers. Groups such as ASCAs and ROSCAs have increased considerably especially among the poor and low-income segments of the population. A significant proportion of the population prefers to save in a secret place and ROSCAs.

Table 17.3: Usage of saving instruments between 2006 and 2015

				Per cent
	2006	2009	2013	2015
Postbank Account	5.6	2.5	2.3	1.5

Usage of 17.21. The FinAccess 2015 survey results show that Kenya is primarily a cash-based economy, formal and as depicted in Figure 17.11. With the exception of adults in salaried employment, over 50 informal per cent of whom receive their money digitally, all other types of livelihoods are paid in cash.

About 95 per cent of entrepreneurs and casual labourers are paid in cash. The same applies to 93 per cent of farmers and farm workers.

landscape

The 17.22. The survey findings shows that the usage of services from mobile phone financial payments service providers has grown remarkably in recent years, and it is increasingly being used for payments beyond the person-to-person transfers. While the dominant use of mobile phone financial service providers are still for interpersonal transfers, 20.2 per cent of Kenyans in 2015 use it to pay for goods, services and bills, and 23.4 per cent use it for business related payments like paying suppliers, employees and receiving payments from customers, as shown in Figure 17.12. In 2015, almost 59 per cent of Kenyans, also use services from mobile phone financial service providers to save or keep money aside, compared to 41.2 per cent in 2013.
